Consideration of the long-term FIP interpretation raises important questions about how SIPs should be treated in similar circumstances: where the Act's firm deadline is past; Congress has failed to provide the relief it expected to provide; and short-term attainment is impossible. Even if one decided that Interpretations 1 or 2 would be most appropriate for determining post-1987 deadlines for SIPs, one might still argue that longer deadlines are permissible for FIPs. Where SIPs are concerned, the legislative history shows that Congress explicitly contemplated that, at least prior to 1987, short term deadlines would apply. The history arguably reveals a Congressional understanding that, if these deadlines proved too harsh to meet, the major consequence would be the imposition of a construction ban, a result that Congress addressed and did not find absurd. But the statute does not provide that the construction ban can be imposed as an alternative to writing the required FIP, and the legislative history demonstrates that the promulgation of a short-term FIP for an area like the South Coast—either before or after 1987—received no attention when Congress amended the law in 1977.

But one might also conclude that the better approach is one that treats SIPs and FIPs equally. That is, if impossibility, absurd results, and the failure of Part D to operate as anticipated, suggest that it would be an *unreasonable* accommodation of the Act's purposes for EPA to prepare a near-term FIP, a state, too, should be relieved of the burden of preparing and enforcing a near-term SIP.

In EPA's proposed ozone strategy, the Agency suggested a rationale for requiring SIPs to demonstrate attainment within three to five years. 52 FR 45050 (November 24, 1987). A variant of that suggestion would be to apply the three-to-five year date as a general rule,

[19] A description of the types of measures that a five-year FIP would include appears in Appendix A to this Notice.

[20] This formulation corresponds to the goals set forth in sections 110 and 172 of the Act.

but to exempt states from that requirement where they can make the same kind of showing that Interpretation 3 argues would relieve EPA of its duty to prepare a short-term FIP. Under this approach, in circumstances where either SIP or FIP attainment within a three- to five-year period would be impossible or lead to absurd results, EPA would rely on the statutory requirement that attainment occur "as expeditiously as practicable" to derive a fixed attainment date and to identify reasonable further progress. Sections 110(a)(2)(a) and 172(a)(1). A final ozone policy would identify what reasonable further progress would mean under these circumstances. A state that made the proper showings of impossibility or absurd results, and submitted a SIP that met all the elements of the ozone policy, could then obtain EPA's full approval for its SIP, even if the attainment date extended beyond five years.[21] Even if EPA were unable to fully approve such a state plan, it is not clear that the courts would demand that EPA impose a FIP in such circumstances. If EPA reasonably concluded that the SIP measures were as stringent as any plan EPA could justifiably issue, there would no point in having EPA issue a FIP, since the FIP would merely duplicate the SIP.

The main objection to the longer-term FIP approach is that, like Interpretation 2, it makes EPA, instead of Congress, the dispenser of relief from statutory deadlines. Arguably, under the Clean Air Act only Congress is authorized to make this kind of choice.[22]

Conclusion

EPA here finds itself confronted by a most painful dilemma—one that clearly needs a Congressional solution. Absent action by Congress, however, EPA must do its best to achieve a result most consistent with the language, history, and purposes of the Clean Air Act.

If EPA interprets the Act to permit a FIP attainment deadline significantly beyond 1987, it may stretch the boundaries of the statute in an unprecedented way, and arguably assume legislative-type authority to direct the pace of technological, economic, and environmental change in the South Coast. The scope of any plan attempting to address the pollution problem in the South Coast must be equal to the enormity of that problem. Should EPA determine to prepare a long-term FIP for the South Coast, it would no doubt encounter great practical difficulties in developing and implementing such a massive plan.

But EPA would also face serious legal and practical problems if it undertook a plan requiring immediate and short-term attainment. The immediate and short-term FIP interpretations are arguably more in keeping with the original lapsed deadline, and with Congress' expressions of intent to be the provider of relief if deadlines proved too harsh. But these interpretations, if imposed here, would wreak a level of economic and social disruption that is likely beyond anything Congress would have imagined would be imposed without some mitigation.

Thus, there appears to be no easy solution to the problem before us. EPA solicits comments on the questions raised in this Notice, and on the approaches EPA might take to preparing a FIP for the South Coast.[23]

Dated: November 28, 1988.

Lee M. Thomas,

Administrator.

Appendix A—Description of Five-Year and Longer-Term FIPs

This Appendix first explores likely components of a five-year FIP. It then describes possible elements of a longer-term FIP. The discussion of the five-year FIP focuses on drastic prohibitions that would be required on transportation, industrial processes, and consumer products, as well as out-of-Basin effects of refinery shutdowns, and other secondary effects throughout the country. The discussion of the long-term FIP considers several approaches to promulgating and implementing a longer-term FIP, perhaps in combination with the current South Coast planning process. EPA solicits comments on these possible approaches.

A. Five-Year Federal Implementation Plan

SCAQMD and SCAG estimate that the South Coast must reduce VOC emissions by 80 to 90 percent to attain the ozone standard. A five-year attainment plan for the South Coast, however, leaves little room for choice among measures, insufficient lead time for the development of the necessary technologies, and hence no opportunity to minimize the most severe social and economic impacts.

1. Likely Measures

To achieve the extraordinary emissions reductions necessary for attainment in the Basin within five years, any plan for the area must wrest substantial reductions from every controllable source of emissions. Such a plan must include restrictions and prohibitions that effectively prevent from operating within the Basin, in the fifth year, almost all reactive hydrocarbon-based fuel-powered vehicles; eliminate almost all aircraft and marine vessels from the Basin; prohibit almost every industrial source from emitting any VOCs; dramatically reduce VOC emissions from commercial and residential solvents and fuel combustion; and substantially limit agricultural VOC emissions.

Assuming that attainment of the ozone standard requires an 80 to 90 percent reduction in VOC emissions, and using the draft SIP's 1985 base year emissions inventory, the following list of possible federal prohibitions gives a partial example of a FIP that could bring the area into attainment of the ozone standard. The fuel limitations applying in the ozone FIP to the mobile source category should also reduce total CO emissions to a level where attainment of the CO NAAQS throughout the Basin would be achieved. The list set out below represents one possible combination of control measures with sufficient cumulative emissions reductions to attain the ozone and CO NAAQS. Such a potential FIP would achieve the required emissions level by applying, in general, an across-the-board reduction to all controllable source categories.

Full implementation of the FIP might be suspended until the fifth year unless EPA determines that: (1) Inadequate progress is occuring under the SIP, or (2) earlier implementation of particular FIP measures is necessary, as a practical matter, in order to ensure that all needed emissions reductions are achieved by the end of the fifth year.

The FIP would apply within the Counties of Orange, Los Angeles, San Bernardino, and Riverside (alternatively, only within the nonattainment portion of the counties) and within coastal waters extending 3 miles from the onshore county boundaries. The entire Basin must demonstrate attainment at the end of the the fifth year.

---

[21] Under this rationale, an attainment deadline of three-five years would be derived from the text of section 110(a)(2)(A) and by analogy from Part D; EPA would, however, read the Act as implicitly authorizing a long-term deadline where compliance with that statutory deadline would be impossible or would produce absurd results. There is, however, another possible rationale for a long-term attainment deadline in this circumstance. EPA could conclude that the Clean Air Act contains no uniform, nationwide deadline applicable now to the South Coast and to the other areas that failed to attain the ozone or CO NAAQS by December 31, 1987. EPA would reason that the attainment deadlines in Part D (1982 or 1987 for an area with extreme nonattainment) applied only to the SIP revisions for which Congress also specified the submittal deadlines (respectively, 1979 and 1982); that Part D does not authorize EPA to set a nationwide attainment deadline after 1987; and that section 110's deadline of three-five years applies not to a plan revision developed after a SIP call or disapproval, but only to the initial SIP following NAAQS promulgation (or NAAQS revision). Under this rationale, a long-term deadline in the South Coast would satisfy the residual mandates, in sections 110 and 172, that attainment occur by a fixed date that is set, given local circumstances, so as to provide for such attainment "as expeditiously as practicable."

[22] Under the rationale for Interpretation 3 set forth in fn. 21, however, EPA would make this legislative choice for the South Coast under its express authority to require or prepare plan revisions that provide for attainment as expeditiously as practicable. The FIP would not override any nationwide deadline since, under this rationale, those deadlines specified in the Act have expired or are inapplicable in this circumstance.

[23] EPA has included at the end of today's notice Appendix A, describing different FIP approaches, and Appendix B, a Technical Appendix describing other issues that the Agency must face in creating a FIP for the South Coast. The Agency solicits comment on these Appendices as well.

The overwhelming impacts of a five-year plan might be somewhat lessened by phasing in implementation over the five-year period. For example, a phased five-year approach could progressively eliminate motor vehicle use of reactive hydrocarbon-based fuels in the Basin, such as at a rate of 20 percent per year. A modest degree of prohibition on products, activities, and fuels might stimulate public awareness of, and committment to, less polluting options. Measures such as a prohibition on multiple car registration, a requirement for no drive days, and mandatory ridesharing at a more stringent level than currently required by the SCAQMD might foster some incremental adjustments in vehicle dependency, by stimulating the development of additional commute alternatives, the elimination of unnecessary vehicle use, and the relocation of jobs and housing. However, EPA does not expect that such adjustments could allow the great majority of residents of the Basin to cope with the ultimate fifth-year prohibition on essentially every form of private vehicle use, combined with the effective elimination of most industrial and commercial opportunities for employment in the Basin.

• *Fuel restriction for motor vehicles:* The FIP would prevent the sale or use of any reactive hydrocarbon-based fuel in all classes of on-road motor vehicles, with the exception of certain vehicles and specified vehicle uses determined to be essential to the public interest. Depending on the emissions still remaining from the motor vehicle category as a result of allowing this exemption, the FIP might need to require exclusive use in the exempted vehicles of such low-emitting fuels as methanol, propane, compressed natural gas, or liquified natural gas in lieu of high-emitting fuels such as gasoline or diesel fuel. Since substantial emissions occur from motor vehicle traffic into the South Coast, the FIP restriction would need to prohibit this traffic from entering the area.

• *Fuel restriction for other mobile sources:* All other mobile sources (such as farm and non-farm equipment; boats and vessels; commercial and civic aircraft; and railroads) would be prohibited from using any fossil fuel, unless the source fell into an exempt category, because it was vital to the public interest.

• *Fuel restriction:* The FIP would prevent the manufacture, transport, storage, sale, use, and disposal of any reactive hydrocarbon based fuel within the basin, unless exempted as essential to the public interest. The restriction would effectively prohibit refining, storage, and transportation of liquid and gaseous fossil fuels, and combustion of solid, liquid, and gaseous fossil fuels and resource recovery derived fuels.

• *Industrial and Commercial Solvent and Lubricant restriction:* the FIP would prevent the manufacture, transport, storage, sale, use, and disposal of any reactive hydrocarbon based solvent, lubricant degreaser, surface coating, ink, adhesive, fountain solution, thinner, retarder, filler, surfactant, and resin. (Again, a partial exemption for uses in the public interest might be allowed.)

• *Restriction on VOC emissions from manufacturing:* The FIP would prohibit almost all VOC emissions from manufacturing activities, unless EPA determined that attainment could be achieved through a less stringent requirement. The FIP restrictions probably would need to be sufficient to reduce total VOC emissions from all manufacturing facilities by as much as 90 percent from current SIP levels. Affected industries would include not only manufacturers of chemicals, pharmaceuticals, cosmetics, and rubber products, but also most small users of VOC-emitting raw materials.

• *Restriction on consumer product solvents and aerosol propellants:* The FIP would either prohibit all products with any VOC emissions or establish VOC limitations to achieve at least a 90 percent reduction from the level of existing VOC emissions. Consumer products affected by this prohibition would include: paints and related products; health and beauty products; automotive polishes and lubricants; cleaners and waxes; and household and garden pesticides.

• *Restriction on pesticides and herbicides:* The FIP would establish VOC limitations to achieve at least a 90 percent reduction from the level of existing VOC emissions.

Unfortunately, the full range of measures in the South Coast plan are clearly not available in a five-year plan because of the time needed to develop or implement many of those measures. In order to accomplish attainment within five years, any control plan would drastically alter the life of everyone in the Basin. Indeed, a five year attainment plan would eliminate practically any possibility of economic survival for most residents within the Basin, either because of the disappearance of jobs from the Basin or the inaccessibility of jobs to workers living within the Basin.

Typical, everyday life in the Basin generally consists of homelife, including recreational activities, time at work, and time traveling. Every aspect of a person's life would be changed dramatically by a five year plan. The following discussion will allow the reader to more clearly envision the sort of changes that will be necessary.

a. *Transportation.* As described previously, a significant portion of the basin's ozone problem, and essentially all of its CO problem, are due to mobile sources. Under a five-year plan, emissions from almost all vehicles must be eliminated by the fifth year in order to achieve the needed reductions from this emissions category. EPA believes that it is necessary and appropriate to exempt from these restrictions, at least partially, certain classes of vehicles, such as mass transit buses, trains, and vans; police cars; emergency response vehicles; fire engines; garbage collection trucks; and delivery trucks of food and medical supplies.

Any exemption for these vehicles, however, places an even greater reduction burden on other sources of vehicular emissions. The only way to realize such a reduction would be to prohibit entirely the use of all non-essential pollutant-emitting vehicles, since even vehicles burning relatively clean fuels, such as methanol, propane, compressed natural gas, or liquid natural gas, could cumulatively emit enough emissions of hydrocarbons, nitrogen oxides, and carbon monoxide to cause continued nonattainment.

A plan that eliminated from the area every privately-owned vehicle except those that are completely clean (i.e., electrified vehicles) would deny access to employment to all but those capable of working at home or commuting to work by mass transit, vanpool, electric vehicle, bicycle, or foot. Since the average home-to-work commute in the Basin is more than 20 miles round trip, it is reasonable to assume that only a small fraction of the current work force would have the ability (either for physical reasons or from critical time constraints) to commute by bicycle or foot. Furthermore, the opportunities to telecommute are not expected to increase dramatically within five years, though they may develop significantly over the next 20 years. All of those jobs heavily dependent upon the use of cars or trucks (including many of the services and trades) would be impossible to pursue, assuming that the FIP were unable to exempt or partially exempt these vehicles from the fuel restriction.

If the non-commute transportation modes of the residents of the South Coast were effectively limited by the FIP to mass transit, vanpool, bicycles, and foot, this severe restriction on mobility would drastically circumscribe most opportunities for shopping; health care; social, service and recreational activity; and general education and vocational training. Thus, the severely restricted transportation options of the five-year FIP would profoundly and comprehensively diminish the quality of life in the area. This restriction on the public's non-commute activities would contribute still further to the general economic decline of the area by its extreme impacts on service, recreational, and commercial enterprises.

If a five-year attainment FIP were promulgated, greatly expanded mass transit systems could not be reasonably anticipated, since the general economic decline of the area would, if anything, require cutbacks in public subsidies for transit operation and expansion. Expanded service would be particularly unlikely if the plan needed to prevent mass transit vehicles from burning high-emitting gasoline or diesel fuel. Even if these factors were absent, it is clear that significant expansions to urban mass transit systems require lead time for implementation beyond the five-year time frame.

Under any ozone attainment plan in the South Coast, electric vehicles ultimately may be the only feasible motorized alternative to a total dependence on mass transit. There is no evidence, however, that more than a small portion of public, private, or commercial transportation needs could be met by electric vehicles within a five-year time frame. This is due to the enormous costs of fleet conversion; the need to improve and perfect technologies; the lengthy construction period for developing electrified mass transit; the time requirements of vehicle manufacturers to redesign, retool, and produce significant numbers of electric vehicles; and the period required for the electric utilities to construct or purchase adequate electric power

generation and distribution systems to meet the radically increased demands for electricity.

A five-year plan would offer no realistic opportunity for clean transportation alternatives to aircraft, locomotives, marine vessels, and heavy duty diesel trucks. Since significant emissions reductions appear to be necessary from these transportation categories, elimination of most commerce is likely to result. For example, it is unlikely that the many industries dependent upon these transportation sources would be able to continue operation in the Basin.

The five-year FIP would have national and possibly global implications if it did eliminate these current means of transportation, since the Basin includes the most active commercial port area on the West Coast. In addition, air, truck, and rail transport into and through the Basin plays a critical role for industry, commerce, and communication in the Western United States.

b. *Industry.* Approximately a quarter of the Basin's VOC emissions comes from industrial and manufacturing facilities. Industrial sources of ozone precursors and CO include both manufacturing facilities that use solvents in their processes and other facilities, such as fossil-fuel fired boilers, turbines, internal combustion engines, and furnaces that emit ozone precursors and CO directly as a result of the combustion process, manufacturing, fabrication, or assembly. In a five-year time frame there is no viable technological or economic opportunity to eliminate emissions from many if not all of these facilities without effectively requiring shutdown. The draft South Coast plan contemplates the eventual elimination of combustion sources and an almost total replacement of solvent emissions. It envisions this change as taking place over 20 years through a process of forced technological advances (most prominently, in the area of solvent composition and use), expanded energy conservation projects, and almost total electrification of the area, with all generating capacity located outside of the basin.

In order to obtain the needed reductions from industry, a five-year plan must not only secure an 80 to 90 percent reduction in VOC emissions from existing industry, it must also prohibit economic growth of any kind. Remaining sources that are not currently operating at full capacity would be prohibited from increasing production, because, to do so, they would generate more emissions.

It would also be necessary to ban the use of reactive solvents in coatings, degreasing, and other uses or, at the least, apply restrictions that would achieve an additional 90% reduction in VOC emissions from industrial activities. The largest contributor to point source VOC emissions are of surface coating operations whose emissions come from the evaporation of the solvent contained in the coatings. In a five-year time frame it will not be possible for technology to totally replace solvent-based coatings; thus, it will be necessary to ban the use of coatings which cannot be changed. Major industries in the basin such as paint manufacturers, paint contractors, auto assembly plants, wood furniture manufacturers, can and coil coaters, paper coaters, printers, aerospace, and semiconductor and electronics will be forced to discontinue or drastically curtail operations, with the inevitable result of massive unemployment and the ripple effects of unemployment on the area's economy.

c. *Out-Basin Impacts of Refinery/Marine Terminal Shutdowns in the Basin.* Southern California is the largest petroleum refining and distribution area on the West Coast. Some of the refined petroleum products now produced in the Basin or produced elsewhere but imported into the Basin through Los Angeles harbor are subsequently exported to markets outside the Basin. Thus, federally required shutdowns of petroleum refining and trans shipping operations in the South Coast Air Basin would have severe effects not only in the Basin, but in other areas as well.

Virtually all of the gasoline, diesel fuel, jet fuel, and heating oil used in Yuma, Arizona; Las Vegas, Nevada; and the Imperial Valley of California is shipped from the Basin via the Southern Pacific Pipeline and the Calnev Pipeline. There are no refineries outside the Basin which can supply these landlocked markets via existing pipelines. A shutdown in the Basin would therefore require that new pipelines be built or that petroleum products be shipped by tank truck on public highways or by rail car, resulting in much higher transportation costs. Even if refineries in other areas could increase production to satisfy these markets (which fortunately are relatively small), prices to consumers would increase substantially.

A portion of the petroleum products used in San Diego, California, also are delivered via pipeline from producers and/or marine importers located in the basin. San Diego presently receives shipments via vessels as well, and these would presumably be increased at some cost for facility expansion.

A very serious situation would also develop in Phoenix and Tucson, Arizona and outlying areas that receive deliveries by tank truck from these cities. About two-thirds of the refined products used in or distributed from these two large and rapidly growing urban areas come from the South Coast Air Basin via pipeline. The remainder now comes via pipeline from El Paso, Texas but the capacity of this pipeline is too limited to supply the full demand. The four refiners with access to this pipeline (located in El Paso and Odessa, Texas and Artesia, New Mexico) may also lack sufficient processing capacity and/or crude oil supply to compensate for loss of product from Basin sources, even if transporting the additional volume to Phoenix and Tucson were not a problem.

Finally, a number of military air bases in California and Arizona rely on Basin sources for their supplies of jet fuel. Costs would increase and reliability of supply decrease if jet fuel had to be transported by tank truck from other refineries or ports.

d. *Consumer sources.* Almost a quarter of the VOC emissions in the Basin comes from the direct consumer use of certain products and related services. Products affected by a prohibition would include paints, primers, varnishes, lubricants and silicones, hair sprays, car polishes and waxes, room deodorants and disinfectants, moth control products, personal deodorants, auto antifreezes, brake cleaners, engine starting fluids, all purpose cleaners, floor waxes, insect repellants, starch and fabric finish, rug and upholstery cleaners, aftershaves, animal insecticides, shaving lathers, perfumes, spot removers, adhesives, insect sprays, caulking and sealing compounds, window cleaners, herbicides and fungicides, suntan lotions, and many other items.

Many of these products are also used by small businesses which provide consumer services, such as drycleaners, painting contractors, automotive and small engine repair shops, printers, barber and beauty shops, bakeries, exterminators, and home and office cleaning services.

In order to achieve the needed reductions from this category, a five-year FIP would have to impose nearly a total ban on the use of these products and related services. While a five-year time frame may be adequate to develop and market some technological alternatives, there would certainly be many products to which the public has become accustomed that would disappear with such a ban. The repercussions from this action would be far-ranging, affecting the consumer and the industries involved. It is unknown at this time whether alternative products can be found in the amount of time available.

A major exemption from this category would be hospitals, health care centers, nursing homes, schools, child day care centers and other facilities where high levels of cleanliness are required to protect the public health. Again, these exempted emissions would need to be offset by tighter restrictions on the remaining sources.

e. *"Multiplier Effect".* As the above consequences are encountered over five years, there will be "multiplier" effects. As industries, auto dealerships, service stations, and other enterprises close and are forced to lay off thousands of people, the companies and employees will try to relocate outside the Basin. The relocation costs will be enormous. The tax base of the Basin's jurisdictions will be depleted, so that those jurisdictions will be hard pressed to provide necessary services (police protection, water and sewer treatment, primary and secondary education, health and welfare benefits, etc.). Since the Basin will become an economically undesirable place in which to live, housing prices will drop dramatically, and most persons forced to leave the Basin will be unable to sell their houses or business, so they will suffer tremendous financial losses. The lending institutions will be unable to resell those properties after the borrowers default on their mortgages, so many of them will also be forced out of business. If these institutions or their depositors are rescued by Federal insurance agencies, the cost of doing so will be felt throughout the nation.

Recreational activities for those remaining Basin residents would be severely limited. Sporting events would be affected by the lack of transportation alternatives. Amusement parks, movie theaters, shopping malls, restaurants, and many other entertainment sources would be forced to close because patrons would be unable to drive to them as in the past. Many other weekend activities

would be eliminated as a result of prohibitions against private vehicle use.

National companies with offices or plants in the Basin may be economically affected so severely that they may go out of business altogether. This would cause a dramatic drain on the national economy from higher unemployment, higher prices, product shortages, and higher taxes to offset lost revenues.

Many other ripple effects may result which cannot be anticipated at this time. However, the above discussion provides a suggestion of the magnitude of impact a five-year FIP would have on the South Coast and the entire country.

B. Possible Approaches to Longer-Term FIP

In the body of this notice, EPA described the draft Air Quality Management Plan (AQMP) that the South Coast Air Quality Management District is developing. This plan contemplates attainment within roughly ten years for CO and twenty years for ozone. The following discussion describes the relative roles that the South Coast and EPA are capable of playing in producing an adequate plan, and how EPA might coordinate its FIP effort with the current South Coast planning process. EPA discusses three approaches it might take to meet its FIP obligation without undermining the state and local planning effort, but in fact building on those efforts. EPA specifically requests comments on all aspects of these options as well as identification of and comments on any other FIP options that EPA should consider.

Option 1: The "Reasonable Progress Backstop" Approach

This approach assumes that EPA's analysis of the South Coast plan as finally submitted as a SIP revision allows the Agency to conclude that the 1997 and 2007 deadlines in the proposed South Coast plan satisfy the "reasonable efforts" requirements of the Clean Air Act. It assumes further that the South Coast AQMP includes a schedule by which the State would submit various measures in legally binding form after the date by which EPA must promulgate its FIP. In that event, EPA could promulgate "backstop" FIP control measures which would be triggered automatically upon EPA's determination of a failure to achieve the progress in emission reductions that the AQMP schedule prescribed. The FIP backstop measures would consist of a predetermined sequence of control measures (possibly adjusted from time to time based on development of new control technologies) that could be implemented to eliminate any shortfall in the emission reductions required in the SIP. It is impossible to predict a complete list of measures that may be considered appropriate at that time, but the list would include at least the kinds of prohibitions and limitations discussed in the previous description of five-year FIP options (e.g., limitations on industrial and commercial activities, fuel sales or usage restrictions). The FIP backstop control measures would be implemented only to the extent necessary to eliminate any shortfall in targeted SIP emission reductions, and would be rescinded if the state and local agencies adopted mitigating control measures of their own.

If EPA decides to promulgate FIP further progress targets that are different from those included in the SIP, this could alter the size of the shortfall to be mitigated by the backstop measures. For instance, EPA might use the targets set in its own post-1987 ozone and CO policy proposal. The proposed policy, which may be revised before final issuance, would require a three percent annual emissions reduction in actual emissions from a fixed baseyear emissions inventory, exclusive of reductions attributable to Federally implemented control measures and certain other "baseline" measures (see 52 FR 45066 and 45091). Alternatively, EPA could select a non-linear schedule extending from the emissions baseline to the allowable emissions level for the Basin, and reflecting EPA's estimation of expeditious progress based upon an ambitious schedule of developing and applying new technologies.

EPA's proposed post-1987 policy allows compliance with the three percent minimum reduction through demonstrations every three years that a nine percent reduction has been achieved (for the first five years, the proposed policy would allow a showing that a fifteen percent reduction has been met). The proposed South Coast plan shows future emissions levels only at the years 2000 and 2010, with interim year emissions levels identifiable only through extrapolation. EPA invites public comment on whether, under this approach, emissions levels should be promulgated, tracked, and enforced on an annual basis, or whether the FIP might prescribe emissions levels on a less frequent basis (such as biennially or triennially).

Under the various versions of this approach, the FIP could promulgate specific basinwide emissions levels for interim years leading to eventual attainment. The emissions levels could be expressed as basinwide emissions in tons per day representative of typical summer weekday conditions for ozone and representative of typical winter weekday conditions for CO. In the case of ozone, the basinwide emissions could be prescribed for NO_x as well as volatile organic compounds (VOC), if EPA concludes that reductions in emissions of NO_x (a precursor to ozone, along with VOC) are necessary or cost-effective to prescribe.

This approach requires that EPA keep close watch on the progress the South Coast achieves as it implements the SIP. The FIP might include a special provision requiring from the State timely annual reports on progress in achieving emissions reductions from individual control measures. The FIP might also require the State to track basin-wide emissions increases and decreases in accordance with detailed EPA instructions and then calculate actual emissions for the basin. EPA may also need to impose some specific record keeping and reporting requirements for sources, transportation agencies, and other jurisdictions to assist in monitoring activity levels. With or without these requirements for data collection, EPA would remain responsible for determining the emissions levels in the basin and whether, and to what extent, surplus emissions exist.

Option 2: "SIP Backstop" Approach

The "SIP Backstop" option is similar to Option 1 but uses, as a measure for progress, the State and local adoption schedule and implementation of control measures, rather than the annual emissions ceiling in the SIP. Under this option, backstop measures promulgated in the initial FIP (or as subsequently adjusted) would become effective automatically if the State and local authorities failed to adopt either the SIP rules or substitute control measures with equivalent emissions reductions. As in Option 1, backstop measures would be rescinded if and when the State or local agencies adopted mitigating measures on their own.

Option 3: SIP Approval in Lieu of FIP

As discussed in the body of this notice, EPA believes that approval of a state or local air quility plan is far preferable to EPA's promulgating a FIP, and EPA strongly supports the South Coast AQMP development process now underway. The proposed AQMP, however, relies heavily on the development of future technologies, funding mechanisms, governmental infrastructures, and long-term societal adjustments. Inevitably, many of the most significant AQMP measures are represented largely as commitments to develop in enforceable form over many years the rules, ordinances, and other implementation mechanisms necessary for the success of the plan.

EPA intends to approve these state and local SIP commitments, at least for the purposes of making them federally enforceable, as soon as they are adopted and submitted in legally binding form, and assuming that they otherwise comply with other Federal requirements. EPA does not anticipate that the state and local agencies will be able to submit most control measures in fully developed and fully approvable form for many years.

Therefore, the proposed AQMP is not expected to meet initially all of EPA's existing requirements for proper adoption of measures, including provisions for legal authority, binding commitments, specificity of limitations, funding, scheduling, approval of appropriate governmental agencies, and monitoring. As such, under EPA's current policies, full and complete approval of the entire pending SIP in lieu of a FIP must be considered a romote possibility.

If, however, the State were to submit a complete, legally adopted plan by the time EPA were to promulgate its FIP, then EPA could find that the SIP measures are sufficient to meet Clean Air Act requirements without additional Federal measures. EPA would then be able to avoid any FIP action and approve the State plan in full, under at least one of the legal theories described in the test of today's notice (see footnotes 20 and 21 and accompanying text).

C. Discussion of the Possibility of Other Types of Federal Measures

In addition to the relatively simple prohibitory FIP measures discussed above, or the list of measures in the local plan, EPA could promulgate in the FIP, at least in theory, other types of federal initiatives that might expedite emission reduction progress in the Basin. These measures would consist of

rules that would supplement the existing and proposed state and local regulations with particular measures applying specific control technology requirements or embodying other available regulatory approaches.

As explained elsewhere in this notice, EPA generally believes that the responsibility for selecting and implementing air pollution control measures rests principally with state and local agencies rather than with EPA. In addition, this notice also discusses the possibility that EPA may lack the authority and resources to promulgate and enforce many types of regulations in a South Coast FIP, particularly those rules that would mandate substantial economic and social change. EPA considers most conventional FIP control approaches to be difficult to implement under a FIP, even assuming federal resources and authority sufficient for enforcement of regulations that require the compliance of thousands of sources or millions of residents. Such controls could also be expected to attract state and local opposition, rather than to enlist that level of support that is a prerequisite to successful implementation. However, we discuss below certain areas where EPA believes a limited active supplemental federal role is or may be possible and appropriate.

1. Currently Planned Federal Measures

EPA proposed to impose nationally two VOC control measures See 52 FR 31162; 52 FR 31,274; (August 19, 1987): (1) Control of refueling emissions through onboard vehicle control systems for gasoline fueled light-duty vehicles and trucks and heavy-duty trucks; and (2) volatility regulations for gasoline and alcohol blends. Because of the current South Coast regulation imposing Stage II refueling controls at service stations, the first of these proposed national promulgations would not be expected to provide significant emissions reductions within the Basin. EPA's proposed restrictions on gasoline volatility would contribute emission reductions beyond those identified in the South Coast plan, and would therefore expedite progress in reducing ozone concentrations in the Basin.[1]

[1] The most common measure of fuel volatility is the Reid Vapor Pressure (RVP). RVP is a measure of the tendency of gasoline to evaporate at 100 degrees Fahrenheit. As RVP increases, evaporative hydrocarbon emissions from gasoline related sources, i.e., motor vehicles and the gasoline transportation and distribution system, increase.

California State law currently limits the RVP of gasoline in the South Coast Basin to 9 pounds square inch (psi) for the seven-month period, April 1 through October 31. EPA has proposed national standards for RVP that would limit fuel for the period May 16 through September 15 to the following levels: 7.8 psi in Orange County and western Los Angles County, and 7.0 psi in Riverside County, San Bernardino County, and eastern Los Angeles County (see 52 FR 31274 and 31315, August 19, 1987). The draft South Coast plan includes a measure to tighten the State standard to 8.0 psi. In the year 2000, this would amount to reductions of 9.6 tons per day of VOC, 16.5 tons per day of CO, and 7.4 tons per day of NO_x. The proposed plan also encourages EPA to work with the PAA to demonstrate and evaluate the potential for methanol-jet fuel use. The plan estimates that significant additional reductions could result from a requirement for methanol fuel.

2. Other Federal Measures

The South Coast plan assigns to either EPA or other federal agencies the following measures, because of legal constraints on the authority of state or local governments. EPA solicits comment as to whether these or other measures should be included in a FIP or another federal promulgation in the case of other federal agencies:

a. *Lower Emissions Standards for Aircraft Engines.* The proposed South Coast plan lists as one of the Tier I control measures lower emission standards for VOC and NO_x from new jet aircraft engines. The plan's control measure (I–2) projects a 50 percent reduction in emissions for all pollutants.

Under Section 231 of the Clean Air Act EPA has authority to promulgate such standards, but under Section 233 state and local governments are prohibited from adopting standards of their own, although they may adopt and enforce EPA's standards. Because aircraft must circulate freely throughout the U.S. to serve their purpose, nationwide regulation would be needed to achieve reductions in the basin.

At present, EPA standards for aircraft engines apply only to commercial jet engines. The standards exclude non-commercial aircraft and all piston-driven engines. Engines smaller than a certain size are also excluded. There are EPA standards for VOC, smoke, and fuel venting, but not for NO_x or CO. The VOC standards apply only for engines manufactured after 1983, although EPA has statutory authority to require retrofit of engines manufactured previously. However, smoke standards apply to all in-use commercial jet engines, regardless of age, and the technology used, for smoke control on pre-1983 engines provides some degree of VOC control. The present standards were established by a rulemaking process that spanned eleven years, ending in 1984. The draft plan in effect proposes that these current exclusions be removed, and that more stringent standards for newly certified engines be adopted.

Some degree of NO_x control, more stringent VOC control, retrofit of 1983 and older engines, controls on smaller engines, and controls on some non-commercial jet engines may be technologically feasible with adequate lead time for development, certification, production, and installation. However, the previous rulemaking process surfaced several concerns about safety, costs, industry disruption, and unintentional disincentives for technological process that led EPA to adopt the standards as they now exist. The cost and favorable emission reduction estimates contained in the draft plan appear to be based largely on EPA analyses from about 1978, and apparently have not been adjusted for inflation and aircraft fleet mix and usage changes since then. EPA's experience from having established the current standards in the 1970's is that adoption of standards for jet engines is a process that requires much more time than for most stationary sources or for motor vehicles. The time frame for implementation of new standards would most likely entend beyond five years, the typical period for Tier I control measure implementation. Thus, new standards most likely would not play a role in a five-year FIP.

b. *Outer Continental Shelf (OCS) Controls.* It may be possible to assist attainment in the South Coast basin by tightening federal controls on OCS emissions sources (primarily, petroleum exploration and development), or by negotiating agreements between the Department of Interior and state or local agencies to allow for partial state or local regulation of OCS sources. The amount of ozone or ozone precursors affecting the South Coast basin from OCS emissions is difficult to forecast. It is heavily dependent upon the scale, location, and form of future petroleum development, as well as the type of emissions control applied.

3. Potential Federal Measures Not Included in South Coast Draft Plan

Lastly, there are a few potential measures that are not included in the draft South Coast Plan. In theory, these measures could be in a FIP if they are not included in the final South Coast plan. EPA solicits comment from the public as to whether any of the following measures should be included in the FIP. As stated above, EPA continues to feel that the state and local agencies are the appropriate level of government for selection and implementation of these potential measures.

a. *Wintertime Oxygenated Gasoline Blend Program.* The use of oxygenated gasoline blends to reduce the CO emissions from motor vehicles is a recent development in air pollution control strategies. The use of these fuels during the CO season (winter months) has been mandated for the Denver nonattainment area, and more recently, for the Phoenix and Tucson nonattainment areas. Oxygenated fuels reduce CO emissions because the air-to-fuel ratio is made leaner, thus providing more oxygen which results in more complete combustion.

Oxygenated blends are produced by adding an oxygenate in the form of aliphatic alcohols and/or ethers to gasoline. Blends currently on the market include methyl-tertiary-butyl-ether (MTBE) blends, ethanol ("gasohol") blends, and methanol/co-solvent blends.

All alcohol-based oxygenates affect the volatility of the gasoline, i.e., its tendency to evaporate at various temperatures. Unless completely offset, these volatility changes may increase a vehicle's evaporative hydrocarbon emissions (i.e., fuel which evaporates and escapes to the air before it is burned in the engine). The use of oxygenated blends could increase hydrocarbon emissins from motor vehicles and possibly interfere with the attainment of the ozone standard in the South Coast basin during those time periods when the ozone and CO seasons overlap. Additionally, the use of oxygenated fuels results in increased NO_x emissions (less than 10 percent) which could adversely affect the attainment of the NO_2 standard and the PM–10 standard due to secondary aerosol formation.

EPA requests comments on the following:

(1) whether the promulgation of a wintertime oxygenated blends program is an appropriate CO control strategy for the South Coast basin given the impact the program might have on other pollutants;

(2) if an oxygenated fuel blends program is promulgated, whether all blends should be subject to sufficiently stringent Reid Vapor Pressure (see discussion above) so that there is no increase in hydrocarbon emissions due to the use of these blends;

(3) whether an oxygenated blends program will impact the introduction into the basin of alternatively fueled vehicles capable of using, for example, a fuel consisting of at least 85 percent methanol, compressed natural gas or liquid petroleum gas; and (4) whether an oxygenated fuels program would be compatible with the draft plan's proposal to require electrification of most motor vehicles in the basin by the year 2007.

b. *Enhanced Inspection and Maintenance Program.* California's current Inspection and Maintenance (I/M) program requires that gasoline-fueled motor vehicles be subjected to a tailpipe emissions test for hydrocarbons (HC) and carbon monoxide (CO) in an idle or idle and 2500 rpm (1980 and newer model year vehicles) mode and a tampering inspection biennially. Vehicles twenty years of age or newer and up to 8500 pounds gross vehicle weight are included in the program. Vehicles are tested at independently run authorized stations. Vehicles receive waivers if they fail the emissions test but cannot be repaired to the standards for $50 or less. Heavy duty gasoline vehicles are scheduled to be included in the program beginning in October 1989.

In September 1988, the Governor of California signed legislation (SB 1997, Presley) amending the repair cost ceiling to between $50 for 1971 and older model year vehicles up to $300 for 1990 and newer vehicles, effective January 1, 1990. The new law has the following additional provisions: 1966 and newer vehicles will be subject to the program; new, more sophisticated exhaust gas analyzers must be in place no later than January 1, 1992; and local air pollution control districts may request NO_x testing which might be implemented by means of loaded mode testing.

In order to obtain the maximum benefit from the I/M program, EPA might promulgate an enhanced I/M program which could require annual inspection of all 1966 and newer gasoline fueled vehicles. Other potential enhancements could include: (1) Inspections conducted at centralized facilities; (2) emissions testing of vehicles in a loaded mode as well as in the idle mode condition; and (3) measurements of NO_x emissions as well as HC and CO emissions. Also all vehicles could be required to be repaired to the standards, *i.e.*, there would be no limit on the amount the motorist might have to spend to bring the vehicles into compliance with the standards.

Any centralized inspection facilities would be run by an independent contractor or an agency under contract to EPA. EPA would maintain oversight over the program. EPA would hope that the program would continue to be enforced by registration through the California Department of Motor Vehicles. Although EPA may have the authority to assess fees for such a program, any monies generated would go directly into the U.S. Treasury and would require a Congressional appropriation to be returned to a federally promulgated I/M program.

c. *New Source Review (NSR) Program.* While the proposed South Coast plan includes a new source review measure (F–8) tightening the existing NSR requirements for the permitting of new or modified emissions sources, it is not clear that the SCAQMD now contemplates, or will ultimately embody, NSR provisions comparable to the two discussed below.

i. *Prohibition on the Use of Shutdown Emission Reduction Credits.* Relatively unmitigated minor source growth and the use of banked emissions credits to offset stationary source growth in the South Coast severely restrict or eliminate potential NSR contribution to achieving air quality goals. While control technologies have gotten increasingly effective at reducing emissions from permitted sources, the use of certain types of offsets, often from shutdowns many years past, has neutralized possible air quality gains. The SCAQMD and Region 9 agree that the current federal construction ban on major new or modified sources will have a negligible impact on the number and types of sources receiving permits in the South Coast Basin.[2] The SCAQMD thresholds for the aplication of BACT/LAER and offsetting are already significantly below federal levels and affect a large proportion of sources within the basin. On the other hand, applications for new or modified sources with emissions above the federal construction ban levels are extremely rare.

EPA could promulgate an NSR rule for the basin using the existing South coast offset threshold levels but prohibiting for use as an offset or in the determination of net emission increase all Emission Reduction Credits (ERC's) derived from shutdowns prior to 1985. Thereafter, credits from shutdowns would be available for use as ERC's (to the extent not otherwise disallowed by federal NSR requirements) but only within a three-year period following the actual shutdown. In addition, ERC's would be available from the application of innovative or excess controls. These ERC's would not be subject to the three-year restriction on use.

EPA's promulgation could also expedite progress toward attainment by discounting all ERC's derived from shutdowns. The discount could provide that the calculation of shutdown credits assume that the source were controlled to a level equivalent to the best available retrofit control technology (BARCT), determined as of the date of permit application for the source intending to use the credit.

ii. *Penalty for Failure to Obtain an NSR Permit.* Sources constructing and operating in the basin without a permit may be considered to be emitting the equivalent of uncontrolled and/or unmitigated air pollution. Many permit applications in the SCAQMD backlog are for facilities that were constructed without a permit.

EPA could promulgate a penalty for failure to apply for an NSR permit. The penalty should be substantial enough to act as a deterrent to sidestepping the regulations.

d. *Conformity Program.* Section 176(c) of the Clean Air Act prohibits federal agencies from taking actions that do not conform to approved SIPs, and prohibits metropolitan planning organizations, such as SCAG, from approving such actions. Strong conformity provisions in the South Coast would ensure that federally funded and approved projects do not lead to further degradation of the Basin's air quality.

The 1982 South Coast SIP includes conformity requirements. Conformity provisions are also included in the draft South Coast plan. SCAG has also formed a conformity working group, which includes EPA, to refine these conformity provisions. The FIP would address any deficiencies that remain after agency revision.

EPA will review the South Coast Plan according to, and base any needed FIP requirements on, previously published notices addressing conformity: 45 FR 21590 (April 1, 1980); 46 FR 7182 (January 22, 1981); and 52 FR 45055 (November 24, 1987). The elements needed for a fully effective conformity program include: (a) Conformity review procedures, (b) growth projections and a disaggregation process, (c) estimates of emissions for major federal projects, (d) conformity review criteria (45 FR 21590), (e) specification of information that must be provided for conformity determinations (growth, emissions, TCM consistency, modeling) and, (f) requirements for a finding of non-conformity if projects do not satisfy the review criteria or insufficient information is provided.

D. Comparison of Five-year and Longer-Term FIPS

How would the impact of the five-year FIP compare with that of the South Coast twenty-year plan? First, both plans envision roughly the same reductions, one within five, the other within 20 years.

The South Coast's proposed plan, however, pursues a technology forcing strategy in order to establish clean alternatives to existing transportation, industrial, commercial, and domestic fuels, equipment, materials, and activities. The South Coast plan avoids much of the sudden and extreme social and economic dislocations that are unavoidable in a five-year attainment period, by allowing time for the development and practical application of the technologies that are required or encouraged by the proposed plan. These technologies include, most notably, clean fuels or engines for mobile sources (with electrification of most surface vehicles); nonreactive industrial, commercial, and domestic solvents; and further stringent controls for a viarety of stationary and area sources of VOC or NO_x. In addition, the South Coast plan seeks to minimize the technological burden borne by the transportation sector by providing a comprehensive variety of transportation and land use control measures to reduce the

[2] The Clean Air Act requires EPA to enforce a ban on construction of major stationary sources and major modifications, following disapproval of a nonattainment area plan (see discussion above on EPA's disapproval of the South Coast SIP for ozone and CO). The construction ban regulations apply only to new sources with the potential to emit 100 tons per year or more of the relevant pollutant or pollutant precursor, and to modifications with a net emissions increase of 100 tons per year for CO and 40 tons per year of VOC. See 40 CFR 52.24.

existing dependency on private vehicle use, and to reduce future needs for additional private vehicle trips to accommodate growth in population and employment. Most of these transportation and land use measures (such as provisions for jobs-housing balance or construction of new mass transit facilities) necessarily involve lead times of at least five years and, in some cases, more than 15 years, for full implementation.

1. State and Local Expertise

EPA has not yet fully analyzed all features of the South Coast AQMP, and does not yet know if it is adequate to provide for attainment, or whether it can be fully implemented within its projected timeframe. But the SCAQMD has consistently been recognized as one of the nation's most comprehensive, progressive, and effective air quality control agencies, particularly with respect to the development, application and refinement of effective controls of ozone precursors, VOC and NO_x. Their effort on the proposed AQMP, in conjunction with SCAG's, includes identifying and scheduling for adoption every feasible stationary source, transportation, and mobile source control measure. The plan has scheduled pilot studies, legislative needs, funding commitments, public awareness programs, and implementation time frames.

EPA's involvement in the South Coast planning effort has primarily been to oversee and provide technical assistance to the state and local agencies. EPA has limited expertise in the specific approaches that would be used to control emissions in the Basin. Much of EPA's regulatory approach to the control of emissions continues to be derived from the knowledge and experience of the SCAQMD and the ARB in the control of stationary, area, and mobile sources.

EPA would be unable to implement many of the measures identified in the South Coast draft plan. Many control strategies require commitments on the local level and must be initiated by local agencies. These include land use measures, incentive based transportation control measures (TCMs), and long-range transit planning. Because of the nature of these control measures, and the fact that there are over 150 local jurisdictions in the basin, local government coordination is essential.

EPA believes that air quality benefits are best achieved through a federal partnership with the state and local planning agencies to ensure that all needed control measures are adopted, monitored, and enforced primarily at the state and local levels. The SCAQMD, SCAG, ARB, and EPA have been working together successfully to refine control strategies included in the draft plan to generate local support for controversial measures. Federal preemption of the planning process, at the culmination of a uniquely ambitious and resource intensive planning process, could jeopardize the extensive efforts and progress of the state and local agencies and jurisdictions.

2. Federal Versus State/Local Resource Allocation

The staff and budgets of the local and state agencies responsible for solving the air pollution problems in the Basin far exceed currently budgeted federal sources. The staff levels in the fiscal year 1989 budgets of the SCAQMD and the ARB are 900 and 670, respectively; this combined work force is more than 22 times the staff size (70) of the Air Management Division (AMD) in the EPA Region 9 office in San Francisco. The Region 9 office is responsible for directly implementing or overseeing the implementation of the Clean Air Act throughout the states of California, Arizona, Nevada, Hawaii, and the Pacific Islands. The approximate fiscal year 1989 budgets of the three agencies are similarly proportioned:

SCAQMD	$75,000,000
ARB	$58,000,000
EPA Region 9 (AMD)	$3,500,000

The imbalance of federal and state/local air pollution planning resources is still more extreme when the staff and budget of SCAG are considered. SCAG, which is the largest of the approximately 700 Councils of Government in the country, shares responsibility with the SCAQMD for preparation of the local air pollution control plan.

Appendix B: Technical Issues

I. Developing the Federal Implementation Plan

This Appendix is intended to provide a better understanding of the technical issues associated with the FIP process. The process of developing an implementation plan is similar whether the plan is to be promulgated by the state, as a SIP, or by the federal government, as a FIP. Typically, states have been given only nine months to prepare and submit to EPA a fully adopted and approvable plan. During this time, EPA must complete appropriate guidance, and the state must gather information, conduct an analysis of the problem, select appropriate control measures, and write and adopt a plan. Because the development of post-1987 plans is expected to be more difficult than previous efforts, EPA, in its proposed policy to address continued nonattainment of the ozone and CO NAAQS, proposed to allow states two years to develop post-1987 ozone and CO SIPs.

In order to produce a technically sound plan, the following types of activities are required:

a. development of data bases (inventories)
b. determination of emission reduction requirements
c. selection of control measures
d. preparation of the FIP or SIP
e. review and adoption of the plan.

A. Development of Data Bases

1. *Current Emission Inventory.* An emission inventory of air pollutants and their sources is essential in identifying major contributors of air contaminants. Sources of emissions are classified as either stationary or mobile sources. Stationary sources are further divided into point and area sources.

The most recent comprehensive inventory for the South Coast is for the base year 1983. For the purposes of the South Coast draft plan, the 1983 inventory was updated to create a 1985 base year emission inventory. The next comprehensive update is expected in 1990 for the base year 1987.

A technical evaluation of the South Coast draft plan inventory and projections has not yet been performed. However, some preliminary conclusions can be drawn about the inventory. Stationary VOC sources in the South Coast include surface coating operations, consumer use products, petroleum processing, and industrial/manufacturing processes. The total VOC contribution from stationary point and area sources comprises 48 percent of the inventory. For NO_x, stationary point and area sources contribute 28 percent of the inventory. The major stationary NO_x sources include electric utilities, petroleum refineries, and manufacturing/industrial process. Stationary sources contribute only 4 percent to the CO inventory and are mostly fuel combustion sources.

Mobile source emissions are attributed to on-road vehicles (automobiles; light, medium, and heavy duty trucks; buses; and motorcycles) and other mobile sources (airplanes, ships, trains, and mobile utility equipment). On-road vehicles account for 46 percent of the VOC emissions, 59 percent of the NO_x emissions, and 87 percent of the CO emissions in the South Coast.

2. *Forecasted Emission Inventories.* The 1985 base year inventory has been projected to create the baseline inventory for 2000 and 2010. The projected inventories take into account existing control strategies presently in the South Coast, including the California and the Federal Motor Vehicle Control Programs (CMVCP) and (FMVCP), and anticipated stationary and mobile source growth.

Due to existing efforts of local, state and federal air pollution control agencies, per source emissions of VOC, CO, and NO_x in the South Coast are declining. The SCAQMD estimates that per source emissions will continue to decline in the near future because of the effect of existing controls on air pollution sources. The major reason for this steady decrease in per source emissions is the expected turnover of vehicles in use due to the implementation of the CMVCP and the FMVCP. As older cars, which have higher emissions, are replaced by newer, cleaner burning cars, the associated emissions have decreased.

As noted above, however, the South Coast Basin is growing in population at a remarkable rate. If the excess cumulative emissions caused by this growth are not offset or mitigated, the South Coast will quickly begin to experience a net increase in emissions throughout the basin.

3. *FIP Emission Inventory.* The FIP emission inventory would give an indication of what sources would be able to provide additional reductions and would provide an overall baseline against which the adequacy of the control strategy is judged. The FIP emission inventory would include VOC, NO_x, and CO.

EPA would need to establish a base year inventory; a projected inventory for future years with no new control measures; and a series of projected control strategy inventories. This would involve the identification of sources; data collection on stationary source production levels;

estimation of traffic volumes; a calculation of emissions for each mobile and stationary source category; and a determination of growth factors for each source or source category. This effect would require extensive cooperation from the SCAQMD, SCAG, ARB, and the California Department of Transportation (Caltrans) since these agencies are typically the source for emissions data.

For the purposes of the greater than five year plan, EPA would use a 1987 base year emission inventory. This emission inventory is already in preparation, and a final draft could be ready as soon as December 1989. Due to limited time, the five-year FIP would use the 1983 inventory.

To be consistent with EPA's proposed post-1987 policy, some revisions to the South Coast's 1987 base year inventory are necessary. The inventory would have to be revised to include all sources which emit more than 10 tons per year. Also, the inventory area would need to be expanded to include sources within a 25 mile boundary of the Basin and additional source categories such as treatment, storage, and disposal facilities of hazardous materials and publicly owned water and sewage treatment facilities.

The projected inventory would take into account existing control measures and expected growth in the South Coast. To be consistent with the proposed post-1987 policy, EPA will project the inventory over five years (1992). The inventories would then be gridded in preparation as input into the Urban Airshed Model (see discussion below).

The quantified emission reductions from the federal control strategies must be allocated to each of the emission inventory categories to produce a series of projected control strategy inventories. Initially, EPA would project the emission reductions over the first five years, then update every three years. To remain consistent with the proposed post-1987 policy, an 80 percent control effectiveness factor would apply to the inventory control categories.

The proposed post-1987 ozone/CO policy give states one year to produce a base year emission inventory. EPA's requirements under a FIP might range between having to do an entire inventory to only having to do a part, depending upon the selection of the base year and the status of any work already done by the state and local agencies. EPA would have to rely heavily on contractor assistance for all phases of inventory preparation.

B. Determination of Emission Reduction Requirements

1. *Ozone Modeling.* There are two modeling techniques recognized by EPA for ozone evaluations and demonstrations of attainment: the Empirical Kinetics Modeling Approach (EKMA) and the Urban Airshed Model (UAM). UAM is the preferred model for ozone control strategy evaluations, but is more complex and expensive to run than EKMA.

EKMA simulates the full range of atmospheric chemical reactions involved in ozone formation, but employs a very simplistic treatment of transport, mixing, and dispersion of the reacting pollutant species. The advantages of EKMA are: (1) That it requires only a limited amount of aerometric input data; (2) it does not require extensive computer resources; and (3) it can provide a fixed VOC emission reduction target necessary to reach attainment. It cannot, on the other hand, be used to evaluate the impact of the spatial variability of emissions, the spatial distribution of ozone, or multi-day effects during ozone episodes.

The UAM is a three dimensional grid-based model which utilizes the same set of chemical reactions as EKMA, but employs a much more rigorous treatment of transport and dispersion. The primary disadvantage to using this model is that it is more costly. It requires detailed, three dimensional data, considerable effort to assemble and input the aerometric and emissions data, and extensive computer resources.

The aerometric and emissions database has been assembled and UAM analyses have been performed by the SCAQMD. Therefore, EPA intends to base its control strategy and attainment analyses on UAM results. EPA would resort to an EKMA analysis only if, by Court order, EPA must promulgate the FIP in a very short time frame, or as discussed below, the SCAQMD modeling analyses or database are found unusable.

Ideally, EPA would build upon the South Coast modeling efforts. If problems are discovered with the model or the data, EPA, or an EPA contractor, will work with the SCAQMD and/or conduct the modeling itself. If serious flaws are found in the SCAQMD's modeling analyses or input data, then EPA may resort to an EKMA analysis.

Two types of modeling analyses will be undertaken: sensitivity and control strategy. Sensitivity analyses will verify that the model is accurately depicting the physics and chemistry of the basin and will provide a rough approximation of the types and magnitudes of emission reduction necessary to attain the NAAQS. The control strategy analysis will be more specific in terms of what types of input parameter changes are analyzed. It is important to note that peak ozone concentrations will not react dramatically to individual control measures. The analysis will evaluate the impact on ozone concentrations of a large group of control measures, with a fairly large overall emission reduction associated with them.

Some of the specific types of analyses which would be performed are the following:

a. *Attainment Demonstration.* The primary analysis needed is the determination of the level of emission reduction necessary to attain the ozone standard. The suggested approach, as outlined by EPA, is to determine the level of VOC reductions, in the absence of NO_X reductions, necessary to reach the standard. Then, if the VOC to NO_X ratio in the nonattainment area is greater than 10 to 1, the effects of NO_X control on the maximum ozone concentrations will be evaluated to determine the overall level of VOC reductions necessary.

In the case of the South Coast Basin, PM–10 and NO_2 ambient levels are also in excess of the standard. The South Coast draft plan proposes major reductions in NO_X emissions as necessary particularly for attainment of the PM–10 standard. EPA would need to take into account the NO_X reductions required by the South Coast. Those reductions will affect ozone attainment, and will make the ozone attainment analyses more complex.

b. *Spatial Effects.* The initial precursor reduction targets will be based on an overall basin reduction level. When actual controls are implemented, some controls may only apply to certain geographic locations. If certain source types are only located in one area of the basin, controls applied to those sources may have different effects on the ozone concentrations than similar controls applied elsewhere in the Basin.

c. *Baseline Changes.* As population patterns shift within the basin, the spatial and temporal distribution of emissions may change, especially vehicle miles traveled (VMT) and associated emissions. Such changes could affect the attainment demonstration.

d. *Maintenance of the Standard.* The modeling must demonstrate maintenance as well as attainment of the NAAQS. Future year projected inventories will be used for this maintenance demonstration.

2. *Carbon Monoxide Modeling.* CO impacts occur on both an urban scale and a microscale. The overall buildup of pollutants on a large scale defines an urban scale impact, while high, but more transient, levels of pollutants near a roadway are considered microscale impacts. Most CO problems are the result of a combination of both types of impacts; however, the CO nonattainment problem in the South Coast basin primarily involves a large urban scale component. Therefore, an attainment demonstration for the basin will require urban scale modeling.

Although the UAM was developed primarily for ozone applications, it can also be used for evaluating relatively inert pollutants, such as CO. It has been successfully used for this purpose in Denver, Colorado, and Phoenix, Arizona. Because of the complex meteorology and disparate emission patterns in the South Coast basin, the model would be appropriate for use there as well.

At this time, only proportional rollback procedures have been used in the analysis of CO in the South Coast basin. Therefore, CO airshed modeling will require assembling an appropriate aerometric and emissions database. EPA intends to construct the CO FIP attainment demonstration based on the UAM unless time and resource contraints disallow its use. In that event, EPA's analysis must use rollback modeling.

C. Selection of Control Measures

Before being selected for inclusion in a plan, measures must be evaluated for their emission reduction potential, costs, technical and administrative feasibility, and social and political impacts.

The evaluation process is expected to take considerable time and resources, and will involve contractor assistance and the input of numerous outside agencies and affected industries. The evaluation of measures is normally performed by the state and local agencies; however, under a FIP, EPA would assume this responsibility.

The selection process is also typically handled by the state and local agencies, with little federal input aside from measures

BEST COPY AVAILABLE

mandated by the Clean Air Act, such as inspection and maintenance (I/M) or Reasonably Available Control Technology. Again, under a FIP, EPA would have the legal responsibility for selecting measures which are sufficient to accomplish the goal for attaining and maintaining the standard in the required time period.

D. Preparation of the FIP

After all the data have been collected, analyses conducted, and measures selected, EPA would assemble the results into a usable form. This entire process would be documented and represented in the form of selected measures and regulations, and a description of how those measures will enable the standard to be attained and maintained. This is the draft implementation plan.

A major portion of the effort involved in preparing a plan would be the development of the regulations needed to implement those selected control measures which are in addition to measures currently approved. Regulations need to be technically defensible and legally enforceable. This will require considerable effort, expertise, and time, especially for measures which address less traditional source categories and controls.

E. Adoption of the Plan

The final state in the preparation of a plan is the process of public review, formal approval, and adoption or promulgation. The purpose of the adoption process is the same for a SIP and a FIP, that is, to provide all interested parties an opportunity to examine the control strategy chosen as well as the technical and legal basis for the strategy, and to make the plan a legally enforceable document. However, the process is somewhat different for a FIP because of the necessity to conform to federal procedural requirements. EPA would be required to publish a summary of the FIP's demonstration of attainment and draft control measures in the **Federal Register**, provide for a public comment period, and hold formal public hearings. A final **Federal Register** notice would contain the final control measures and responses to public comments. EPA regional offices are primarily responsible for drafting **Federal Register** notices, holding public hearings, and obtaining public comment.

II. Implementing a Plan

After a plan has been prepared and promulgated, it must be implemented. Implementation is an ongoing process of administering programs to achieve and maintain compliance with the control measures set forth in the plan. The following activities are encountered in the implementation of a plan:

A. Source Permitting, Testing, and Inspection

B. Enforcement

C. Effectiveness evaluation

The implementation phase is critical, as it, along with the quality of the planning effort, determines how effective the plan is. As in the case of plan preparation, the responsibility for implementing a FIP rests with EPA. While EPA cannot legally require another agency to implement FIP control measures, it would hope that state and local air agencies would want to be involved.

A. Source Permitting, Testing, and Inspection

The process of implementing the measures in a plan requires that the compliance status of the various stationary and mobile sources be determined, corrected when necessary, and maintained. Ideally, a FIP would build from the existing state rules which have been approved, adding federal measures where necessary but leaving the state or local measures in place. Implementation would then be shared between the state and local agencies and EPA. Compliance determination inspection could be a cooperative venture also; however, since sources subject to federal measures would be operating under federally issued permits, enforcement actions probably would be carried out at the federal level.

The task of determining compliance varies with the nature of the source. Stationary sources such as manufacturing facilities, industrial plants, and gasoline terminals require emissions testing and visual inspection of stack emission points, probable non-stack or fugitive emissions points, and production and control equipment. Mobile source measures require not only emission testing and visual inspection, as with an I/M program, but more non-traditional techniques as well, in order to gauge compliance with control measures such as reduced fuel volatility, oxygenated fuels, gasoline rationing, parking restrictions, and mandatory ridesharing.

B. Enforcement

Enforcement is the process of compelling sources to comply, generally through actual or threatened legal action. As previously mentioned, enforcement of federal measures would mean that EPA would have the responsibility for initiating action against sources operating out of compliance with those measures. While EPA routinely conducts enforcement activities against large emitters, these activities are limited. Under a FIP, EPA's enforcement role would expand significantly in the affected area.

C. Plan Tracking

Essential to the FIP process is a program to monitor how measures are being implemented and if emission reductions are occurring as scheduled and committee to assure attainment of the NAAQS. Reports on the plan's implementation status must be timely and made public. EPA could promulgate a plan provision for such a tracking program. This program would include emission quantification techniques, required resources, and time frames for completing the analysis. Quarterly reports would document current control measures development, adoption and implementation, and how they would provide the quantitative analysis necessary to document emission changes. Both quarterly and annual reports would be distributed to the public. EPA would rescind this measure if the SCAQMD and SCAG adopt such a provision in their SIP and show evidence of sufficient staff and financial resources for implementation.

14 CFR Part 121, 127, 135 and 145

Special Federal Aviation Regulation No. 36; Development of Major Repair Data; Final Rule

VOL 53 ISS 235 DE 7 1988 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 121, 127, 135, and 145

[Docket No. 17551; SFAR No. 36-4]

Special Federal Aviation Regulation No. 36; Development of Major Repair Data

AGENCY: Federal Aviation Administration [FAA], DOT.

ACTION: Final rule, request for comments.

SUMMARY: This amendment extends the effective date of Special Federal Aviation Regulation (SFAR) No. 36 which provides that repair stations, air carriers, air taxis, and commercial operators of large aircraft may accomplish major repairs using self-developed repair data which have not been specifically approved by the FAA. In addition, the regulation will continue to provide an alternative from the need to obtain FAA approval of repair data on a case-by-case basis and allow additional time for the FAA to incorporate the SFAR provisions into the regulations.

DATES: Effective Date January 23, 1989. Comments must be received on or before January 6, 1989.

ADDRESS: Comments on this rule may be mailed, in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC–10), Docket No. 17551, 800 Independence Ave., SW., Washington DC 20591. Comments delivered must be marked Docket No. 17551. Comments may be examined in Room 915G weekdays between 8:30 a.m. and 5:00 p.m., except on Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jess Lewis, Continued Airworthiness Staff, Aircraft Engineering Division, AWS–100, Office of Airworthiness, Federal Aviation Administration, 800 Independence Ave., SW., Washington DC 20591, telephone: (202) 267–9287.

SUPPLEMENTARY INFORMATION:

Background

SFAR 36, which became effective on January 23, 1978, was issued to provide qualifying certificated air carriers, air taxis, commercial operators, and repair stations with an alternative to the need to obtain FAA approval of data developed by them for major repairs on a case-by-case basis. The certificate holders eligible for authorization under the SFAR are those employing adequately trained personnel and complying with specified procedural requirements.

SFAR 36 was adopted as an interim rulemaking action to obtain information upon which to base a permanent rule change. However, most of the affected certificate holders did not utilize the provisions of SFAR 36 until it was well into its second year and near its expiration date of January 23, 1980. Since the FAA did not have sufficient data upon which to base a permanent rule change, the termination date for SFAR 36 was extended an additional 2 years, to January 23, 1982.

Although the FAA initiated rulemaking to consolidate certain authorizations along with those issued under SFAR 36 and make them a permanent part of the Federal Aviation Regulations (FAR) the rulemaking action was not completed and the termination date for SFAR 36 was extended two additional periods. The first period was for 2 years and the second period, with a termination date of January 23, 1989, was for 5 years. Each authorization issued under the SFAR was made effective from the date of issuance. There are presently more than 30 certificated air carriers and repair stations holding SFAR 36 authorizations. For reasons unrelated to the subject matter of SFAR 36, the rulemaking project that was to permanently codify SFAR 36 was canceled. A new regulatory project which will codify the provisions of SFAR 36 into FAR 21 (14 CFR Part 21) is underway. This new project broadens existing delegation of aircraft certification and approval functions and extends these functions to domestic organizations which possess the necessary technical and managerial qualifications. These changes are beyond the scope of SFAR 36 and are likely to stimulate significant interest and comment. This will prevent codification before SFAR 36 expires. Consequently, to provide continuity and avoid hardships to those relying on SFAR 36 as it presently exists, the FAA finds it necessary to extend the effective date of SFAR 36 an additional 5 years, to January 23, 1994.

Paperwork Reduction Act

Information collection requirements in this regulation [SFAR 36] have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB Control Number 2120–0507.

Good Cause Justification for Immediate Adoption

The termination date for SFAR 36 and the authorizations issued thereunder is January 23, 1989. The reasons which supported the adoption of SFAR 36 still exist and, to avoid hardships to those relying on the provisions of SFAR 36, it is in the public interest to extend the termination date of SFAR 36 from January 23, 1989, to January 23, 1994. The amendment also extends the effective date of each current authorization issued under this SFAR from the date of issuance until January 23, 1994. This rule extension should provide ample time for provisions to be incorporated into a permanent rule change.

This amendment is necessary to provide regulatory continuity and avoid hardship and costs to those relying on SFAR 36 as it presently exists. Since this amendment continues to effect the provisions of a currently effective SFAR and imposes no additional burden on any person, we find that notice and public procedures hereon are unnecessary. However, interested persons are invited to submit such comments as they may desire regarding this amendment. Communications should identify the docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator, and this amendment may be changed in light of the comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested parties.

Federalism Implications

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

The FAA has determined that this document involves a rule change which imposes no additional burden on any person. Accordingly, it has been determined that: the rule change does not involve a major action under Executive Order 12291; it is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and its anticipated impact is so minimal that an evaluation is not required.

List of Subjects

14 CFR Part 121

Air carriers, Aviation safety, Airworthiness directives and standards, Safety.

14 CFR Part 127

Air carriers, Aircraft, Airmen, Airworthiness, Helicopters.

14 CFR Part 135

Air carriers, Air taxis, Air transportation, Aircraft, Airmen, Airplanes, Airworthiness, Aviation safety, Safety, Helicopters.

14 CFR Part 145

Air Carriers, Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends Parts 121, 127, 135, and 145 (14 CFR Parts 121, 127, 135, and 145) as follows, effective January 23, 1989.

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

1. The authority citation for Part 121 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421 through 1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983).

PART 127—CERTIFICATION AND OPERATIONS OF SCHEDULED AIR CARRIERS WITH HELICOPTERS

2. The authority citation for Part 127 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, 1422, 1423, 1424, 1425, 1430; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983).

PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS

3. The authority citation for Part 135 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1421 through 1431, and 1502; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983).

PART 145—REPAIR STATIONS

4. The authority citation for Part 145 continues to read as follows:

Authority: Secs. 313, 314, 601, and 607, 72 Stat. 752; 49 U.S.C. 1354(a), 1355, 1421, and 1427; unless otherwise noted.

5. By amending Parts 121, 127, 135, and 145, Special Federal Aviation Regulation No. 36 (the text of which is found at the beginning of Part 121), by revising the termination date from "January 23, 1989" to "January 23, 1994" and by revising paragraph 5 to read as follows:

SFAR–36

* * * * *

5. *Duration of Authorization.* Each authorization issued under this Special Federal Aviation Regulation is effective from the date of issuance until January 23, 1994, unless it is surrendered or the Administrator suspends, revokes, or otherwise terminates it at an earlier date.

* * * * *

Issued in Washington, DC, on November 28, 1988.

T. Allan McArtor,

Administrator.

Department of Education

Drug Prevention Programs in Higher Education; Institution-Wide Program; Notice Inviting Applications for New Awards for Fiscal Year 1989

VOL 53 ISS 235 DE 7 1988 UMI

DEPARTMENT OF EDUCATION

[CFDA No. 84.183A]

Drug Prevention Programs in Higher Education; Institution-Wide Program; Applications for New Awards for Fiscal Year (FY) 1989

Purpose of Program: Provide grants to institutions of higher education to develop, implement, operate, and improve drug abuse education and prevention programs for students enrolled in institutions of higher education (IHEs).

Deadline for Transmittal of Applications: March 1, 1989.

Applications Available: December 20, 1988.

Available Funds: $10,200,000.

Estimated Range of Awards: $10,000 to $250,000.

Estimated Average Size of Awards: $100,000.

Estimated Number of Awards: 75 to 125.

Note: The Department is not bound by any estimates in this notice.

Budget Period: 24 months.

Project Period: 24 months.

Applicable Regulations: (a) The regulations for this program in 34 CFR Part 612 (Final regulations for this program were published in the **Federal Register** on June 30, 1988 (53 FR 24884); and (b) the Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, and 77.

Absolute Priority: In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3), the Secretary gives an absolute preference for comprehensive, institution-wide programs designed to prevent or eliminate students' use of illegal drugs and abuse of other drugs and alcohol, including activities whose direct or indirect purpose is to train students, faculty, and staff in drug abuse education and prevention as described at 34 CFR 612.21(b). The Secretary funds under this competition only applications that meet this absolute priority.

Selection Criteria

In evaluating applications for Institution-Wide grants, the Secretary will use the specific competition selection criteria for Institution-Wide awards listed in 34 CFR 612.23(c)(1). The program regulations in 34 CFR 612.22(b) provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 15 points. For this competition, the 15 points will be distributed as follows:

Methods and management plan. (34 CFR 612.23(c)(1)(iii)) Five (5) points will be added to this criterion for a possible total of 20 points.

Cost effectiveness and budget clarity. (34 CFR 612.23(c)(1)(vi)) Five (5) points will be added to this criterion for a possible total of 15 points.

Organizational commitment. (34 CFR 612.23(c)(1)(vii)) Five (5) points will be added to this criterion for a possible total of 20 points.

For Applications or Information Contact: Dr. Ronald B. Bucknam, Drug Prevention Programs in Higher Education, FY 1989–A Competition, Fund for the Improvement of Postsecondary Education, ROB–3—Room 3100, 7th and D Streets, SW., Washington, DC 20202–5175. Telephone: (202) 732–5750.

Program Authority: 20 U.S.C. 3211.

Dated: December 1, 1988.

Kenneth D. Whitehead,

Assistant Secretary for Postsecondary Education.

[FR Doc. 88–26171 Filed 12–6–88; 8:45 am]

BILLING CODE 4000–01–M

[CFDA No. 84.183B]

Drug Prevention Programs in Higher Education: Special Focus Program Competition: National College Student Organizational Network Program; Applications for New Awards for Fiscal Year (FY) 1989

Purpose of Program: Provide grants to institutions of higher education to develop, implement, operate, and improve drug abuse education and prevention programs for students enrolled in institutions of higher education (IHEs).

Deadline for Transmittal of Applications: May 1, 1989.

Applications Available: December 9, 1988.

Available Funds: $900,000.

Estimated Range of Awards: $100,000 to $250,000.

Estimated Number of Awards: 2 to 4.

Note: The Department is not bound by any estimate in this notice.

Budget Period: 24 months.

Project Period: 24 months.

Applicable Regulations: (a) the regulations for this program in 34 CFR Part 612 (Final regulations for this program were published in the **Federal Register** on June 30, 1988 (53 FR 24884)); and (b) the Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, and 77.

Absolute Priority: In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to Special Focus Program competitions, described at 34 CFR 612.21(c)(2), for projects addressing one or more specific approaches or problem areas related to drug abuse education and prevention for students enrolled in IHEs. The Secretary has chosen as an absolute priority one approach from the list at 34 CFR 612.21(c)(2): the development and implementation of programs conducted in conjunction with national student networks or organizations (34 CFR 612.21(c)(2)(ii)). The Secretary funds under this competition only applications that meet this absolute priority.

Eligible Applicants: IHEs are the only eligible applicants for grants under this competition. Therefore, interested national student networks or organizations must be sponsored by an IHE which will serve as the applicant and fiscal agent for a grant award.

Selection Criteria

In evaluating applications for National College Student Organizational Network grants, the Secretary will use the specific competition selection criteria for National College Student Organizational Network awards listed in 34 CFR 612.23(c)(2)(ii). The program regulations in 34 CFR 612.22(b) provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 15 points. For this competition, the 15 points will be distributed as follows:

Design. (34 CFR 612.23(c)(2)(ii)(A)) Five (5) points will be added to this criterion for a possible total of 25 points.

Organizational commitment. (34 CFR 612.23(c)(2)(ii)(F)) Ten (10) points will be added to this criterion for a possible total of 20 points.

For Applications or Information Contact: Dr. Ronald B. Bucknam, Drug Prevention Programs in Higher Education, FY 1989–B Competition, Fund for the Improvement of Postsecondary Education, ROB–3—Room 3100, 7th and D Streets SW., Washington, DC 20202–5175. Telephone: (202) 732–5750.

Program Authority: 20 U.S.C. 3211.

Dated: December 1, 1988.

Kenneth D. Whitehead,

Assistant Secretary for Postsecondary Education.

[FR Doc. 88–28172 Filed 12–6–88; 8:45 am]

BILLING CODE 4000–01–M

[CFDA No. 84.183C]

Drug Prevention Programs in Higher Education: Special Focus Program Competition: Approaches to Accountability in Prevention Program; Applications for New Awards for Fiscal Year (FY) 1989

Purpose of Program: Provide grants to institutions of higher education to develop, implement, operate, and improve drug abuse education and prevention programs for students enrolled in institutions of higher education (IHEs).

Deadline for Transmittal of Applications: February 8, 1989.

Applications Available: December 9, 1988.

Available Funds: $100,000.

Estimated Range of Awards: Up to $15,000.

Estimated Number of Awards: 6.

Note: The Department is not bound by any estimates in this notice.

Project Period: 9 months.

Applicable Regulations: (a) The regulations for this program in 34 CFR Part 612 (Final regulations for this program were published in the **Federal Register** on June 30, 1988 (53 FR 24884)); and (b) the Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, and 77.

Absolute Priority: In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to Special Focus Program competitions, described at 34 CFR 612.21(c)(2), for projects addressing one or more specific approaches or problem areas related to drug abuse education and prevention for students enrolled in IHEs. The Secretary has chosen as an absolute priority one approach from the list at 34 CFR 612.21(c)(2): the formulation of promising new approaches to individual and institutional leadership and responsibility (34 CFR 612.21(c)(2)(i)). The Secretary funds under this competition only applications that meet this absolute priority.

Invitational Priority: In accordance with EDGAR at 34 CFR 75.105(c)(1), the Secretary invites applications from IHEs to produce papers which develop and articulate new theories, theoretical models, and conceptual approaches on a variety of topics and issues in a number of fields and areas of knowledge related to individual and institutional leadership and responsibility in drug abuse education and prevention.

Areas of knowledge which applicants may wish to consider in developing their formulations include, but are not limited to, the following: higher education, psychology (including motivation, character, and responsibility), social psychology (including social deviance), ethics and moral education, health, sociology of organizations, management science, and leadership. Applications that meet this invitational priority will not receive a competitive or absolute preference over other applications that do not meet this priority.

The Secretary is not interested in inviting applications for grants for research, the development of instructional or training materials, program evaluation, restatements of existing theory, or literature reviews that are not conducted as part of a theoretical formulation.

Selection Criteria

In evaluating applications for Approaches to Accountability in Prevention grants, the Secretary will use the selection criteria for Approaches to Accountability in Prevention awards listed in 34 CFR 612.23(c)(2)(i). The program regulations in 34 CFR 612.22(b) provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 15 points. For this competition, the 15 points will be distributed as follows:

Design. (34 CFR 612.23(c)(2)(i)(B)) Five (5) points will be added to this criterion for a possible total of 35 points.

Methods and management plan. (34 CFR 612.23(c)(2)(i)(C)) Five (5) points will be added to this criterion for a possible total of 20 points.

Key personnel. (34 CFR 612.23(c)(2)(i)(D)) Five (5) points will be added to this criterion for a possible total of 25 points.

For Applications or Information Contact: Donald R. Fischer, Drug Prevention Programs in Higher Education, FY 1989–C Competition, Fund for the Improvement of Postsecondary Education, ROB–3—Room 3100, 7th and D Streets, SW., Washington, DC 20202–5175. Telephone: (202) 732–5750.

Program Authority: 20 U.S.C. 3211

Dated: December 1, 1988.

Kenneth D. Whitehead,

Assistant Secretary for Postsecondary Education.

[FR Doc. 88–28173 Filed 12–6–88; 8:45 am]

BILLING CODE 4000–01–M

[CFDA No. 84.183D]

Drug Prevention Programs in Higher Education: Special Focus Program Competition: Specific Approaches to Prevention Projects; Applications for New Awards for Fiscal Year (FY) 1989

Purpose of Program: Provide grants to institutions of higher education to develop, implement, operate, and impove drug abuse education and prevention programs for students enrolled in institutions of higher education (IHEs).

Deadline for Transmittal of Applications: June 1, 1989.

Applications Available: January 6, 1989.

Available Funds: $1,800,000.

Estimated Range of Awards: $5,000 to $40,000.

Estimated Number of Awards: 30 to 60 awards.

Note: The Department is not bound by any estimates in this notice.

Budget Period: 24 months.

Project Period: 24 months.

Applicable Regulations: (a) The regulations for this program in 34 CFR Part 612 (Final regulations for this program were published in the **Federal Register** on June 30, 1988 (53 FR 24884)); and (b) the Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, and 77.

Absolute Priority: In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105 (c)(3), the Secretary gives an absolute preference for Special Focus Program competitions, described at 34 CFR 612.21 (c) (2), for projects addressing one or more specific approaches or problem areas related to drug abuse education and prevention for students enrolled in IHEs. The Secretary has chosen as an absolute priority one approach from the list at 34 CFR 612.21 (c) (2); specific approaches to the prevention of drug use or alcohol abuse (34 CFR 612.21 (c) (2) (iii). The Secretary funds under this competition only applications that meet this absolute priority.

Invitational Priority: In accordance with EDGAR at 34 CFR 75.105 (c) (1), the Secretary invites applications from IHEs to develop, implement, operate, or improve higher education consortia for drug prevention. Applicants are invited to propose consortia arrangements to assist local and nearby prevention professionals, representing institutions of higher education, to meet on a monthly basis to discuss, investigate, and act on efforts to develop and improve their own comprehensive,

institution-wide programs of drug education and prevention. Other specific approaches meeting the absolute priority are also eligible. Applications that meet this invitational priority will not receive a competitive or absolute preference over other applications that do not meet this priority.

Selection Criteria

In evaluating applications for specific approaches to prevention grants, the Secretary will use the selection criteria for awards for specific approaches to prevention listed in 34 CFR 612.23(c) (2) (iii). The program regulations in 34 CFR 612.23 (b) provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 15 points. For this competition, the 15 points will be distributed as follows:

Need. (34 CFR 612.23 (c) (2) (iii) (A)) Five (5) points will be added to this criterion for a possible total of 20 points.

Methods and management plan. (34 CFR 612.23 (c)(2) (iii) (C)) Five (5) points will be added for a possible total of 20 points.

Cost effectiveness and budget clarity. (34 CFR 612.23 (c) (2) (iii) (F)) Five (5) points will be added for a possible total of 15 points.

For Applications or Information Contact: Dr. Ronald B. Bucknam, Drug Prevention Programs in Higher Education, FY 1989–D Competition, Fund for the Improvement of Postsecondary Education, ROB–3—Room 3100, 7th and D Streets, S.W., Washington, DC 20202–5175. Telephone: (202) 732–5750.

Program Authority: 20 U.S.C. 3211.

Dated: December 1, 1988.

Budget Deferrals; Notice

OFFICE OF MANAGEMENT AND BUDGET

Budget Deferrals

To the Congress of the United States

In accordance with the Impoundment Control Act of 1974, I herewith report four new deferrals of budget authority totaling $4,635,275,000 and three revised deferrals of budget authority now totaling $3,725,586,833.

The deferrals affect programs in Funds Appropriated to the President, and the Departments of State and Transportation.

The details of these deferrals are contained in the attached report.

Ronald Reagan,

The White House.

November 29, 1988.

[ ] Other _____

Type of budget authority:

[X] Appropriation

[ ] Contract authority

[ ] Other _____

Justification: The President is authorized by the Arms Export Control Act to sell or finance by credit or guarantee articles and defense services to friendly countries to facilitate the common defense. Under Section 2 of the Act, the Secretary of State, under the direction of the President, is responsible for sales made under the Act, including determining whether there shall be a sale to a country and the amount thereof. Executive Order No. 11958 further requires the Secretary of State to obtain the prior concurrence of the Secretaries of Defense and Treasury, respectively, regarding standards and criteria for credit and guarantee transactions that are based upon national security and financial policies. These funds have been deferred pending approval of specific loans to eligible countries by the Departments of State, Defense and Treasury. Consultation among these Departments will ensure that each approved program is consistent with the foreign, national security and financial policies of the United States and will not exceed the limits of available funds. This action is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Estimated Program Effect: None

Outlay Effect: None

1/ This account was the subject of a similar deferral in 1988 (D88-20).

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D89-1 transmitted to Congress on September 30, 1988.

This increases by $2,054,000,000 the previous deferral of $592,760,000 in the Economic support fund, Funds Appropriated to the President, resulting in a total deferral of $2,646,760,000. The increase in the amount deferred results from the deferral of funds included in the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1989. Funds are deferred pending approval of specific grants by the Secretary of State.

Deferral No: D89-1A

Justification: Pursuant to the Foreign Assistance Act (FAA) of 1961, as amended, the President is authorized to furnish grant military assistance to any friendly country or international organization if he finds that it will strengthen the security of the United States or promote world peace. Executive Order No. 12163 of September 29, 1979, as amended, delegates certain Presidential functions under the FAA to the Secretaries of State and Defense. These funds are being deferred until approval of specific programs by the Departments of State, Treasury, and Defense. Consultation among these Departments will ensure that each approved program is consistent with the foreign, national security and financial policies of the United States and will not exceed the limits of available funds. This action is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Justification: The International disaster assistance account allows the President to respond to humanitarian disaster relief efforts throughout the world. Responsibility for administration of this account has been delegated by Executive Order to the Administrator of the Agency for International Development. The Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1989 provided $25 million for disaster assistance activities. Funds are deferred pending the development of country-specific plans and to insure that funds are available to meet emergency needs throughout the year. This deferral action is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D89-9 transmitted to Congress on September 30, 1988.

This revision to a deferral of the Department of State's Emergency refugee and migration assistance fund increases the amount previously reported from $26,135,000 to $53,135,000. This net increase of $27,000,000 results from the deferral of 1989 appropriations pending Presidential designation of the refugees to be assisted.

Justification: * Section 501(a) of the Foreign Relations Authorization Act, 1976 (Public Law 94-141) and Section 414(b)(1) of the Refugee Act of 1980 (Public Law 96-212) amended Section 2(c) of the Migration and Refugee Assistance Act of 1962 (22 U.S.C. 2601) by authorizing a fund not to exceed $50,000,000 to enable the President to provide emergency assistance for unexpected urgent refugee and migration needs. The Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1989 (Public Law 100-461) expressly waived the provision that placed a limit on the amounts in the fund.

Executive Order No. 11922 of June 16, 1976, allocated all funds appropriated to the President for the Emergency Fund to the Secretary of State but reserved for the President the determination of assistance to be furnished and the designation of refugees to be assisted by the Fund.

1/ This account was the subject of a similar deferral in FY 1988 (D88-11).

* Revised from previous report.

VOL 53 ISS 235 DE 7 1988 UMI

D89-9A

* These funds have been deferred pending Presidential decisions required by Executive Order No. 11922. Funds will be released as the President determines assistance to be furnished and designates refugees to be assisted by the Fund. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

D89-10A

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D89-10 transmitted to Congress on September 30, 1988.

This increases by $202,084,287 the previous deferral of $823,607,546 in the Department of Transportation's Facilities and equipment, FAA trust fund account, resulting in a total deferral of $1,025,691,833. The increase results from the multi-year funding of modernization and improvement projects in the Department of Transportation and Related Agencies Appropriations Act, 1989. Due to the complexity and lengthy lead time for many of these projects, some of these funds will not be obligated until after FY 1989. This is fully consistent with the full-funding approach used for most projects in this account and ensures that sufficient funds will be available in future years to complete the acquisition, testing, and installation of improved air traffic control equipment and facilities.

***Justification:** Funds from this account are used to continue to procure specific Congressionally-approved facilities and equipment for the expansion and modernization of the National Airspace System. The projects financed from this account include construction of buildings, and the purchase of new equipment for new or improved air traffic control towers, automation of the en route airway control system, and expansion/improvement of navigational and landing aid systems. Funds to continue these activities were justified and provided for in the Department's regular budget submissions and were appropriated by Congress for the year in which requested.

Because of the lengthy procurement and construction time for these interrelated facilities and complex equipment systems, it is not possible to obligate all the funds necessary to complete each project in the year funds were appropriated. Therefore, it is necessary to apportion funds so that sufficient resources will be available in future periods to complete these projects. This deferral action is consistent with FAA's full funding approach and Congressional intent to provide resources for a project's total cost, and is taken under provision of the Antideficiency Act (31 U.S.C. 1512).

1/ This account was the subject of a similar deferral in FY 1988 (D88-12A).

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

Rules and Regulations

Federal Register
Vol. 53, No. 236
Thursday, December 8, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 536

Grade and Pay Retention

AGENCY: Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of Personnel Management is publishing interim regulations to provide for entitlement to pay retention when a Federal prevailing rate (wage) schedule is reduced as the result of the findings of a wage survey. This change will address certain anomalies in the statutory wage and survey process for Federal wage employees by providing that wage employees will not be reduced in pay solely because of changes in the local private sector economy over which they have no control.

DATES: This interim rule becomes effective on December 8, 1988; comments must be received on or before February 6, 1989.

ADDRESS: Comments may be sent or delivered to Barbara L. Fiss, Assistant Director for Pay and Performance Management, Personnel Systems and Oversight Group, Office of Personnel Management, Room 7H28, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Jan B. Karicher, (202) 632–5056.

SUPPLEMENTARY INFORMATION: In a report that accompanied Pub. L. 100–71, Congress recommended that the Office of Personnel Management (OPM) "* * * examine the possibility of proposing changes in the underlying statute to address * * * anomalies in the statutory wage and survey process [for Federal prevailing rate (wage) employees] and report to the Committee * * *."

Based on the philosophy that wages in a prevailing rate system should follow the local economy, regardless of which direction the economy moves, OPM has considered the use of pay retention as inappropriate when a wage schedule is reduced as a result of a decline in the local private sector economy. However, in recent years we have noticed that wage schedule reductions generally are short-lived, usually affect the lowest-paid wage employees, and have little impact on Federal spending. Further, over the past several years pay increases have been capped, and Federal wage rates have not always kept pace with prevailing rates in the local economy.

OPM now believes that pay retention would be appropriate in reducing the impact of survey anomalies. In addition, we believe there is sufficient flexibility in the existing statute governing grade and pay retention (5 U.S.C. 5365) to allow OPM adequately to protect wages when schedules are reduced by revising § 536.104(a)(3)(ii) of Title 5, Code of Federal Regulations. This revision will remove the restriction on granting pay retention to a wage employee whose rate of basic pay is reduced as the result of the findings of a wage survey.

Waiver of Notice of Proposed Rulemaking

Pursuant to section 553(b)(3)(B) of title 5, United States Code, I find that good cause exists for waiving the general notice of proposed rulemaking and for making this amendment effective in less than 30 days. The notice is being waived and the regulation is being made effective immediately in the event a prevailing rate is reduced as the result of a wage survey in the near future.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it will affect only Federal employees and agencies.

List of Subjects in 5 CFR Part 536

Administrative practice and procedure, Government employees, Wages.

U.S. Office of Personnel Management.
Constance Horner,
Director.

Accordingly, OPM is amending Part 536 of Title 5, Code of Federal Regulations, as follows:

PART 536—GRADE AND PAY RETENTION

1. The authority citation for Part 536 continues to read as follows:

Authority: 5 U.S.C. 5361–5366.

2. In § 536.104, the introductory text to paragraph (a) and (a)(3) is republished for the convenience of the reader, and paragraph (a)(3)(ii) is revised to read as follows:

§ 536.104 Coverage and applicability of pay retention.

(a) Pay retention shall apply to any employee whose rate of basic pay would otherwise be reduced—

* * * * *

(3) As a result of a reduction or elimination of scheduled rates, special schedules, or special rates, but not as the result of—

* * * * *

(ii) A statutory reduction in a prevailing rate schedule established under subchapter IV of chapter 53 of title 5, United States Code, and Part 532 of this chapter.

* * * * *

Section 22 Dairy Import Quota for Uruguay

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Interim rule.

SUMMARY: This interim rule amends the regulations governing the importation under license of certain dairy products which are subject to quantitative limitations proclaimed under the authority of section 22 of the Agricultural Adjustment Act of 1933, as amended, in order to implement Presidential Proclamation No. 5908 of

November 18, 1988, as amended by Presidential Proclamation No. 5916 of November 28, 1988, which modified such quantitative limitations to allow for an additional importation of 392,418 pounds of Italian-type cheese in original loaves from Uruguay. A special application period for the 1988 quota year is being established for importers who desire to receive import licenses for the importation of cheese from Uruguay.

DATES: This regulation is effective December 8, 1988. Comments must be submitted on or before February 6, 1989.

ADDRESSES: Mail comments to: Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Room 6616 South Building, Department of Agriculture, Washington, DC 20250–1000.

Copies of all written comments received will be available for examination by interested persons in Room 6622 of the South Building, Department of Agriculture (14th and Independence Avenue SW.), Washington, DC, during regular business hours (8:15–4:45 weekdays).

FOR FURTHER INFORMATION CONTACT: Richard Warsack, Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Room 6616 South Building, Department of Agriculture, Washington, DC 20250–1000 or telephone at (202) 447–5270.

SUPPLEMENTARY INFORMATION: This interim rule has been reviewed under USDA procedures required by Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" since this interim rule will not have any of the significant effects specified in those documents.

Furthermore, to the extent, if any, that the provisions of the Regulatory Flexibility Act (5 U.S.C. 601) apply to this interim rule, the Administrator, Foreign Agricultural Service (FAS), hereby certifies that this interim rule will not have a significant economic impact on a substantial number of small entities. The interim rule will enhance the capability of both large and small firms to import certain cheese from Uruguay. The public is invited to comment on the impact of this interim rule on small entities, and the Administrator, FAS, will review this determination in light of those comments.

An environmental impact statement has not been prepared since FAS is excluded from the requirements to prepare procedures implementing the National Environmental Policy Act in accordance with 7 CFR 1b.4.

Presidential Proclamation No. 4708 of December 11, 1979 established quantitative limitations on imports of certain dairy articles in accordance with section 701 of the Trade Agreements Act of 1979 (Pub. L. 96–39) and section 22 of the Agricultural Adjustment Act of 1933, as amended (7 U.S.C. 624). Presidential Proclamations No. 8411 of December 30, 1980, No. 5425 of January 6, 1986, No. 5618 of March 16, 1987, and No. 5832 of June 16, 1988 modified those quantitative restrictions. Pursuant to those proclamations, the Department of Agriculture issued regulations providing that the dairy articles subject to such quantitative restrictions could be entered into the United States only by or for the account of a person or firm to which a license has been issued by or under the authority of the Secretary of Agriculture and only in accordance with the terms of such license.

Presidential Proclamation No. 5425 of January 6, 1986, modified such quantitative limitations to permit imports of up to 551,150 pounds of Italian-type cheese in original loaves from Uruguay. The purpose of this interim rule is to amend the regulations governing the importation of dairy articles subject to quotas in order to implement Presidential Proclamation No. 5908 as amended. This interim rule amends the regulations to provide a special application period for licenses for this cheese for 1988 and amends Appendix 2 "Articles subject to the historical and supplementary licensing provisions of Import Regulation 1, Revision 7, and respective annual import quotas for each quota year" to 7 CFR Part 6, Subpart—Section 22 Import Quotas by revising the line for Uruguay. The quantity which now may be imported annually from Uruguay is 943,569 pounds.

The Department will issue supplementary import licenses authorizing the importation of such cheese from Uruguay to qualified importers. The application period for import licenses for the 1988 quota year was the period from August 1, 1987 through November 1, 1987. However, since there has been no opportunity for importers to apply for the additional supplementary import licenses for cheese imported from Uruguay, it has been determined to provide for a special application period for such licenses.

Importers who desire to receive supplementary import licenses for the importation of Italian-type cheese in original loaves from Uruguay during the 1988 quota year must submit their application in writing to: Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Room 6616, South Building, U.S. Department of Agriculture, Washington, DC 20250–1000 no later than December 23, 1988. Eligibility to receive such licenses and the allocation of such licenses will be determined in accordance with the established rules and procedures for supplementary import licenses.

Since the 1988 quota year has already begun, it is important that licenses to import the specified quantity of cheese from Uruguay be issued as quickly as possible so that importers will have sufficient time to import such cheese for the remainder of the 1988 quota year. In addition, this rule merely implements Presidential Proclamation No. 5908, as amended, which amended the quantitative limitations on imports of certain cheeses in accordance with the Agreement on Trade between the United States and the Oriental Republic of Uruguay.

Accordingly, it has been determined that this interim rule shall become effective on December 8, 1988. However, comments from interested persons are requested. Comments must be received by February 6, 1989 in order to be assured of consideration. After the comments have been received and reviewed, a final rule will be published setting forth any changes which may be necessary in these regulations.

List of Subjects in 7 CFR Part 6

Section 22, Import quotas, Dairy products.

Accordingly, 7 CFR Part 6, Subpart—Section 22 Import Quotas, is amended as follows:

PART 6—IMPORT QUOTAS AND FEES

1. The authority citation for 7 CFR Part 6, Subpart—Section 22 Import Quotas, continues to read as follows:

Authority: Sec. 3, Pub. L. 80–897, 62 Stat. 1248, as amended (7 U.S.C. 624); secs. 701, 703, Pub. L. 96–39, 93 Stat. 268, 272; Part 3 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202); Sec. 501, Pub. L. 82–137, 65 Stat. 290, as amended (31 U.S.C. 9701).

§ 6.25 [Amended]

2. Section 6.25 is amended by adding paragraph (c)(3) to read as follows:

(3)(i) Supplementary license eligibility for the additional 392,418 pounds of Italian-type cheese in original loaves from Uruguay made available by Presidential Proclamation No. 5908 of November 18, 1988 as amended by Presidential Proclamation No. 5916 of November 28, 1988, will be established in accordance with paragraph (c)(1) except as provided in paragraph (c)(3) (ii of this section).

(ii) Notwithstanding paragraph (b)(4) of this section, certification required to establish supplementary eligibility for licenses for the additional TSUS item 950.10 (Harmonized Tariff Schedule of the United States subheading 9904.10.42) from Uruguay for 1988 must be postmarked no earlier than December 8, 1988, and no later than December 23, 1988. Importers who have already submitted supplementary license certification for the application period which ended November 1, 1987, may simply request license for this additional article for 1988 by submitting a letter without further documentation postmarked as required in this paragraph.

Appendix 2 [Amended]

3. Group IV(a) of "Appendix 2—Articles subject to the historical and supplementary licensing provisions of Import Regulation 1, Revision 7, and respective annual import quotas for each quota year" is amended by revising the line beginning with "Uruguay" to read as follows:

"Uruguay.....	428.000	943.569".

Signed this 28th day of November, 1988.

Ann M. Veneman,

Acting Administrator, Foreign Agricultural Service.

[FR Doc. 88-28102 Filed 12-7-88; 8:45 am]

BILLING CODE 3410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-CE-37-AD; Amdt. 39-6086]

Airworthiness Directives; Empresa Brasileira de Aeronautica, SA (EMBRAER) Models EMB-110P1 and EMB-110P2 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action adopts a new Airworthiness Directive (AD) applicable to certain EMBRAER Models EMB-110P1 and EMB-110P2 airplanes which requires replacement or internal modification of the flap control switch P/N 110-898-14. This AD is prompted by a recent incident in which uncommanded full flap extension occurred on the ground prior to take-off. The actions specified in this AD will preclude uncommanded full flap extensions and prevent possible loss of airplane control.

DATES: *Effective Date:* January 5, 1989.

Compliance: As prescribed in the body of the AD.

ADDRESSES: EMBRAER Service Bulletin (SB) 110-027-0084, dated March 23, 1988, and EMBRAER Maintenance Manual with Illustrated Parts List No. T.P. 27-50-00/646, dated February 15, 1985, may be obtained from EMBRAER, 276 SW. 34th Street, Fort Lauderdale, Florida 33315. This information may also be examined at the FAA, Rules Docket, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. William Trammell, Aerospace Engineer, ACE-130A, Atlanta Aircraft Certification Office, FAA, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349; Telephone (404) 991-3020.

SUPPLEMENTARY INFORMATION: The manufacturer issued SB 110-027-0084, dated March 23, 1988, identifying the possibility of an electrical short caused by chafing between an electrical resistor and a potentiometer fastener screw within the body of the flap control switch on Model EMB-110 airplanes. An evaluation of this condition at that time by EMBRAER indicated that should this occur the flaps would not function. Subsequently, a foreign registered airplane experienced an incident where uncommanded full flap deployment occurred prior to take-off. It was determined that this incident had to have been caused by the resistor shorting to ground within the flap control switch body. This condition, if not corrected, could result in loss of control of the airplane during a critical phase of flight. The above incident prompted the Brazilian Airworthiness Authority (CTA) to issue Brazilian AD, 88-09-01, dated September 2, 1988, requiring compliance with the EMBRAER SB 110-027-0084, dated March 23, 1988. This service bulletin requires the modification or replacement of the flap selector switch. The CTA, who has the responsibility and authority to maintain the continued airworthiness of these airplanes in Brazil, has classified this service bulletin and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under Brazilian registration, this action has the same effect as an AD on airplanes certificated for operation in the United States. The FAA relies upon the certification of the CTA combined within FAA review of the design of these airplanes with the applicable U.S. airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of the EMBRAER service bulletin and the mandatory classification of this bulletin by the CTA. Based on the foregoing, the FAA has determined that the condition described herein is an unsafe condition that may exist or develop on other airplanes of the same type design certificated for operation in the United States. Therefore, an AD is being issued requiring replacement or modification of the flap selector switch on certain EMBRAER Models EMB-110P1 and EMB-110P2 airplanes. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Empresa Brasileira de Aeronautica, SA (EMBRAER): Applicable to Models EMB–110P1 and EMB–110P2 (serial numbers (S/N) 110001 up to and including S/N 110466) airplanes equipped with multi position flap control switch P/N 110–898–14, certificated in any category.

Compliance: Within the next 50 hours time-in-service after the effective date of this AD, unless previously accomplished.

To reduce the potential for inadvertent full flap extension that could result in loss of control of the airplane in a critical phase of flight, accomplish the following:

(a) Replace the flap control switch, P/N 110–898–14, with flap control switch P/N 110–898–14, Revision S, in accordance with Part I of EMBRAER Service Bulletin (SB) 110–027–0084, dated March 23, 1988; or

(b) Modify the flap control switch, P/N 110–898–14, in accordance with Part II of EMBRAER SB 110–027–0084, dated March 23, 1988, and electrically test the reassembled switch and adjust the potentiometer, if necessary to resistance values specified for P/N 110–898–14, Revision G, after the above modification in accordance with Section 2A "Adjusting the Potentiometer" as described in EMBRAER "Maintenance Manual with Illustrated Parts List", No. T.P. 27–50–00/646, dated February 15, 1985. The above modification, test and adjustment must be performed by an appropriately rated repair station.

(c) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Atlanta Aircraft Certification Office, FAA, Central Region.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to EMBRAER, 276 SW. 34th Street, Fort Lauderdale, Florida 33315, or may examine these documents at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on January 5, 1989.

Issued in Kansas City, Missouri, on November 21, 1988.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 88–28218 Filed 12–7–88; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 88–CE–36–AD; Amdt. 39–6085]

Airworthiness Directives; Mooney Models M20J and M20K Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Mooney Models M20J and M20K airplanes which requires modification of the baggage door for certain Mooney Models M20J and M20K airplanes. There have been eight reports of baggage door in-flight openings, one of which involved fatalities. The actions of this AD will prevent further in-flight openings of the baggage door by providing additional instructions and procedures to ensure proper operation and security.

DATES: *Effective Date:* January 5, 1989.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Mooney Aircraft Corporation Service Bulletin (SB) No. M20–239, dated September 28, 1988, and Pilots Operating Handbook/Airplane Flight Manual (POH/AFM) Supplement, dated September 30, 1988, applicable to this AD may be obtained from the Mooney Aircraft Corporation, P.O. Box 72, Kerrville, Texas 78029. This information may also be examined at the Rules Docket, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Efrain E. Esparza, Aerospace Engineer, ASW–150, FAA, Airplane Certification Branch, Fort Worth, Texas 76193–0150; Telephone (817) 624–5156.

SUPPLEMENTARY INFORMATION: The FAA has received eight reports of baggage door in-flight openings on Mooney Models M20J and M20K airplanes equipped with an auxiliary exit mechanism that allows the baggage door to be opened from the inside. The earlier of these reports indicated the in-flight opening of the baggage door occurred due to incorrect positioning of the clevis pin in the auxiliary handle. This can occur if the auxiliary exit is not properly secured even though the door is properly latched and locked from the outside. As a result of these reports, the manufacturer issued Service Instruction (SI) M20–63, dated April 12, 1983, to modify the auxiliary exit handle mechanism by installing a spring to provide a positive means of pin engagement in the cam slot.

Subsequent reports indicated that in some cases the ABS cover had fallen off and the plastic knob did not retain the red handle in the closed and locked position as it should, allowing the handle to extend into the cabin. When this condition exists, the exposed handle, which is designed to swing aft to open the door, can be moved to the open position by inadvertent contact, resulting in the opening of the baggage door. Investigation revealed there were no instructions in the POH/AFM to instruct the pilot on the proper operation of the auxiliary exit to prevent the baggage door from opening in-flight.

The manufacturer issued SI M20/82, dated March 14, 1988, to modify the auxiliary exit handle mechanism by replacing the plastic knob with a safety pin designed for positive security of the baggage door. On September 28, 1988, the manufacturer issued SB No. M20–239, that incorporates the modification contained in SI M20/82 and a POH/AFM supplement dated September 30, 1988. The POH/AFM supplement provides instructions for a preflight check of the auxiliary exit handle mechanism as well as information for the pilot on a recommended course of action should the baggage door open in-flight.

Since the FAA has determined that the unsafe condition described herein is likely to exist or develop in other airplanes of the same type design, an AD is being issued requiring modification of the auxiliary exit provided by the baggage door on certain Mooney Models M20J and M20K airplanes in accordance with the instructions in SB No. M20–239. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance

with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that is not major under section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Mooney: Applies to Models M20J (Serial Numbers 24–0004, 24–0376 through 24–1645, and 24–3000 through 24–3056) and M20K (Serial Numbers 25–0001 through 25–1100) certificated in any category.

Compliance: Required within the next 25 hours time-in service after the effective date of this AD, unless already accomplished.

To prevent in-flight opening of the baggage door, accomplish the following:

(a) Modify the auxiliary exit mechanism in the baggage door, install a placard, and incorporate the Pilots Operating Handbook/Airplane Flight Manual Supplement as specified in Mooney Aircraft Corporation Service Bulletin No. M20–239, dated September 28, 1988, and operate the airplane in accordance with these instructions.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(c) An equivalent means of compliance with this AD may be used if approved by the Manager, Airplane Certification Branch, FAA, Fort Worth, Texas 76193–0150.

All persons affected by this directive may obtain copies of the document referred herein upon request to the Mooney Aircraft Corporation, P.O. Box 72, Kerrville, Texas 78029; or may examine this document at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on January 5, 1989.

Issued in Kansas City, Missouri, on November 21, 1988.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 88–28219 Filed 12–7–88; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 71

[Airspace Docket No. 88–ANM–18]

Amendment of Transition Area; Denver, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Denver, Colorado 700 foot transition area. This action is necessary to provide additional controlled airspace which will encompass a new instrument approach procedure for the Denver Front Range Airport. The area will be depicted on aeronautical charts for pilot reference, and is intended to segregate aircraft operating under Instrument Flight Rules conditions from other aircraft which are operating under Visual Flight Rules conditions.

EFFECTIVE DATE: 0901 u.t.c., December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Ted Melland, ANM–536, Federal Aviation Administration, Docket No. 88–ANM–18, C–68968, Seattle, Washington 98168, Telephone: (206) 431–2536.

SUPPLEMENTARY INFORMATION:

History

On August 31, 1988, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Denver, Colorado transition area (53 FR 33504). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The Rule

This amendment of Part 71 of the Federal Aviation Regulations adds controlled airspace to the Denver, Colorado transition area. This action is necessary to enhance safety at Front Range Airport during the oncoming winter months. It is therefore necessary to publish this final rule within 30 days of its effective date.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under E.O. 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Denver, Colorado (Revised)

On the third line and on the fifth line change 078° to read 065°.

Issued in Seattle, Washington, on November 14, 1988.

Temple H. Johnson, Jr.,

Manager, Air Traffic Division, Northwest Mountain Region.

[FR Doc. 88–28100 Filed 12–7–88; 8:45 am]

BILLING CODE 4910–13–M

VOL 53 ISS 236 DE 8 1988 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 14

Advisory Committees; Biological Response Modifiers Advisory Committee; Establishment

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is announcing the establishment by the Secretary of Health and Human Services of the Biological Response Modifiers Advisory Committee in FDA's Center for Biologics Evaluation and Research. Elsewhere in this issue of the **Federal Register**, FDA is publishing a notice requesting nominations for membership on this committee. This document adds to the agency's list of standing advisory committees.

DATES: Effective December 8, 1988. Authority for the committee being established will end on October 28, 1990, unless the Secretary of Health and Human Services formally determines that renewal is in the public interest.

FOR FURTHER INFORMATION CONTACT: Richard L. Schmidt, Committee Management Office (HFA–306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–2765.

SUPPLEMENTARY INFORMATION: Under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92–463 and 21 CFR 14.40(b)), FDA is announcing the establishment by the Secretary of Health and Human Services of the Biological Response Modifiers Advisory Committee.

The committee will review and evaluate data relating to the safety, effectiveness, and appropriate use of biological response modifiers which are intended for use in the prevention and treatment of a broad spectrum of human diseases. The committee will also consider the quality and relevance of FDA's research program which provides scientific support for the regulation of these products, and advise the Secretary of Health and Human Services, the Assistant Secretary for Health, and the Commissioner of Food and Drugs of its findings.

Because this is a technical amendment to Part 14, the Commissioner of Food and Drugs finds under 21 CFR 10.40 (c), (d), and (e) that notice and public procedure in § 10.40(b) are unnecessary and contrary to the public interest.

List of Subjects in 21 CFR Part 14

Administrative practice and procedure, Advisory committees, Color additives, Drugs, Radiation protection.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 14 is amended as follows:

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

1. The authority citation for 21 CFR Part 14 continues to read as follows:

Authority: 5 U.S.C. 5332 note; 15 U.S.C. 1451 et seq.; 21 U.S.C. 41 et seq.; 141 et seq., 321–371, 467f(b), 679(b), 821, 1031 et seq.; 42 U.S.C. 201 et seq.; 257a; 21 CFR 5.10.

2. Section 14.100 is amended by adding a new paragraph (c) to read as follows:

§ 14.100 List of standing advisory committees.

* * * * *

(c) *Center for Biologics Evaluation and Research.*

(1) [Reserved]

(2) *Biological Response Modifiers Advisory Committee.*

(i) *Date established.* October 28, 1988.

(ii) *Function.* Reviews and evaluates data relating to the safety, effectiveness, and appropriate use of biological response modifiers which are intended for use in the prevention and treatment of a broad spectrum of human diseases. The committee will also consider the quality and relevance of FDA's research program which provides scientific support for the regulation of these products, and advise the Secretary of Health and Human Services, the Assistant Secretary for Health, and the Commissioner of Food and Drugs of its findings.

Dated: December 1, 1988.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 88–28278 Filed 12–7–88; 8:45 am]

BILLING CODE 4160–01–M

21 CFR Part 178

[Docket No. 87F–0387]

Indirect Food Additives; Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the expanded use of 1,3,5-tris(3,5-di-*tert*-butyl-4-hydroxybenzyl)-*s*-triazine-2,4,6(1*H*,3*H*,5*H*)trione as an antioxidant in certain olefin copolymers containing not less than 85 weight-percent of polymer units derived from propylene. This action is in response to a petition filed by Ciba-Geigy Corp.

DATES: Effective December 8, 1988; written objections and requests for a hearing by January 9, 1989.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gillian Robert-Baldo, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of January 6, 1988 (53 FR 289), FDA announced that a food additive petition (FAP 8B4047) had been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) be amended to provide for the increased use of 1,3,5-tris(3,5-di-*tert*-butyl-4-hydroxybenzyl)-*s*-triazine-2,4,6(1*H*,3*H*,5*H*)trione as an antioxidant in propylene copolymers.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed increased use of the food additive is safe, and that 21 CFR 178.2010(b) should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4

p.m., Monday through Friday. This action was considered under FDA's final rule implementing the National Environmental Policy Act (21 CFR Part 25).

Any person who will be adversely affected by this regulation may at any time on or before January 9, 1989, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specified factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 178

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 178 is amended as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

1. The authority citation for 21 CFR Part 178 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 178.2010 is amended in the table in paragraph (b) by adding new entry "5" under the heading of "Limitations" for the entry "1,3,5-tris(3,5-di-*tert*-butyl-4-hydroxybenzyl)-*s*-triazine-2,4,6(1*H*,3*H*,5*H*)trione" to read as follows:

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b) * * *

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6692

[AK-932-09-4214-10; AA-8253]

Public Land Order No. 5566, Correction and Modification; Partial Revocation of Public Land Order No. 5550, Withdrawal of Lands for Native Selection; Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order will correct errors in the land description and will also modify Public Land Order No. 5566 to further withdraw the lands pursuant to section 14(h)(3) of the Alaska Native Claims Settlement Act (ANCSA) for selection by the Natives of Kodiak, Inc.

EFFECTIVE DATE: December 8, 1988.

FOR FURTHER INFORMATION CONTACT: Sandra C. Thomas, BLM State Office, 701 C Street, Box 13, Anchorage, Alaska 99513, 907–271–5477.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and section 14(h)(3) of the Alaska Native Claims Settlement Act (ANCSA), 85 Stat. 688, 704; 43 U.S.C. 1613, it is ordered as follows:

1. The land description in Public Land Order No. 5566, published in the **Federal Register** on December 23, 1975 (40 FR 59347–59348), is hereby corrected as follows:

In the land description for Parcel 2 on page 59348, first column, line 19, which reads "2,968.12 feet to the point of beginning." is hereby corrected to read "2,968.12 feet to the point of beginning, *excluding* the Diesel Power Plant, a tract of land within lot 2, U.S. Survey No. 2539, Kodiak Island Borough, State of Alaska, more particularly described as follows:

Beginning at Corner No. 1, Swampy Acres Tract, Lat 57°46'20.441"N., Long. 152°28'48.003"W., which bears S. 60°15'14"W., 10,251.96 feet from Corner No. 1, U.S. Survey No. 2539;
Thence North, 2,000.00 feet;
Thence East, 1,600.00 feet;
Thence South, 2,000.00 feet;
Thence West, 1,600.00 feet to the point of beginning.

The excluded tract as described contains approximately 73.46 acres.

2. PLO No. 5566, as amended, is hereby modified to further withdraw the lands described in paragraph 1 pursuant to section 14(h)(3) of ANCSA, 43 U.S.C. 1613(h)(3), for selection by the Natives of Kodiak, Inc.

3. The actions taken in this order do not serve to otherwise affect the provisions or limitations of PLO No. 5566.

November 29, 1988.

J. Steven Griles,

Assistant Secretary of the Interior.

[FR Doc. 88-28210 Filed 12-7-88; 8:45 am]

BILLING CODE 4310-JA-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 4

Service of Process—National Vaccine Injury Compensation Program

AGENCY: Office of the Secretary, HHS.

ACTION: Final rule.

SUMMARY: In order to permit the expedited review of petitions and related filings, the Secretary is amending the regulation regarding service of legal process to provide that all service of process related to petitions for compensation under the National Vaccine Injury Compensation Program are to be filed with the Director, Bureau of Health Professions, in Rockville, Maryland.

EFFECTIVE DATE: This regulation is effective December 8, 1988.

FOR FURTHER INFORMATION CONTACT: David Benor, Office of the General Counsel, 5600 Fishers Lane, Suite 4A–53, Rockville, MD 20857,(301) 443–2006. For information about how to file petitions for compensation, contact the Clerk, United States Claims Court, 717 Madison Place, NW., Washington, DC 20005, (202) 633–7257.

SUPPLEMENTARY INFORMATION: 45 CFR Part 4 provides that service of legal process in proceedings involving the Secretary of Health and Human Services or employees of the Department of Health and Human Services is to be upon the General Counsel or the Deputy General Counsel. Under the National Vaccine Injury Compensation Program (the "Program") at Subtitle 2 of Title XXI of the Public Health Service Act, 42 U.S.C. 300aa–10 *et seq.*, the Secretary is named as respondent in all proceedings based on petitions for compensation of vaccine-related injuries and deaths. While petitions for compensation are to be filed with the United States Claims Court, which is responsible for adjudicating the petitions, the statute also provides that a copy of the petition is to be served upon the Secretary. In order to permit the expedited review of petitions and related filings, the Secretary is amending 45 CFR Part 4 to provide that such materials are to be served directly upon the office within the Public Health Service that is responsible for the Program.

Paperwork Reduction Act

This regulation is not subject to the Paperwork Reduction Act because it deals solely with internal management of the Department of Health and Human Services.

Cost/Regulatory Analysis

The Secretary has determined, in accordance with Executive Order 12291, that this rule will not constitute a "major" rule and therefore is not subject to a regulatory impact analysis requirement of the Order. Major rules are those which impose a cost on the economy of $100 million or more a year or have certain other economic impacts.

The rule will not have a significant economic impact on small entities; therefore, preparation of a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. 601–612).

Waiver of Notice and Public Comment

Because this is a procedural rule, related solely to internal Department management, the Secretary has determined that notice of proposed rulemaking, public comment, and a delayed effective date are unnecessary and would not be in the public interest. Accordingly, this regulation is issued in final form and is effective upon publication.

List of Subjects in 45 CFR Part 4

Courts, Vaccine injury petitions.

For the reasons set forth above, 45 CFR Part 4 is amended as follows:

PART 4—[AMENDED]

1. The authority citation for 45 CFR Part 4 is revised to read as follows:

Authority: 5 U.S.C. 301, 42 U.S.C. 300aa–11.

2. The table of sections is amended by adding at the end the following:

4.6 Materials related to petitions under the National Vaccine Injury Compensation Program.

3. A new § 4.6 is added at the end of Part 4 as follows:

§ 4.6 Materials related to petitions under the National Vaccine Injury Compensation Program.

Notwithstanding the provisions of §§ 4.1, 4.2, and 4.3, service of the Secretary's copies of petitions for compensation under the National Vaccine Injury Compensation Program and of related filings, whether by mail or in person, shall be upon the Director, Bureau of Health Professions, 5600 Fishers Lane, Suite 8–05, Rockville, Maryland 20857.

Dated: November 21, 1988.

Otis R. Bowen,

Secretary.

[FR Doc. 88–28254 Filed 12–7–88; 8:45 am]

BILLING CODE 4150–04–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 675

[Docket No. 71147–8002]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustment.

SUMMARY: NOAA announces the apportionment of amounts of Pacific cod from the nonspecific reserve to domestic fishermen processing fish or delivering fish to domestic processors (DAP). This action, taken under provisions on the Fishery Management Plan (EMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI), is necessary to assure optimum use of Pacific cod in the groundfish fishery. It is a conservation and management measure intended to promote fishery objectives of the North Pacific Fishery Management Council.

DATES: Effective December 4, 1988, 0001 hours, Alaska Standard Time. Comments will be accepted through December 20, 1988.

ADDRESS: Comments should be mailed to James W. Brooks, Acting Director, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802, or delivered to Room 453, Federal Building, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Michael Sigler, Fishery Research Biologist, NMFS, 907–586–7229.

SUPPLEMENTARY INFORMATION: Rules appearing at 50 CFR 611.93 and Part 675 implement the FMP.

Initially, 15 percent of the 1988 total allowable catch (TAC) for each species or species group in the BSAI was placed in reserve, DAP was specified, and remaining amounts were provided to domestic fishermen delivering fish to foreign processors (JVP) (53 FR 894, January 14, 1988). No amounts of groundfish were provided for foreign harvest because U.S. fishermen are able to harvest the entire 1988 TAC amounts.

The following 1988 inseason actions have apportioned amounts from the reserve to DAP, JVP, or both, or amounts from DAP to JVP: April 19 (53 FR 12772), May 10 (53 FR 16552), May 25 (53 FR 19303), June 22 (53 FR 23402), July 14 (53 FR 26599), July 27 (53 FR 28229), August 30 (53 FR 33140), September 9 (53 FR 35081), October 5 (53 FR 39097), October

19 (53 FR 40894), and November 23 (53 FR 47544).

The Acting Director, Alaska Region, NMFS (Regional Director), has determined from fishery data, including DAP catches to date and a DAP survey completed in August 1988, that DAP fisheries have the potential to harvest and process about 88,590 mt of Pacific cod in the BSAI by the end of 1988. The reported DAP catch of Pacific cod in the BSAI as of November 12 was 69,738 mt, 92 percent of the current apportionment of 75,416 mt. The current apportionment is expected to have been reached on November 19.

Based on the above information, the Regional Director has determined that the current DAP amounts of Pacific cod in the BSAI are insufficient to meet DAP needs in 1988. Therefore, 8,193 mt of the reserve are apportioned to the DAP category for Pacific cod, effective December 3, 1201 AST (2101 GMT).

These apportionments will not result in overfishing of Pacific cod because the resulting TAC is less than the allowable biological catch for this species (Table 1). Directed fishing, as defined at 50 CFR 675.2, for Pacific cod by DAP fishermen in the BSAI remains open for 1988.

Classification

This action is taken under the authority of 50 CFR 675.20(b) and complies with Executive Order 12291.

The Assistant Administrator for Fisheries finds for good cause that it is impractical and contrary to the public interest to provide prior notice and comment. Immediate effectiveness of this notice will allow DAP fishermen to continue directed fishing for Pacific cod and for species that require Pacific cod as bycatch, reducing waste that would otherwise occur. Interested parties are invited to submit comments in writing to the address above for 15 days after the effective date of this notice, in accordance with § 675.20(b)(2)(i).

List of Subjects in 50 CFR Part 675

Fish, Fisheries, Reporting and recordkeeping requirements.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 5, 1988.

Joe P. Clem,

Acting Director of Office Fisheries Conservation and Management.

TABLE 1.—BSAI AREA REAPPORTIONMENTS OF INITIAL TAC

[All values are in metric tons]

Proposed Rules

Federal Register
Vol. 53, No. 236
Thursday, December 8, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-NM-183-AD]

Airworthiness Directives; Boeing of Canada, Ltd., de Havilland Division, Model DHC-8-100 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to revise an existing airworthiness directive (AD), applicable to de Havilland Model DHC-8-100 series airplanes, which currently requires flight manual limitations to prohibit takeoff, landing and climb in the vicinity of lightning or thunderstorms, and requires continuous ignition operation during takeoffs, takeoff climb to 1500 feet above ground level (AGL), final approach, and landing within 5 nautical miles of lightning and thunderstorms. That AD was prompted by reports of lightning strike incidents which damaged the electronic controls units. This action would require the installation of four modifications which, when incorporated, will eliminate the unsafe condition addressed and obviate the need for the flight manual limitations.

DATES: Comments must be received no later than February 1, 1989.

ADDRESS: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthness Rules Docket No. 88-NM-183-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing of Canada, Ltd. de Havilland Division, Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada.

This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the FAA, New York Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Mr. Murry Schoenberger, Aerospace Engineer, FAA, New York Aircraft Certification Office, ANE-174, Engine and Propeller Directorate, Aircraft Certification Service, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; telephone (516) 791-7421.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-183-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

On October 1, 1986, the FAA issued AD 85-14-51-R1, Amendment 39-5440 (51 FR 36003; October 8, 1986), to require a revision of the FAA-approved Airplane Flight Manual (AFM) to prohibit takeoff, landing, and climb in the vicinity of lightning or thunderstorms; and to require continuous ignition operation during takeoffs, takeoff climb to 1500 feet above ground level (AGL), final approach, and landing within 5 nautical miles of lightning and thunderstorms. That AD was prompted by two lightning strike incidents where the engine electronic control units and associated wiring were found to be vulnerable to induced transients. This could cause engine flameout or power loss, and could adversely affect the electronic control units and propeller auto-feathering function.

Since issuance of that AD, the manufacturer has developed four modifications which, when installed (on the production line or in the field), will provide the necessary lightning strike protection to preclude unacceptable power losses during critical flight phases:

De Havilland DHC-8 Service Bulletin 8-73-7, Revision E, dated October 14, 1988, Modification No. 8/0597, describes procedures for installation of left and right shielded harness incorporating electronic control unit (ECU) and signal conditioning unit (SCU) wiring. This modification will prevent ECU and SCU malfunction due to lightning strike effects.

De Havilland DHC-8 Service Bulletin 8-71-10, Revision B, dated October 14, 1988, Modification No. 8/0598, describes procedures for installation of improved engine grounding jumpers. This modification will prevent lightning strikes from inducing high transient voltage levels on the ECU and SCU.

De Havilland DHC-8 Service Bulletin 8-72-2, Revision A, dated October 14, 1988, Modification 8/0964, describes procedures for replacement of the electrical wiring harness assembly. This modification will improve lightning strike protection by improving conductivity between conductors.

De Havilland DHC-8 Service Bulletin 8-72-4, Revision A, dated October 14, 1988, Modification 8/0813, describes procedures for installation of an SCU grounding strap on Pratt & Whitney PW120A engines. This modification will decrease susceptibility of the SCU to lightning damage.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would revise AD 85-14-51-R1 to require installation of the four modifications described above, in accordance with the service bulletins

previously mentioned. Installation of these modifications would constitute terminating action for this AD and would allow the removal of the operating limitations previously added to the AFM.

The manufacturer has advised that all four modifications have been incorporated on the production line staring with airplanes Serial Number 94. Some, but not all, of the modifications have been incorporated on earlier airplanes. Therefore, the FAA has determined that the existing AD must be revised to limit the applicability to only those airplanes up to and including Serial Number 93.

It is estimated that 40 airplanes of U.S. registry would be affected by this AD and that it would take a total of approximately 120 manhours per airplane to accomplish the required actions. Modification 8/0597 in itself would require 98 of these manhours to accomplish. Because of the extent and criticality of procedures involved in installing this particular modification, de Havilland is sending a team to the operators to perform its installation. The kits for all four modifications will be supplied to operators by de Havilland and/or Pratt and Whitney of Canada (the engine manufacturer) at no or reimbursed cost for parts and labor.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federal Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By revising AD 85–14–51–R1, Amendment 39–5440 (51 FR 36003; October 8, 1986), by revising the applicability statement, adding new paragraphs B. and D., and revising and redesignating existing paragraph B. as C., as follows:

Boeing of Canada, Ltd., de Havilland Division: Applies to Model DHC–8–100 series airplanes, Serial Numbers up to and including 93, certificated in any category. Compliance required as indicated, unless previously accomplished.

To minimize the danger of lightning transient-induced damage to the electronic engine control units, accomplish the following:

A. Prior to further flight, incorporate the following limitations into the Limitations Section of the Airplane Flight Manual. This may be accomplished by including a copy of this AD in the flight manual:

1. To preclude unacceptable loss of power during critical phases of flight, takeoff is prohibited when lightning or thunderstorms are observed or reported within 5 nautical miles of the takeoff climb path of the airplane, or when existing weather conditions may reasonably be expected to result in a lightning strike of static discharge.

2. Operating with engine ignition selected to manual is required when operating below 1500 feet AGL within 5 nautical miles of any observed or reported lightning or thunderstorms, or any weather condition that may reasonably be expected to result in a lightning strike of static discharge.

B. Within 12 months after the effective date of this amendment, install the following modifications. Installation of all four of these modifications constitutes terminating action for this AD, and the operating limitations required by paragraph A., above, may be removed from the Airplane Flight Manual.

1. Modification No. 8/0597, installation of left and right shielded harnesses incorporating electronic control unit (ECU) and signal conditioning unit (SCU) wiring, in accordance with de Havilland DHC–8 Service Bulletin 8–73–7, Revision E, dated October 14, 1988.

2. Modification No. 8/0598, installation of improved engine grounding jumpers, in accordance with de Havilland DHC–8 Service Bulletin 8–71–10, Revision B, dated October 14, 1988.

3. Modification No. 8/0964, replacement of the electrical wiring harness assembly, in accordance with de Havilland DHC–8 Service Bulletin 8–72–2, Revision A, dated October 14, 1988.

4. Modification No. 8/0813, installation of an SCU grounding strap on Pratt & Whitney PW120A engines, in accordance with de Havilland DHC–8 Service Bulletin 8–72–4, Revision A, dated October 14, 1988.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, New York Aircraft Certification Office (ANE–170), FAA, Engine and Propeller Directorate, Aircraft Certification Service.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing of Canada, Ltd., de Havilland Division, Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the FAA, New York Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

Issued in Seattle, Washington, on November 30, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

UMI

mass balance side plate assembly and the balance weight spigot. This condition, if not corrected, could lead to displacement of the side plate which could cause control surface interference and jamming of flight controls.

DATES: Comments must be received no later than February 1, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-167-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace, PLC, Service Bulletin Librarian, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Standardization Branch, ANM-113; telephone (206) 431-1565. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice or Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-167-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA), in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on certain British Aerospace (BAe) Model BAe/DH/BH/HS 125 series airplanes. There have been six reports of corrosion found in the elevator mass balance weight side plate assembly and spigot, on airplanes ranging in ages from 6 to 22 years. This condition, if not corrected, could lead to displacement of the side plate causing control surface interference and jamming of the flight controls.

British Aerospace has issued Service Bulletin No. 27-142, Revision 2, dated June 10, 1987, which describes procedures for inspection of the side plate assembly and balance weight spigot for corrosion, and repair, if necessary. The United Kingdom CAA has classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require inspection of the elevator mass side plate assembly and the balance weight spigot for corrosion, and repair, if necessary, in accordance with the British Aerospace service bulletin.

It is estimated that 420 airplanes of U.S. registry would be affected by this AD, that it would take approximately 10 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $168,000.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($400). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace (BAe), PLC: Applies to Model BAe/DH/BH/HS 125 series airplanes, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent control surface interference and jamming of flight controls, accomplish the following:

A. Within 3 years since date of airplane manufacture or within 60 days after the effective date of this AD, whichever occurs later, and thereafter at intervals not to exceed 3 years, inspect the elevator mass balance weight side plate assembly and balance weight spigot for corrosion, in accordance with BAe Service Bulletin 27-142, Revision 2, dated June 10, 1987. Any corrosion detected as a result of this inspection must be repaired prior to further flight, in accordance with the service bulletin.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace, Inc., Service Bulletin Librarian, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on November 30, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 88-NM-169-AD]

Airworthiness Directives; British Aerospace Model BAe 146 100A and 200A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to British Aerospace Model BAe 146 100A and 200A series airplanes, which would require modification of the aileron disconnect units (ADU). This proposal is prompted by reports of the ADU failing to cock and/or release when tested. This condition, if not corrected, could lead to loss of all roll control should a jam in the aileron flight control system occur.

DATES: Comments must be received no later than February 1, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-169-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Standardization Branch, ANM-113; telephone (206) 431-1565. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-169-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA), in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on British Aerospace Model BAe 146 100A and 200A series airplanes. The manufacturer reports that there have been several incidents where the aileron disconnect units (ADU) failed to cock and/or release when tested. Subsequent investigation revealed that the circlip had become displaced, allowing the cocking lever to rotate freely. This condition, if not corrected, could lead to loss of all roll control should a jam in the aileron flight control system occur.

British Aerospace has issued Service Bulletin 27-75-70212A&B, dated June 16, 1988, which describes a modification of the ADU internal mechanism to correct cocking of the unit. This modification consists of replacing the existing pin and circlip with a threaded pin, of increased diameter, and a nut. A fixed stop is secured to the base of the cam assembly to prevent over-torquing. The service bulletin refers to Normalair-Garrett, Ltd. (NGL), Service Bulletin 1224R-27-5 and 1099R-27-4 for procedures to modify the ADU mechanisms. The British CAA has classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certified in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require modification of the ADU internal mechanism in accordance with the service bulletin previously mentioned.

It is estimated that 45 airplanes of U.S. registry would be affected by this AD, that it would take approximately 2½ manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The estimated cost for the modification is $100. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $9,000.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of

VOL 53 ISS 236 DE 8 1988 UMI

compliance per airplane ($200). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to all British Aerospace (BAe) Model 146 100A and 200A series airplanes, as listed in BAe 146 Service Bulletin 27-75-70212A&B, dated June 16, 1988, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent loss of all roll control should a jam in the aileron control system occur, accomplish the following:

A. Within 120 days after the effective date of this AD, modify all Normalair-Garrett LTD (NGL) Aileron Disconnect Units, in accordance with British Aerospace Service Bulletin 27-75-70212A&B, dated June 16, 1988.

Note.—British Aerospace Service Bulletin 27-75-70212A&B references Normalair-Garrett LTD (NGL) Service Bulletins 1224R-27-5 and 1099R-27-4 for specific procedures for installation of this modification.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modification required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on November 30, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 88-NM-176-AD]

Airworthiness Directives; Lockheed Models L-188A and L-188C Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to Lockheed Models L-188A and L-188C series airplanes, which would require replacement, if necessary, of the flap asymmetry shutoff valve; inspection and replacement, if necessary, of the flap drive torque tube bearings and housings; and modification of the annunciator light wiring. This proposal is prompted by reports of flap asymmetry. This condition, if not corrected, could lead to control difficulties at low altitude on takeoff or landing.

DATE: Comments must be received no later than February 1, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-176-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Lockheed Aeronautical Systems Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Order Administration, Dept. 65-33, U-33, B-1. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 3229 East Spring Street, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. William Roberts, Aerospace Engineer, Airframe Branch, ANM-121L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (213) 988-5228.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-176-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

Operators of Lockheed Models L-188A and L-188C series airplanes have reported several cases of flap asymmetry. Investigation has revealed that this asymmetry has resulted from spline disengagement and the failure to provide the required information to the cockpit. This condition can result from several sources: (1) A new universal joint that was introduced on these airplanes lacks the necessary stop to center the spline; (2) the tolerance for centering the splines is too loose; (3) wear of bearing and housings can contribute to disengagement; and (4) once asymmetry occurs, annunciation to the cockpit does not always occur when the shutoff valve that triggers the warning light malfunctions, either through failure of the valve or slow response of the valve. Such flap asymmetry is a critical flight safety problem because of its occurrence at low altitude, its sudden onset, and when coupled with lack of cockpit warning.

the difficulty it presents to the pilot to determine what has occurred.

The FAA has reviewed and approved Lockheed Operator Letter PCS/87–516573–OL, dated July 24, 1987, which describes modification of the flap asymmetry system, including a change in the flap asymmetry warning light logic, installation of an improved flap asymmetry shut off valve, and replacement of flap drive torque tube bearings and housings.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require inspection of the flap universal joints to determine if they are splined without a stop, and replacement, if necessary; repetitive inspections of the flap asymmetry universal joints torque tube bearings and housings for wear or out-of-tolerance conditions, and repair or replacement, if necessary, in accordance with the Lockheed operator letter previously mentioned; and modification of the flap asymmetry annunciator light wiring.

There are approximately 110 Lockheed Model L–188 series airplanes operated in the worldwide fleet. It is estimated that 60 airplanes of U.S. registry would be affected by this AD, that it would take approximately 120 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $288,000.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any small entities operate Model L–188A or L–188C airplanes. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Lockheed Aeronautical Systems Company: Applies to Lockheed Model L–188A and L–188C series airplanes, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent airplane control difficulties due to flap asymmetry, accomplish the following:

A. Within 90 days after the effective date of this AD, inspect the flap universal joints to determine if they are splined without a stop. (Note: Flap universal joints that are splined without a stop are easily detected by the lack of a screw and washer that holds the pins in place.) If they do not have a stop, accomplish one of the following:

1. Remove from service any flap universal joints that are splined without a stop and install universal joints that are splined with a stop; or

2. Cut a circumferential groove into the splines of the torque tube shafts on each side of the universal joints (1 inch from the end of the shaft) and install a snap ring in a manner approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region. The snap ring is to eliminate the possibility of spline disengagement. The snap ring should completely encircle the shaft.

B. Within 90 days after the effective date of this AD and thereafter at intervals not to exceed one year, accomplish the following:

1. Inspect the flap asymmetry universal joints, torque tube bearings, and housings for out-of-tolerance, wear, and spline engagement in accordance with the Lockheed Electra L–188 Maintenance Manual, Controls, Wing Flap, Section 27–6–8, Figure 201, dated October 15, 1961. Repair or replace any worn or out-of-tolerance components before further flight. Spline engagement at BL55 must be 5.50 to 5.87 inches.

2. Inspect the wing flap asymmetry shutoff valves to ascertain that the valves do not hang up or respond slowly. If the valves hang up or respond slowly (greater than 1 second), prior to further flight, repair in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region, or replace in accordance with Lockheed Operator Letter PSC/87–516573–OL, dated July 24, 1987. Replacement constitutes terminating action for the repetitive inspections required by this paragraph.

C. Within 90 days after the effective date of this AD, rewire the annunciator light in the cockpit in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region, so that the light will illuminate when the asymmetry detector is tripped and not be dependent on the shutoff valve.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance inspector (PMI), who may add any comments and then send it to the Manager, Los Angeles Aircraft Certification Office.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a base to accomplish the actions required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Lockheed Aeronautical Systems Company, P.O. Box 551, Burbank, California 91520, Attn: L–188 Commercial Support Contracts, Dept. 63–11, Unit 33. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 3229 East Spring Street, Long Beach, California.

Issued in Seattle, Washington, on November 30, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM–103, Attention: Airworthiness Rules Docket No. 88–NM–166–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

The Luftfartsverket (LFV), which is the airworthiness authority of Sweden, has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist on certain SAAB-Scania Model SF–340A series airplanes. There has been a report that, during production of some of these airplanes, the fuel system optical sensor jumper assemblies were not installed. This condition, if not corrected, could result in arcing in the fuel tank in the event of a lightning strike.

SAAB-Scania has issued Service Bulletin SF 340–28–996, dated March 23, 1988, which describes the defueling and inspection procedures that are required to determine if the midlevel and tank-full optical sensor jumper assemblies have been installed. Installation procedures are provided if the jumper assemblies are not installed. The LFV has classified this service bulletin as mandatory, and has issued an airworthiness directive, SAD No. 1–025, dated March 24, 1988, addressing this subject.

This airplane model is manufactured in Sweden and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require inspection to determine if the midlevel and tank-full optical sensor jumper assemblies have been installed, and installation of the jumper assemblies if they are missing.

The proposed rule applies only to airplanes equipped with the "optical sensors." The optical sensor is identified as having a circular window. No action is required if the "mechanical float" switch has been installed. The mechanical float switch is identified as having an elongated hole. The part number may not be visible; therefore, identification may necessitate visual inspection of the size and shape of the window.

It is estimated that 41 airplanes of U.S. registry would be affected by this AD, that it would take approximately 8 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $13,120.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($320). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

SAAB-Scania: Applies to Model SF–340A series airplanes, serial numbers 003 through 106, certificated in any category, except those airplanes equipped with mechanical float switches. Compliance is required as indicated below, unless previously accomplished.

To prevent the potential for arcing in the fuel tanks should a lightning strike occur, accomplish the following:

A. Within 30 days after the effective date of this AD, conduct an inspection to determine if the jumper assemblies are fitted to the midlevel and tank full optical sensors, in accordance with SAAB Service Bulletin SF340–28–006, dated March 23, 1988.

B. If optical sensor jumper assemblies have not been installed, prior to further flight, install jumper assemblies and check resistance, in accordance with SAAB Service Bulletin SF340–28–006, dated March 23, 1988.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM–113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to SAAB-Scania Aircraft Division, Product Support, S–58188, Linkoping, Sweden. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on November 30, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 931

Surface Coal Mining and Reclamation Operations Under the Federal Lands Program; State-Federal Cooperative Agreement; New Mexico

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: The State of New Mexico is proposing to amend the cooperative agreement between the Department of the Interior and the State of New Mexico for the regulation of surface coal mining and reclamation operations on Federal lands in New Mexico under the permanent regulatory program. The proposed amendment would add the Archaeological Resources Protection Act of 1979 to the list of other applicable laws for permit coordination in Appendix A of the agreement. Cooperative agreements are provided for under section 523(c) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This notice of proposed rulemaking provides information on the proposed change to the cooperative agreement. The amendment revises the cooperative agreement concerning the regulation of coal mining and reclamation operations on Federal lands within the State to be consistent with the revised Federal regulations regarding Historic Preservation.

DATES: *Written comments:* OSMRE will accept written comments on the proposed rule until 4:00 p.m. January 9, 1989. Comments received after the close of the comment period will not necessarily be considered.

Public Hearing: If requested, a public hearing on the proposed modification will be held on January 3, 1989, beginning at 10:00 a.m. at the location shown below under "**ADDRESSES.**"

ADDRESSES: *Written comments:* Mail or hand deliver to: Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue SW., Suite 310, Albuquerque, New Mexico 87102.

Public Hearing: The New Mexico Capitol Building, Santa Fe, New Mexico 87503.

Request for public hearing: Submit orally or in writing to the person and address specified under "**FOR FURTHER INFORMATION CONTACT.**"

See "**SUPPLEMENTARY INFORMATION**" for addresses where copies of the proposed New Mexico amendment to the cooperative agreement and administrative record on the New Mexico program are available. Each requester may receive, free of charge, one single copy of the proposed amendment by contacting the OSMRE Albuquerque Field Office listed above.

FOR FURTHER INFORMATION CONTACT: Mr. Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue SW., Suite 310, Albuquerque, New Mexico 87102; Telephone: (505) 766–1486.

SUPPLEMENTARY INFORMATION:

I. Availability of Copies
II. Public Comment Procedures
III. Background
IV. Proposed Amendment
V. Procedural Matters

I. Availability of Copies

Copies of the proposed New Mexico amendment to the cooperative agreement, the New Mexico program, and the administrative record on the New Mexico program are available for public review and copying at the OSMRE offices and the office of the State regulatory authority listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m., excluding holidays:

Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, New Mexico 87102; Telephone: (505) 766–1486.

Office of Surface Mining Reclamation and Enforcement, 1100 L Street NW., Room 5215, Washington, DC 20240; Telephone: (202) 343–5492.

New Mexico Energy and Minerals Department, Mining and Minerals Division, 525 Camino de los Marquez, Santa Fe, New Mexico 87501; Telephone: (505) 827–5970.

II. Public Comment Procedures

Written Comments

Written comments should be specific, pertain only to that issue proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "**DATES**" or at locations other than Albuquerque, New Mexico, will not necessarily be considered and included in the Administrative Record for this final rulemaking. Where practicable, commenters should submit three copies of their comments (See "**ADDRESSES**").

Public Hearing

Persons wishing to comment at a public hearing should contact the person listed under "**FOR FURTHER INFORMATION CONTACT**" by the close of business December 23, 1988. If no one requests to comment at a public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Individuals wishing to attend, but not testify at the hearing should contact the person identified under "**FOR FURTHER INFORMATION CONTACT**" beforehand to verify that the hearing will be held.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will also allow

OSMRE officials to prepare appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment, have been heard.

Public Meeting

Persons wishing to meet with OSMRE representatives to discuss the proposed amendment may request a meeting at the OSMRE office listed in "**ADDRESSES**" by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**"

All such meetings are open to the public, and if possible, notices of meeting will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

III. Background

On February 9, 1981, the State of New Mexico requested a cooperative agreement between the Department of the Interior and the State of New Mexico to give the State primacy in the administration of its approved regulatory program of Federal lands in New Mexico. The Secretary approved the cooperative agreement effective December 20, 1982 (47 FR 56800). The text of the existing cooperative agreement can be found at 30 CFR 931.30.

On February 10, 1987, OSMRE promulgated revised regulations (52 FR 4244) concerning the consideration which must be accorded historic properties during the permitting of surface coal mining operations. Specific to this proposed amendment, OSMRE revised 30 CFR 773.12 to require that where Federal lands are involved, each regulatory program shall provide for the coordination of review and issuance of permits for surface coal mining and reclamation operation with applicable requirements of the Archaeological Resources Protection Act of 1979.

On June 9, 1987, OSMRE notified New Mexico (Administrative Record No. NM–361) of the change to 30 CFR 773.12 and the need for a corresponding amendment pursuant to 30 CFR 732.17(d). The State responded on October 16, 1987 (Administrative Record No. NM–388), and indicated its intent to modify the existing cooperative agreement to satisfy OSMRE's requirement to amend the State program.

IV. Proposed Amendment

On September 12, 1988, the State of New Mexico submitted to OSMRE a proposed amendment (Administrative Record No. NM–443) to its approved cooperative agreement under the permanent regulatory program. The proposed amendment consists of the addition of the Archaeological Resources Protection Act of 1979 to the list of other applicable laws for permit coordination in Appendix A of the agreement. There are now other changes proposed to the document.

V. Procedural Matters

Executive Order No. 12291 and the Regulatory Flexibility Act

On July 12, 1984, the Department of the Interior received from the Office of Management and Budget (OMB) an exemption for State-Federal cooperative agreements from the requirements of sections 3 and 7 of Executive Order 12291.

The Department has reviewed this proposed agreement in light of the Regulatory Flexibility Act (Pub. L. 96–354). Having conducted this review, the Department has determined that this document will not have a significant economic effect on a substantial number of small entities because no significant departure from either the State or Federal requirements already in effect will occur and no new or additional information will be required by the proposed agreement.

Paperwork Reduction Act

This proposed amendment to the New Mexico Cooperative Agreement does not contain information collection requirements which require clearance from the OMB under 44 U.S.C. 3507.

National Environmental Policy Act

Proceedings relating to adoption or amendment of a State-Federal cooperative agreement are part of the Secretary's implementation of the Federal lands program pursuant to section 523 of the Act. Such proceedings are exempt under section 702(d) of the Act from the requirements to prepare a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

Author

The author of this regulation is Mr. Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, New Mexico 87102, Telephone: (505) 766–1486.

List of Subjects in 30 CFR Part 931

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

James E. Cason,

Deputy Assistant Secretary, Land and Minerals Management.

Date: November 30, 1988.

Accordingly, it is proposed to amend 30 CFR Part 931 as set forth below:

PART 931—NEW MEXICO [AMENDED]

1. The authority citation for Part 931 is revised to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. In § 931.30, State-Federal Cooperative Agreement, Appendix A is amended by redesignating items 14 and 15 as items 15 and 16, respectively, and adding new item 14 to read as follows:

§ 931.30 State-Federal cooperative agreement.

* * * * *

Appendix A

* * * * *

14. The Archaeological Resources Protection Act of 1979.

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD13 88–09]

Security Zone; Sinclair Inlet, WA

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The Coast Guard is considering a proposal to establish a security zone in the waters of Sinclair Inlet immediately adjacent to the Puget Sound Naval Shipyard Bremerton, Washington. This action is necessary to safeguard U.S. Naval vessels from sabotage or other subversive acts, accidents, or other incidents of a similar nature while they are moored or in drydock at the shipyard. This security zone will provide protection to these vessels by prohibiting access to the waters around the shipyard except by certain authorized vessels, and by providing a sufficient area in which to detect unauthorized intrustions in time

to allow appropriate security measures to be taken.

DATES: Comments must be received on or before January 23, 1989.

ADDRESS: Comments should be mailed to Commander (mps), Thirteenth Coast Guard District, Federal Building, 915 Second Avenue, Seattle, WA, 98174–1067. The comments and other materials referenced in this notice will be available for inspection and copying at this address. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand delivered to this address.

FOR FURTHER INFORMATION CONTACT: CDR W. O. Harper, (206) 442–1711.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD13 88–09) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self addressed postcard or envelope is enclosed. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are CDR W.O. Harper, Project Officer, Port and Vessel Safety Branch, Thirteenth Coast Guard District, and LCDR L. I. Kiern, Project Attorney, Legal Office, Thirteenth Coast Guard District.

Discussion of Proposed Regulations

After a review of Puget Sound Naval Shipyard's physical security, the Commanding Officer, Puget Sound Naval Shipyard requested the Coast Guard Captain of the Port, Puget Sound to establish a security zone around the shipyard's active piers and drydocks. Two restricted zones established by the U.S. Army Corps of Engineers at 33 CFR 207.750(k) already exist in the Sinclair Inlet. One zone restricts certain sized vessels from the entire inlet and the second zone restricts vessels from the shipyard waterfront. The proposed security zone overlaps portions of the waters covered by these existing restricted areas. The Coast Guard has concluded that a security zone is warranted and appropriate because the security zone is intended for the protection of assets which are vital to the national interest. Vessels moored or drydocked at the shipyard can easily be approached from the water and are vulnerable to acts of sabotage. Regulating access to the water areas around the Shipyard provides a means of countering this threat without unnecessarily interfering with the public's use of the waterway.

The security zone will keep unauthorized persons and vessels away from the vessels at the shipyard and will allow early detection of unauthorized entry. Yet, it will not significantly interfere with navigation of Sinclair Inlet. This security zone will be limited to water areas only. Present laws and regulation give the Commanding Officer, Puget Sound Naval Shipyard authority to restrict access to the shipyard's property and to deal with trespassers within the shipyard.

This proposal will exempt certain categories of vessels from some or all of the restrictions imposed by the security zone. Such exemptions will be granted where the Captain of the Port and Commanding Officer, Puget Sound Naval Shipyard have agreed that access to the shipyard does not pose a threat to the safety or security of the shipyard and is in the national interest. (Persons aboard exempted vessels also may enter the security zone without the permission of the Captain of the Port.)

Other persons who desire to enter the security zone will be required to request and receive authority for themselves and their vessels to enter or operate within the security zone from the Captain of the Port Puget Sound via the Security Office of the Puget Sound Naval Shipyard at Bremerton, WA.

This proposal preserves the Coast Guard's existing authority to control the movement of vessels and individuals on the waters subject to the jurisdiction of the United States, including those vessels and persons that are permitted to enter or remain within the security zone without the specific permission of the Captain of the Port. This authority is restricted by law to actions taken to prevent injury to vessels, waterfront facilities, or the waters of the United States, or to secure the observance of the rights and obligations of the United States. The reservation of this authority is necessary to ensure the Coast Guard has the ability to take prompt and adequate enforcement action within the security zone if a threat to the national security or the safety of any vessel arises. The reservation of this authority is not intended to, and should not, obstruct or hinder the ability of the Commanding Officer, Puget Sound Naval Shipyard to conduct operations at the yard. The authority of the Coast Guard that has been reserved by this proposal is no greater than the authority the Coast Guard has over vessels and individuals at other waterfront facilities, including commercial shipyard and dock facilities.

The Coast Guard does not intend to require the use of Port Security Cards or other special credentials for persons authorized to operate within the security zone, other than the certificate of exemption required for persons and vessels entering or operating within the security zone.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 CFR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The area affected by this security zone is already restricted to navigation by the restricted zones referred to above. Even in the absence of the restricted zones, the interests affected will be primarily recreational, and the loss of the use of this part of the Inlet should not affect their use of other parts of the Inlet for navigation or other purposes except in a very minor way. Special consideration was given to the Port Orchard passenger ferry route when the boundaries of this zone were developed. The zone does not interfere with that route.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial numbert of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 165 of Title 33, Code of Federal Regulations as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

VOL 53 ISS 236 DE 8 1988 UMI

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

2. Section 165.1303 is added to read as follows:

§ 165.1303 Puget Sound Naval Shipyard Bremerton, WA.

(a) *Location.* The following is a security zone: The waters of the Sinclair Inlet encompassed by a line commencing on the north shore of Sinclair Inlet at latitude 47°33′40″; longitude 122°37′29″W; thence to latitude 47°33′35″N, longitude 122°38′28W″; thence to latitude 47°33′21″N, longitude 122°37′37″W; thence to latitude 47°33′02″N, longitude 122°38′26″W; thence to latitude 47°33′02″N, longitude 122°38′40″W; thence to the shoreline at latitude 47°33′23″N, longitude 122°38′40″; thence easterly along the shoreline to the point of origin.

(b) *Special regulations.* (1) Section 165.33 paragraphs, (a), (e), and (f) do not apply to the following vessels or individuals on board those vessels:

(i) Public vessels of the United States.

(ii) Vessels that are performing work at Puget Sound Shipyard pursuant to a contract with the United States Navy which requires their presence in the security zone.

(iii) Any other vessels or class of vessels mutually agreed upon in advance by the Captain of the Port and Commanding Officer, Puget Sound Naval Shipyard. Vessels operating in the security zone under this exemption must have previously obtained a copy of a certificate of exemption permitting their operation in the security zone from the Security Office, Puget Sound Naval Shipyard Bremerton, WA. This written exemption shall state the date(s) on which it is effective and may contain any further restrictions on vessel operations within the security zone as have been previously agreed upon by the Captain of the Port and Commanding Officer, Puget Sound Naval Shipyard. The certificate of exemption shall be maintained on board the exempted vessel so long as such vessel is operating in the security zone.

(2) Other vessels desiring access to this zone shall secure permission from the Captain of the Port through the Security Office of the Puget Sound Naval Shipyard Bremerton, WA. The request shall be forwarded in a timely manner to the Captain of the Port by the appropriate Navy official.

(c) *Enforcement.* The U.S. Coast Guard may be assisted in the patrol and monitoring of this security zone by the U.S. Navy.

Dated: November 23, 1988.

R.E. Kramek,

Rear Admiral, U.S. Coast Guard, Commander, Thirteenth Coast Guard District.

BILLING CODE 4910–14–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 4100

[AA–220–08–4322–02]

Grazing Administration Exclusive of Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: This proposed rule would revise § 4110.4–2(a) to allow the authorized officer, in his or her discretion and on a case-by-case basis, to permit livestock grazing preferences to continue unchanged despite a reduction in the acreage available for livestock grazing. The current regulation provides that the authorized officer must cancel or suspend a grazing preference when acreage is lost. This action is being considered in response to several stated concerns that the current regulation is restrictive in that cancellation or suspension, in some cases, serves no purpose. The proposed revision would allow the grazing preference on those allotments where there is a decrease in the public land available for livestock grazing, to be cancelled, suspended or remain unchanged where there is sufficient forage available, as determined by the authorized officer, to maintain the grazing preference authorized prior to the decrease in land available.

DATE: Comments should be submitted by February 6, 1989. Comments not received by the above date may not be considered in the decisionmaking process or issuance of a final rulemaking.

ADDRESS: Comments should be sent to: Director (140), Bureau of Land Management, Room 5555, Main Interior Building, 18th & C Streets, NW., Washington, DC 20240. Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Billy R. Templeton, (202) 653–9193.

SUPPLEMENTARY INFORMATION: This proposed rulemaking would provide the authorized officer discretion on a case-by-case basis to maintain, cancel or suspend a grazing preference where there is a reduction in the acreage available for livestock grazing.

The existing regulation at § 4110.4–2(a) requires that where there is a decrease in public land acreage available for livestock grazing use within an allotment, grazing permits or leases and grazing preferences must be canceled in whole or in part. However, in certain circumstances, the public land acreage lost to livestock grazing may be very small and the remaining acreage in the allotment may produce sufficient forage for livestock to maintian the grazing preference. In other situations, the land may be committed to a mining operation and later again be available for livestock grazing when the mining operation is completed and the land rehabilitated. For these reasons, in recognition of range administration purposes, the existing regulations would be revised to deal more equitably with the livestock grazing permittees and lessees. Rather than be required to cancel a grazing preference, the authorized officer should have the authority to make a determination that takes into account the level of available forage for livestock and the magnitude of the change in public land acreage.

The principal author of this proposed rulemaking is Billy R. Templeton of the Division of Rangeland Resources, assisted by staff of the Division of Legislation and Regulation Management.

It is hereby determined that this proposed rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to secion 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This rule does not contain information colleciton requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

List of Subjects in 43 CFR Part 4100

Administrative practice and procedure, Grazing lands, Livestock, Penalties, Range management, Reporting and recordkeeping requirements.

PART 4100—GRAZING ADMINISTRATION—EXCLUSIVE OF ALASKA

Subpart 4110—Grazing Management

1. The authority citation for Part 4100 continues to read as follows:

Authority: 43 U.S.C. 315, 315a–315r, 1701 *et seq.*, 1182d, and 98 Stat. 1837.

2. Section 4110.4–2, paragraph (a) is proposed to be revised to read as follows:

§ 4110.4–2 Decrease in land acreage.

(a) Where there is a decrease in public land acreage available for livestock grazing within an allotment:

(1) Grazing permits or leases may be canceled, suspended or modified as appropriate to reflect the changed area of use.

(2) Grazing preference may be cancelled or suspended in whole or in part, as determined necessary by the authorized officer through standard range analysis and/or study methods, to protect the remaining public lands. Cancellations or suspensions will be apportioned as agreed upon among authorized users or, in the event of failure to reach agreement, will be equitably apportioned among authorized users or, in the event of failure to reach agreement, will be equitably apportioned among authorized users by the authorized officer.

* * * * *

James E. Cason,

Acting Assistant Secretary of the Interior.

October 6, 1988.

BILLING CODE 4310–84–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

45 CFR Parts 1304 and 1306

Head Start Program

AGENCY: Office of Human Development Services (OHDS), DHHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: This Notice of Proposed Rulemaking (NPRM) requests comments from the public on a new part, 45 CFR Part 1306, entitled Head Start Staff Requirements and Program Options. Head Start grantees may operate various types of Head Start programs, e.g., center-based or home-based programs. This Part consolidates and clarifies existing regulations and policies regarding Head Start program staffing patterns and qualifications and proposes new requirements regarding Head Start program staff. It also consolidates and clarifies existing regulations and policies regarding Head Start program options. It proposes specific new requirements for hours and days of program operations and class size.

Specifically, it proposes that local grantees have appropriate and qualified staff and volunteers in their programs; provide appropriate training for staff and volunteers; implement program option(s) based on the needs of the community; implement the options in conformance with all Performance Standards and other program regulations and policies; operate their programs to provide at least a minimum number of hours and days of direct services to children and parents; and maintain appropriate class sizes and number of families per home visitor.

The purpose of the proposed rule is to further ensure the quality and the long range effectiveness of the services being provided to children and families by the Head Start program.

DATE: In order to be considered, comments on this proposed rule must be received on or before February 21, 1989.

ADDRESS: Please address comments to: Elizabeth Strong Ussery, Associate Commissioner, Head Start Bureau, Administration for Children, Youth and Families, P.O. Box 1182, Washington, DC 20013.

It would be helpful if agencies and organizations would submit their comments in duplicate. Beginning 14 days after close of the comment period, comments will be available for public inspection in Room 5755, 400 6th Street, SW., Washington, DC 20201, Monday through Friday between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Terry R. Lewis, 202–755–7787.

SUPPLEMENTARY INFORMATION:

I. Program Purpose

Head Start is a national program providing comprehensive developmental services primarily to low-income preschool children, age three to the age of compulsory school attendance, and their families. To help enrolled children to achieve their full potential, Head Start programs provide comprehensive health, nutritional, educational, social and other services. In addition, Head Start programs are required to provide for the direct participation of parents of enrolled children in the development, conduct, and direction of local programs. In FY 1987, Head Start served 446,523 children through a network of 1,290 grantees and 620 delegate agencies, each of which has an approved written agreement with the grantee to operate a Head Start program.

While Head Start is targeted primarily on children whose families have incomes at or below the poverty line or are eligible for public assistance, Head Start regulations permit up to 10 percent of the Head Start children in local programs to be from families who do not meet these low-income criteria. Head Start also requires that a minimum of 10 percent of the enrollment opportunities in each State be made available to handicapped children. Such children are expected to be enrolled in the full range of Head Start services and activities in a setting with their non-handicapped peers and to receive necessary special education and related services.

The Head Start program presently operates with two paid staff (one teacher and one aide) and, whenever possible, a volunteer in each classroom. Appropriate training is provided to staff and program volunteers.

Head Start programs may currently operate one or more of five program options:

Standard Head Start operates for five days per week and can be part day or full day.

Variations in Center Attendance operate for four days or less per week.

Double sessions operate with a teacher who works with two groups of children, one in the morning and one in the afternoon.

Home-based programs provide weekly home visits to the child's parents and have an organized socialization experience for a small group of children approximately once each month.

Locally designed options are programs designed to meet the unique needs of the local community, and are operated with special approval from the Administration for Children, Youth and Families (ACYF).

II. Purpose of the NPRM

The purpose of this proposed rule is to ensure that Head Start programs maintain levels of quality that will continue to promote long range benefits to children and families. The proposed program staffing requirements have been developed to assure that Head Start children are being served by qualified staff. The requirements regarding program options have been developed to identify the levels of service that grantees must provide to children and parents in operating a Head Start program.

In addition, as required by section 108 of Pub. L. 98–558, these proposed additions and revisions to the Head Start regulations do not result in the elimination of, or any reduction in, the scope or types of health, education, parent involvement, social or other services required to be provided under the Performance Standards in effect on November 2, 1978.

ACYF is proposing that this NPRM supercede some existing Head Start regulations and policies. Other Head Start regulations and policies are incorporated or recodified within the NPRM. The Redesignation Table found in section VI. of the Preamble specifies the superceded regulations and policies. It also identifies new requirements.

III. Data Used in the Development of the NPRM

Background

This NPRM proposes new requirements regarding program staffing and options, including staffing patterns, staff qualifications, staff and volunteer training, hours and days of operation and class size as a new Part 1306, Head Start Staff Requirements and Program Options. Research and other data indicate that the program variables addressed in this Notice of Proposed Rulemaking (NPRM) directly affect program quality and the number of children that can be served on an annual basis.

Basis for Change

The changes proposed in this NPRM are a result of findings from research studies, data from Head Start information systems and current information regarding effective early childhood education programs.

Research

The National Day Care Study (Abt Associates, 1980) addresses the issues of teacher qualifications and class size. There is evidence that children in programs with staff trained in early childhood education and development had better relationships with the teacher, were able to complete more projects and showed significant gains in skills and knowledge.

This Study also reported the advantages of preschool classrooms with smaller group sizes. Teachers engaged in more social interaction with children and less passive observation of activities. Children in smaller groups made greater gains on tests of cognitive skill, showed more cooperative behavior with peers, more verbal initiative in giving opinions, providing information, stating preferences and exhibited more reflective or innovative behavior in play or in assigned tasks. In addition, children showed fewer negative behaviors of hostility or conflict with others and were less likely to wander aimlessly around the classroom or to be uninvolved in activities.

A number of studies indicate that longer hours of service produce more and longer lasting gains for children (Head Start Synthesis Project, 1985; Head Start Measures Project, 1987). The 1985 Head Start Measures Project indicated that the effectiveness of the program depended on the time that children and teachers were engaged in learning activities. The 1969 Westinghouse Study showed that summer programs (approximately 240 hours of services per year per child) provide insufficient contact with children and families to result in long range benefits.

Based on this information, on the experience of the agency and on general practice in child development programs, a minimum number of hours of service was determined.

The Home Start Evaluation Study (1976) was implemented to review the methodology and effectiveness of home-based programs. That study found home-based programs effective when home visitors worked with 10 to 11 families. When home visitors worked with more than 12 families, however, home visits were made less frequently resulting in a decline in children's development in the areas of school readiness and language development.

Head Start Information Systems

There are two relevant Head Start data collection systems. The Head Start Program Information Report (PIR) provides program information on actual Head Start services provided to children and families. The Head Start Cost Analysis System (HSCOST) provides information on planned program design and cost. Combined, the two data bases provide information on both the efficiency and effectiveness of individual Head Start programs. These systems provided information that was used as a basis for raising issues and posing questions regarding the implementation of the Head Start program. The exploration of these issues resulted in this proposed rule.

Both data sources highlight differences among programs and regions. They provide information regarding such variables as class size, hours of service and program option being implemented:

Currently, the average class size in Head Start is 18 children. The range is 12 to 22 children.

Across the nation, the average center-based Head Start grantee offers a program of approximately 718 hours of service per child per year, but the variation among regions and programs is great. Full day programs offer an average of 1,223 hours per year to approximately 18% of the children served nationally. Programs implementing the variations in center attendance option offer an average of 544 service hours annually to 15% of the children. Part day programs offer an average of 734 hours per year to 32% of all Head Start children. Part day and variation programs that operate double sessions offer an average of 475 hours per year to 26% of all Head Start children. Home-based programs provide approximately 129 hours of service per year to 8% of the children.

The questions raised by these variations revolve around what is adequate in terms of:

- Providing effective services resulting in long range benefits to children and families, and,
- Operating as efficiently as possible so as to be able to serve as many children as possible.

Current Information From the Field of Early Childhood Education

Because research findings are often not definitive, early childhood professionals have long recognized and endorsed "best practices" as developmentally appropriate for young children and their families. Opinions and ideas regarding the effectiveness and efficiency of Head Start were solicited from professionals in the field of early childhood education and Head Start. These professionals include Head Start grantee and delegate agency staff (directors, education coordinators, teachers, etc.), training and technical assistance providers and the National Head Start Association Board of Directors and members (a national organization representing Head Start directors, parents, staff and friends). The contents of this rule regarding hours of service, staffing and options reflect the comments and ideas offered by the professionals and others in the early childhood education field.

In addition, the National Association for the Education of Young Children, a national organization that represents early childhood professionals, has developed *Accreditation Criteria and Procedures of the National Academy of Early Childhood Programs* (NAEYC, 1984) to which we looked for guidance. The Academy's *Criteria* confirm that low enrollment limits and trained staff

VOL 53 ISS 236 DE 8 1988 UMI

are important to the success of any preschool program.

We have focused our efforts in four major areas:

1. *Program Flexibility.* One of the strengths of Head Start is that local programs have the flexibility to design the program to meet specific community needs. The result of this flexibility is that there is a wide variation in the manner in which local Head Start programs are implemented, which is generally a tribute to the ingenuity of Head Start program operators. The intent of this NPRM is to retain that flexibility, within parameters that protect program quality, by setting minimums or ranges on those program variables that affect long range benefits to children and families.

2. *Program Options.* ACYF is proposing that this NPRM incorporate into a new Part 1306, Appendix A of 45 CFR Part 1304, Program Options for Project Head Start. The NPRM also revises the program options requirements based on the need to relate program goals and design to community needs and on the need for sufficient hours and days of program operations. The NPRM also further specifies the various program options available to local Head Start programs and consolidates in one place all the information on each option which is presently scattered throughout Head Start requirements, manuals and other policy issuances.

3. *Hours and Days of Operation.* Based on data cited above, ACYF proposes to set minimum hours and days of operation for both the center-based and home-based program options. The specific requirements for each program option include days of planned classroom operation, number of group socialization activities and number of home visits to be made by the teaching staff or home visitors.

Currently, the frequency and length of this contact time vary tremendously across the country and among regions. Some programs operate for a number of hours that is insufficient to provide an adequate amount of contact between the program and the child and family. This NPRM will require that those programs increase the amount of contact time being provided.

4. *Class Size.* ACYF proposes to specify the minimum, maximum and average grantee class sizes that are acceptable for Head Start based on the ages of the children being served and the type of center-based program option being implemented. These proposed requirements are fully consistent with research findings regarding group size (Abt, 1980), the recommendations of early childhood professionals and information on current good practices (NAEYC, 1984).

IV. Section by Section Discussion of the NPRM

Subpart A

Subpart A, General, of the NPRM sets forth the purpose and scope of the proposed rule, proposes an effective date and provides definitions of terms used. Subpart A also indicates that the rule is not applicable to the 35 existing Parent Child Center programs which serve children below the age of three.

In § 1306.2, we propose to allow current grantees two years to come into compliance with the staff qualification requirements and at least 180 days to come into compliance with the program option requirements. New grantees must meet all requirements of the final rule at the time they are funded.

Subpart B

Subpart B, Head Start Program Staffing Requirements, sets forth program staffing requirements for all Head Start grantees and delegate agencies regardless of the program option being implemented. This subpart consolidates and clarifies existing staffing requirements and introduces new requirements regarding staff qualifications.

Section 1306.20 Program Staffing Patterns.

Section 1306.20 specifies that center-based programs must employ two staff persons responsible for each classroom (a teacher and a teacher aide) and must have a volunteer in the classroom whenever possible. Home-based programs must employ home visitors. Both classroom staff and home visitors must be able to communicate with the families they serve and must be familiar with the ethnic background of those families.

These requirements are designed to assure that sufficient adults are available so that children in the classroom can be provided with individualized attention. They are also designed to assure that families that participate in the home-based program will receive the individualized attention needed to meet the needs of the parents and children in that family.

Section 1306.21 Staff Qualification Requirements.

Section 1306.21 specifies, for the first time, staff qualification requirements for classroom staff and home visitors. The competence of the Head Start teacher and home visitor is one of the most important determinants of the success of the program. It is the training and experience of this staff that enables them to provide high quality and age appropriate experiences to children. Accordingly, ACYF proposes to require a minimum level of training for teachers prior to being put in charge of a classroom and for home visitors prior to being put in charge of a group of home based families. One way to meet these requirements is to hire teachers and home visitors with Child Development Associate (CDA) credentials. Individuals with CDAs have demonstrated their competence in working in center- or home-based child development programs.

The Administration for Children, Youth and Families encourages public comment on those activities and efforts that will be needed to insure that qualified teachers and home visitors are available to fill vacant positions. We are particularly interested in ways programs could provide training or help persons obtain the credentials necessary to become home visitors. Possible approaches might include hiring staff as home visitors trainees or providing training to staff currently employed in other positions.

Section 1306.22 Volunteers.

Current Head Start policies in the Head Start Manual of Policies and Instructions regarding volunteers are incorporated in § 1306.22. The proposed regulation requires that all programs have a system for actively encouraging volunteer participation and that special efforts must be made to have volunteer participation, especially parents, in the classroom. Volunteer participation must be organized so that there are specific opportunities to work at meaningful tasks both within the classroom and in other program and administrative areas.

Section 1306.23 Training.

Current Head Start regulations regarding staff and volunteer training are found in 45 CFR Part 1304, Appendix A. These requirements are incorporated in § 1306.23 of the proposed regulations.

Subpart C

Subpart C, Head Start Program Options, sets forth the proposed requirements regarding the direct service options that can be implemented by Head Start grantees and delegate agencies. It supercedes existing requirements found in 45 CFR Part 1304, Appendix A. The requirement at Appendix A, developed prior to the promulgation of 45 CFR Part 1304, the Head Start performance standards,

VOL 53 ISS 236 DEC 8 1988 UMI

contained a number of requirements related to parent involvement, education services, social services, nutrition and other Head Start components. These component requirements are being deleted as they are covered by the Head Start performance standards. These deletions are not to be interpreted as a de-emphasis on any Head Start program component.

The subpart details ranges of acceptable operations in regard to class size and hours and days of operation for each of the options.

Section 1306.30 Provision of Comprehensive Child Development Services.

This section incorporates existing requirements found in 45 CFR Part 1304, Appendix A, section A. It requires that grantees provide comprehensive child development services to all children enrolled in the program, meet the Head Start Performance Standards, provide classroom or home-based group socialization experiences for all children, provide home visits to all parents and utilize community resources to the greatest extent possible.

We are proposing a new requirement in § 1306.30(c) that the facilities for regularly scheduled center-based classroom or home-based group socialization activities must meet State and local licensing standards. Depending on various State and local licensing standards, this may include classrooms, outdoor play areas or, in some cases, homes. This new requirement is proposed to further ensure the health and safety of the Head Start children being served. In cases where no State and local licensing standards are applicable or where these licensing standards are less comprehensive than Head Start regulations, programs are required to assure that their facilities are in compliance with the Head Start Performance Standards related to health and safety found in 45 CFR 1304.2–3.

Section 1306.31 Choosing Head Start Program Options.

This section incorporates existing requirements found in 45 CFR Part 1304, Appendix A, section A. It allows grantees and delegate agencies to implement a center-based program option which focuses on delivery of services to the child, a home-based program option which focuses on delivery of services to the parents, or both options with different groups of children.

Some Head Start grantees may prefer to implement the center-based program option in which priority is placed on providing services to children in a classroom setting. This option encompasses those options previously termed standard option, part day and full day, double sessions and variations in center attendance. Other Head Start grantees may prefer to implement a home-based program option when the age or other characteristics of the children indicate the importance of working directly with parents to enhance their role as the primary factor in the development and education of their child(ren). Head Start grantees also have the option to implementing both a center-based and a home-based program.

Both home-based and center-based options as specified in the proposed rule allow sufficient flexibility for local grantees and delegates to be able to implement programs that provide serves appropriate to individual children and the families being served.

The Administration for Children, Youth and Families is aware that some Head Start grantees operate programs that combine aspects of both center- and home-based options. Some of these combination programs do not meet the minimum requirements of this NPRM for either option. This NPRM does not presently include a third option that would allow and regulate these programs. However, we are interested in public comment on these programs in three areas:

The goals and effectiveness of such programs, and the possibility of including a combination model as a third option in the rule.

Recommendations regarding acceptable minimums or ranges for days and hours of operations that a combination model would need to provide to assure gains to children and families. Minimums might be two days per week plus three home visits a month for thirty two weeks of operation or three days per week plus two home visits a month for thirty two weeks of operation.

The likely impact of this rule on existing combination programs if no third option is allowed.

Section 1306.32 Center-Based Program Option.

This section specifies the requirements for the operation of a center-based program including class size, hours and days of operation, double session and full day variations.

Paragraph (a) defines a Head Start class as a group of children, a qualified teacher, an aide and a volunteer and specifies new requirements for class size. It defines the appropriate size of the group of children based on the predominant age of the children in the class and whether or not the program is single or double session. Identifying the predominant age of the children in the class makes it possible to determine allowable class sizes for multi-age classrooms. Identifying whether a class is single or double session allows us to take into account the workload of the double session teacher.

The chart found in the proposed rule at § 1306.32(a)(11) summarizes the new class size requirements which are based on funded enrollment. Minimum and maximum class sizes have been specified to ensure that Head Start can reach as many children as possible while still providing quality services. The Administration for Children, Youth and Families is interested in public comment on whether or not Head Start can operate both effectively and efficiently within these requirements.

For the first time in Head Start regulations, proposed class size is more stringent for the implementation of double session classes than for the implementation of single session classes. Paragraphs (a)(4) and (6) set limits on double session class size to ensure that no teacher will be responsible for more than 34 children. This limit is imposed to make sure that teachers have time to provide individualized services to all children and still have sufficient time for recordkeeping, planning, home visits and parent-teacher conferences.

Paragraph (b) contains proposed new regulations on minimum days per week, days per year and hours per day that grantees must provide center-based classroom operations. It specifies that programs providing 4 days each week of classroom operations must provide a minimum of 128 days per year of classroom operations. Programs providing 5 days each week of classroom operations must provide a minimum of 160 days per year of classroom operations. The number of days required are exclusive of holidays and vacations which, when factored in, will increase the number of operating weeks. Establishing separate days of operation for four day and for five day programs will result in both types of programs operating for a minimum of approximately 32 weeks over an eight or nine month period.

Center-based programs will be expected to operate for at least the number of days specified in this proposed rule. Classroom operations should only be cancelled due to factors beyond the control of the program (adverse weather conditions, emergencies, etc.). When cancellations

do occur, programs should make every effort to make up the cancelled days of class using existing resources. Makeup classes must be provided if cancellations result in less than 128 days of class.

Paragraph (b) also allows grantees to implement a program with a combination of four and five days per week and to pro-rate the minimum required number of days of service based on 32 weeks of scheduled days of classroom operations. This program allows the fifth day of the week to be used alternately for classroom operations or for staff training, home visits, parent-teacher conferences or other relevant activities. In no instance are programs which operate five days per week being encouraged to reduce the number of days per week of operation except as noted below in § 1306.32(c) regarding double session programs.

Paragraph (b) has the effect of requiring that grantees and delegate agencies currently operating two or three days per week must increase their days of classroom operations to at least four days per week if they intend to continue to provide center-based program services. As an alternative, these grantees and delegates can choose to implement a home-based program as defined in § 1306.33, but only if the needs of children and families in the community indicate that such a change is appropriate.

Minimum requirements and acceptable ranges for planned hours per day are also proposed in paragraph (b). Both days and hours of operation include the scheduled days and hours of classroom operations during which time children are expected to be involved in learning opportunities, field trips or receiving Head Start nutrition or health services. These days and hours are exclusive of scheduled vacation days or holidays, the child's travel to and from the center or time for staff planning and record keeping. Programs are also expected to employ staff for an amount of time that allows them time, when children are not present, for pre-service training, for program startup and close down, for required record keeping and planning and for home visits and parent teacher conferences.

The NPRM includes a required minimum of 3½ hours of classroom operation per day. The Administration for Children, Youth and Families is aware that some Head Start grantees presently operate double session programs that may make it administratively difficult to operate for longer than 3 hours per day. We are also aware, however, that a 3½ hour day is developmentally appropriate for a Head Start child and think that the use of staggered working hours or additional part time or swing personnel will make it possible for double sessions to operate for the required hours. The Administration for Children, Youth and Families is interested in public comment on the difficulties and costs grantees would encounter putting this requirement into practice.

In the center-based option, the current requirement for two home visits for each child to be conducted by the child's teacher is found under 45 CFR 1304.2-2(e). This requirement is recodified in paragraph (b)(8) of this section. Home visits focus on parental goals for the child based on staff and parents' perceptions of the child's needs and progress.

Paragraph (b)(8) proposes a new requirement which specifies that each program must conduct two parent-teacher conferences during the school year for each child in a center-based program. These conferences, to be held in the Head Start Center, will be helpful to both the teacher and parent. They provide a formal opportunity to explore the child's progress within the classroom context and allow the teacher to show the parent specific activities and activity areas in which the child is involved. During the first conference, parents can provide useful information to the teaching staff about their child at the beginning of the program year. During the second conference, teachers can explain the child's progress to the parents before the child leaves the program.

Since the parent-teacher conference is traditionally used by public schools, its use in Head Start is also an effort to make the transition from Head Start to the public school system easier for both children and parents.

Head Start grantees are responsible for setting up and implementing a system to conduct home visits and parent-teacher conferences. The purpose of this system is to provide a vehicle for working with parents as the prime educators of their children. In those instances when parents implicitly or explicitly refuse to participate, the program must try to convince them of the usefulness of these activities and to encourage them to participate. Under no circumstances, however, is the program to drop the child from the center-based program if the parents will not participate in the visits and/or the conferences. The center-based program option allows the implementation of two center-based option variations: double session and full day. Both of these variations must comply with the general requirements set forth in § 1306.32 (a) and (b) for center-based program operations with specific additions and exceptions.

Section 1306.32(c) discusses the double session variation. As previously mentioned, the proposed regulations regarding double sessions are more stringent in terms of class size. In addition, paragraph (c) requires that double sessions operate for no more or less than four days per week to ensure that teachers have adequate class time to provide individualized services to all children and still have sufficient time for recordkeeping, planning, home visits and parent-teacher conferences. This may require the employment of additional part-time personnel or staggered times of staff arrival and departure.

Section 1306.32(d) defines full day as the provision of more than six hours of classroom operations per day using Head Start funds. Existing policies on the use of Head Start funds to provide full day services (Transmittal Notice 72.6) are incorporated in this paragraph. They require a search for alternative resources for implementing full day services and that full day services be provided based on the needs of individual children.

ACYF acknowledges that many Head Start families have a need for full day services. Head Start, however, does not have the resources to provide a substantial amount of full day care for children. Therefore, we are proposing that grantees work with State and local organizations to secure alternative resources to extend the services past the normal hours of the Head Start program or to operate and charge for an extended day program that is not administered under the Head Start Act. It should be noted that Head Start regulations at 45 CFR 1305.8 specifically prohibit Head Start agencies from prescribing a fee schedule or charging fees for participation in the Head Start program itself.

In instances where grantees decide to operate and charge for full day services outside the normal hours of the Head Start program, they should develop and follow operating rules and requirements that protect the health and safety of the program participants and provide the kinds of services desired and supported by the parents of the children being served. Head Start grantees may wish to consider other variations for the non-Head Start portion of the day such as using a non-Head Start funded full day program as a mechanism for providing after school care in addition to providing preschool services.

Section 1306.33 Home-Based Program Option.

This section proposes annual minimums of 32 home visits and 16 group socialization activities per child in home-based programs. These minimums also include minimum hours for home visits and group socialization activities which are exclusive of scheduled vacations or holidays, the child's travel to and from the group socialization activities, the home visitor's travel to and from family homes and time for staff planning and record keeping. In the home-based option, home visits are conducted by trained home visitors in the home and are designed to enhance the ability of parents to foster their child's growth and development.

Home visits are to be made by the home visitor with the parent, foster parent or guardian of the child or the persons with whom a child has been placed for purposes of adoption pending a final decree. Home visits are not to be made with only a baby sitter or other temporary caregiver in attendance. Programs may need to be flexible and schedule home visits on weekends or during evenings in order to carry out a home-based program and conduct home visits with working parents, parents in training or school or with parents who are otherwise out of the house during weekdays.

Group socialization activities must be designed to provide an opportunity for peer interaction for the children and to provide parents with the opportunity to enhance their understanding of child development and their skills as the primary educator of their children. In addition, there should be ample opportunity for parents to participate in activities of their own choosing. As with home visits, the intent of these activities is to involve the child's parent and not a babysitter or temporary caregiver.

Based on research data, a maximum caseload of 12 families per home visitor has been proposed in paragraph (a)(5). As with center-based programs, the purpose of this requirement is to ensure adequate time for the provision of quality services that will have long range benefits for Head Start children and their families.

Paragraph (c)(3) requires that home-based programs follow the nutrition requirements specified in 45 CFR 1304.3-10(b)(1) by providing appropriate snacks and meals during group socialization activities. This requirement is included because the Performance Standards specify nutrition requirements for center-based programs, but not for home-based group socialization activities.

Section 1306.34 Additional Head Start Program Option Variations.

This section incorporates requirements related to Locally Designed Options that are currently found in 45 CFR Part 1304, Appendix A, Section B.5. and in Transmittal Notice 72.11, N-30-211.a-1. Variations from the center- or home-based program options are allowable under this section for the purpose of meeting unique local needs or demonstrating innovative approaches to the provision of services.

V. Resource Implications

In order to comply with these regulations, some Head Start programs will have to make changes in class size and/or hours and days of operation. Estimates of the cost of those changes can be made based on a variety of assumptions.

On the assumption that no children will be dropped from the program, estimates can be made of the number of additional classes that would be needed to serve those children whose classes must be reduced in size. Estimates can also be made of the additional resources needed to increase days and hours of service. An alternative assumption is that children will be dropped where class size is too large and there are no classes with smaller numbers of children that can absorb them. In addition, it would be possible to drop classrooms in order to pay for additional hours and days of operation.

In reality, the promulgation of this rule will probably encompass both assumptions and increase total classes for some grantees and decrease the number of children served by other grantees. It should be noted that in no instances would currently enrolled children actually be dropped from the program. Decreases in enrollment would take place at the beginning of a new program year and would be accomplished by enrolling fewer children.

Some programs will have to decide whether or not to change the program option(s) they are presently operating. These are primarily center-based programs which are now operating split sessions (two and three days of classroom operations each week) or variations in center attendance.

We estimate that the changes proposed in the NPRM will cost approximately $15 million, an amount equal to 1¼ percent of current spending. These funds are needed primarily to reduce class size and to increase the amount of contact between the program and the child and family.

It is anticipated that these changes will not be required prior to FY 1990 and will be implemented over a two year period. These cost increases can be accommodated in current budget policy.

VI. Redesignation Table

VII. Impact Analysis

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be prepared for major rules, which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or certain other specified effects. Since nothing in the NPRM is likely have an effect on the economy of $100 million, the Secretary concludes that this regulation is not a major rule within the meaning of the Executive Order.

Regulatory Flexibility Act of 1980

Consistent with the Regulatory Flexibility Act of 1980 (5 U.S.C. Ch.6), we try to anticipate and reduce the impact of rules and paperwork requirements on small businesses. For each rule with a "significant economic impact on a substantial number of small entities", we prepare an analysis describing the rule's impact on small entities. Small entities are defined in the Act to include small businesses, small non-profit organizations, and small entities. While these regulations would affect small entities, these requirements are not substantial and most Head Start programs already meet all or some of the proposals. We expect that less than 25 percent of the programs will have to make changes in class size and less than 20 percent of the programs will have to make changes in the amount of contact with children and families. For these reasons, the Secretary certifies that this rule will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

Under the Paperwork reduction Act of 1980, Pub. L. 96–511, all Departments are required to submit to the Office of Management and Budget for review and approval any reporting or recordkeeping requirement inherent in a proposed or final rule. This proposed rule does not contain information collection requirements or increase Federal paperwork burden on the public or private sector.

List of Subjects

45 CFR Part 1304

Dental health, Education of disadvantaged, Grant programs—social programs, Health care, Mental health program, Parental Involvement, Nutrition.

45 CFR Part 1306

Head Start, Education, Grant programs/social programs, Handicapped, Pre-school education.

(Catalog of Federal Domestic Assistance Program Number 13.600, Project Head Start)

Dated: April 8, 1988.

Sydney Olson,

Assistant Secretary for Human Development Services.

Approved: June 21, 1988.

Otis R. Bowen,

Secretary.

For the reasons set forth in the preamble, Subchapter B, Chapter XIII, of title 45 of the Code of Federal Regulations is proposed to be amended as follows:

PART 1304—[AMENDED]

1. The authority citation for Part 1304 continues to read as follows:

Authority: 42 U.S.C. 9831 et seq.

Appendix A—[Removed]

2. Appendix A of Part 1304 is removed.

3. Part 1306 is added to read as follows:

PART 1306—HEAD START STAFF REQUIREMENTS AND PROGRAM OPTIONS

Subpart A—General

Sec.

1306.1 Purpose and scope.
1306.2 Effective dates.
1306.3 Definitions.

Subpart B—Head Start Program Staffing Requirements

1306.20 Program staffing patterns.
1306.21 Staff qualification requirements.
1306.22 Volunteers.
1306.23 Training.

Subpart C—Head Start Program Options

1306.30 Provision of comprehensive child development services.
1306.31 Choosing a Head Start program option.
1306.32 Center-based program option.
1306.33 Home-based program option.
1306.34 Additional Head Start program option variations.

Authority: 42 U.S.C. 9831 et seq.

Subpart A—General

§ 1306.1 Purpose and scope.

This part sets forth standards for Head Start program staffing and program options that all Head Start programs, with the exception of the Parent Child Center programs, are required to implement. These standards, including staffing patterns and qualifications, the choice of the program option(s) to be implemented and the acceptable ranges in the implementation of those options, have been develped to help ensure the quality of the program and to help promote long range benefits to the children and families being served.

§ 1306.2 Effective dates.

(a) Except as provided in paragraph (b) of this section, existing Head Start programs refunded 180 or more days after the effective date of this part must comply with these requiremens by that time in their grant cycle when a new group of children begins receiving services. This does not preclude programs from voluntarily coming into compliance with these regulations prior to the effective date.

(b) Currently funded Head Start programs must be in compliance with the staff qualification requirements in § 1306.21 within two years from the effective date of this part. This does not preclude programs from voluntarily coming into compliance with these regulations prior to the effective date.

(c) All new Head Start programs must be in compliance with this rule at the time they are funded.

§ 1306.3 Definitions.

(a) *Center-based program option* means Head Start services provided to children primarily in classroom settings.

(b) *Days of operation* means the planned days during which children will be receiving direct Head Start component services in a classroom, on a field trip or on trips for health-related activities.

(c) *Double session variation* means a variation of the center-based program option that operates with one teacher who works with a group of children in a morning session and a different group of children in an afternoon session.

(d) *Full day variation* means a variation of the center-based program option in which program operations continue for longer than six hours per day.

(e) *Group socialization activities* means the sessions in which children and parents enrolled in the home-based program option interact with other home-based children and parents in a Head Start classroom, community facility, home or on a field trip.

(f) *Head Start classroom* means a group of children supervised and taught by two paid staff members (a teacher and a teacher aide) and, whenever possible, a volunteer.

(g) *Head Start parent(s)* means a Head Start child's parent(s), foster parent(s), guardian(s) or the person(s) with whom the child has been placed for purposes of adoption pending a final adoption decree.

(h) *Head Start program* means a Head Start grantee or delegate agency.

(i) *Home-based program option* means Head Start services provided to children through intensive work with the child's parents and family as the primary factor in the growth and development of the child.

(j) *Home visits* means the visits made to a child's home by the classroom teacher in a center-based program or home visitors in a home-based program for the purpose of assisting parents in fostering the growth and development of their children.

(k) *Hours of operation* means the planned hours per day during which children and families will be receiving direct Head Start component services in a classroom, on a field trip, while receiving medical or dental services or during a home visit or group socialization activity. Hours of operation does not include travel time to and from the center at the beginning and end of a session.

(l) *Parent-teacher conference* means the meeting held at the Head Start center between the child's teacher and the child's parent(s) during which the child's progress and accomplishments are discussed.

Subpart B—Head Start Program Staffing Requirements

§ 1306.20 Program staffing patterns.

(a) Programs must provide adequate supervision of their staff.

(b) Center-based programs must employ two staff persons responsible for each classroom (a teacher and a teacher aide) and, when ever possible, a third person in the classroom who is a volunteer.

(c) Home-based programs must employ home visitors responsible for home visits and group socialization activities.

(d) Classroom staff and home visitors must be able to communicate with the families they serve either directly or through a translator. They must also be familiar with the ethnic background of those families.

§ 1306.21 Staff qualification requirements.

(a) Every Head Start classroom teacher must:

(1) Have a Child Development Associate (CDA) credential that is appropriate to the age of the children being served in center-based programs (Preschool or Infant-Toddler CDA); or

(2) Have a State awarded certificate for preschool teachers which meets or exceeds the requirements for a CDA credential; or

(3) Have an Associate, Baccalaureate, or advanced degree in early childhood education; or

(4) Have a degree in a field related to early childhood education with experience in teaching preschool children and have a State awarded certificate required to teach in a preschool program.

(b) Each Head Start home visitor must:

(1) Have a CDA Home Visitor credential; or

(2) Have a State awarded certificate for home visitors which meets or exceeds the requirements for a CDA credential; or

(3) Have an Associate, Baccalaureate, or advanced degree in early childhood education or human development, including education and experience in social services and adult education.

§ 1306.22 Volunteers.

(a) Head Start programs must use volunteers to the fullest extent possible. Head Start programs must develop and implement a system to actively recruit, train and utilize volunteers in the program.

(b) Special efforts must be made to have volunteer participation, especially parents, in the classroom and during group socialization activities.

§ 1306.23 Training.

(a) Head Start programs must provide pre-service and in-service training opportunities to program staff and volunteers to assist them in acquiring or increasing the knowledge and skills they need to fulfill their job responsibilites. This training must be directed towards improving the ability of staff and volunteers to deliver services required by Head Start regulations and policies.

(b) Head Start programs must provide staff with information and training about the underlying philosophy and goals of Head Start and the program option being implemented.

Subpart C—Head Start Program Options

§ 1306.30 Provision of comprehensive child development services.

(a) All Head Start programs must provide comprehensive child development services.

(b) All Head Start programs must provide classroom or group socialization activities for the child as well as home visits to the parent(s). The major purpose of the classroom or socialization activities is to help meet the child's developmental needs and to foster the child's social competence. The major purpose of the home visits is to enhance the parental role in the growth and development of the child.

(c) The facilities used by Head Start programs for regularly scheduled center-based classroom or home-based group socialization activities must meet applicable State and local licensing standards. In cases where these licensing standards are less comprehensive or less stringent than Head Start regulations or where no State or local licensing standards are applicable, programs are, at a minimum, required to assure that their facilities are in compliance with Head Start performance standards related to health and safety found in 45 CFR 1304.2–3.

(d) All programs must identify, secure and use community resources in the provision of services to Head Start children and their families prior to using Head Start funds for these services.

§ 1306.31 Choosing a Head Start program option.

(a) Programs may choose to implement a center-based option, a home-based program option or both options.

(b) Programs must choose the program option(s) that meet the needs of the children and families as indicated by the community needs assessment conducted by the program.

(c) When assigning children to a particular option, Head Start programs that operate more than one option must consider such factors as the child's age, developmental level, handicaps, health or learning problems, previous preschool experiences and family situation. Programs must also consider parents' concerns and wishes prior to making final assignments.

§ 1306.32 Center-based program option.

(a) *Class Size.* (1) Head Start classes must be staffed by a teacher, an aide and, whenever possible, a volunteer.

(2) Using funded enrollment, programs must determine their class size based on the predominate age of the children in the classroom and whether or not a double session is being implemented.

(3) For classes serving predominantly four or five year old children, the average class size of that group of classes must be between 17 and 20 children with no more than 20 and no fewer than 13 children in any one class.

(4) When double session classes serve predominately four or five year old children, the average class size of that group of classes must be between 15 and 17 children. A double session class for four or five year old children may have no more than 17 and no fewer than 13 children enrolled. See paragraph (c) of this section for other requirements regarding the double session variation.

(5) For classes serving predominately three year old children, the average

class size of that group of classes must be between 15 and 17 children with no more than 17 and no fewer than 13 children enrolled in any one class.

(6) When double session classes serve predominately three year old children, the average class size of that group of classes must be between 13 and 15 children. A double session class for three year old children may have no more than 15 and no fewer than 13 children enrolled. See paragraph (c) of this section for other requirements regarding the double session variation.

(7) A class is considered to serve predominately four or five year old children if more than half of the children in the class will be four or five years old by whatever date is used by the State or local jurisdiction in which the Head Start program is located to determine eligibility for public school.

(8) A class is considered to serve predominately three-year-old children if more than half of the children in the class will be three years old by whatever date is used by the State or local jurisdiction in which the Head Start program is located to determine eligibility for public school.

(9) Head Start programs must determine the predominate age of children in the class at the start of the year. There is no need to change that determination during the year.

(10) In some cases, State or local licensing requirements may be more stringent than these class requirements, preventing the required minimum numbers of children from being enrolled in the facility being used by the Head Start program. Where this is the case, Head Start programs must try to find alternative facilities that satisfy licensing requirements for the numbers of children cited above. If no alternative facilities are available, the responsible HHS official has the discretion to approve enrollment of fewer children than required above.

(11) The chart below may be used for easy reference:

Predominate age of children in the class	Funded class size (funded enrollment)
4 and 5 year olds	Program average of 17–20 children enrolled per class in these classes. No less than 13 and no more than 20 children enrolled in any class.
4 and 5 year olds in double session classes.	Program average of 15–17 children enrolled per class in these classes. No less than 13 and no more than 17 children enrolled in any class.
3 year olds	Program average of 15–17 children enrolled per class in these classes. No less than 13 and no more than 17 children enrolled in any class.
3 year olds in double session classes.	Program average of 13–15 children enrolled per class in these classes. No less than 13 and no more than 15 children enrolled in any class.

(b) *Center-Based Program Requirements.* (1) Programs must operate classes for four or five days per week or some combination of four or five days per week.

(2) Programs must operate classes for a minimum of three and one half to a maximum of six hours per day with four hours per day considered to be optimal.

(3) The annual number of required days of planned classroom operations (days when children are scheduled to attend) is determined by the number of days per week each program operates. Programs that operate for four days per week must provide at least 128 days per year of planned classroom operations. Programs that operate for five days per week must provide at least 160 days per year of planned classroom operations. Programs implementing a combination of four and five days per week must plan to operate between 128 and 160 days per year. The minimum number of planned days of service per year can be determined by computing the relative number of four and five day weeks that the program operates. All center-based program must provide a minimum of 32 weeks of scheduled days of classroom operations over an eight or nine month period. Every effort should be made to schedule makeup classes using existing resources if planned classroom days fall below the number required per year.

(4) Programs must schedule makeup classes, when needed, to prevent the number of days of service available to the children from falling below 128 days per year.

(5) Each individual child is not required to receive the minimum days of service, although this is to be encouraged in accordance with Head Start policies regarding attendance. The minimum number of days also does not apply to handicapped children whose individualized education plan may require fewer planned days of service in the Head Start program.

(6) Head Start migrant programs are not subject to the requirement for a minimum number of planned days, but each migrant program must make every effort to provide as many days of service as possible to each migrant child and family.

(7) Staff must be employed for sufficient time to allow them to participate in pre-service training, to plan and set up to program at the start of the year, to close the program at the end of the year, to conduct home visits and parent-teacher conferences, to maintain records and to keep plans current and relevant. These activities should take place when no classroom activities with children present are planned.

(8) Head Start programs must develop and implement a system that actively encourages parents to participate in two home visits and two parent-teacher conferences annually for each child enrolled in a center-based option. These visits and conferences must be initiated and carried out by the child's teacher. Programs may not, however, drop the child from the center-based program if the parents will not participate in the visits and/or the conferences.

(9) Head Start migrant programs are required to plan for a minimun. of two parent-teacher conferences for each child during the time they serve that child. Should time and circumstance allow, migrant programs must make every effort to conduct home visits.

(c) *Double Session Variation.* (1) A center-based option with a double session variation employs a single teacher to work with one group of children in the morning and a different group of children in the afternoon. Because of the larger number of children and families to whom the teacher must provide services, double session programs must comply with the requirements regarding class size explained in paragraph (a) of this section and with all other center-based requirements in paragraph (b) of this section with the exceptions and additions noted in this paragraph.

(2) Each program must operate classes for four days per week.

(3) Each double session classroom staff member must be provided adequate break time during the course of the day. In addition, each teacher, aide and volunteer must have appropriate time to prepare for each session together, to set up the classroom environment and to give individual attention to children entering and leaving the center.

(d) *Full Day Variation.* (1) A Head Start program implementing a center-based option with a full day variation provides more than six hours of classroom operations per day using Head Start funds. These programs must

comply with all the requirements regarding the center-based program option found in paragraphs (a) and (b) of this section with the exception of paragraph (b)(2) of this section regarding the hours of service per day.

(2) Programs are encouraged to meet the needs of the families for full day operations by securing funds from other agencies. A Head Start program implementing a full day variation must determine that all alternative sources for full day services have been contacted, that enrollment opportunities in other programs are not available for families and that non-Head Start resources are not available to operate the longer day.

(3) Head Start programs may provide full day services only to those children and families with special needs that justify full day services or to those children whose parents are employed or in job training with no caregiver present in the home. The records of each child receiving services for more than 6 hours per day must show how each child meets the criteria stated above.

(4) Programs may consider charging for services which are provided outside the normal hours of the Head Start program. When this alternative is utilized, no Head Start funds may be used to pay for these services. Head Start space, however, that would otherwise be unused may be made available for other activities outside the normal hours of the Head Start program.

§ 1306.33 Home-based program option.

(a) Programs implementing a home based option must:

(1) Provide one home visit per week per family (a minimum of 32 home visits per year) lasting for a minimum of 1½ hours each.

(2) Provide, at a minimum, two group socialization activities per month per child (a minimum of 16 group socialization activities each year). Each group socialization activity must operate for a minimum of 3½ hours to a maximum of 6 hours with 4 hours considered to be optimal.

(3) Make up planned home visits or scheduled group socialization activities that were cancelled by the program or by program staff if this is necessary to meet the minimums stated above. Medical or social service appointments may not replace home visits or scheduled group socialization activities.

(4) Allow staff sufficient employed time to participate in pre-service training, to plan and set up the program at the start of the year, to close the program at the end of the year, to maintain records and keep plans current and relevant. These activities should take place when no home visits or group socialization activities are planned.

(5) Maintain an average caseload of 10 to 12 families per home visitor with a maximum of 12 families for any individual home visitor.

(b) Home visits must be conducted by trained home visitors with the content of the visit jointly planned by the home visitor and the parent(s). Home visitors must conduct the home visit with the parent(s). Home visits may not be conducted by the home visitor with only baby sitters or other temporary caregivers in attendance.

(1) The purpose of the home visit is to help parents improve their parenting skills and to assist them in the use of the home as the child's primary learning environment. The home visitor must work with parents to help them provide learning opportunities that enhance their child's growth and development.

(2) Home visits must, over the course of the year, contain elements of all Head Start program components. The home visitor is the person responsible for introducing, arranging for and, in some component areas, actually providing Head Start services.

(c) Group socialization activities must be focused on both the children and parent(s). They may not be conducted by the home visitor with baby sitters or other temporary caregivers.

(1) The purpose of these activities for the children is to emphasize peer group interaction through age appropriate activities in a Head Start classroom, community facility, home or on a field trip. The children are to be supervised by the home visitor with parents observing at times and actively participating at other times.

(2) The program must design these activities so that parents are expected to accompany their children to the group socialization activities at least twice each month to observe, to participate as volunteers or to engage in activities designed specifically for the parents.

(3) Programs must follow the nutrition requirements specified in 45 CFR 1304.3–10(b)(1) and provide appropriate snacks and meals to the children during group socialization activities.

§ 1306.34 Additional Head Start program option variations.

In addition to the center/based and home-based program options as defined above, the Administration for Children, Youth and Families retains the right to fund alternative program variations to meet the unique needs of communities or to demonstrate or test alternative approaches for providing Head Start services.

BILLING CODE 4130–01–M

FEDERAL MARITIME COMMISSION

46 CFR Parts 585, 587 and 588

[Docket No. 88–24]

Actions To Address Adverse Conditions Affecting U.S.-Flag Carriers That Do Not Exist for Foreign Carriers in the United States

AGENCY: Federal Maritime Commission.

ACTION: Availability of finding of no significant impact.

SUMMARY: The Commission has completed an environmental assessment of a proposed rule in Docket No. 88–24 and found that its resolution of this proceeding will not have a significant impact on the quality of the human environment.

DATE: Petitions for review are due on or before December 19, 1988.

ADDRESS: Petitions for review (Original and 15 copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573–0001.

FOR FURTHER INFORMATION CONTACT: Edward R. Meyer, Office of Special Studies, 1100 L Street, NW., Washington, DC 20573–0001.

SUPPLEMENTARY INFORMATION: Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Special Studies has determined that Docket No. 88–24 (published November 1, 1988, 53 FR 44039) will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. § 4321 *et. seq.*, and that preparation of an environmental impact statement is not required.

In Docket No. 88–24, the Commission proposes to add a new part to its regulations to implement the Foreign Shipping Practices Act of 1988. The new part sets forth general procedures for investigatory proceedings to address adverse conditions affecting U.S.-flag carriers that do not exist for foreign carriers in the United States. The Commission also proposes to amend its rules implementing section 19(1)(b) of the Merchant Marine Act, 1920 and section 13(b)(5) of the Shipping Act of 1984, to add new sanctions made available to the Commission in

proceedings under those statutes, pursuant to the Foreign Shipping Practices Act.

This Finding of No Significant Impact ("FONSI") will become final within 10 days of publication of this notice in the **Federal Register** unless a petition for review is filed pursuant to 46 CFR § 504.6 (b).

The FONSI and related environmental assessment are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, DC 20573–0001, telephone (202) 523–5725.

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 36

[CC Docket No. 80–286, FCC 88–303]

Amendment of the Commission's Rules and Establishment of a Joint Board; Universal Service Fund Expense Allocation

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has issued a Notice of Proposed Rulemaking (NPRM) seeking comment and data from interested parties on revised separations procedures for the allocation of corporate operations expenses and taxes for the purpose of computing the additional interstate allocation known as the Universal Service Fund (USF) expense adjustment. Pursuant to Subpart F of Part 36 of the Commission's rules, the National Exchange Carriers Association (NECA) administers the USF and calculates which carriers receive support from the fund and the amount of support each carrier receives. NECA calculates the USF expense adjustment based on data submitted by the Local Exchange Carriers (LECs) June 30 of each year. The NPRM proposes to revise the rules to allocate corporate operations expenses on the basis of gross investment in calculating the USF expense adjustment. The NPRM also refers this issue to the Docket 80–286 Joint Board and requests that it prepare a recommended decision regarding the issues.

DATES: Comments and data must be filed on or before January 12, 1989, and reply comments on or before January 27, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Patricia Shipley, Accounting and Audits Division, Common Carrier Bureau, at (202) 632–7500.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking, CC Docket No. 80–286, FCC 88–303; adopted September 27, 1988 and released November 22, 1988.

The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, 2100 M Street NW., Suite 140, Washington, DC 20037, (202) 857–3800.

Summary of Notice of Proposed Rulemaking

1. On July 2, 1987, the NECA filed a waiver to permit it to allocate corporate operations expenses and taxes on the basis of gross investment rather than net investment in computing the level of additional interstate allocation known as the USF expense adjustment. The Common Carrier Bureau granted NECA a temporary waiver request [1] through December 31, 1988 pending further review of the issue.

2. The current procedures [2] provide the LECs, with higher-than-average loop costs, additional revenues from the USF to reduce their state revenue requirements. NECA calculates each carrier's USF expense adjustment and level of assistance based on data submitted to it by the carriers on June 30 each year. The level of assistance is calculated by comparing each study area's average loop costs [3] with the national average loop costs. Current rules require that, in computing average loop costs NECA must allocate corporate operations expenses and taxes on the basis of net plant investment.

3. The NPRM proposes to revise these rules to require the allocation of corporate operations expenses on the basis of gross investment. The proposed rules would continue to require allocation of taxes on the basis of net investment. The Commission found that, because net investment is affected by depreciation levels, this may cause distortions in the calculation of average loop costs. These distortions may not occur if the rules were revised to use gross investment in allocating corporate operating expenses.

4. The NPRM requests that parties file comments on the proposed separations procedures outlined in Appendix A and to propose alternative approaches. It also requests the Joint Board to analyze those proposals and submit a recommended decision to the Commission. The NPRM also requested NECA to file the information, by study area, that each LEC filed with NECA on June 30, 1988.

Comments

5. Interested parties may file comments and data on the issues discussed above on or before January 12, 1989 and reply comments on or before January 27, 1989.

Regulatory Flexibility Act

6. We certify that the Regulatory Flexibility Act [4] is not applicable to the rule changes we are proposing in this proceeding. In accordance with the provisions of section 605 of the Act, a copy of this certification will be sent to the Chief Counsel for Advocacy of the Small Business Administration at the time of publication of a summary of this Notice in the **Federal Register.** As part of our analysis of the proposal described in this Notice, however, we will consider the impact on small telephone companies, *i.e.,* those serving 50,000 or fewer lines.[5] The action proposed herein would have a beneficial economic impact on the majority of the small telephone companies because it would promote universal service by enabling the telephone companies and state regulators to establish local exchange

[1] National Exchange Carrier Association, Inc., Petition for Waiver of §§ 67.621(a)(4) and 36.621(a)(4) of the Commission's Rules, 3 FCC Rcd 1023 (1988).

[2] 47 CFR Part 36, Subpart F.

[3] The loop costs include the costs associated with Category 1.3 Cable and Wire Facilities investment and Category 4.13 Central Office Equipment investment.

[4] 5 U.S.C. 601.

[5] Because of the nature of local exchange and access service, this Commission has concluded that small telephone companies are dominant in their fields of operation and therefore are not small entities as defined by the Regulatory Flexibility Act. *See* MTS and WATS Market Structure, 93 FCC 2d 241, 338–39 (1983). Thus, this Commission is not required by the terms of the Act to apply the formal procedures set forth therein. This Commission is nevertheless committed to reducing the regulatory burdens on small telephone companies whenever possible consistent with our other public interest responsibilities. Accordingly, we have chosen to utilize, on an informal basis, appropriate Regulatory Flexibility Act procedures to analyze the effect of proposed regulations on small telephone companies.

service rates in high cost areas that are lower than they otherwise would be.

Paperwork Reduction Act

7. We have analyzed the proposal contained herein with respect to the Paperwork Reduction Act of 1980 [6] and have tentatively concluded that it will not, if adopted, impose new or modified information collection requirements on the public. Therefore, implementation of the proposed requirements will not be subject to approval by the Office of Management and Budget as prescribed by the Paperwork Reduction Act.

Ex Parte Contacts

8. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* presentations are permitted except during the Sunshine Agenda period.[7] The Sunshine Agenda period is the period of time which commences with the release of a public notice that a matter has been placed on the Sunshine Agenda and terminates when this Commission: (1) Releases a text of a decision or order in the matter; (2) issues a public notice stating that the matter has been deleted from the Sunshine Agenda; or (3) issues a public notice stating that the matter has been returned to the staff for further consideration, whichever occurs first.[8] During the Sunshine Agenda period, no presentations, *ex parte* or otherwise, are permitted unless specifically requested by this Commission or our staff for the clarification or addition of evidence or the resolution of issues in the proceeding.[9]

9. In general, an *ex parte* presentation is any presentation directed to the merits or outcome of the proceeding made to decision-making personnel which: (1) If written, is not served on the parties to the proceeding; or (2), if oral, is made without advance notice to the parties to the proceeding and without opportunity for them to be present.[10] Any person who sububmits a written *ex parte* presentation must provide on the same day it is submitted a copy of same to this Commission's Secretary for inclusion in the public record. Any person who makes an oral *ex parte* presentation that presents data or arguments not already reflected in that person's previously-filed written comments, memoranda, or filings in the proceeding must provide on the day of the oral presentation a written memorandum to the Secretary which summarizes the data and arguments. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates.[11]

10. For Joint Board actions, special *ex parte* rules apply.[12] For those actions, all written materials that are not filed in accordance with a pleading cycle established by the Joint Board shall be accompanied by a Petition for Leave to File showing cause why the material should be considered by the Joint Board. The Joint Board will not consider any filing made outside the authorized pleading cycle and received by this Commission less than fifteen days[13] in advance of a Joint Board meeting at which is will consider the subject matter of that filing. Written *ex parte* presentations, as defined by our rules, need not be accompanied by a Petition for Leave to File and may be received at the discretion of the Joint Board member or staff personnel involved. No written *ex parte* presentations, however, shall be made during the fifteen day period immediately preceding a Joint Board meeting except in response to an inquiry initiated by a member of the Joint Board or its staff.

Ordering Clause

11. Accordingly, it is ordered, that the Joint Board in CC Docket No. 80–286 shall review the comments, proposals, and data filed in response to this Notice and prepare a recommendation to this Commission on the issues raised herein.

List of Subjects in 47 CFR Part 36

Communications common carrier, Telephone, Uniform system of accounts, Jurisdictional separations procedures.

This action is taken pursuant to 47 U.S.C. 154 (i) and (j), 201–205, 218, 221(c), 303(r), 403, and 410.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

Part 36 of Title 47 of the Code of Federal Regulations is proposed to be amended to read as follows:

PART 36—[AMENDED]

1. The authority citation for Part 36 continues to read:

Authority: 47 U.S.C. Secs. 151, 154 (i) and (j), 205, 221(c), 403 and 410.

2. The title of Subpart F is proposed to be revised to read as follows:

Subpart F—Universal Service Fund Expense Allocation

3. Section 36.601 is proposed to be amended by revising paragraph (a) to read as follows:

§ 36.601 General.

(a) The Universal Service Fund Expense Allocation shall consist of an expense adjustment computed in accordance with this Subpart F. The expense adjustment will be added to interstate expenses and deducted from state expenses after expenses and taxes have been apportioned pursuant to Subpart D.

* * * * *

4. Section 36.621 is proposed to be amended by revising paragraph (a)(4) and by adding paragraph (a)(5) as follows:

§ 36.621 National and study area average unseparated loop costs per working loop.

(a) * * *

(4) Corporate Operations Expense, and the benefits and rent portions of operating expenses as reported in § 36.611(a)(5) attributable to investment in Category 1.3 Cable and Wire Facilities (C&WF), and Category 4.13 Central Office Equipment (COE). To calculate the amount of these expenses attributable to investment in Category 1.3 C&WF and Category 4.13 COE, multiply each of these expenses by the ratio of the unseparated gross plant investment in Category 1.3 C&WF and Category 4.13 COE, as reported in § 36.611(a)(1), to the unseparated gross telecommunications plant investment for the study area as reported in § 36.611(a)(6).

(5) Operating Taxes reported in § 3.611(a)(5) attributable to investment in Category 1.3 C&WF and Category 4.13 COE. To calculate the amount of these taxes attributable to investment in Category 1.3 C&WF and Category 4.13 COE, multiply each of these taxes by the ratio of the unseparated net plant investment in Category 1.3 C&WF and Category 4.13 COE as calculated in § 36.621(a)(1) to the unseparated net investment for the total telecommunications plant for the study area. The unseparated net investment for total telecommunications plant for the study area equals the unseparated gross telecommunications plant investment as reported in § 36.611(a)(6) minus the unseparated accumulated

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

48 CFR Parts 219, 226, and 252

Department of Defense Federal Acquisition Regulation Supplement; Implementation of Section 1207 of Pub. L. 99-661 and Section 806 of Pub. L. 100-180; Contracting With Small Disadvantaged Business Concerns

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule and Request for Public Comments.

SUMMARY: The Department of Defense is proposing changes to Parts 219, 226 and 252 of the DoD FAR Supplement (DFARS) implementing section 1207 of Pub. L. 99-661 and section 806 of Pub. L. 100-180. Sections 219.001, 226.7003 and 252.219-7007(d) are being amended to provide that, in unrestricted procurements, Historically Black Colleges and Universities (HBCUs) and Minority Institutions (MIs) will be given the same evaluation preference as that accorded to small disadvantaged business (SDB) concerns. Sections 219.7000 and 252.219-7007 are being modified to provide that the evaluation preference will not be applied in acquisitions over the dollar threshold for the Trade Agreements Act only where the low offeror is offering an eligible end product or where the application would otherwise violate an agreement or memorandum of understanding with a foreign government. Sections 219.508, 219.7002, 252.219-7007, and 252.219-7010 are being modified to provide that, in an unrestricted procurement, an SDB regular dealer, in order qualify for the evaluation preference, must provide the product of an SDB concern if available; in a partial small business set-aside, in order to be eligible for preferential consideration, an SDB dealer or manufacturer must provide the product of an SDB concern, if available. Section 219.001, 219.502(S-70), 219.502-72, 219.508, and 252.219-7012 are being amended to assist disadvantaged business concerns in transitioning to large business status and in becoming viable business entities.

DATE: Comments should be received on or before January 9, 1989 to ensure their consideration in formulating a final rule. Please cite DAR Case 88.069 in all correspondence related to this issue.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, ODASD(P)DARS, c/o OASD(P&L) (M&RS), Room 3D139, The Pentagon, Washington, DC 20301-3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, telephone (202) 697-7266.

SUPPLEMENTARY INFORMATION:

A. Background

On June 6, 1988, DoD published a final and an interim rule with request for public comments (53 FR 20626) substantially implementing the requirements of section 1207 of Pub. L. 99-661 and section 806 of Pub. L. 100-180 that established an objective that five percent of total combined DoD obligations (i.e., procurement; research, development, test and evaluation; construction; and operation and maintenance) for contracts and subcontracts awarded during FY 1987 through FY 1989 be entered into with SDB concerns, HBCUs and MIs. Section 844 of Pub. L. 100-456 extended this objective through FY 1990.

During the development of the final rule implementing sections 1207 and 806, as part of the public comment period, several issues were raised that were considered beyond the scope of that rulemaking effort and were deferred for full public consideration and comment. Four of these issues have been consolidated into the present proposed rulemaking.

DFARS coverage has been added to afford HBCUs and MIs the same evaluation preference as that accorded to SDBs under the procedures at DFARS 219.7000. This change is proposed in recognition that in certain procurements (e.g., solicitations involving research and studies) HBCUs and MIs may very well compete with SDBs and other business entities for award. Since SDBs, HBCUs and MIs are defined equally as "1207(a) entities" for the purposes of the preference procedures of section 1207 of Pub. L. 99-661, the revisions will ensure that they are treated equally for evaluation purposes consistent with that statute. (See revisions at 219.7001, 226.7003 and 252.219-7007(d).)

Revised DFARS coverage is proposed with respect to the application of the evaluation preference to acquisitions under the Trade Agreements Act which equal or exceed the dollar threshold referenced in FAR 25.402. Under the proposed revision, the evaluation preference will be applied unless there is an offer of an eligible product which is otherwise low (before application of the evaluation preference). Thus, where the solicitation equals or exceeds the threshold of the Trade Agreements Act and the low offer is an offer of an eligible product, then the evaluation preference will not be applied. However, when the offer of the eligible product is not low, even where the dollar amount of the solicitation equals or exceeds the threshold of the Trade Agreements Act, the evaluation preference will be applied to all non-SDB offers. Application of the evaluation preference to the offer of an eligible product when it is not the low offer does not operate to the detriment of that offeror. It does, however, enhance the opportunities for SDBs even when the acquisition equals or exceeds the dollar threshold of the Trade Agreements Act and either there is no offer of an eligible product or the offer of the eligible product is not low. (See revision at 219.7000(a) and 252.219-7007(b).)

Revised DFARS coverage is proposed to require that, in order to be eligible for the evaluation preference under 219.7000, an SDB dealer must provide the product of an SDB manufacturer if one is available who can meet the requirements of the solicitation. Under the current coverage, to be entitled to the evaluation preference described at 219.7000, SDB concerns other than regular dealers must agree to the subcontracting limitations identified at 252.2.219-7007(c). An SDB dealer, on the other hand, may provide the product of any business concern (i.e., another SDB, a small business or a large business) and still be eligible for the evaluation preference. A similar situation exists under the preferential consideration given to SDBs under the partial small business set-aside procedures at 252.219-7010. Under those procedures, an award to an SDB concern on the set-aside portion may exceed the award price on the non set-aside portion by up to ten percent (10%). An SDB manufacturer or regular dealer need only provide the product of a small business concern in order to be granted this preferential consideration.

Some reservations were voiced that these policies could result in SDB dealers having an advantage over SDB manufacturers. It does not appear from the legislative history of the underlying statutes that Congress intended this result. Accordingly, in light of the growing concern over the erosion of the domestic industrial base and the need to foster and encourage the growth of U.S.-based industries, a decision was made to seek public comments on proposed

VOL 53 ISS 236 DE 8 1988 UMI

revisions to certain aspects of the procedures outlined above.

Section 252.219–7007 is revised to state that in order to be entitled to an evaluation preference in an unrestricted procurement, SDB dealers would have to provide a product manufactured or produced by an SDB concern. However, in the event the contracting officer, in coordination with the activity small business specialist, determines that there are no SDB manufacturers available who can meet the requirements of the solicitation, then the dealer can provide the product of either a small or a large business concern and still obtain the evaluation preference. Section 252.219–7010 is revised to state that, to be eligible for preferential consideration in a partial small business set-aside, both an SDB manufacturer and an SDB dealer would have to provide an end item manufactured or produced by an SDB concern. In the event there is a determination that there are no SDB manufacturers available who can meet the requirements of the solicitation, the SDB manufacturer or dealer need only provide the product of a small business to be entitled to preferential consideration. It is intended that the foregoing would place all SDB concerns, dealers and manufacturers, on an even footing, foster the growth of SDB concerns, and assist in supporting the growth of a domestic industrial base. (See revisions at 219.508(d)(S–72), 219.7002, 252.219–7007(c).)

DFARS coverage is proposed with respect to follow-on procurements in order to assist disadvantaged business firms in transitioning to large business status and in becoming viable business entities. Under the proposed revisions, follow-on requirements to those procured by the contracting office under the existing contract on an unrestricted basis are to be procured under the successor contract on the basis of an unrestricted competition or by partial small business set-aside procedures, where the incumbent contractor certifies that it (i)(is a "disadvantaged business concern" as defined in DFARS 219.001, (ii) derived contract revenues under the existing contract representing at least one-third of its total revenues during the performance period of that contract, and (iii) desires to participate in a follow-on acquisition.

In addition, a new definition in DFARS 219.001, in essence, will define a "disadvantaged business concern" as a minority-owned business enterprise which meets U.S. Small Business Administration criteria for social and economic disadvantaged business status, but which no longer qualifies as a "small business". Thus, by providing for an unrestricted competition or partial small business set-aside when the circumstances in (i) through (iii) above exist, disadvantaged businesses which do not qualify as small businesses will not be denied an opportunity to compete for requirements which represent a large portion of their business base, as would be the case if the successor requirements were reserved for exclusive small or small disadvantaged business participation. However, in keeping with the requirements of section 806(b)(7) of Pub. L. 100–180 (which requires that DoD maintain the number and dollar value of contracts set-aside for small business or reserved under the 8(a) Program), the coverage will not apply to situations where award of the predecessor contract was made as the result of total small business or small disadvantaged business set-asides, or 8(a) Program reservations. (See revisions at 219.001, 219.502(S–70), 219.502–72(b), 219.508(S–74), and 252.219–7012).

B. Regulatory Flexibility Act

The proposed rule may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601, *et seq.* An Initial Regulatory Flexibility Analysis has therefore been deemed necessary and will be provided to the Chief Counsel for Advocacy of the U.S. Small Business Administration. Interested parties desiring to obtain a copy of the Analysis may contact the Executive Secretary of the DAR Council. Comments received from the public will be considered in drafting a final rule and in performing a Final Regulatory Flexibility Analysis.

Comments from small entities concerning the affected DFAR Subparts will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite DAR Case 88–610D in correspondence.

C. Paperwork Reduction Act

The proposed rule does not impose information collection requirements within the meaning of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, *et seq.*, and OMB approval of the proposed rule is not required pursuant to 5 CFR Part 1320.

List of Subjects in 48 CFR Parts 219, 226 and 252

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Therefore, 48 CFR Parts 219, 226 and 252 are amended as follows:

1. The authority citation for 48 CFR Parts 219, 226 and 252 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 500.35 and DoD FAR Supplement 201.301.

PART 219—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

2. Section 219.001 is amended by adding a definition of "Disadvantaged Business Concerns" (DBC), alphabetically, as follows:

219.001 Definitions.

"Disadvantaged business concern", as used in this Part, means a business concern, including mass media, owned and controlled by individuals who are both socially and economically disadvantaged, as defined in regulations prescribed by the Small Business Administration (SBA) at 13 CFR Part 124, the majority of earnings of which directly accrue to such individuals, and which concern is not also a small business concern.

* * * * *

219.502-2 [Amended]

3. Section 219.502–2 is amended by adding paragraph (S–70) to read as follows.

* * * * *

(S–70) Total Set-Aside Exception Regarding Incumbent Disadvantaged Business Concerns.

(1) Notwithstanding FAR 19.502–2, a follow-on procurement for supplies or services (except construction or A&E), acquired by the contracting office under the existing contract on the basis of an unrestricted competition, shall not be totally set-aside for exclusive small business participation when the contracting officer determines based upon a written certification by the incumbent contractor, that the contractor—

(i) Is a disadvantaged business concern as defined in 219.001;

(ii) Derived contract revenues under the existing contract which represent at least one-third of the contractor's total revenues derived during the performance period of that contract; and

(iii) Desires to submit an offer in response to a follow-on solicitation.

(2) After learning of a follow-on requirement, the contracting officer shall notify the incumbent contractor of the requirement and permit the concern a period of ten (10) calendar days, or such longer period as the contracting officer may allow, to furnish a certification under the clause at 252.219–7012 together with any supporting documentation which the contracting officer deems necessary to verify the concern's status. Notification to the incumbent contractor need not be made when—

(i) A decision has been made to procure the follow-on requirement on an unrestricted basis, or through use of partial small business set-aside procedures under 219.502–3(S–70) or FAR 19.502–3; or

(ii) The contracting officer has information sufficient to conclude that the incumbent contractor is not a disadvantaged business concern as defined in 219.001.

(iii) The contracting officer shall accept the contractor's self-certification of its status as a disadvantaged business concern unless the contracting officer has reason to question that status. The contracting officer or the SBA may challenge the contractor's status as a disadvantaged business concern in accordance with the procedures at 219.302(S–70).

(3) When the contracting officer determines that the circumstances in (S–70)(1) above exist, the follow-on procurement shall be conducted either on an unrestricted basis or by using partial small business set-aside procedures under 219.502–3(S–70) or FAR 19.502–3 in the order of precedence set forth in 219.504(b) (5) and (6).

4. Section 219.502–72 is amended by adding paragraph (6) to paragraph (b), to read as follows:

219.502–72 Total SDB set-asides.

* * * * *

(b) * * *

(6) A determination has been made in accordance with 219.502–2(S–70)(a) to conduct the procurement either on an unrestricted basis or by using partial small business set-aside procedures.

* * * * *

5. Section 219.508 is amended by redesignating the existing paragraph (S–72) as (S–72)(1); by adding paragraph (S–72)(2); and by adding paragraph (S–74) to read as follows:

219.508 Solicitation provisions and contract clauses.

* * * * *

(S–72)(1) * * *

(S–72)(2) The contracting officer shall insert the clause with its Alternate I when the contracting officer, determines, in coordination with the contracting activity's SADBUS, that there are no SDB manufacturers available that can meet the requirements of the solicitation.

* * * * *

(S–74) The contracting officer shall insert the clause at 252.219–7012, Disadvantaged Business Concerns—Notice of Follow-On Procurement, in all solicitations and contracts when the procurement is conducted on an unrestricted basis.

6. Section 219.7000 is revised to read as follows:

219.7000 Policy.

(a) In furtherance of the Department of Defense objectives and initiatives undertaken to award acquisitions in all industrial categories in which small disadvantaged businesses (SDBs) have not dominated and to meet the five percent goal for SDBs established by section 1207 of Pub. L. 99–661 and section 806 of Pub. L. 100–180 (see 19.201), offers from SDB concerns shall be given and evaluation preference in accordance with the procedures of this subpart. The evaluation preference shall only be used in competitive acquisitions (except as provided in (b) below) where award is based on price and price related factors. However, in no event may award be made at a price which exceeds fair market price (see FAR 19.806–2) by more than 10 percent.

(1) The evaluation preference shall not apply when using—

(i) Small purchase procedures;

(ii) Total SDB set-asides;

(iii) Partial set-asides for LSA concerns;

(iv) Partial small business set-asides;

(v) Total small business set-asides.

(2) The evaluation preference shall: not be applied to—

(i) Otherwise low offers of eligible products under the Trade Agreements Act as defined in DFARS 25.401 when the acquisition equals or exceeds the dollar threshold stated in FAR 25.402, or qualifying country and products as defined in DFARS 25.001; or

(ii) Where the application would be inconsistent with a Memorandum of Understanding or any other international agreement with a foreign government (see Appendix T).

(b) Subject to the exceptions in (a) above, the evaluation preference may also be used in other competitive acquisitions, at the discretion of the source selection authority, when (1) SDBs are expected to possess the requisite qualification, consistent with the demands of the acquisition (e.g., see FAR 35.007 with regard to technical qualification of sources) and, (2) award price with not exceed fair market price by more than 10 percent.

7. Section 219.7001 is amended by adding a sentence following the first sentence to read as follows:

219.7001 Procedures.

* * * "Offers submitted by HBCUs/MIs shall be evaluated as through they were from SDB concerns (see 252.219–7007(d))." * * *

8. Section 219.7002 is amended by adding a sentence after the existing text as follows:

219.7002 Contract clause.

* * * The contracting officer shall insert the clause with its Alternate I when the contracting officer, determines, in coordination with the contracting activity's SADBUS, that there are no SDB manufacturers available that can meet the requirements of the solicitations.

PART 226—OTHER SOCIOECONOMIC PROGRAMS

9. Section 226.7003 is revised to read as follows:

226.7003 General policy.

In furtherance of the Government policy of placing a fair proportion of its acquisitions with HBCUs, MIs, and SDBs, section 1207 of Pub. L. 99–661 and section 806 of Pub. L. 100–180 established an objective for the Department of Denfense of awarding a combined total of five percent of its total contract dollars during each of fiscal years 1987–89 to HBCUs, MIs and SDBs (see 219.201) and of maximizing the number of such entities participating in Defense prime contracts and subcontracts. Executive Order 12320 also contains additional guidance concerning HBCUs. It is the policy of the Department of Defense to strive to meet these objectives through the enhanced use of outreach efforts, technical assistance programs, and the special authorities conveyed by these laws (e.g., through a total set-aside for HBCUs and MIs to acquire research and studies normally acquired from Higher Education Institutions (HEIs). With, regard to technical assistance programs, it is the Department's policy to provide HBCUs and MIs, technical assistance, to include information about the Department HBCU and MI program, advice about acquisition procedures, instructions on preparation of proposal, and such other assistance as is consistent with the Department's mission. In the event an HBCU or MI submits an offer under an unrestricted

BEST COPY AVAILABLE

acquisition that offers an evaluation preference for SDBs, the HBCU or MI offer shall be evaluated as if it had been submitted by an SDB concern (see 252.219–7007(d)).

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

10. Section 252.219–7007 is revised to read as follows:

252.219–7007 Notice of evaluation preference for small disadvantaged business (SDB) concerns (unrestricted).

As prescribed in 219.7007(a), insert the following clause:

Notice Evaluation Preference for Small Disadvantaged Business (SDB) Concerns (Date) (Unrestricted).

(a) *Definition.* (1) The term "small disadvantaged business (SDB) concern", as used in this clause, has the meaning set forth in the clause entitled Small Disadvantaged Business Concern Representation (DoD FAR Supplement Deviation).

(b) *Evaluation.* (2) After all other evaluation factors described in this solicitation are applied, and except as set forth in (b)(2) below, offers will be evaluated by adding a factor of ten percent (10%) to offers from concerns that are not SDB concerns and to offers from those SDB concerns which elect to waive the SDB evaluation preference (see paragraph (c) below) by checking the box below. However, in no event may award to made to an SDB concern at a price which exceeds fair market price (as determined under FAR 19.806–2) by more than ten percent (10%).

The SDB offeror requests that the evaluation preference in subparagraph (b)(1) above not be given to this offer.

(3) The evaluation factor desirable in subparagraph (a)(1) above shall not be applied to (i) otherwise low offers of eligible products under the Trade Agreements Act as defined in DFARS 25.401 when the acquisition equals or exceeds the dollar threshold stated in FAR 25.402, or qualifying country end products as defined in DFARS 25.011; or (ii) where the application would be inconsistent with a Memorandum of Understanding or any other international agreement with a foreign government (see Appendix T of the DoD FAR: Supplement).

(c) *Agreement.* (1) By submission of an offer and execution of a contract, the SDB Offeror/Contractor (except a regular dealer) who did not waive the evaluation preference by checking the box in paragraph (b) above agrees that in performance of the contract in the case of a contract for—

(i) *Services (Except Construction).* At least fifty (50%) of the cost of contract performance incurred for personnel shall be expended for employees of the concern.

(ii) *Supplies.* The concern shall perform work for at least fifty percent (50%) of the cost of manufacturing the supplies, not including the cost of materials.

(iii) *General Construction.* The concern will perform at least fifteen percent (15%) of the cost of the contract, not including the cost of materials, with its own employees.

(iv) *Construction be special trade contractors.* The concern will perform at least twenty-five percent (25%) of the cost of the contract, not including the cost of materials, with its own employees.

An SDB regular dealer submitting an offer in its own name, who did not waive the evaluation preference by checking the box in paragraph (b) above, agrees to furnish, in performing this contract, only end items manufactured or produced by SDB concerns in the United States, its territories and possessions, the Commonwealth of Puerto Rico, the U.S. Trust Territory of the Pacific Islands, or the District of Columbia. However, this requirement does not apply in connection with construction or service contracts.

(d) *HBCU/MI offer.* In the event an HBCU/MI as defined at 226.7002 submits to the contracting officer, upon request, a certification as to its HBCU/MI status.

(End of clause)

Alternate I (Date)

If a determination has been made in accordance with 219.7002 that there are not SDB manufacturers available who can meet the requirements of the solicitation, delete paragraph (c)(2) of the basic clause.

11. Section 252.219–7010 is amended by substituting the word "(Date)" in lieu of the date "(FEB 1988)"; by adding paragraph (4) to paragraph (c) of the clause and by adding Alternate I to read as follows:

252.219–7010 Notice of partial small business set-aside with preferential consideration for small disadvantaged business (SDB) concerns.

As prescribed at 219.508(S–72), insert the following clause:

Notice of Partial Small Business Set-Aside With Preferential Consideration for Small Disadvantaged Business (SDB) Concerns (FEB 1988)

* * * * * *

(c) *Agreement.*

* * * * * *

(4) In order to be entitled to preferential consideration, an SDB manufacturer or regular dealer submitting an offer in its own name agrees to furnish, in performing the contract, only end items manufactured or produced by SDB concerns inside the United States, its territories and possessions, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia. However, this requirements does not apply in connection with construction or service contracts.

(End of clause)

Alternate I (Date)

If a determination has been made in accordance with 219.508(S–72) that there are no SDB manufacturers available who can meet the requirements of the solicitation, insert the following paragraph (c)(4) in lieu of paragraph (c)(4) of the basic clause:

(c)(4) In order to be entitled to preferential consideration, an SDB manufacturer or regular dealer submitting an offer in its own name agrees to furnish, in performing this contract, only end items manufactured or produced by small business concerns in the United States, its territories and possessions, the Commonwealth of Puerto Rico, the U.S. Trust Territory of the Pacific Islands, or the District of Columbia. However this requirement does not apply in connection with construction or service contracts.

12. Section 252.219–7012 is added to read as follows:

252.219–7012 Disadvanged business concerns—notice of follow-on procurement.

As prescribed in 219.508(S–74), insert the following clause:

Disadvantaged Business Concerns—Notice of Following Procurement (Date)

(a) *Definition.* As used in this clause, this term "disadvantaged business concern" means a business concern, including mass media, owned and controlled by individuals who are both socially and economically disadvantaged, as defined in regulations prescribed by the Small Business Administration at 13 CFR Part 124, the majority of earnings of which directly accrue to such individuals, which concern is not also a small business concern.

(b) DoD FAR Supplement 219.502(S–70)(a) provides that a follow-on procurement for supplies or services (except construction or A&E), acquired on the basis of an unrestricted competition, shall not be totally set-aside for exclusive small business participation when the contracting officer determines, based upon a written certification by the incumbent contractor, that contractor (1) is a disadvantaged business concern (as defined in paragraph (a) above, (2) derived contract revenues under the existing, contract which represent at least one-third of the contractor's total revenues derived during the performance period of that contract, and (3) desires to submit an offer in response to a follow-on solicitation.

(c) If the Contractor meets the criteria in paragraph (b) (1) and (2) of this clause and desires to participate in a follow-on procurement, the Contractor agrees that it shall, within ten (10) calendar days (or such longer period as the Contracting Officer shall allow after receipt of notice by the Contracting Officer of a follow-on requirement—

(1) Certify in writing that it meets the criteria in paragraph (b) (1) and (2) above, and

(2) Provide such supporting documentation, as the Contracting Officer may require to verify the contractor's status.

Notices

Federal Register
Vol. 53, No. 236
Thursday, December 8, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of International Cooperation and Development

Cooperative Agreement; University of Idaho

AGENCY: Office of International Cooperation and Development (OICD), USDA.

ACTION: Notice of intent.

Activity: OICD intends to enter into an agreement with the University of Idaho to provide funding for research on Disinfestation of Fruit Using Shrinkwrap.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD anticipates the availability of funds in fiscal year 1989 (FY1989) to provide funding support to the University of Idaho for a joint research project with the USDA Tropical Fruit and Vegetable Research Laboratory, Hilo, Hawaii. The cancellation of ethylene dibromide (EDB) as a postharvest fumigant and the continued concern over the use of agricultural chemicals on fresh fruit and vegetables has necessitated renewed efforts for the development of alternative quarantine treatments against quarantine pests. This project will examine the advantages of shrinkwrap in terms of disinfestation and/or prevention of reinfestation of quarantine pests such as fruit flies as a potential control system that will make the use of chemicals unnecessary.

Assistance will be provided only to the University which will utilize funds to support purchase of equipment and supplies, technicians salaries and travel.

Based on the above, this is not a formal request for application. An estimated $50,000 will be available in FY1989 as partial support for this project.

Information on proposed Agreement #58–319R–9–007 may be obtained from: USDA/OICD/Management Services Branch, Washington, DC 20250–4300.

Date: December 5, 1988.

Nancy J. Croft,

Contracting Officer.

BILLING CODE 3410–DP–M

DEPARTMENT OF COMMERCE

International Trade Administration

[A–428–801, A–427–801, A–475–801, A–588–804, A–485–801, A–559–801, A–401–801, A–549–801, A–412–801, C–559–802, C–549–802]

Postponement of Final Antidumping Duty Determinations: Antifriction Bearings (Other than Tapered Roller Bearings) and Parts Thereof From the Federal Republic of Germany, France, Italy, Japan, Romania, Singapore, Sweden, Thailand, and the United Kingdom; and Postponement of Final Countervailing Duty Determinations: Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Singapore and Thailand

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: This notice informs the public that we have received requests from all respondents and the petitioner to postpone the final determinations as permitted by sections 735(a)(2)(A) and (B) of the Tariff Act of 1930, as amended (the Act). Based on these requests, we are postponing our final determinations as to whether sales of antifriction bearings (except tapered roller bearings) and parts thereof from the Federal Republic of Germany, France, Italy, Japan, Romania, Singapore, Sweden, Thailand, and the United Kingdom have occurred at less than fair value until not later than March 24, 1989.

Since the petitioner has already requested that the final determinations in the companion countervailing duty investigations be postponed to correspond with the date of the final antidumping duty determinations as permitted by section 705(a)(1) of the Act, we are postponing the deadline for our determinations as to whether sales of antifriction bearings from Singapore and Thailand have been subsidized until not later than March 24, 1989. We are also announcing the dates and locations of our public hearings in these investigations.

EFFECTIVE DATE: December 8, 1988.

FOR FURTHER INFORMATION CONTACT: Gary Taverman (202–377–0161), Barbara Tillman (202–377–2438) or Mary Clapp (202–377–3965), Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION: On November 9, 1988, we published preliminary determinations of sales at less than fair value of this merchandise (53 FR 45312–45367). On September 6, 1988, we published preliminary determinations that exports of this merchandise are being subsidized (53 FR 34329–34338).

From November 7 through November 21, 1988, we received requests from all respondents and the petitioner in these antidumping duty investigations that the final determinations in these investigations be postponed until not later than the 135th day after the date of publication of the preliminary determinations in the **Federal Register**. On September 29, 1988, we published a notice announcing that we had granted the request of the petitioner to extend the deadline date for the final determinations in the countervailing duty investigations to correspond to the final antidumping duty determinations of the same products pursuant to section 705(a)(1) of the Act (53 FR 38049). Accordingly, we are postponing the date of our final determinations in these antidumping and countervailing duty investigations until not later than March 24, 1989.

Public Comment

In conjunction with these postponements, we are scheduling the public hearings to afford interested parties an opportunity to comment on the preliminary determinations, in accordance with 19 CFR 353.47 and 355.35. Public hearings will be held as indicated below, at the U.S. Department of Commerce, 14th Street and

Constitution Avenue, NW., Washington, DC 20230.

Country	Date	Time	Room
Countervailing Duty Investigations:			
Singapore	Feb. 1, 1989	9:00 a.m.	3708
Thailand	Feb. 1, 1989	1:30 p.m.	3708
Antidumping Duty Investigations:			
Federal Republic of Germany.	Feb. 22, 1989.	9:30 a.m.	4830
France	Feb. 15, 1989.	9:30 a.m.	3708
Italy	Feb. 16, 1989.	9:30 a.m.	3708
Japan	Feb. 21, 1989.	9:30 a.m.	4830
Romania	Feb. 9, 1989	9:00 a.m.	3708
Singapore	Feb. 10, 1989.	9:00 a.m.	3708
Sweden	Feb. 9, 1989	1:30 p.m.	3708
Thailand	Feb. 10, 1989.	1:30 p.m.	3708
United Kingdom.	Feb. 14, 1989.	9:30 a.m.	3708

Requests to participate in the hearings have been filed.

Pre-hearing briefs in at least ten copies, both public and non-public versions, must be submitted to the Assistant Secretary for Import Adminstration, Room B-099, at the above address seven days prior to each individual hearing. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46 and 19 CFR 355.34, at the above address, in ten copies, within seven days after the hearing transcript is available.

The U.S. International Trade Commission is being advised of these postponements, in accordance with sections 735(d) and 705(d) of the Act. This notice is published pursuant to sections 735(d) and 705(d) of the Act.

Jan W. Mares,

Assistant Secretary for Import Administration.

December 2, 1988.

BILLING CODE 3510-DS-M

[C-122-805]

Postponement of Preliminary Countervailing Duty Determination: New Steel Rail, Except Light Rail, From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: Based upon the request of petitioner, the Bethlehem steel Corporation, the Department of Commerce (the Department) is postponing its preliminary determination in the countervailing duty investigation of new steel rail, except light rail, from Canada. The preliminary determination will be made on or before February 23, 1989.

EFFECTIVE DATE: December 8, 1988.

FOR FURTHER INFORMATION CONTACT: Roy Malmrose or Barbara Tillman, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377-5414 or 377-2438.

SUPPLEMENTARY INFORMATION: On September 26, 1988, the Department initiated as countervailing duty investigation of new steel rail, except light rail, from Canada. In our notice of initiation we stated that we would issue our preliminary determination on or before December 20, 1988 (53 FR 41394, October 21, 1988).

On November 17, 1988, the petitioner filed a request that the preliminary determination in this investigation be postponed for 65 days.

Section 703(c)(1)(A) of the Tariff Act of 1930, as amended (the Act), provides that the preliminary determination in a countervailing duty investigation may be postponed where the petitioner has made a timely request for such a postponement. Pursuant to this provision, and the timely request by petitioner in this investigation, the Department is postponing its preliminary determination until no later than February 23, 1989.

This notice is published pursuant to section 703(c)(2) of the Act.

Jan W. Mares,

Assistant Secretary for Import Administration.

November 30, 1988.

Intent To Grant Exclusive Patent License; L.D. Caulk Division of Dentsply

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to L.D. Caulk Division of Dentsply, having a place of business in Milford, DE, an exclusive license in the United States under the rights of the United States of America to manufacture, use, and sell products and use methods embodying the invention entitled "Resin-Modified Glass Ionomer Dental Cements," United States Patent Application Number 7–160,856. The patent rights in this invention will be assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the intended license would not serve the public interest.

Inquiries, comments, and other materials relating to the proposed license must be submitted to Papan Devnani, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

A copy of the instant patent application may be purchased from the NTIS Sales Desk by telephoning (703) 487–4650 or by writing to the Order Department, NTIS, 5285 Port Royal Road, Springfield, VA 22161.

Douglas J. Campion,

Associate Director, Office of Federal Patent Licensing, National Technical Information Service, U.S. Department of Commerce.

BILLING CODE 3510–04–M

Intent To Grant Exclusive Patent License; Urodynamic Systems, Inc.

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Urodynamic Systems, Inc., having a place of business in Sunnyvale, CA 94089, an exclusive license in the United States and certain foreign countries to practice an invention embodied in U.S. Patent Number 4,553,533, entitled "Intra-Urethral Prosthetic Sphincter Valve." The invention consists of a prosthetic urethral sphincter valve which is installed without surgery within a patient's urethra. Such invention closely simulates the natural physiologic function and is controlled by the patient internally rather than by external manual control. Prior to the grant of any license by NTIS, the patent rights in this invention will be assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the license would not serve the public interest.

Inquiries, comments, and other materials relating to the intended license must be submitted to Neil L. Mark, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

A copy of the instant patent application may be purchased from the NTIS Sales Desk by telephoning (703) 487–4650 or by writing to the Order Department, NTIS, 5285 Port Royal Road, Springfield, VA 22161.

Douglas J. Campion,

Associate Director, Office of Federal Patent Licensing, National Technical Information Service, U.S. Department of Commerce.

COMMISSION ON EXECUTIVE, LEGISLATIVE AND JUDICIAL SALARIES

Meeting

Notice is hereby given, pursuant to Pub. L. 92–463, that the Commission on Executive, Legislative and Judicial Salaries will hold a follow-up Executive Session on December 13, 1988 from 9:00 a.m. to 12:00 p.m. at 736 Jackson Place NW., Washington, DC.

Due to the late submission of needed data, it was not feasible to provide earlier notice of this meeting.

This final meeting is necessary to provide the Commission additional time to study the data in order to reach a decision concerning dollar figures to be recommended to the President on the 15th of December.

For further information, please contact the Commission's Office, 736 Jackson Place, NW. Washington, DC 20415, telephone 275–8031.

Polly L. Gault,

Executive Director.

VOL 53 ISS 236 DE 8 1988 UMI

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the Polish People's Republic

December 2, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854)

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION: A copy of the current bilateral textile agreement between the Governments of the United States and the Polish People's Republic is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647–1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 2, 1988.

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 15 and 31, 1984, as amended, between the Governments of the United States and the Polish People's Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Poland and exported during the twelve-month period beginning on January 1, 1989 and extending through December 31, 1989, in excess of the following levels of restraint:

Category	12-mo restraint limit
Aggregate group: 200–239, 300–369, 400–469, 600–670 and 831–859, as a group.	74,383,760 square meters equivalent.
Limits subject to the aggregate group:	
313	836,127 square meters.
315	836,127 square meters.
363	3,000,000 numbers.
410	1,991,893 square meters.
611	1,152,184 square meters.
617	836,127 square meters.
620	1,672,255 square meters.
843	204,000 numbers.
Group II: 237, 239, 330–359, 630–642, 645–659 and 833, as a group.	55,552,678 square meters equivalent.
Sublevels within group II:	
237	46,640 dozen.
239	99,187 kilograms.
333/833	117,945 dozen.
334	289,327 dozen of which not more than 23,100 dozen shall be in Category 334pt.[1]
335	56,995 dozen.
338	885,471 dozen.
339	363,841 dozen.
340/640	111,300 dozen.
341/641	84,800 dozen.
347/348	159,000 dozen.
359	149,685 kilograms.
634	193,047 dozen.
635	101,120 dozen.
638	246,086 dozen.
639	184,565 dozen.
645/646	144,747 dozen.
647	191,963 dozen.
648	106,646 dozen.
659	110,392 kilograms.
Group III: 431–442 and 444–459, as a group.	2,005,608 square meters equivalent.
Sublevels within group III:	
433	7,748 dozen.
434	3,704 dozen.
435	6,198 dozen.
440	7,896 dozen.
444	61,982 numbers.
445	16,945 dozen.
446	11,173 dozen.
447	12,397 dozen.
448	5,556 dozen.
459	50,606 kilograms.
Group IV: 443/643/644, as a group.	176,750 numbers.

[1] In Category 334pt., all tariff numbers except 6112.11.00.10.

Imports charged to these category limits, except Categories 439 and 839, for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The restraint limits set forth above are subject to adjustment in the future according to the provisions of the current bilateral agreement between the Governments of the United States and the Polish People's Republic.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

Establishing Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the United Arab Emirates; Correction

December 5, 1988.

In the **Federal Register** notice published on November 7, 1988 (53 FR 44936), column 3, last line of paragraph 4, change June 27, 1987 to June 27, 1988.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88–28243 Filed 12–7–88; 8:45 am]

BILLING CODE 3510–DR–M

Extending Coverage of Export Visa and Exempt Certification Requirements for Certain Cotton Textile Products Produced or Manufactured in Uruguay

December 2, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs extending coverage of visa and exempt certification requirements.

EFFECTIVE DATE: January 1, 1989.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Pursuant to the terms of the visa and exempt certification mechanism established under the terms of the current bilateral textile agreement and the Memorandum of Understanding dated October 17, 1988 between the Governments of United States and the Republic of Uruguay, export, visas will be required for cotton textile products in Category 334.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 50 FR 6232, published on February 14, 1985.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreement.

Committee for the Implementation of Textile Agreements

December 2, 1988.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on February 8, 1985, by the Chairman, Committee for the Implementation of Textile Agreements. That directive, as amended on May 22, 1986, established export visa and exempt certification requirements for cotton and wool textile products, produced or manufactured in Uruguay.

Effective on January 1, 1989, the February 8, 1985 directive is being amended further to require an export visa or exempt certification for cotton textile products in Category 334, produced or manufactured in Uruguay and exported from Uruguay on and after January 1, 1989. Merchandise in Category 334 which has been exported prior to January 1, 1989 shall not be denied entry for lack of a visa or exempt certification.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Application for Discharge of Member or Survivor of Member of Group Certified to have Performed Active Duty with the Armed Forces of the United States; DD Form 2168; and OMB Control Number 0704–0100.

Type of Request: Extension

Average Burden Hours/Minutes Per Response: 30 minutes.

Frequency of Response: 1.

Number of Respondents: 1000.

Annual Burden Hours: 500.

Annual Responses: 1000.

Needs and Uses: DD Form 2168 is essential to identify and collect basic information needed to search available records or develop sufficient information to determine the applicant's membership in a group approved by the DoD Civilian/Military Service Review Board for equivalent active military service status.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Dr. Timothy Sprehe.

Written comments and recommendations on the proposed information collection should be sent to Dr. Timothy Sprehe at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison.

A copy of the information collection proposal may be obtained from Mrs. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone (202) 746–0933.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense

BILLING CODE 3810–01–M

Advisory Council on Dependents' Education; Meeting

AGENCY: Department of Defense Dependents Schools (DoDDS), Office of the Secretary of Defense, DoD.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Council on Dependents' Education. It also describes the functions of the Council. Notice of this meeting is required under the National Advisory Committee Act. Although the meeting is open to the public, because of space constraints, anyone wishing to attend the meeting should contact the DoDDS coordinator.

DATE: January 13, 1989, 9 a.m. to 5 p.m.; January 14, 1989, 9 a.m. to 4:30 p.m.

ADDRESS: January 13, 1989, The Pentagon, Room 3E869, Washington, DC. January 14, 1989, Embassy Suites, Adams Morgan Room, 1402 South Eads Street, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: Ms. Marilyn Witcher, DoDDS, 2461 Eisenhower Avenue, Alexandria, Virginia, 22331–1100, (202/325–0867).

SUPPLEMENTARY INFORMATION: The Advisory Council on Dependents' Education is established under title XIV, section 1411, of Pub. L. 95–561, Defense Dependents' Education Act of 1978, as amended by title XII, section 1204(b)(3)–(5), of Pub. L. 99–145, Department of Defense Authorization Act of 1986 (20 U.S.C., chapter 25A, section 929, Advisory Council on Dependents' Education). The Council is co-chaired by designees of the Secretary of Defense and the Secretary of Education. In addition to a representative of each of the Secretaries, 12 members are appointed jointly by the Secretaries. Members include representatives of educational institutions and agencies, professional employee organizations, unified military commands, school

administrators, parents of DoDDS students, and one DoDDS student. The Director, DoDDS, serves as the Executive Secretary of the Council. The purpose of the Council is to advise the Secretary of Defense and the DoDDS Director about effective educational programs and practices that should be considered by DoDDS and to perform other tasks as may be required by the Secretary of Defense. The agenda includes information on student attendance policy, expansion of the Drug Abuse Resistance Education program, staff development, programs to combat teenage alcohol abuse, teacher competency tests, parental communication, and responses to the recommendations made by the Council in its August meeting.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 5, 1988.

AMENDMENT

A0319.01DACA

System Name: Debt Collection System.

Where Published Last: 51 FR 30901, August 29, 1986.

Changes:

System Name: Debt Collection System(s)/FINCP–FF

Authority for Maintenance of the System: Add "E.O. 9397"

Purpose(s): Delete entire entry and add "To provide a basis for establishment of and post audit of each receivable to provide a history of collection activities and answer inquiries pertaining to such collection activity. This information is to establish, formulate, maintain, monitor accounts receivables and administer the Federal Claims Collection Act(s)."

Routine Uses of Records Maintained in the System, Including Categories of Users and the Purposes of Such Uses: Delete entire entry and add "Data necessary to identify the individual involved are disclosed to:

a. Consumer Reporting Agencies:

(1) Whenever a financial status report is requested for use in the administration of the Federal Claims Collection Act, Claims of the U.S. may be compromised, terminated or suspended, when warranted, by information collected.

(2) Pursuant to 5 U.S.C. 552a(b)(12) that an individual is responsible for a debt to the U.S. Army provided the debt has been validated, is overdue and the debtor has been advised of the disclosure and his rights to dispute, appeal or review the claim.

b. U.S. Department of Justice/U.S. Attorneys: For legal action and/or final disposition of the debt claims. The litigation brief(s) (comprehensive, written referral recommendations) will restructure the entire scope of the collection cases.

c. Internal Revenue Service:

(1) To obtain locator status for delinquent accounts receivable. (Automated controls exist to preclude redisclosure of solicited IRS address data.)

(2) To report write-off amounts as taxable income as pertains to amounts compromised and accounts barred from litigation due to age.

(3) To provide for offset of tax refunds.

d. Private Collection Agencies: For collection service whenever USAFAC has exhausted its internal collection actions.

e. Credit Card Processing Institutions: To collect indebtedness by credit card.

f. Other Government Agencies: For the purpose of offset; administrative or salary.

g. See "Blanket Routine Uses" set forth at the beginning of the Army's listing of record system notices."

Storage: Delete "and printouts; microfiche." Add "computer printouts and microfiche."

Retrievability: Delete "By Social Security Number, name, and substantiating document number, conventional indexing is used to retrieve data." Add "By SSN, alphabetically by name, and substantiating document number. Conventional indexing is used to retrieve data."

Safeguards: Delete "in effect." Add "utilized." Delete "in the performance of their official duties." Add "for need to know."

Retention and Disposal: Delete "these records are sent to the Federal Records Center General Services Administration at Dayton, Ohio;" Add "Disposition is to federal records centers and".

System manager(s) and address: Delete entire entry and add "Commander, USAFAC, Department 80, ATTN: FINCP–FF, Indianapolis, IN 46249–0001."

Notification Procedure: Delete "ATTN: FINCP–FF, Department 80". Delete "Social Security Number". Add "SSN".

Record Access Procedures: Add "or telephone (317)–542–28509"

Record Source Categories: Add after "installation," "Internal Revenue Service,".

AO319.01DACA

SYSTEM NAME:

Debt Collection System(s)/FINCP–FF.

SYSTEM LOCATION:

United States Army Finance and Accounting Center (USAFAC), Fort Benjamin Harrison, Indiana 46249–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Separated and retired military/civilian personnel and others indebted to the U.S. Army.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of current and former military members and civilian employees' pay accounts showing entitlements, deductions, payments made, and any indebtedness resulting from deductions and payments exceeding entitlements. These records include, but are not limited to: individual military pay records, substantiating documents such as military pay orders, pay adjustment authorizations, military master pay account printouts from the Joint Uniform Pay System (JUMPS), records of travel payments, financial record data folders, miscellaneous vouchers, personal financial records, credit reports, promissory notes, indvidual financial statements, and correspondence. Applications for waiver of erroneous payments or for remission of indebtedness with supporting documents including, but not limited to, statements of financial status (personal income and expenses), statements of commanders, statements of accounting and finance officers, correspondence with members and employees. Claims of individuals requesting additional payments for service rendered with supporting documents including, but not limited to, time and attendance reports, leave and earnings statements, travel orders, travel vouchers, and correspondence with members and employees. Delinquent accounts receivable from field accounting and finance officers including, but not limited to, returned checks, medical services billings, collection records, and summaries of the U.S. Army Criminal Investigation Command and Federal Bureau of Investigation reports. Reports from probate courts regarding estates of deceased debtors. Reports from bankruptcy courts regarding claims of the United States against debtors.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

31 U.S.C., section 3711; 10 U.S.C., section 2774; 12 U.S.C., section 1715; and E.O. 9397.

PURPOSE(S):

To provide a basis for establishment of and post audit of each receivable to provide a history of collection activities and answer inquiries pertaining to such collection activity. This information is to establish, formulate, maintain, monitor accounts receivables and administer the Federal Claims Collection Act(s).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Data necessary to identify the individual involved are disclosed to:

a. Consumer Reporting Agencies:

(1) Whenever a financial status report is requested for use in the administration of the Federal Claims Collection Act. Claims of the U.S. may be compromised, terminated or suspended, when warranted, by information collected.

(2) Pursuant to 5 U.S.C. 552a(b)(12) that an individual is responsible for a debt to the U.S. Army provided the debt has been validated, is overdue and the debtor has been advised of the disclosure and his rights to dispute, appeal or review the claim.

b. U.S. Department of Justice/U.S. Attorneys: For legal action and/or final disposition of the debt claims. The litigation brief(s) (comprehensive, written referral recommendations) will restructure the entire scope of the collection cases.

c. Internal Revenue Service:

(1) To obtain locator status for delinquent account receivables. (Automated controls exist to preclude redisclosure of solicited IRS address data.)

(2) To report write-off amounts as taxable income as pertains to amounts compromised and accounts barred from litigation due to age.

(3) To provide for offset of tax refunds.

d. Private Collection Agencies: For collection service whenever USAFAC has exhausted its internal collection actions.

e. Credit Card Processing Institutions: To collect indebtedness by credit card.

f. Other Government Agencies: For the purpose of offset; administrative or salary.

g. See "Blanket Routine Uses" set forth at the beginning of the Army's listing of record system notices.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records, in collection file folders and bulk storage, card files, computer magnetic tapes, computer printouts and microfiche.

RETRIEVABILITY:

By SSN, alphabetically by name, and substantiating document number. Conventional indexing is used to retrieve data.

SAFEGUARDS:

USAFAC employs security guards. An employee badge and visitor registration system is utilized. Hard copy records are maintained in areas accessible only to authorized personnel who are properly screened, cleared and trained. Computerized records are accessed by custodian of the records system and by person(s) responsible for servicing the records system for need-to-know. Certifying finance and accounting officers of debts have access to debt information to confirm if the debt is valid and collection action is to be continued. Computer equipment and files are located in a separate secured area.

RETENTION AND DISPOSAL:

Accounts receivables are converted to microfiche and retained for 6 years. Destruction is by shredding. Other records—retention periods vary according to category, but total retention periods do not exceed 56 years. Disposition is to federal records centers and destruction thereafter is by burning or salvage as waste paper.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, USAFAC, Department 89, ATTN: FINCP–FF, Indianapolis, IN 46249–0001.

NOTIFICATION PROCEDURE:

Individuals desiring to know whether this system of records contains information about them should contact the System Manager, furnishing full name, SSN, and military status or other information verifiable from the record itself.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records in this system pertaining to them should submit a written request as indicated in "Notification procedure" and furnish information required therein or telephone (317)–542–2859.

CONTESTING RECORD PROCEDURES:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340–21 (32 CFR Part 505).

RECORD SOURCE CATEGORIES:

Information is received from Department of Defense staff and field installations, Internal Revenue Service, Social Security Administration, Treasury Department, financial organizations, and automated system interface.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

[FR Doc. 28272 Filed 12–7–88; 8:45am]

BILLING CODE 3810–01–M

Department of the Navy (Marine Corps)

Privacy Act of 1974; Amended Record System

AGENCY: Department of the Navy (U.S. Marine Corps), DOD.

ACTION: Notice of one amended system of records subject to the Privacy Act.

SUMMARY: The Marine Corps is amending one system of records subject to the Privacy Act, as amended, (5 U.S.C. 552a).

DATE: This proposed action will be effective without further notice January 9, 1989, unless comments are received which would result in a contrary determination.

ADDRESS: Send any comments to Mrs. B.L. Thompson, Privacy Act Coordinator, Headquarters, U.S. Marine Corps, Washington, DC 20380–0001, telephone: (202) 694–4008, autovon: 224–4008.

SUPPLEMENTARY INFORMATION: The U.S. Marine Corps systems notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a) Pub. L. 93–579 have been published in the **Federal Register** as follows:

FR Doc 85–10237 (50 FR 22674) May 29, 1985
FR Doc 86–22610 (51 FR 35548) October 6, 1986
FR Doc 86–28837 (51 FR 45932) December 23, 1986
FR Doc 87–13559 (52 FR 22670) June 15, 1987

The specific changes to the record system being amended are set forth below, followed by the systems notice, as amended, published in its entirety.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 5, 1988.

MMN00009

System name:

Military Police Information System (MILPINS) (50 FR 22712, May 29, 1985).

Changes:

Categories of individuals covered by the system:

Delete the entire entry and substitute, with the following: "Files contain information concerning both military and civilian personnel who have come in contact with the military victims, suspects, or witnesses to incidents, complaints reported to the Provost Marshal. Files also contain data on military personnel living in base sponsored housing, or who have registered weapons or pets aboard the base. Military personnel and civilians who have registered motor vehicles are also included."

Categories of records in the system:

Delete the entire entry and substitute the following paragraph: "Incidents/complaints reported to the installation Provost Marshal and all subjects listed on Field Interviews/Reports by the military police. The individual's name, description, social security number, address, offense charges, location of office/incident, date, time, blotter entry number, military police report number, and disposition of case are maintained. Housing information includes phone number, building number, address, and dependent information. Pet registration information includes species, sex, breed, color, name and inoculation dates. Weapon registration information includes brand name, caliber, type, and model. Motor vehicle information includes year, make, model, color, license number, insurance company, and decal information. Work section information includes phone number, division code, building number, building key access, and recall information. Personnel information includes date of birth, sex, race, age, and date transferred."

Authority for maintenance of the system:

Delete the entire entry and substitute with the following: "Title 10, U.S. Code 5031; E.O. 9397.'

Purpose(s):

Delete the entire entry and substitute with the following:

"To provide a rapid means for military police to access reports for proper disposition of cases. The system also provides a historical record of all reports on individuals who have come in contact with the military police as victims, suspects of witnesses to incidents."

Storage:

Delete the entire entry and substitute with the following: "Computer magnetic disks and tapes; index cards and printouts in security file cabinets."

Safeguards

Delete the last two sentences and replace with the following: "Passwords are required to access those programs which produce printed output. Access to the computer is controlled via a centralized security office and printouts may only be receipted for by designated personnel. All index cards and printouts are filed in locked security cabinets."

Retention and disposal

Delete the entire entry and substitute with the following: "Records are maintained three months to six years depending on the type of information."

MMN00009

SYSTEM NAME:

Military Police Information System (MILPINS).

SYSTEM LOCATION:

Decentralized segments—commands within area of jurisdiction.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Files contain information concerning both military and civilian personnel who have come in contact with the military police as victims, suspects, or witnesses to incidents, complaints reported to the Provost Marshal. Files also contain data on military personnel living in base sponsored housing, or who have registered weapons or pets aboard the base. Military personnel and civilians who have registered motor vehicles are also included.

CATEGORIES OF RECORDS IN THE SYSTEM:

Incidents/complaints reported to the installation Provost Marshal and all subjects listed on Field Interviews/ Reports by the military police. The individual's name, description, social security number, address, offense charges, location of offenses/incident, date, time, blotter entry number, military police report number, and disposition of case are maintained. Housing information includes phone number, building number, address, and dependent information. Pet registration information includes species, sex, breed, color, name and inoculation dates. Weapon registration information includes brand name, caliber, type, and model. Motor vehicle information includes year, make, model, color, license number, insurance company, and decal information. Work section information includes phone number, division code, building number, building key access, and recall information. Personnel information includes date of birth, sex, race, age, and date transferred.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 10, U.S. Code 5031, E.O. 9327

PURPOSE(S):

To provide a rapid means for military police to access reports for proper disposition of cases. The system also provides historical record of all reports on individuals who have come in contact with the military police as victims, suspects or witnesses to incidents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Marine Corps compilation apply to this system.

Courts—By officials of duly established local, state and federal courts as a result of court order pertaining to matters properly within the purview of said court.

Congress of the U.S.—By the State or the House of Representatives of the U.S. or any committee or subcommittee thereof, any joint committee of Congress or subcommittee of joint committee on matters within their jurisdiction requiring disclosure of the files.

The Comptroller General of the U.S.—By the Comptroller General or any of his authorized representatives in the course of the performance of the duties of the General Accounting Office relating to the Marine Corps.

To provide information to another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States which has been authorized by law to conduct law enforcement activities pursuant to a request that the agency or instrumentality initiate criminal or civil against an individual on behalf of the U.S. Marine Corps, the Department of the Navy, or the Department of Defense.

To provide information to individuals pursuant to a request for assistance in a criminal or civil action against a member of the U.S. Marine Corps, by the U.S. Marine Corps, the Department of the Navy, or the Department of Defense.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer magnetic disks and tapes; index cards and printouts in security file cabinets.

RETRIEVABILITY:

Filed by full name or social security number (SSN).

SAFEGUARDS:

Records are maintained in areas accessible only to authorized personnel that are properly screened, cleared and trained. Passwords are required to access those programs which produce printed output. Access to the computer is controlled via a centralized security office and printouts many only be receipted for by designated personnel. All index cards and printouts are filed in locked security cabinets.

RETENTION AND DISPOSAL:

Records are maintained three months to six years depending on the type of information.

SYSTEM MANAGER(S) AND ADDRESS:

Installation Provost Marshal of activity concerned.

NOTIFICATION PROCEDURE:

Information may be obtained from Installation Provost Marshal of activity concerned.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to Provost Mashal of activity concerned.

Written requests for information should contain the full name of the individual, social security number, date and place of birth.

For visits, the individual should report to Provost Marshal of the respective installations.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES

Military Police Blotters and Field Interview Card.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3810–01–M

DEPARTMENT OF ENERGY

Financial Assistance Award; Intent To Award Grant to National Association of State Utility Consumer Advocates (NASUCA)

AGENCY: U.S. Department of Energy.

ACTION: Notice of Unsolicited Financial Assistance Award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.14, it is making a financial assistance award based on an unsolicited application under Grant Number DE–FG01–89CE28300 to NASUCA for the production of the "NASUCA Least-Cost Utility Planning Handbook" which will further the regulatory and technological transfer of Least-Cost Utility Planning (LCUP).

SCOPE: This grant will aid in providing funding for the research and preparation of a manual to be used by consumer groups interested in either initiating an LCUP process or participating effectively in a process already underway.

The purpose of this project will be to bring about an expansion and further transfer of information and data among consumers and their representatives to assist in achieving dependable energy service at rates that are reasonable, as well as assuring utility services to the consumer at the least cost for future generating capacity.

ELIGIBILITY: Based on receipt of an unsolicited application, eligibility of this award is being limited to NASUCA, a non-profit organization which serves as an information clearinghouse to educate its members on activities in other states and at the federal level. NASUCA has the exclusive domestic capability to perform this activity successfully based upon technical expertise and the unique nature of the organization. There is no known other entity which is conducting or planning to conduct activities such as preparation of this manual.

The term of this grant shall be six months from the effective date of award.

The estimated cost of this grant is $29,925.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Procurement Operations, Attn: Phyllis Morgan, MA–453.2, 1000 Independence Avenue SW., Washington, DC 20585.

Thomas S. Keefe,

BILLING CODE 6450–01–M

National Petroleum Council; Meeting Postponement

An open meeting of the National Petroleum Council which was scheduled to be held on Tuesday, December 13, 1988, at 9:00 a.m., the Madison Hotel, Dolley Madison Ballroom, 15th & M Streets NW., Washington, DC, has been postponed. This meeting was announced in the **Federal Register,** Vol. 53, No. 221 on Wednesday, November 16, 1988.

Donald L. Bauer,

Principal Deputy Assistant Secretary, Fossil Energy.

[FR Doc. 28292 Filed 12–7–88; 8:45 am]

BILLING CODE 6450–01–M

Office of Conservation and Renewable Energy

Energy Conservation Program for Consumer Products; Petition for Waiver and Application for Interim Waiver of Refrigerator and Refrigerator-Freezer Test Procedures From Amana Refrigeration Inc. (RF–005)

AGENCY: Conservation and Renewable Energy Office, DOE.

SUMMARY: Today's notice publishes a "Petition for Waiver" and "Application for Interim Waiver" from the Amana Refrigeration Inc. (Amana), of Amana, Iowa, requesting a waiver from the existing Department of Energy (DOE) test procedure for refrigerators and refrigerator-freezers for its model DE25 variable defrost control refrigerator-freezer. In addition, today's notice grants Amana's application for an Interim Waiver.

Amana is a manufacturer of home appliances including refrigerators and refrigerator-freezers. Amana has developed a variable defrost control that initiates defrost cycles in refrigerator-freezer in response to operating conditions and usage patterns. Amana requests relief from the existing test procedures because it believes they yield materially inaccurate estimates of the energy consumption for models equipped with the variable defrost controls.

DOE is soliciting comments, data and information regarding the petition.

DATE: DOE will accept comments, data and information not later than January 9, 1989.

ADDRESS: Written comments and statements shall be sent to: Department of Energy, Office of Conservation and Renewable Energy, Case No. RF–005, Mail Stop CE–132, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Douglass S. Abramson, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE–132, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9127

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–12, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9507

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Pub. L. 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Pub. L. 95–619, 92 Stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Pub. L. 100–12, and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Pub. L. 100–357, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including refrigerators and refrigerator-freezers. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

DOE has amended the prescribed test procedures by adding 10 CFR 430.27 on September 26, 1980, creating the waiver process. 45 FR 64108. DOE further amended the Department's appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy to grant an interim waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary for Conservation and Renewable Energy to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of a waiver.

The interim waiver provisions, added by the 1986 amendment, allow the Assistant Secretary to grant an interim waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the petition for waiver will be granted and/or the Assistant Secretary determines that it would be desirable for public reasons to grant immediate relief pending a determination on the petition for waiver.

Amana's petition seeks a waiver from the DOE test provisions that requires the energy consumption of refrigerator-freezers be determined by Appendix A1 of Subpart B of 10 CFR Part 430. Amana states that the existing test procedure does not adequately evaluate the true energy consumption of its product because there is no provision in the existing test procedure to determine the interval between defrost cycles for a refrigerator-freezer with a variable defrost control. Amana believes that the existing test procedure is likely to incorrectly estimate the energy consumption of these models, thereby misleading the consumer. Since the current DOE test procedures do not address this control feature, Amana asks that the waiver be granted. Amana requests approval to perform testing to determine energy consumption in accordance with the DOE proposed test procedure as published in the **Federal Register** on September 26, 1988. 53 FR 37416.

In support of its position that the petition for waiver will likely be granted, Amana identified four current waivers which DOE has issued for similar control features.

Three of the four were issued to Whirlpool Corporation (Whirlpool), Case No. FR–001, January 11, 1985. 50 FR 1628. Case Nos. RF–003 and FR–004, October 14, 1986. 51 FR 36591.

The fourth waiver was issued to White Consolidated Industries, Case No. FR–002, on April 26, 1986. 51 FR 15679.

In reviewing Amana's Application for Interim Waiver, the Department finds that the company has not provided sufficient information for DOE to evaluate what, if any, economic impact or competitive disadvantage, Amana will likely experience absent a favorable determination on the Application for Interim Waiver.

However, Amana has demonstrated through the granting by DOE of the four previous waivers and the Department's proposed rule published in the **Federal Register** on September 26, 1988 (53 FR 37416) the likelihood of success of its petition for waiver.

Therefore, the Department finds that it would be desirable for public policy reasons to grant Amana's Application for an Interim Waiver. Specifically, in those instances where the likely success of the petition for waiver has been demonstrated based upon DOE having granted a waiver for similar product design, it is in the public interest to have similar products tested and rated for energy consumption on a comparable basis.

Pursuant to paragraph (b) of 10 CFR 430.27, DOE is hereby publishing the "Petition for Waiver" in its entirety. The petition contains no confidential information. DOE solicits comments, data, and information regarding the petition.

In addition, pursuant to paragraph (e) of § 430.27 of the Code of Federal Regulations, the following letter granting the Application for Interim Waiver was issued to Amana Refrigeration, Incorporated.

Issued in Washington, DC, December 1, 1988.

John R. Berg,

Assistant Secretary, Conservation and Renewable Energy.

December 1, 1988

Mr. Robert DeHaan,

Director of Engineering, Amana Refrigeration, Inc., Amana, Iowa 52204.

Dear Mr. DeHaan: This is in response to your October 10, 1988, Application for Interim Waiver, from the Department of Energy (DOE) test procedures for refrigerators and refrigerator-freezers when testing Amana's model DE25 variable defrost control refrigerator-freezer.

Pursuant to the Energy Policy and Conservation Act, as amended, the Department has prescribed test procedures to measure the energy consumption of certain major household appliances, including refrigerator-freezers. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchase decisions. These test procedures appear in the Code of Federal Regulations at 10 CFR Part 430, Subpart B.

DOE amended the test procedure regulations on September 26, 1980, (45 FR 64108) and November 26, 1986 (51 FR 42823). These provisions allow the Assistant Secretary for Conservation and Renewable Energy to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing of the basic model according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inadequate comparative data. The 1986 amendments provide that an interim waiver from test procedure requirements will be granted by the Assistant Secretary for Conservation and Renewable Energy if it is determined that the applicant will experience economic hardship if the application for interim waiver is denied, if it appears likely that the petition for waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the petition for waiver. Paragraph 430.27.

Amana has demonstrated the likely success of its Petition for Waiver based upon the showing that DOE proposed test procedures for variable defrost control refrigerator-freezers on September 26, 1988, (53 FR 37416) and that four waivers had been granted from the Department's refrigerator and refrigerator-freezer test procedures for models with variable defrost controls. Amana's Application for Interim Waiver does not provide sufficient information for the Department to evaluate what, if any, economic impact or competitive disadvantage will likely be experienced absent a favorable determination on the Application for Interim Waiver. However, the Department finds that it would be desirable for public policy reasons to grant Amana's Application for Interim Waiver. Specifically, in those instances where the likely success of the petition for waiver has been demonstrated based upon DOE having granted waivers for similar products tested and rated for energy consumption on a comparable basis.

Therefore, Amana's Application for an Interim Waiver requesting relief from the DOE test procedures for its model DE25 variable defrost control refrigerator-freezer is granted.

Amana shall be permitted to test its model DE25 variable defrost control refrigerator-freezer on the basis of the test procedures specified in 10 CFR Part 430, with the modification set forth below.

(i) A new section 5.2.1.3 is added as follows:

5.2.1.3 Variable Defrost Control. The energy consumption in kilowatt-hours per day shall be calculated equivalent to:

$ET = (1440 \times EP1/T1 + (EP2 - (EP1 \times T2/T1) \times 12/CT$

where ET and 1440 are defined in 5.2.1.1 and EP1, EP2, T1, and T2 and 12 are defined in 5.2.1.2

$CT = (CT_L \times CT_M)/(F \times (CT_M - CT_L) + CT_L)$

CT_L = least or shortest time between defrosts in tenths of an hour (but not less than 12 hours)

CT_M = maximum time between defrost cycles in tenths of an hour (but not more than 84 hours)

F = ratio of per day energy consumption in excess of the least energy and the maximum difference in per day energy consumption

$F = (1/CT - 1/CT_M)/(1/CT_L - 1/CT_M) = (ET - ET_L)/(ET_M - ET_L)$ or $F = 0.20$ in lieu of testing to find CT

ET_L = least electrical energy used (kilowatt hours)

ET_M = maximum electrical energy used (kilowatt hours)

This interim waiver shall remain in effect for 180 days from the date of issuance or until the Department of Energy issues a determination on Amana's Petition for Waiver, which ever occurs first.

This interim waiver is based upon the presumed validity of the statements and allegations submitted by the applicant. This interim waiver may be revoked or modified at any time upon a determination that the factual basis underlying the application is incorrect.

Yours truly,

John R. Berg,

Assistant Secretary, Conservation and Renewable Energy.

October 10, 1988

Petition for Waiver

To: Donna R. Fitzpatrick, Assistant Secretary for Conservation and Renewable Energy, United States Department of Energy, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585

From: Amana Refrigeration, Inc., Amana, Iowa 52204

Amana Refrigeration, Inc. submits this Petition for Waiver pursuant to the provisions of 10 CFR 430.27:

1. *Petitioner.* Amana Refrigeration, Inc. is a manufacturer of home appliances including refrigerator-freezers and hereby petitions for a waiver from the test procedure specified in 10 CFR Part 430, Subpart B, Appendix A1. Concurrently with the filing of this Petition for Waiver, Amana Refrigeration, Inc. is filing an Application for Interim Waiver.

2. *Identification of Model.* Amana Refrigeration has developed and plans to market a basic twenty-five (25) cubic foot side-by-side refrigerator-freezer model equipped with a through-the-door ice dispenser and an electronic variable defrost control. At this time the basic refrigerator has three versions identified as SXDE25, SLDE25, and SCDE25. The first two letters in the prefix may change in the future but the control system will not be affected. Suffix alpha or numeric designators may also be used to indicate model year or color/visual characteristics, but the "DE25" designation will remain. The prefix and

suffix changes will not indicate a change in the control system.

3. *Other Manufacturers.* White Consolidated Industries and Whirlpool Corporation are other manufacturers known to Amana to have models incorporating a non-time initiated defrost system similar to the Amana design. Both of these companies have submitted Petitions for Waiver which have been addressed by the Department.

4. *Electronic Variable Defrost Control Design Principles.* The variable defrost control employs a microcomputer utilizing an algorithm that initiates defrost cycles on a non-timed basis depending on (1) compressor run time and (2) the length of the preceding defrost period. The actual interval between defrost cycles with this control could range from eight (8) to seventy-two (72) compressor run time hours. Under normal operating conditions, the interval between defrost cycles ranges from eight (8) to sixteen (16) compressor run time hours. In a non-use vacation mode, the defrost cycle lenghtens to seventy-two (72) compressor run time hours.

5. *Basis for Waiver.* Without a waiver, this refrigerator-freezer must be tested under the provisions of 10 CFR Part 430, Subpart B, Appendix A1. That test does not adequately evaluate the true energy consumption of this product. There is no provision in the test procedure 10 CFR, Part 430, Subpart B, Appendix A1 to determine the interval between defrost cycles for a refrigerator-freezer with an electronic variable defrost control as described above, which would be comparable to normal usage patterns. Under the conditions specified in the test procedures, it is likely the actual energy consumption of the Amana variable defrost system will be estimated incorrectly, and be misleading to consumers. This result would be unfair to both consumers and to Amana. The consumer, when comparing operating costs, might be led into purchasing a product based upon incorrect judgments about energy consumption because the labeling information is not representative of normal usage patterns. Amana, on the other hand, would be placed in the position of providing cost of operation information for the energy guide label which it believes is inaccurate.

6. *Proposed and Alternative Test Procedures.* Amana Refrigeration, Inc. has reviewed the test procedure modifications requested and adopted by previous waivers (RF–001, RF–002, RF–003, and RF–004), as well as the Notice of Proposed Rulemaking, Federal Register Vol. 53, No. 186 p. 37416–37422, issued by the U.S. Department of Energy, regarding 10 CFR Part 430, Subpart B, Appendix A1. The Notice of Proposed Rulemaking prescribes test procedures for rating refrigerators with innovative features such as variable defrost control (VDC). Amana has investigated the formula calculations described in 5.2.1.3. of the Proposed Rule and finds that it substantially represents the function of our refrigerator in actual consumer usage. Therefore, Amana Refrigeration, Inc. requests that the proposed calculation procedure described in amended paragraph 5.2.1.3. of 10 CFR Part 430 Subpart B, Appendix A1, found in Federal Register Vol. 53, No. 186, p. 37416–37422, as corrected, be allowed for this model. This method will result in a CT=15 hours.

7. *Further Information.* If additional information is desired, please contact Robert L. Cushman (319/622–2300).

Robert DeHaan,

Director of Engineering, (319) 622–2744.

October 10, 1988

Application for Interim Waiver

To: Donna R. Fitzpatrick, Assistant Secretary for Conservation and Renewable Energy, United States Department of Energy, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

From: Amana Refrigeration, Inc., Amana, Iowa 52204.

In accordance with 10 CFR 430.27, Amana Refrigeration, Inc. hereby submits this Application For Interim Waiver. This application is submitted concurrently with a Petition for Waiver pertaining to a 25 cubic foot refrigerator-freezer basic model which may be designated as SCDE25, SXDE25 or SLDE25. This refrigerator-freezer has an electronic variable defrost control system.

1. *Likely Success of the Petition for Waiver.* Amana Refrigeration believes that the Petition for Waiver will be successful in that the proposed test procedure allows the model to be tested in a manner that will accurately represent consumer usage patterns and thereby arrive at data representative of true energy consumption. This is consistent with public and the purposes of the National Appliance Energy Conservation Act of 1987.

2. *Favorable Determination on the Application for Interim Waiver.* Failure to reach a favorable determination on this Application for Interim Waiver will discourage future development of innovative control systems intended to address actual consumer usage patterns. Electronic variable defrost control systems better respond to actual consumer use patterns than do conventional timed defrost systems, thereby resulting in lower energy consumption. A favorable determination on this application for Interim Waiver will serve to further the nation's energy conservation policy by encouraging other manufacturers to provide more energy efficient appliances.

3. *Competitive and Economic Considerations.* Amana Refrigeration has invested heavily in both human and monetary resources to bring an innovative product to the point of production. If Amana cannot accurately label and market this product, it stands to lose both its investment and a competitive position in the overall market for energy conserving refrigerator/freezer appliances.

4. *Further Information.* If additional information is required, please contact Robert L. Cushman (319/622–2300).

Respectfully submitted,

Robert DeHaan,

Director of Engineering, (319) 622–2744.

Certificate of Notification

The undersigned hereby certifies that on the 10th day of October, 1988 Amana Refrigeration, Inc. forwarded by ordinary mail a Notice of an Application for Interim Waiver to all known manufacturers of domestically marketed units of side-by-side refrigerator/freezers. Attached hereto is a copy of the form of Notice.

The Notice was sent to the following:

Mr. Leonard A. Hadley, President, Admiral Division of Maytag Corp., Home Appliances, Monmouth Blvd., Galesburg, IL 61401

Mr. Roger Schipke, Senior Vice President, General Electric Co., Major Appliance Business Group, Building 3, Room 232, Appliance Park, Louisville, KY 40225

Mr. Homer Price, President/CEO, Sub-Zero Freezer Co., Inc., P.O. Box 4130, Madison, WI 53711–0130

Mr. David Whitwam, President/CEO, Whirlpool Corp., Administrative Center, 2000 M–63, Benton Harbor, MI 49022–2692

Mr. J. M. Ringler, President, White Consolidated Industries, Major Appliance Group, 300 Phillipi Road, Columbus, OH 43228.

Robert DeHaan,
Director of Engineering, (319) 622-2744.
October 10, 1988

Notice

To: [Name and Address]
From: Amana Refrigeration, Inc.,
Amana, Iowa 52204

Notification is hereby given to you that, pursuant to the terms of 10 CFR 430.27, Amana Refrigeration, Inc. has on the date of mailing of this Notice to you also mailed to Donna R. Fitzpatrick, Assistant Secretary, Conservation and Renewable Energy, United States Department of Energy, an Application for Interim Waiver. A copy of the Application for Interim Waiver is attached hereto for your information.

You are further advised that the Assistant Secretary for Conservation and Renewable Energy will receive and consider timely written comments on the Application for Interim Waiver.

Respectfully submitted,
Robert DeHaan,
Director of Engineering, (319) 622-2744

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

Hydroelectric Application Filed With the Commission

December 2, 1988.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Transfer of License.
b. *Project No.:* 4114-009.
c. *Date Filed:* November 18, 1988, and revised on November 29, 1988.
d. *Applicant:* Long Lake Energy Corporation.
e. *Name of Project:* Lower Saranac.
f. *Location:* On the Saranac River in Clinton County, New York.
g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).
h. *Applicant Contact:* Sanford L. Hartman, 420 Lexington Avenue, New York, NY 10170, (212) 986-0440.
i. *FERC Contact:* William Guey-Lee, (202) 376-9536.
j. *Comment Date:* December 15, 1988.
k. *Description of transfer:* Long Lake Energy Corporation, in order to facilitate financing of the project, proposes to transfer the license to Lower Saranac Hydro Partners L.P., a limited partnership. The license was issued June 26, 1987, and would expire May 31, 2027.

l. This notice also consists of the following standard paragraphs: B, C, and D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATIONS," "PROTEST" or "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 204-RB, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

D2. Agency Comments—The Commission invites federal, state, and local agencies to file comments on the described application. (Agencies may obtain a copy of the application directly from the applicant.) If an agency does not file comments within the time specified for filing comments, the Commission will presume that the agency has none. One copy of an agency's comments must also be sent to the applicant's representatives.

Lois D. Cashell,
Secretary.

Hydroelectric Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. *Type of Filing:* Major License.
b. *Project No.:* 6986-003.
c. *Date Filed:* September 15, 1986.
d. *Applicant:* Tranquility Irrigation District.
e. *Name of Project:* Griswold Creek Hydroelectric Project.
f. *Location:* In the Stanislaus National Forest, on Griswold Creek, in Tuolumne County, California. Township (T) 3N, Range (R) 15E, and T 4N, R 15E Mount Diablo Meridian.
g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).
h. *Applicant Contact:* Mr. Keith Miller, Tranquility Irrigation District, P.O. Box 365, Tranquility, CA 93668, (209) 698-7225.
i. *FERC Contact:* Thomas Dean, (202) 376-9562.
j. *Comment Date:* January 12, 1989.
k. *Description of Project:* The proposed project would consist of: (1) A 23-foot-long, 10-foot-wide grated drop inlet diversion structure with an invert elevation of 3,289 feet msl; (2) a 50-foot-long, 50-inch-diameter penstock leading to; (3) a 100-foot-long by 12-foot-wide reinforced concrete fish screen structure; (3) a 12,800-foot-long steel penstock varying in diameter from 50-inches to 38-inches leading to; (4) a 45-foot by 60-foot reinforced concrete powerhouse containing a single 11,000 kW generating unit; (5) a 70-foot-long tailrace discharging flows into the Middle Fork Stanislaus River; (6) a 4.4-mile-long, 115-kV transmission line; and (7) appurtenant facilities.

The applicant estimates the average annual energy production to be 33.26 GWh.

l. *Purpose of Project:* Applicant intends to sell the power generated from the proposed facility to Pacific Gas and Electric Company.

m. This notice also consists of the following standard paragraphs: A3, A9, B, and C.

2 a. *Type of Filing:* Minor License.
b. *Project No.:* 10038-001.
c. *Date Filed:* September 9, 1988.
d. *Applicant:* Summit Hydro Power.
e. *Name of Project:* Cargill Falls Hydroelectric Project.
f. *Location:* On the Quinebaug River near Putnam, Windham County, Connecticut.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Duncan Broatch, P.O. Box 122, Putnam, CT 06260, (203) 928–2002.

i. *FERC Contact:* Ed Lee, (202) 376–5786.

j. *Comment Date:* January 12, 1989.

k. *Description of Project:* The proposed run-of-river project would consist of: (a) The existing 130-foot-long and 24-foot-high Putnam Dam; (b) an existing 16-acre reservoir having a gross storage capacity of 80 acre-feet at normal surface elevation of 253.4 feet msl; (c) an existing intake structure located at the southeast end of the dam consisting of four 3-foot-wide by 5-foot-high wooden head gate; (d) a new forebay consisting of masonry walls and a ledge floor; (e) a new masonry powerhouse housing a single 1.2–MW generating unit having an average annual generation of 5.4 GWh; (f) a new tailrace; (g) a proposed 25-foot-long, 23-kV transmission line; and (h) appurtenant facilities. The project dam is owned by the Town of Putnam, CT.

l. *Purpose of Project:* All project energy will be sold to Connecticut Light and Power Company.

m. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

3 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10654–000.

c. *Date Filed:* September 1, 1988.

d. *Applicant:* Marseilles Hydro Assocaites.

e. *Name of Project:* Marseilles Hydroelectric Project.

f. *Location:* On the Illinois River near Marseilles, La Salle County, Illinois.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Dominique Darne, Might Development Corporation, 1900 L Street NW., Suite 608, Washington, DC 20036, (202) 775–4692.

i. *FERC Contact:* Michael Dees, (202) 376–9414.

j. *Comment Date:* January 9, 1989.

k. *Description of Project:* The proposed project would utilize the existing Corps of Engineers' Marseilles Lock and Dam and reservoir and would consist of: (1) An existing headgate structure and canal; (2) an existing concrete powerhouse 100 feet by 200 feet housing four new hydropower units with a combined capacity of 10,500 kW; (3) a proposed tailrace 200 feet wide, 750 feet long and 15 feet deep; (4) a proposed 64-kV transmission line 2,500 feet long; and (5) appurtenant facilities. The estimated annual energy production is 55 GWh. Project energy would be sold to Illinois Power Company. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $15,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

4 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10657–000.

c. *Date Filed:* September 9, 1988.

d. *Applicant:* Pacific Water & Power, Inc.

e. *Name of Project:* San Antonio Reservoir/Turner Dam Power.

f. *Location:* On the outlet piping from the San Antonio Reservoir, which is owned by the San Francisco Water Department and is fed by San Antonio, Indian, Apperson, and South Fork Creeks in Alameda County, California.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Robert R. Doelle, 960 La Mesa Drive, Portola Valley, CA 94025, (415) 854–3574.

i. *FERC Contact:* Mr. James Hunter, (202) 376–1943.

j. *Comment Date:* January 4, 1989.

k. *Description of Project:* The proposed project would consist of: (1) The 194-foot-high James H. Turner Dam and 120,000-acre-foot San Antonio Reservoir; (2) the 1500-foot-long, 5-foot-diameter penstock connecting the reservoir to a pumping station; (3) a powerhouse along the penstock, containing approximately three generating units with a total capacity of 1600 kW and an average annual output of 12.12 GHW; and (4) a transmission line connecting to the Pacific Gas & Electric Company (PG&E) distribution system. The estimated costs of permit activities is $20,000.

l. *Purpose of Project:* Power from the project would be sold to PG&E.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

5 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10658–000.

c. *Date Filed:* September 9, 1988.

d. *Applicant:* Pacific Water & Power, Inc.

e. *Name of Project:* Calaveras Reservoir/Dam Power.

f. *Location:* On the outlet piping from Calaveras Reservoir, which is on Calaveras Creek, and on a tunnel connecting the Alameda Creek Diversion Dam with Calaveras Reservoir, which are owned by San Francisco City and County and located in Alameda and Santa Clara Counties, California.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Robert R. Doelle, 960 La Mesa Drive, Portola Valley, CA 94025, (415) 854–3574.

i. *FERC Contact:* Mr. James Hunter, (202) 376–1943.

j. *Comment Date:* January 4, 1989.

k. *Description of Project:* The proposed project would consist of: (1) The diversion dam on Alameda Creek with a diversion tunnel taking water to Calaveras Reservoir; (2) the 210-foot-high Calaveras Dam and 100,000-acre-foot Reservoir; (3) the 20,500-foot-long, 5-foot-diameter penstock connecting the reservoir to the Sunol Filtration Plant; (4) a powerhouse to be located just upstream of the Plant and a powerhouse to be located at the outlet of the Alameda Creek diversion tunnel, containing a total of aproximately three generating units with a total capacity of 4 MW and an average annual output of 26.5 GWH; and (5) a transmission line connecting to the Pacific Gas & Electric Company (PG&E) distribution system. The estimated cost of permit activities is $20,000 to $30,000.

l. *Purpose of Project:* Power from the project would be sold to PG&E.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

6 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10673–000.

c. *Date Filed:* October 5, 1988.

d. *Applicant:* Tuttle Creek Associates.

e. *Name of Project:* Tuttle Creek Hydro Project.

f. *Location:* On the Big Blue River near Manhattan Riley County, Kansas.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Tom Forbes, 3244 106th Ave., SE., Bellevue, WA 98004, (206) 453–0500.

i. *FERC Contact:* Ed Lee, (202) 376–5786.

j. *Comment Date:* January 12, 1989.

k. *Description of Project:* The proposed project would utilize the U.S. Army Corps of Engineers' Tuttle Creek Dam and Reservoir, and would consist of: (1) A new 775–foot-long steel penstock approximately 20 feet in diameter; (2) a new 75-foot-long and 64-foot-wide powerhouse located on the south side of the existing stilling basin; (3) a new 34.5 kV transmission line approximately 1-mile long; and (4) appurtenant facilities. Applicant estimates the total capacity of the project to be 14,500 kW, and the average annual generation to be 56,690 MWh. All energy generated would be sold to a local utility company. Applicant estimates that the cost of the studies under permit would be $125,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

7. a. *Type of Application:* Transfer of License.

b. *Project No.:* 9951–012.

c. *Date Filed:* October 25, 1988.

d. *Applicant:* The Charter Township of Van Buren, Michigan Adirondack Hydro Development Corporation, and STS French Landing Ltd.

e. *Name of Project:* French Landing Project.

f. *Location:* On the Huron River in Wayne County, Michigan.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Stephen O. Schultz, Foster, Swift, Collins & Coey, P.C., 313 South Washington Square, Lansing, MI 48933–2193, (517) 372–8050.

i. *FERC Contact:* Steven H. Rossi, (202) 376–9814.

j. *Comment Date:* January 6, 1989.

k. *Description of Transfer:* On October 25, 1988, The Charter Township of Van Buren, Michigan and Adirondack Hydro Development Corporation (licensee) and The Charter Township of Van Buren and STS French Landing Ltd. (transferee) filed a joint application for transfer of a major license for the French Landing Project No. 9951.

The purpose of the proposed transfer of license is to facilitate the financing of the project. No construction has started to date.

The proposed transfer would not result in any changes in the operation of the project. All engineering, design, and feasibility studies performed would be transferred to the transferee. The transferee states that it would comply with all the terms and conditions of the license.

l. This notice also consists of the following standard paragraphs: B and C.

8. a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10675–000.

c. *Date Filed:* October 13, 1988.

d. *Applicant:* Northeast Utilities Service Company.

e. *Name of Project:* Dwight Project.

f. *Location:* On the Chicopee River, Hampden County, Massachusetts.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:*

Mr. Richard W. Thomas, Western Massachusetts Electric Company, P.O. Box 270, Hartford, CT 06141–0270, (203) 665–3719

Mr. R.A. Rechert, Vice President, Northeast Utilities Service Company, P.O. Box 270, Hartford, CT 06141–0270

i. *FERC Contact:* Mary Nowak, (202) 376–9634.

j. *Comment Date:* January 17 1989.

k. *Description of Project:* The proposed project would consist of the following facilities: (1) An existing 15-foot-high and 306-foot-long stone masonry overflow spillway; (2) an existing reservoir with a surface area of 32 acres, a storage capacity of approximately 70 acre-feet, and a normal surface elevation of 78.8 feet mean sea level; (3) an existing 3,000-foot-long power canal of variable cross section delivering water from the headworks to the forebay; (4) three existing penstocks, each 168 feet long and 7 feet in diameter; (5) an existing powerhouse containing three generating units with a capacity of 480 kW each for a total installed capacity of 1,440 kW; (6) an existing 3.2-mile-long transmission line; and (7) appurtenant facilities. The applicant estimates that the average annual generation is 8,520 MWh. The existing dam is owned by the Western Massachusetts Electric Company. The applicant estimates that cost of the studies under permit would be $236,000. The project was found jurisdictional under UL88–29–000.

l. This notice also consists of the following standard praragraphs: A5, A7, A9, A10, B, C, and D2.

9. a. *Type of Filing:* Preliminary Permit.

b. *Project No.:* 10627–000.

c. *Date Filed:* July 15, 1988.

d. *Applicant:* Wailuku Hydroelectric Development, Inc.

e. *Name of Project:* Wailuku River Water Power Project.

f. *Location:* On the Wailuku River and its tributaries in Piihonua County, Hawaii.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* J. Paul Carrington, Kahala Energy Development Corp., 820 Mililani Street, Suite 701, Honolulu, Hawaii 96813, (808) 526–4552.

i. *FERC Contact:* Nanzo T. Coley, (202) 376–94156.

j. *Comment Date:* January 23, 1989.

k. *Description of Project:* The proposed project would utilize lands owned by the State of Hawaii and would consist of three proposed alternatives.

Alternate A would consist of: (1) Two proposed diversion structures, each approximately 25 feet high and 110 feet long; (2) two proposed forebays, each with a surface area of acres and a storage capacity of 50 acre-feet at an elevation of 1,880 feet m.s.l.; (3) two proposed 8-foot-diameter horseshoe tunnels or penstocks, each approximately 2,000 feet long, which converge into one 8-foot-diameter penstock and diverge for 8,400 feet and 2,600 feet, respectively; (4) a proposed upper and lower powerhouse with a generating unit rated at 12,000 kW and 14,000 kW, respectively; (5) proposed tailraces; (6) a proposed access road; (7) proposed 2,500-foot-long and 2,000-foot-long, 69 kV transmission lines; and (8) appurtenant facilities. The estimated average annual energy output for Alternate A is 86,000,000 kwh.

Alternate B would consist of: (1) A proposed diversion structure approximately 25 feet high and 110 feet long; (2) a proposed forebay with a surface area of 2 acres and a storage capacity of 25 acre-feet at an elevation of 1,880 feet m.s.l.; (3) a proposed bifurcated 60-inch-diameter, 13,000–foot-long penstock; (4) a proposed upper and lower powerhouse in the same location as Alternate A, containing a generating unit rated at 7,000–kW and 8,000 kW, respectively; (5) a proposed access road; (6) proposed transmission lines as in Alternate A; and (7) appurtenant facilities. The estimated average annual energy output for Alternate B is 68,000,000 kwh.

Alternate C would consist of: (1) Two proposed diversion structures each approximately 15 feet high and 50 feet long; (2) two proposed forbays, each with a surface area of 0.8 acre and a storage capacity of 8 acre-feet at an elevation of 1,420 feet m.s.l.; (3) two proposed 48-inch-diameter penstock, which conveys water from each diversion for 2,800 feet and 1,800 feet, respectively, and merge into one 60-inch-diameter, 2,900-foot-long penstock; (4) a proposed powerhouse containing a generating unit rated at 5,000 kW; (5) a proposed access road; (6) a proposed 69–kV, 6,500-foot-long transmission line; and (7) appurtenant facilities. The estimated average annual energy output for Alternate C is 17,000,000 kwh. The applicant estimates that the cost of the work to be performed under the preliminary permit in each case would be $150,000.

l. *Purpose of Project:* Energy produced at the project would be sold to Hawaii Electric and Light Company.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

10 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10676–000.

i. *FERC Contact:* Thomas Dean, (202) 376–9562.

j. *Comment Date:* January 27, 1989.

k. *Description of Application:* The proposed project would consist of: (1) A 10-foot-high embankment dam; (2) a 2-acre reservoir with a normal maximum water surface elevation of 5,090 feet msl; (3) a 96-inch-diameter, 8,200-foot-long pipeline leading to; (4) a powerhouse at elevation 4,860 feet msl containing 2 generating units with a combined capacity of 10 MW; and (5) a 11-mile-long, 12.5-kV transmission line.

The applicant estimates the average annual energy production to be 36.000

MWh. The approximate-cost of the studies under the permit would be $45,000.

l. *Purpose of Project:* Applicant intends to sell the power generated from the proposed facility to Utah Power and Light Company.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

19 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10674–000.

c. *Date Filed:* October 11, 1988.

d. *Applicant:* Midtec Paper Company.

e. *Name of Project:* Midtec Protect.

f. *Location:* On the Fox River in Outagamie County, Wisconsin.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. C.E. Wise, Manager or Engineering, Maintenance & Utilities, Midtec Paper Company, North Main Street, Kimberly, WI 54136, (414) 788–3511 Ext. 447.

i. *FERC Contact:* Robert Bell, (202) 376–9237.

j. *Comment Date:* January 25, 1989.

k. *Description of Project:* The proposed project would utilize the U.S. Corps of Engineers Cedric Lock and Dam and impoundment and would consist of: (1) An existing intake structure; (2) 31 existing 12 foot 8 inch diameter penstocks 66 inches long; (3) an existing powerhouse containing 3 generating unit with a total installed capacity of 2700 kW; and (4) appurtenant facilities. The proposed project would have an average annual generators of 8600 MWh.

l. *Purpose of Project:* All energy generated would be used by applicant in its mills.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permits will not be accepted in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Dean Shumway, Director, Division of Project Review, Federal Energy Regulatory Commission, Room 203–RB, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. Agency Comments—States, agencies established pursuant to federal law that have the authority to prepare a comprehensive plan for improving, developing, and conserving a waterway affected by the project, federal and state agencies exercising administration over fish and wildlife, flood control, navigation, irrigation, recreation, cultural or other relevant resources of the state in which the project is located, and affected Indian tribes are requested to provide comments and recommendations for terms and conditions pursuant to the Federal Power Act as amended by the Electric Consumers Protection Act of 1986, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. Recommended terms and conditions must be based on supporting technical data filed with the Commission along with the recommendations, in order to comply with the requirement in section 313(b) of the Federal Power Act, 16 U.S.C. section 8251(b), that Commission findings as to facts must be supported by substantial evidence.

All other federal, state, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant

to the statutes listed above. No other formal requests will be made. Responses should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not respond to the Commission within the time set for filing, it will be presumed to have no comments. One copy of an agency's response must also be sent to the Applicant's representatives.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: December 5, 1988, Washington, DC.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28290 Filed 12-7-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP89-305-000 et al.]

Northwest Pipeline Corporation et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Northwest Pipeline Corporation

[Docket No. CP89-305-000]

December 1, 1988.

Take notice that on November 29, 1988, Northwest Pipeline Corporation, (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-305-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service for Williams Gas Marketing (Williams), a marketer, under the blanket certificate issued in Docket No. CP86-578-000 on January 19, 1988, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest states that pursuant to an agreement dated September 26, 1988, as amended September 26, 1988, and October 28, 1988, under Rate Schedule TI-1, it proposes to transport up to 35,500 MMBtu per day equivalent of natural gas for Williams, which transportation service may involve interconnections between Northwest and various transporters. Northwest states that it would receive the gas from existing wells located in Uintah County, Utah, and Garfield, Mesa, Rio Blanco, La Plata and Gunnison Counties, Colorado, and transport the gas to various delivery points on Northwest's system in Colorado and Utah.

Northwest advises that service under § 284.223(a) commenced October 1, 1988, as reported in Docket No. ST89-677 (filed November 14, 1988). Northwest further advises that it would transport 10,000 MMBtu on an average day and 3,650,000 MMBtu annually.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. K N Energy, Inc.

[Docket No. CP89-278-000]

December 2, 1988.

Take notice that on November 23, 1988, K N Energy, Inc. (K N), P.O. Box 15265, Lakewood, Colorado 80215, filed in Docket No. CP89-278-000 a request pursuant to § 157.205(b) of the Commission's Regulations under the Natural Gas Act for authorization to construct and operate sales taps for the delivery of gas to end-users, under the blanket certificate issued in Docket Nos. CP83-140-000, CP83-140-001 and CP83-140-002 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

K N proposes to construct and operate seven sales taps. K N states that the taps would be located in Box Butte, Fillmore, Hamilton, Clay and Buffalo Counties, Nebraska, and in Thomas and Sheridan Counties, Kansas. K N further states that the end use of the gas delivered at each of the seven taps would be irrigation or domestic. K N indicates that the estimated cost of the taps would range from $850 to $1150.[1]

K N states that the proposed sales taps are not prohibited by any of its existing tariffs and that the additional taps will have no significant impact on K N's peak day and annual deliveries.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Texas Gas Transmission Corporation

[Docket No. CP88-279-000]

December 2, 1988.

Take notice that on November 23, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-279-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Summit Pipeline and Producing Company (Summit), under its blanket authorization issued in Docket No. CP88-686-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas would perform the proposed interruptible transportation service for Summit, pursuant to a gas transportation service agreement under dated September 22, 1988. The term of the transportation agreement is from the date of execution by Summit and shall continue in effect month-to-month thereafter, unless terminated upon 30 days written notice by either party. Texas Gas proposes to transport on a peak day up to 35,000 MMBtu; on an average day up to 10,000 MMBtu; and on an annual basis 12,775,000 MMBtu for Summit. Texas Gas proposes to receive the subject gas from various exiting points of receipt on its system in Louisiana, Texas, and Arkansas. Texas Gas would then transport and redeliver such volumes to Summit at existing points of delivery in Ohio and Kentucky for ultimate use by Kroger Bakery. The proposed rate to be charged is contained in Texas Gas' currently effective T rate schedule. It is stated that Summit also agrees to pay the legally effective GRI funding unit, which is currently 1.47 cents per MMBtu, and the currently effective FERC ACA unit charge which is .2 cents per MMBtu, when applicable.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Texas Gas commenced such self-implementing service on October 11, 1988, as reported in Docket No. ST89-620-000.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89-255-000]

December 2, 1988.

Take notice that on November 21, 1988, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas, 77251 filed in Docket No. CP89-255-000, an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to partially abandon sales service to a

[1] K N states that customers reimburse a portion of the construction costs to K N through imposition of a connection charge which varies by state. This charge is $250 in Kansas and $400 in Nebraska.

BEST COPY AVAILABLE

certain existing jurisdictional sales customer, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco proposes to partially abandon sales service to North Penn Gas Company (North Penn). Transco performs this service under a December 5, 1968 Service Agreement and Transco's Rate Schedule ACQ–3. Transco requests that the abandonment be made effective January 1, 1989. Transco states that Article II of the Service Agreement provides that the agreement shall be in full force and effect for a period ending December 31, 1988, and year to year thereafter unless terminated by either party at the end of the primary period or any anniversary thereof by not less than thirty days' prior written notice. Transco states that by letter dated April 7, 1987, North Penn gave Transco written notice of North Penn's desire to reduce the existing annual contract quantity of 3,607,347 Mcf under the Service Agreement to 1,000,000 Mcf.

Comment date: December 23, 1988, in accordance with Standard Paragraph F at the end of this notice.

5. Natural Gas Pipeline Company of America

[Docket No. CP89–270–000]

December 2, 1988.

Take notice that on November 22, 1988, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP 89–270–000 a request pursuant to §§ 157.205 and 284.223(b) of the Commission's Regulations under the Natural Gas Act for authorization to provide an interruptible transportation service for BP Gas Marketing Company (BP), a marketer of natural gas, under its blanket certificate issued in Docket No. CP86–582 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Natural states that it proposes to transport natural gas from points of receipt located in Oklahoma, Louisiana, Offshore Louisiana, Illinois, Texas, and Kansas to points of delivery located in Illinois, Louisiana, New Mexico, Texas, Iowa, Arkansas, Oklahoma, and Kansas.

Natural further states that the maximum daily, average and annual quantities that it would transport for BP would be 500,000 MMBtu equivalent, 200,000 MMBtu equivalent and 73,000,000 MMBtu equivalent, respectively.

Natural indicates that in a filing made with the Commission on November 22, 1988, it reported that transportation service for BP began on September 21, 1988 under the 120-day automatic authorization provisons of § 284.233(a).

Comment Date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. PennEast Gas Services Company, CNG Transmission Corporation, Texas Eastern Transmission Corporation

[Docket No. CP88–195–001]

December 2, 1988.

Take notice that on November 10, 1988, PennEast Gas Services Company (PennEast), a general partnership, CNG Transmission Corporation (CNG Transmission), 445 West Main Street, Clarksburg, WV 26301, and Texas Eastern Transmission Corporation (Texas Eastern) (jointly Applicants), P.O. Box 2521, Houston, TX 77252, filed a Compliance amendment to their joint application filed in Docket No. CP88–195–000 on January 15, 1988, for certificates of public convenience and necessity and related authorizations. The Compliance Amendment supplements and modifies Applicants' original application, solely to reflect a modification of the design of certain of the proposed facilities for which Commission authorization to construct and operate is requested. The Compliance amendment is currently on file with the Commission and is available for public inspection.

Applicants state that on January 15, 1988, applicants filed a joint application in abbreviated form for certificates of public convenience and necessity, pursuant to section 7(c) of the Natural Gas Act. Applicants sought authorization for:

(1) PennEast to render long-term firm transportation services for two industrial cogeneration developers with facilities in New York, New Jersey and New England under a new Rate Schedule T–4, and to construct and operate related pipeline, compression and metering facilities to be known as the "Niagara System."

(2) CNG Transmission to render related gas compression and metering services for PennEast in support of the Niagara System.

(3) Texas Eastern to render related gas compression and metering services for PennEast in support of the Niagara System.

(4) A blanket certificate of public convenience and necessity pursuant to 18 CFR 284.221 authorizing open access, non-discriminatory transportation of natural gas.

Applicants further state that specifically, PennEast sought construction and operation authorization in its application for its Niagara System, which could consist of incremental pipeline, compression and metering facilities, which would be operated in conjunction with existing facilities owned and operated by CNG Transmission and Texas Eastern to render the proposed transportation services from the proposed receipt points to the proposed New York delivery points. By the original application, PennEast proposed to construct and operate the following facilities:

In Conjunction With CNG Transmission

—27 miles of 24-inch pipeline between CNG Transmission's Ellisburg and Woodhull Storage Pools;

—4,000 HP, 2,700 HP, 1,350 HP, and 3,200 HP compression at CNG Transmission's Greenlick Compression Station, State Line Junction, Marilla measuring and regulating station, and Line No. PL–1 near Doylesburg, Pennsylvania, respectively;

—Metering and regulating facilities at the existing interconnection between CNG Transmissin and Texas Eastern at Leidy Storage Pool;

In Conjunction With Texas Eastern

—5.31 miles of 24-inch pipeline and 11.25 miles of 36-inch pipeline looping on Texas Eastern's Leidy pipeline on the suction side and discharge side, respectively, of PennEast's proposed Centre Hall compressor station;

—11 miles and 0.75 miles of 36-inch pipeline replacing a like quantity of Texas Eastern's 20-inch pipeline at the discharge of Station 25 and Texas Eastern's Hanover Lateral in New Jersey, respectively;

—Installation and expansion of capacity of Texas Eastern's measuring and regulating stations No. 087, Perulack and Chambersburg.

Applicants state that the original application was filed in response to the Commission's Notice of July 24, 1987, soliciting applications for authority to provide new natural gas service to the Northeast United States, and that on March 17, 1988, the Commission issued an order consolidating various related applications into specific project proposals, designating certain applications to serve the Northeast as "discrete," and tentatively identifying certain other projects including the Niagara/Cogen project as mutually exclusive and requiring comparative consideration. It is stated that on July 27, 1988, the Commission issued an order

which, *inter alia*, appointed a settlement judge, whose role would be to "identify, additional discrete projects or separate groups of competitive projects" and to "simplify and focus any remaining competitive issues."

Applicants further state that on August 15, 1988, the Associated PennEast Customer (APEC) Group filed an offer of settlement that provided for the severance from the open season proceedings of various projects or portions of projects in order to provide service to the APEC members by the winter of 1989–90.

Applicants state that by its order of October 26, 1988, the Commission found the LNG reinstatement portion of the Capacity Restoration Project (CRP project) to be eligible for processing as a discrete project and directed Texas Eastern to file an application to implement that portion of the CRP project. It is stated that that application is being filed concurrently at Docket No. CP87–92–004 and that, as a result of the filing by Texas Eastern of the Fence-to-Fence facilities and the separate LNG reinstatement facilities, modifications are necessary to facilities proposed for other PennEast projects which were designed in conjunction with Texas Eastern's system and were in a subsequent design sequence. It is further stated that by its October 26, 1988, Order, the Commission ordered:

The sponsors of PennEast-Niagara/Cogen and the Greater Northeast project shall file, within 15 days, revised applications to reflect changes in facilities and services resulting from the severance of the APEC projects.

Applicants state that their Compliance Amendment is submitted in response to that directive and in compliance with the October 26, 1988, Order, to reflect only modifications to *facilities* resulting from changes in Texas Eastern facilities resulting from severance of the APEC project, and that no changes in PennEast-Niagara/Cogen project *services* result from the APEC severance.

PennEast requests authorization to construct and operate the following facilities in conjunction with Texas Eastern's system:

—16.24 miles of 36-inch pipeline looping on Texas Eastern's Leidy pipeline, M.P. 40.91 to M.P. 24.66;

—Replace 25.25 miles of 20-inch pipeline No. 2 with 36-inch pipeline between Station 25 and Station 26, M.P. 1405.47 to 1430.72;

—Additional modification of Measuring and Regulation Stations Nos. 087, Perulack and Chambersburg;

—Upgrade two existing 4,000 HP DC990/compressor units to 5,100 HP each at Station 28;

—Aerodynamic assembly changeout at Perulack Station.

The estimated capital cost of the proposed facilities is $101,343,500. PennEast's plan of financing remains unchanged from the original application.

Comment date: December 23, 1988, in accordance with Standard Paragraph F at the end of the notice.

7. Williams Natural Gas Company

[Docket Nos. CP89–243–000, CP89–250–000]

December 2, 1988.

Take notice that on November 18, 1988, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket Nos. CP89–243–000 and CP89–250–000, requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–631–000 pursuant to section 7 of the Natural Gas Act for Gulf Energy Marketing Company (Gulf Energy) and Access Energy Corporation (Access) marketers of gas, all as more fully set forth in the requests on file with the Commission and open to public inspection.

Williams proposes to transport up to a maximum of 156,000 MMBtu of natural gas for Gulf Energy and up to 50,000 MMBtu of natural gas per day for Access from various receipt points in Kansas, Missouri, Oklahoma, Texas and Wyoming to various delivery points on Williams's pipeline system located in Kansas, Missouri, Nebraska and Oklahoma. Williams auticipates transporting up to 156,000 MMBtu on a peak day and average day, and 56,940,000 MMBtu on an annual basis for Gulf Energy; and up to 50,000 MMBtu on a peak day, 10,000 MMBTu on an average day, and 18,250,000 MMBtu on an annual basis for Access. Williams explains that service commenced October 7, 1988 and October 1, 1988, respectively, under § 284.223(a) of the Commission's Regulations, as reported in Docket Nos. ST89–615–000 and ST89–259–000, respectively.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Pelican Interstate Gas System

[Docket No. CP89–240–000]

December 2, 1988.

Take notice that on November 18, 1988, Pelican Interstate Gas System (Pelican), 1600 Smith Street, Suite 4775, Houston, Texas, 77002, filed in Docket No. CP89–240–000 an application pursuant to section 7(c) of the Natural Gas Act requesting authorization to transport natural gas, on an interruptible basis, for the account of Bishop Pipeline Corporation (Bishop), an intrastate pipeline in Louisiana and a marketer of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pelican states that it has entered into a Gas Transportation Agreement dated October 15, 1988, to provide on an interruptible basis, transportation of up to a maximum of 40,000 MMBtu per day of natural gas for Bishop for a primary term ending October 15, 1989, and continuing month to month thereafter.

Pelican indicates it would receive volumes of gas for the account of Bishop at the existing subsea interconnection of Pelican and Bishop's designee, Sun Operating Limited Partnership, in the High Island Area, Block 129, offshore Texas. Pelican proposes to transport and redeliver such gas at the existing onshore terminus of Pelican's pipeline facilities located at the Oxy NGL Cameron Meadows plant (formerly owned by Mobil) in Cameron Parish, Louisiana.

Pelican proposes to charge Bishop a transportation fee of three and three-tenths cents (3.3. cents) per Mcf of gas received for transportation. Pelican states that this is its currently effective transportation rate in its Rate Schedule No. 1 of its FERC Gas Tariff, Original Volume No. 1.

Comment date: December 23, 1988, in accordance with Standard Paragraph F at the end of his notice.

9. Texas Gas Transmission Corporation

[Docket No. CP89–282–000]

December 2, 1988.

Take notice that on November 23, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301 filed in Docket No. CP89–282–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Mid-South Oil & Gas, Inc. (Mid-South), under its blanket authorization issued in Docket No. CP88–686–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas would perform the proposed interruptible transportation service for Mid-South, pursuant to a gas transportation service agreement under

dated September 28, 1988. The term of the transportation agreement is from the date of execution by Mid-South and shall continue in effect month-to-month thereafter, unless terminated upon 30 days written notice by either party. Texas Gas proposes to transport on a peak day up to 5,000 MMBtu; on an average day up to 1,500 MMBtu; and on an annual basis 1,825,000 MMBtu for Mid-South. Texas Gas proposes to receive the subject gas from an exciting point of receipt on its system in Warren County, Kentucky. Texas Gas would transport and redeliver such volumes to Mid-South at existing points of delivery in Kentucky for ultimate use by Western Kentucky Gas Company. The proposed rate to be charged is contained in Texas Gas' currently effective T rate schedule. It is stated that Mid-South also agrees to pay the legally effective GRI funding unit, which is currently 1.47 cents per MMBtu, and the currently effective FERC ACA unit charge which is .2 cents per MMBtu, when applicable.

It is explained that the proposed service is currently being performed pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations. Texas Gas commenced such self-implementing service on October 6, 1988, as reported in Docket No. ST89–507–000.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the date after the time allowed for filing a protect. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. CP87–148–001, CP87–148–000 and CP87–390–000]

Columbia Gas Transmission Corp.; Motion To Vacate Order

December 2, 1988.

Take notice that on November 15, 1988, Columbia Gas Transmission Corporation (Columbia Gas), P.O. Box 1273, Charleston, West Virginia 25325–1273, filed in Docket No. CP87–148–001 a motion that the Commission issue an order reinstating the 1,000 dt equivalent of natural gas per day of contract demand reduction authorized for Commonwealth Gas Pipeline Corporation (Commonwealth) by Commission order issued September 21, 1988, all as more fully set forth in the motion and open to public inspection. The Commission will consider this to be a motion to vacate, partially, the September 21, 1988, order.

Columbia Gas states that on December 31, 1986, it filed a request for permission and approval under section 7(b) of the Natural Gas Act, as amended, for the abandonment of certain firm sales service to existing wholesale customers in which, *inter alia*, Columbia Gas requested authority to abandon 1,000 dt equivalent of contract demand service to Commonwealth under Columbia Gas's Rate Schedule CDS. Columbia Gas indicates that the Commission approved its request for abandonment to Commonwealth by order issued September 21, 1988 in Docket Nos. CP86–240–001, CP87–148–000 and CP87–390–000, 44 FERC ¶61,365.

Columbia Gas states that Commonwealth withdrew its request for contract demand reduction of 1,000 dt equivalent by letter dated October 4, 1988. Columbia Gas states further that the capacity made available through the contract demand reduction by Commonwealth as approved September 21, 1988, has not been committed by Columbia Gas to provide either firm sales or transportation service to any other customer of Columbia Gas. Columbia Gas indicates that since the capacity is still available on its system to provide Commonwealth with the level of service that Commonwealth requires, Columbia Gas proposes to reinstate such 1,000 dt equivalent of contract demand to Commonwealth.

Any person desiring to be heard or to make any protest with reference to said motion to vacate should on or before December 23, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Project No. 2290, California]

Southern California Edison Co.; Intent To File an Application for a New License

December 6, 1988.

Take notice that on November 1, 1988, Southern California Edison Company, the existing licensee for the Kern River No. 3 Hydroelectric Project No. 2290, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99–495. The original license for Project No. 2290 was issued effective September 20, 1963, and expires December 31, 1993.

The project is located on the North Fork of the Kern River is Kern County, California. The principal works of the Kern River No. 3 Project include a 26-foot-high 270-foot-long dam; a 68,515-foot-long main conduit; small dams on Salmon Creek and Corral Creek with conduits to the main conduit; a forebay and a complex of flume, tunnel, syphon, reinforced concrete pipe, and steel penstocks; a powerhouse with an installed capacity of 32 MW; 66 kV transmission lines; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87–7–000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE, Washington, DC 20426. The above information as described in the rule is now available from the licensee at 2244 Walnut Grove Avenue, Rosemead, California 91770, telephone (818) 302–7803.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 30, 1991.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–62063A; FRL–3487–7]

Asbestos-Containing Materials in Schools; Clarification of EPA Interim Accreditation Awarded Asbestos Laboratories

AGENCY: Environmental Protection Agency (EPA).

ACTION: Clarification of EPA interim accreditation awarded asbestos laboratories.

SUMMARY: Laboratories currently accredited in the April 1988 round of the EPA Interim Asbestos Bulk Sample Analysis Quality Assurance Program for polarized light microscopy (PLM) laboratories will maintain their EPA accredited status beyond January 12, 1989, provided the laboratory (1) enrolled in the National Institute of Standards and Technology (NIST, formerly the National Bureau of Standards (NBS)) National Voluntary Laboratory Accreditation Program (NVLAP) by September 30, 1988 and (2) is not found deficient by NIST before January 12, 1989. The conditions for maintaining EPA accreditation for PLM laboratories which analyze bulk building materials for asbestos are reviewed in this notice.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB–44, 401 M St., SW., Washington, DC 20460, (202–554–1404), TDD: (202–554–0551).

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 30, 1987 (52 FR 41826), EPA promulgated a final rulemaking requiring all local education agencies (LEA) to identify asbestos-containing materials (ACM) in their school buildings and take appropriate actions to control release of asbestos fibers from ACM. As part of the identification process, LEA's must sample all suspect materials that are not assumed to be ACM. The samples must be analyzed by PLM laboratories which have received interim accreditation in the EPA Interim Asbestos Bulk Sample Analysis Quality Assurance Program until the NIST NVLAP has accredited its first laboratories in the spring of 1989. The accredited status of laboratories accredited in the final round of the EPA interim program in April 1988 will expire on January 12, 1989.

To maintain accreditation of laboratories between the EPA and NIST accreditation programs, EPA and NIST made provision to continue the accredited status of EPA accredited laboratories by requesting these laboratories to enroll in the NIST NVLAP by September 30, 1988. In March 1988, EPA and NIST informed all laboratories enrolled in the EPA and NIST programs that if the EPA accredited laboratory desired to extend its accredited status past the expiration date of January 12, 1989, the laboratory must complete the final NIST application process and provide the full NVLAP fee by September 30, 1988 (53FR 10151). Approximately, six hundred commercial and noncommercial laboratories met this deadline.

NIST began its evaluation of these facilities in late October 1988. The evaluation process is two staged. NIST first conducts a site assessment of the facility. Next, proficiency testing samples are submitted to the laboratory for analysis. If a laboratory is found to be deficient in any part of the evaluation stages, NIST will not accredit the laboratory until corrections have been made. NIST will notify EPA of a laboratory's unsatisfactory performance at any point in the evaluation process. If the laboratory has major deficiencies, the interim EPA accreditation will be withdrawn by EPA.

For example, NIST may find deficiencies during the site visit to the facility. NIST will notify EPA of all major deficiencies, and EPA will remove the laboratory from its accredited status immediately. Since NIST began the site visits in October 1988, removal of EPA accreditation prior to January 12, 1989, is possible. Each deficient laboratory will be informed by EPA of its removal from the accredited listing in writing.

A laboratory found to be deficient should work to correct the problems and then complete the NIST accreditation process. When all NIST requirements have been met, NIST will accredit the laboratory and inform EPA of its action. The laboratory will be then recognized by EPA and NIST as having NIST accreditation.

Dated: November 29, 1988.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in §§ 560.7 and/or 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the time, deliver a copy of that document to the person filing the agreement at the address shown below

Agreement No.: 224-200186.

Title: Port of Houston Authority Terminal Agreement.

Parties: Port of Houston Authority of Harris County, Texas (Port) and Strachan Shipping Company (Strachan).
Filing Party: Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252–2562.
Synopsis: The agreement provides that Strachan will perform or have performed public marine terminal services, including freight handling, cargo loading and unloading, at the Port's wharves and transit sheds numbers 24 through 26. The term of the agreement expires December 31, 1990.
Agreement No.: 224–200187.
Title: Port of Houston Authority Terminal Agreement.
Parties: Port of Houston Authority of Harris County, Texas (Port) and Ceres Gulf Incorporated (Ceres).
Filing Party: Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252–2562.
Synopsis: The agreement provides that Ceres will perform or have performed freight handling at the Port's wharves and transit sheds numbers 19 through 20, for cargo loading and unloading, and such other incidental services needed to expedite the movement of cargo between vessels and land carriers. The term of agreement expires December 31, 1990.
Agreement No.: 224–200188.
Title: Port of Houston Authority Terminal Agreement.
Parties: Port of Houston Authority of Harris County, Texas (Port) and Port-Cooper/T. Smith Stevedoring (Assignee).
Filing Party: Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252–2562.
Synopsis: The agreement provides that Assignee will perform or have performed freight handling at the Port's wharves and transit sheds numbers 16 thorugh 18, for cargo loading and unloading, and such other incidental services needed to expedite the movement of cargo between vessels and land carriers. The term of agreement expires December 31, 1990.
Agreement No.: 224–200185.
Title: Port of Houston Authority Terminal Agreement.
Parties: Port of Houston Authority of Harris County, Texas (Port) and Ryan Walsh Incorporated (RWI).
Filing Party: Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252–2562.
Synopsis: The agreement provides that RWI will perform or have performed public marine terminal services, including freight handling and cargo loading and unloading, at the Port's wharves and transit sheds numbers 30 thorugh 32. The term of agreement expires December 31, 1990.

By Order of the Federal Maritime Commission.

Dated: December 2, 1988.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HF (Food and Drug Administration) of the Statement of Organizations, Functions, and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, as amended most recently in pertinent parts at 47 FR 46142, October 15, 1982) is amended to clarify and update the functional statements of the Office of Health Affairs, Food and Drug Administration.

The changes include adding new functions regarding patent term restoration and international drug scheduling activities to the functional statements of the Offiice of Health Affairs and revising the functfonal statements to clarify and update them.

Section HF-B, Organization and Functions amended is as follows:

1. Delete paragraph (g), *Office of Health Affairs (HFA5)* in its entirety and insert a new paragraph (g), *Office of Health Affairs (HFA5)* reading as follows:

(g) *Office of Health Affairs (HFA5).* Advises and assists the Commissioner and other key officials on health issues which have an impact on policy, direction, and long-range program goals.

Coordinates Agency relations with health professional groups and represents the Agency on issues involving technology assessment and coverage decisions regarding FDA-regulated products.

Coordinates the nonregulatory international activities of Agency programs and acts as liaison with the Department of State and international components of other U.S. Government agencies, foreign governments, international organizations, and foreign firms and organizations. Coordinates international travel for Agency personnel. Promotes international scientific collaboration through Pub. L. 480 and other related statutes.

Develops Agency policy and coordinates Agency activities under the Drug Price Competition and Patent Term Restoration Act of 1984.

Coordinates Agency international drug scheduling programs for the Department of Health and Human Services through the Office of International Health. Represents the Agency in deliberations at the World Health Organization and the Commission on Narcotic Drugs.

Conducts informal hearings; provides medical/scientific review of hearing requests and of proposed Commissioner's decisions following initial decisions by a public board of inquiry or by the Administrative Law Judge after formal evidentiary hearings.

Coordnates Agency policies related to the protection of human subjects of research, including institutional review and ethical considerations.

Develops Agency policy and guidelines concerning medical research, training, and fellowship activities; provides for the continuing appraisal of these activities.

Evaluates the adequacy of medical resources available to the Agency.

Evaluates medical research results originating from other Government agencies and private institutions for potential Agency use.

Dated: November 28, 1988.

Otis R. Bowen,

Secretary of Health and Human Services.

Food and Drug Administration

Request for Nominations for Voting Members on Public Advisory Committees; Biological Response Modifiers Advisory Committee

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is requesting nominations for nine voting members to serve on the Biological Response Modifiers Advisory Committee in FDA's Center for Biologics Evaluation and Research. Elsewhere in this issue of the **Federal Register**, FDA is publishing a notice announcing the establishment of this committee.

DATE: Nominations should be received on or before February 6, 1989.

ADDRESS: All nominations for membership to Jack Gertzog (address below).

FOR FURTHER INFORMATION CONTACT: Jack Gertzog, Advisors and Consultants Staff (HFD-9), Center for Biologics Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5455.

SUPPLEMENTARY INFORMATION: FDA is requesting nominations for nine voting members on the Biological Response Modifiers Advisory Committee. The function of the committee is to review and evaluate data relating to the safety, effectiveness, and appropriate use of biological response modifiers which are intended for use in the prevention and treatment of a broad spectrum of human diseases. The committee will also consider the quality and relevance of FDA's research program which provides scientific support for the regulation of these products, and advise the Secretary of Health and Human Services, the Assistant Secretary for Health, and the Commissioner of Food and Drugs of its findings.

Persons nominated for membership shall have adequately diversified experience appropriate to the work of the committee in such fields as biological response modifiers (cytokines and lymphokines; more specifically, interleukins, interferons, cell stimulating factors, and other growth and differentiating biological factors, tumor necrosis factor, and other anti-proliferative biological agents), immunology, virology, molecular biology, deoxyribonucleic acid (DNA) technology, infectious diseases, viral oncology, cytokine biology, and other related specialties. The specialized training and experience necessary to qualify the nominee as an expert suitable for appointment is subject to review, but should include experience in two or more medical or bioscientific fields such as medical practice, teaching, clinical trials, basic research, and applied research relevant to the field of activity of the committee. The term of office is 4 years, except that initial appointments will be staggered to permit an orderly rotation of membership.

Interested persons may nominate one or more qualified persons for membership on the advisory committee. Nominations shall state that the nominee is willing to serve as a member of the advisory committee and appears to have no conflict of interest that would preclude committee membership. Potential candidates will be asked by FDA to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts to permit evaluation or possible sources of conflict of interest.

FDA has special interest in assuring that women, minority groups, and the physically handicapped are adequately represented on advisory committees and therefore extends particular encouragement to nominations for appropriately qualified female, minority, or physically handicapped candidates.

Dated: December 1, 1988.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 88G-0377]

Grindsted Products; Filing of Petition for Affirmation of GRAS Status

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a petition (GRASP 8G0339) has been filed on behalf of Grindsted Products, Inc., proposing to affirm that sorbitan tristearate is generally recognized as safe (GRAS) as a direct human food ingredient.

DATE: Comments by February 6, 1989.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Blondell Anderson, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), and the regulations for affirmation of GRAS status in § 170.35 (21 CFR 170.35), notice is given that a petition (GRASP 8G0339), has been filed on behalf of Grindsted Products, Inc., c/o 1150 17th Street NW., Suite 1000, Washington, DC 20036, proposing that sorbitan tristearate be affirmed as GRAS for use as a crystal stabilizer (or "anti-bloom" agent) in nonstandardized chocolate coatings and in confections and frostings as a direct human food ingredient.

The GRAS affirmation petition has been placed on display at the Dockets Management Branch (address above).

Any petition that meets the requirements outlined in §§ 170.30 and 170.35 (21 CFR 170.30 and 170.35) is filed by the agency. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for GRAS affirmation.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Interested persons may, on or before February 6, 1989, review the petition and/or file comments (two copies, identified with the docket number found in brackets in the heading of this document) with the Dockets Management Branch (address above). Comments should include any available information that would be helpful in determining whether the substance sorbitan tristearate is, or is not, GRAS for the proposed use. A copy of the petition and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 25, 1988.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of January 1989:

Name: National Advisory Committee on Rural Health.

Date and Time: January 23-25, 1989, 8:30 a.m.

Place: Ramada Renaissance Hotel, 1001 County Lane Road, Jackson, Mississippi 39221.

The meeting is open to the public.

Purpose: The Committee provides advice and recommendations to the Secretary with respect to the delivery, financing, research, development and administration of health care service in rural areas.

Agenda: The meeting will include a welcome and opening remarks; Mississippi Congressional and State legislative perspectives; Congressional legislative update; regulatory update; approval of minutes of last meeting; update on Office of Rural Health Policy activities; meetings of the Committee's Work Groups: Health Services Delivery; Health Professions; and Health Care Financing; and setting priorities for future activities. There will be four brief periods (15 minutes each) for public comment.

Persons interested in attending any portion of the meeting should contact Ms. Arlene Granderson, Program Analyst, Office of Rural Health Policy, Health Resources and Service Administration, Room 14-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-0835.

Anyone requiring information regarding the subject Council should contact Mr. Jeffrey Human, Executive Secretary, National Advisory Committee on Rural Health, Health Resources and Service Administration, Room 14-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-0835. Agenda Items are subject to change as priorities dictate.

Date: December 5, 1988.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Office of Tribal Services; Availability of Financial Assistance

December 2, 1988.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Announcement of availability of competitive planning grant funds for Federally recognized Indian tribes.

SUMMARY: The Bureau of Indian Affairs announces the availability of $1,200,000 to continue the planning phase of the Self-Governance Demonstration Project in fiscal year 1989. The ten tribes which received first year planning grants may receive a grant under this announcement provided they demonstrate a need for such a grant. Several other tribes may participate in the program in FY 1989. The grants, awarded for a six-month period, will permit tribes to develop a tribally designed budget as well as a proposal for an agreement based on the tribe's needs and priorities. The proposed agreement will serve as the basis for negotiation between the Bureau and tribe to arrive at a formal agreement under which the tribe may assume control over various Bureau programs, services and functions.

DATES: The closing date for the submission of applications under this announcement is January 9, 1989.

FOR FURTHER INFORMATION CONTACT: James J. Thomas (202) 343-1705 or James M. Abeita (202) 343-5012, Office of Tribal Services, Bureau of Indian Affairs, Department of the Interior, 18th

and C Street NW., Room 2616 MIB, Washington, DC 20240.

SUPPLEMENTARY INFORMATION:

A. Purpose of the Program

The purpose of the program under this announcement is to continue the Self-Governance project. This will permit the ten first year tribes (see list of first year tribes at end of this section) to develop a proposal reflecting tribally determined priorities and allow several other tribes to do the same. The self-governance project is designed to allow tribes to exercise a greater degree of Self-Determination by assuming more and more control over Bureau programs and services under negotiated agreements. That is, an agreement whereby the tribe determines the type and amount of programs and services to be available to its members rather than be limited to providing the same programs, services or functions as the Bureau would have provided. Funds will be awarded under section 203 of the 1988 Amendments to Pub. L. 93–638, The Indian Self-Determination and Education Assistance Act of 1975, (25 U.S.C. 450).

Grants will be awarded on a competitive basis to those tribes meeting the eligibility criteria and other provisions as contained in this announcement. Applications not meeting all provisions of this announcement will be considered non-responsive and will not be reviewed for funding, (e.g., an application requesting a grant in excess of $50,000 will be considered non-responsive).

First Year Tribes

Hoopa Valley
Jamestown Klallam
Lummi
Quinault
Salish and Kootenai
Mescalero Apache
Mille Lacs
Red Lake
Rosebud
Tlingit-Haida

B. Eligibility Criteria

To receive a grant under this announcement a tribe must:

1. Make a request for a grant by resolution of its governing body which contains: (a) A statement indicating a desire to participate in the Self-Governance project; (b) a commitment to develop a plan for a consolidated contract or other type agreement for direct funding of Bureau programs, services or functions;

2. Have operated two or more self-determination contracts for at least three years without significant or material audit exceptions (material audit exception as used here means audit findings which can result in criminal action against a responsible tribal official or bills of collection being issued against the tribe);

3. Furnish an organization-wide or single audit report as prescribed by Pub. L. 98–502, the Single Audit Act of 1984, for fiscal year 1987 which contains no significant or material audit exceptions (material exceptions here means the same as in item 2, immediately above and audit findings requiring a corrective action plan as prescribed by the Single Audit Act, Pub. L. 98–502);

4. The ten tribes participating in the first year of the project must demonstrate a need for funds to complete a proposed agreement. To demonstrate a need, a tribe must satisfy criterion number 1 above and lack funds to prepare a direct funding proposal.

C. Grant Period

Duration of planning grants awarded under this announcement shall be for a period of six Months or less.

D. Funds Available

The Bureau has an appropriation of $1,200,000 for planning grants in FY 1989. This will allow for the award of at least 24 grants in an amount not to exceed $50,000 for individual grant.

E. Application Process

Applications submitted for funding under this announcement shall be on SF–424 and as otherwise provided by OMB Circular A–102. In addition to a tribal council or governing body resolution, an applicant shall submit a narrative description of grant activities as well as a line budget and a budget justification. In formulating its proposal a tribe may use the following as guides for the effort:

1. *Authorizations.* The governing body of an eligible tribe for the purposes of this announcement is authorized to:

(a) Plan, conduct, consolidate and administer programs, services and functions authorized under the acts of April 16, 1934 (U.S.C. 452; 48 Stat. 596 and Nov. 2, 1921 (25 U.S.C. 13; 42 Stat. 208));

(b) Redesign programs, activities, functions or services and to reallocate funds for such programs, activities or services;

(c) Specify the services to be provided, the functions to be performed,and the respective responsibilities of the tribe and the Bureau under the proposed agreement.

2. *Other Conditions.* In proposing terms for a proposed agreement:

(a) A tribe is entitled to receive funds for any programs, services or functions in an amount equal to the amount the tribe would be eligible to receive under contracts and grants authorized by this Act; including direct program costs and indirect costs and for any funds which are specifically related to the provision by the Bureau of services and benefits to the tribe and its members; provided, however, that funds for trust services to individual Indians are available under any written agreement to the extent that the services would have been provided by the Bureau are provided to individual Indians by the tribe;

(b) A tribe may not receive funds under a self-determination contract for any program, service or function to be provided or performed under a proposed agreement udner this announcement;

(c) A tribe negotiating an agreement as a result of a grant under this annoucement assumes responsibility for the administration of the programs, services, and activities for which funds are provided under the agreement thereby relieving the Secretary of responsibility for any activities covered by the agreement;

(d) A tribe submitting a proposal for an agreement as a deliverable is not obligated to enter an agreement with the Bureau. The proposal merely serves as a starting point for negotiations between the tribe and Bureau for arriving at an agreement;

(e) A tribe may retrocede all or any portion of a direct funding agreement after completing the first year of the agreement;

(f) Participation by a tribe in the grant program or a subsequent self-governance agreement will not (i) affect, modify, diminish or otherwise impair the sovereign immunity from suit enjoyed by the tribe, or (ii) authorize, require or permit the termination of any existing trust responsibility of the United States with respect to the tribe or its members.

F. Application Review and Approval Process

Applications submitted in response to this announcement will be subject to a competitive review and evaluation. An independent review panel, appointed by the Assistant Secretary—Indian Affairs, will evaluate applications against the criteria, and the terms and conditions contained in this announcement including any statutory or regulatory requirements. Incomplete applications or applications which do not conform to this announce will not be reviewed (e.g., an application lacking a current tribal council or governing body resolution). Such applications will be returned to sender and the applicant shall have no

appeal rights. Applications will be reviewed and rated as follows:

1. The goals/objectives of the grant are consistent with the purpose of this announcement;
2. Grant activities are measurable;
3. Grant abjectives are fully and clearly described and reflect the needs of the tribe and its members;
4. The grant objectives can be accomplished with the resources requested and/or available;
5. The grant objectives/objectives are scheduled and indicate who will accomplish each objective;
6. The application contains evidence of capability and qualifications, i.e., resumes and position descriptions of key project staff are part of the application;
7. A line item budget is accompanied by a detailed justification for each expenditure; and
8. Reasonableness of cost will also be considered in the rating process.

G. Submission of Applications

1. The closing date for applications submitted for this announcement is January 9, 1989;
2. Applications may be mailed or hand delivered;
3. Late applications will not be considered for funding;
4. Applications shall be mailed or delivered to: Bureau of Indian Affairs, Attention: Hazel Elbert, Deputy to the Assistant Secretary—Indian Affairs (Tribal Services), 18th and C Street NW., Room 4600 MIB, Washington, DC 20240.

Ross O. Swimmer,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

[WY-920-08-4111-15; WYW-88290]

Proposed Reinstatement of Terminated Oil and Gas Lease; Campbell County, WY

November 30, 1988.

Pursuant to the provisions of Pub. L. 97-451, 96 Stat. 2462-2466, and Regulation 43 CFR 3108.2-3 (a) and (b)(1), petition for reinstatement of oil and gas lease WYW-88290 for lands in Campbell County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW-88290 effective October 1, 1988, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Andrew L. Tarshis,

Chief, Leasing Section.

Realty Action; Issuance of Land Exchange Conveyance Document; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Exchange of public and private lands.

SUMMARY: The United States has issued an exchange conveyance document to Jacob Blaine Wight and Viola J. Wight of Malta, Idaho 83342 for the following-described lands under section 206 of the Federal Policy and Management Act of 1976;

Boise Meridian

T. 14 S., R 30 E.,
Sec. 28, E½, SE¼NW¼.
Comprising 360 acres of public land.

In exchange for these lands, the United States acquired the following-described lands:

Boise Meridian

T. 15 S., R. 29 E.,
Sec. 24, SW¼, W½SE¼, SE¼SE¼;
Sec. 25, NE¼NE¼, NW¼NW¼.
Comprising 360.00 acres of private land.

The purpose of the exchange was to acquire the non-federal lands for use in grazing, wildlife habitat and recreation. The public interest was well served through completion of this exchange.

The values of the Federal public land and the non-federal land in the exchange were both appraised at $18,000.

Dated: December 2, 1988.

John Davis,

Deputy State Director for Operations.

BILLING CODE 4310-GG-M

[NM-060-4760-90]

Availability of the Carlsbad Resource Area; Approved Resource Management Plan and Record of Decision

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability

SUMMARY: The Carlsbad Resource Area, Roswell District, New Mexico, announces the availability of the approved Carlsbad Resource Management Plan (RMP) as approved in the Record of Decision (ROD) signed September 30, 1988. This follows several years of work during which a Draft RMP/Environmental Impact Statement (EIS), a Proposed RMP/EIS, and a Revised Proposed RMP was prepared and public input received. The ROD and the Approved RMP complete the planning process.

This Approved RMP provides the framework to guide management decisions during the next 10 to 20 years on the Carlsbad Resource Area's 2.2 million surface acres and 2.7 million subsurface acres. This Approved RMP provides for a combination of resource uses that will protect important environmental values and sensitive resources and at the same time allows the development of resources which produce commercial goods and services. The Approved RMP also describes how the five key resource issues that were identified early in the planning process have been resolved.

These issues were: (1) Land Tenure; (2) Minerals and Energy Resources; (3) Rangeland Resources; (4) Special Management Areas; and (5) Access

In addition to the analysis performed for the Draft and Final EIS portion of the RMP, in compliance with the requirements of the National Environmental Policy Act, further environmental analysis will be conducted for site-specific plans and actions resulting from implementation of the Approved RMP.

ADDRESS: Copies of the Draft RMP/EIS, Proposed RMP/Final EIS, and Revised Proposed RMP, are available for review at, and copies of the ROD and Approved RMP are available from: Area Manager Carlsbad Resource Area, Bureau of Land Management, P.O. Box 1778, Carlsbad, New Mexico 88220.

FOR FURTHER INFORMATION CONTACT: Richard L. Manus, Carlsbad Resource Area Manager at address given above telephone 505/887-6544.

SUPPLEMENTARY INFORMATION: Implementation of the Approved RMP

decisions will continue over a period of years. Priorities will be developed to guide the order of implementation for those decisions that cannot be immediately implemented.

The implementation priorities may be revised based upon new administrative policies, new Departmental directions or Bureau goals.

The ROD formally designates the following areas:

Five (5) Areas of Critical Environmental Concern (ACECs);
1. Chosa Draw Caves Complex—2,200 acres
2. Dark Canyon—1,480 acres
3. Lonesome Ridge—2,990 acres
4. Blue Spring—160 acres
5. Pecos River Canyons Complex—5,190 acres

Five (5) Research Natural Areas (RNAs);
1. Dry Cave—420 acres
2. South Texas Hill Canyon—1,360 acres
3. Yeso Hills—560 acres
4. Little McKittrick Draw—10 acres
5. Pecos River/Canyons Complex—2,320 acres

One (1) Outstanding Natural Area (ONA);
—Lonesome Ridge—2,990 acres

Eight (8) Special Recreation Management Areas (SRMAs);
1. McKittrick Hill Caves Complex—4,500 acres
2. Lost Cave—20 acres
3. Fence Canyon Caves—340 acres
4. Manhole Caves—100 acres
5. Yellowjacket/Lair Cave—260 acres
6. Chosa Draw Caves—720 acres
7. Mudgetts Caves—50 acres
8. Pecos River Corridor—6,000 acres

Seven (7) Cultural Resource Management Areas (CRMA's);
1. Honest Injun Cave—10 acres
2. Laguna Plata Archeological District—3,360 acres
3. Maroon Cliffs Archeological District—11,783 acres
4. Potash Bull Wheel—4 acres
5. Poco Site—51 acres
6. Bear Grass Draw—1,780 acres
7. Pope's Well Historic Site—40 acres

and two (2) Scenic Areas.
1. Dark Canyon—3,220 acres
2. Guadalupe Escarpment—49,570 acres.

The ROD also designates five (5) Right-of-way Corridors, covering 185 miles and encompassing 118,400 acres; several Right-of-way avoidance areas covering 37,361 acres; 159,017 acres as limited fire suppression areas; 220,770 acres for future disposal from Federal ownership; and completes the process to designate the public lands in the resource area as "Open", "Closed", or "Limited" for Off Road Vehicle use.

Of the surface acres in the Resource Area 5,943 acres are "Closed", 153,299 acres are "Limited", and 2,011,506 acres are "Open". Of the open category 56,700 acres are designated as intensive use areas for organized or competitive events.

The ROD has been sent to all recipients of the Revised Proposed RMP. Copies of the Approved RMP are available on request from the Carlsbad Area Manager.

Monte G. Jordan,

Associate State Director.

[FR Doc. 88-28211 Filed 12-7-88; 8:45 am]

BILLING CODE 4310-FB-M

[ES-940-09-4520-13, ES-039859, Group 539]

Minnesota; Filing of Plat of Survey of Two Islands

November 29, 1988.

1. On November 22, 1988, the plat representing the survey of two islands in Lake Jessie, which were omitted from the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m., on January 13, 1989.

The tracts shown below describes the islands omitted from the original survey.

Fifth Principal Meridian, Minnesota

T. 131 N., R. 39 W.
Tracts 38 and 39

2. The islands described above are separate and distinct yet similar in all respects to that of the adjacent surveyed lands.

3. Tracts 38 and 39 rise approximately 13 feet and 20 feet respectively, above the ordinary high water mark of Lake Jessie and are composed of glacial till parent material. Tree species consist of ash, basswood, elm, oak and willow.

4. The present water level of the lake compares favorably with that of the original meander line, therefore, the elevation and upland character of the islands along with the depth and width of the channels between the upland and the islands are considered evidence that the islands did exist in 1858, the year Minnesota was admitted into the Union.

5. Tracts 38 and 39 are more than 50% upland in character within the purview of the Act of September 28, 1850 (9 Stat. 519). Therefore, the islands are held to be public land.

6. Except for valid existing rights, these islands will not be subject to application, petition, location, or selection under any public law until January 13, 1989.

7. Interested parties protesting the determination that the island(s) is public land of the United States, must present valid proof showing that the island(s) did not exist at the time of statehood or that it was attached to the mainland at the time of the original survey. Such protests must be submitted in writing to the Deputy State Director for Cadastral Survey, Bureau of Land Management, Eastern States Office, prior to 7:30 a.m., January 13, 1989.

8. All inquiries concerning the color-of-title claims should be filed with the Deputy State Director for Lands and Renewable Resources, Bureau of Land Management, Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304, after January 13, 1989.

9. Copies of the plat will be made available upon request and prepayment of the reproduction fee of $4.00 per copy.

Lane J. Bouman,

Deputy State Director for Cadastral Survey and Support Services.

BILLING CODE 4310-GJ-M

Fish and Wildlife Service

Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora; Seventh Regular Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Service publishes the time and place for the seventh regular meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora and invites the public to make suggestions for agenda items for the meeting.

DATE: Suggestions for agenda items should be communicated to the Service by December 21, 1988.

ADDRESS: Suggestions for agenda items should be sent to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, P.O. Box 27329, Central Station, Washington, DC 20038-7329.

SUPPLEMENTARY INFORMATION:

Background

The Convention on International Trade in Endangered Species of Wild Fauna and Flora, TIAS 8249, hereinafter referred to as CITES, is an international agreement designed to control international trade in certain listed animal and plant species which are or

may become threatened with extinction. Currently, 96 countries, including the United States are CITES Parties. CITES calls for biennial meetings of the Conference of the Parties to review its implementation, make provisions enabling the Secretariat of CITES to carry out its functions, consider adopting amendments to Appendices I and II to CITES (2 of the 3 lists that contain the names of species and other taxonomic categories controlled by CITES; the third list, Appendix III, may be amended unilaterally), consider any reports presented by the Secretariat, any Party or a committee of the Conference of the Parties, and make recommendations for the improved effectiveness of CITES.

This if the first of a series of notices which together with several public meetings, provide the public with an opportunity to participate in the development of the United States negotiating positions for the seventh regular meeting of the Conference of the Parties to CITES. The Service's regulations governing this process are found in Title 50 of the Code of Federal Regulations §§ 23.31 through 23.39.

Notice of the Seventh Regular Meeting of the Conference of the Parties and Call for Agenda Items

The Service has received notice from the Secretariat of CITES of the convening of the seventh meeting of the Conference of the Parties (COP7) to be held in Lausanne, Switzerland, from October 9–20, 1989. That notice also stated that the provisional agenda for COP7 would be prepared by the Secretariat and the Standing Committee at its 18th meeting early in 1989 and invited Parties to make suggestions for COP7 agenda items before January 1, 1989.

Request for Suggestions for Agenda Items for COP7

The Service invites suggestions for agenda items for COP7. Suggestions should contain sufficient detail to enable the Service to evaluate their appropriateness for inclusion on the agenda for the meeting. Suggestions should be communicated to the Service by December 21, 1988.

Announcement of Public Meeting Concerning the 18th Meeting of the Standing Committee

Based on information received from the Secretariat, the 18th meeting of the Standing Committee will be held in Lausanne, Switzerland from February 27–March 4, 1989. To assist it in its preparations for the meeting, the Service announces that it will hold a public meeting on January 17, 1989, from 1:30 p.m. to 4:00 p.m. in the North Penthouse of the Department of the Interior's Main Building at 18th and C Streets, NW., Washington, DC.

Probable topics that will be discussed at the 18th meeting of the Standing Committee are:

1. The African Elephant Ivory Trade.
2. Secretariat Economy/Efficiency Study.
3. Secretariat Finances.
4. Location of the Secretariat.
5. Alleged Infractions Procedures.
6. Humane Transport.
7. Next Conference of the Parties: Agenda, Procedures.
8. Standing Committee Substitute Members.
9. Preparations for COP7.

Publication of COP7 Provisional Agenda in the Federal Register

Around March 15, 1989, the Service will publish in the Federal Register the Provisional Agenda for COP7. That notice will also announce a public meeting and procedures for written comments on COP7 agenda items. It will also set forth procedures for obtaining observer status for COP7.

This notice was prepared by Arthur Lazarowitz, Office of Management Authority.

Date: December 12, 1988.

Frank Dunkle,

Director.

BILLING CODE 4310-55-M

Minerals Management Service

Development Operations Coordination Document; Corpus Christi Oil and Gas Co.

AGENCY: Minerals Management Service; Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Corpus Christi Oil and Gas Co. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 9412, Block 318, West Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Cameron, Louisiana.

DATE: The subject DOCD was deemed submitted on December 1, 1988. Comments must be received on or before December 23, 1988 or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Emile H. Simoneaux; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2872.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: December 1, 1988.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

[FR Doc. 88-28215 Filed 12-7-88; 8:45 am]

BILLING CODE 4310-MR-M

National Park Service

Availability of Plan of Operations and Environmental Assessment, Proposed Exploratory Well; Christopher Oil & Gas, Inc., Big Thicket National Preserve, TX

Notice is hereby given in accordance with § 9.52(b) of Title 36 of the Code of Federal Regulations that the National Park Service has received from Christopher Oil & Gas, Inc., a Plan of Operations for the proposed Exxon Fee No. 1 Exploratory Well, Turkey Creek Unit, Big Thicket National Preserve, Texas.

The Plan of Operations and environmental Assessment are available for public review and comment for a period of 30 days from the publication date of this notice in the office of the Superintendent, Big Thicket National Preserve, 3785 Milam, Beaumont, Texas; and the Southwest Regional Office, National Park Service, 1220 South St. Francis Drive, Room 347, Sant Fe, New Mexico. Copies are available from the Southwest Regional Office, P.O. Box 728, Santa Fe, New Mexico 87504–0728, and will be sent upon request.

Date: November 29, 1988.

Hal Garland,

Acting Regional Director, Southwest Region.

BILLING CODE 4310–70–M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–306 (Sub-No. 1X)]

Kewash Railroad, Inc.; Abandonment Exemption in Keokuk and Washington Counties, IA

Applicant has filed a notice of exemption under 49 CFR Part 1152, Subpart F—*Exempt Abandonments* to abandon its 14.86-mile line of railroad between milepost 248.79 at Washington, IA, and milepost 263.65 at Keota, IA, in Keokuk and Washington Counties.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) overhead traffic is not moved over the line or may be rerouted; and (3) no formal complaint filed by a user of rail service on the line (or by a State governmental entity acting on behalf of such user) regarding cessation of service over the line is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has ben notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10905(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on January 7, 1989 (unless stayed pending reconsideration). Petitions to stay regarding matters that do not involved environmental issues and formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2) [1] must be filed by December 19, 1988. Requests for stays regarding environmental issues [2] and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by December 30, 1988 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative:

T. Scott Bannister, 1300 Des Moines Building, Des Moines, IA 50309.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab inito*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by December 13, 1988. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275–7316.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

[1] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C. 2d 164 (1987), and final rules published in the **Federal Register** on December 22, 1987 (52 FR 48440–48446).

[2] A stay will be routinely issued by the Commission in those proceeding where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines*, 4 I.C.C.2d 400 (1988).

Decided December 2, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Antitrust Division

National Cooperative Research Act of 1984; Cooperative Research and Development Project; Industrial Consortium for Research and Education

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* (the "Act"), The University of Illinois at Urbana-Champaign has filed a written notification on behalf of itself and the other members of the Industrial Consortium for Research and Education ("ICRE") simultaneously with the Attorney General and with the Federal Trade Commission disclosing (1) the identities of the parties to a cooperative research and development agreement that became effective November 1, 1988 and (2) the nature and objectives of the venture. Notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the venture and its general areas of planned activities are given below.

The current parties to the ICRE are the University of Illinois at Urbana-Champaign (Department of Geology) 245 National History Building, 1301 West Green Street, Urbana, Illinois 61801; Mobil Research and Development Corporation, P.O. Box 819047, Dallas, Texas 75381; and Union Oil Company of California, Room El-183, P.O. Box 76, Brea, California 92621. Under the agreement the parties will engage in cooperative research and development activities to improve the efficiency of parallel process computing, to build models describing the flow of material and energy within the earth's crust, to apply those models to problems of interest, and to train research scientists and students in the field of hydrogeology.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

VOL 53 ISS 236 DE 8 1988 UMI

National Cooperative Research Act of 1984; NAHB Research Foundation; Smart House Project

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), the NAHB Research Foundation, Inc. ("NAHB") has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission on November 2, 1988 disclosing (1) the identities of six parties and eleven additional advisors to the Smart House Project,

Parties

Dicon System Ltd.
Dormont Manufacturing Company
Molex Incorporated
Multiplex Technology, Inc.
Northern Telecom, Inc.
SCICON Systems Control, Inc.

Advisors

Allegheny Power Service Corporation
Consumers Gas Company, Ltd.
Lone Star Gas Company
Michigan Consolidated Gas Company
National Joint Apprenticeship & Training Committee
Oklahoma Natural Gas Company
Pacific Gas & Electric Company
Pacific Power & Light Company
Paragon Design Resources S.W., Ltd.
Portland General Electric Company
Union Gas, Ltd.;

(2) the identities of two parties and one advisor that no longer are involved in the Smart House Project,

Parties

Pass & Seymour Incorporated
Systems Controls, Inc.

Advisor

Clark/Van Voorhis Architects, Inc.; and

(3) the revision of the listing or name for certain other parties and one advisor,

Parties

BRIntec Corporation
Canada Wire & Cable Limited
Honeywell Corporation
Shell Chemical Company (Division of Shell Oil Company)
Siemens Energy and Automation, Inc., Circuit Protection Division

Advisor

Delmarva Power & Light Company; and

(4) the nature and objectives of the Smart House Project. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to single damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of current parties to the Smart House Project, and its general areas of planned activity, are given below.

The Smart House Project is a joint venture project that will be implemented in a series of stages by separate agreements at each stage. The following are current parties and have signed agreements to fund or otherwise participate in the first stage of the venture, which involves, among other things, organizational activities:

AMP, Incorporated
Apple Computer, Inc.
Arco Solar, Inc.
AT&T Technologies, Inc.
Bell Northern Research Ltd.
Bose Corporation
BRIntec Corporation
Broan Mfg. Co., Inc.
Burndy Corporation
Canada Wire & Cable Limited
Carrier Corporation
Challenger Electrical Equipment Corp.
Dicon System Ltd.
Dukane Corporation
Dormot Manufacturing Company
E.I. duPont de Nemours & Company (Inc.)
Emerson Electric Co.
Federal Pioneer, Ltd.
Gas Research Institute
General Electric Company
Honeywell Corporation
Johnson Controls
Kohler Company
Landis & Gyr Metering, Inc.
Lennox Industries Inc.
Molex Incorporated
Multiplex Technology, Inc.
NAHB Research Foundation, Inc.
North American Philips Consumer Electronics Corp., on its own behalf and on behalf of Signetics Corporation
Northern Telecom, Inc.
Onan Corporation
Robertshaw Controls Company
Schlage Lock Company
SCICON Systems Control, Inc.
Scott Instruments Corporation
Scovill Inc.
Shell Chemical Company (Division of Shell Oil Company)
Siemens Energy and Automation, Inc., Circuit Protection Division
Slater Electric, Inc.
Smart House Development Venture, Inc.
Smart House, L.P.
Sola Basic Industries, Inc.
Southwire Company
Square D Company
Whirlpool Corporation
The Wiremold Company

The following entities are serving as advisors to the venture:

AgipPetroli
Allegheny Power Service Corporation
American Electric Power Service Corp.
American Gas Association
Arkla, Inc.
Baltimore Gas & Electric Company
Bell Canada
Bell South Services
Boston Edison Company
Columbia Gas Distribution Companies
Consolidated Natural Gas Company
Consumers Gas Company, Ltd.
Consumers Power Company
Copper Development Association Inc.
Delmarva Power & Light Company
Detroit Edison Company
Duke Power Company
Edison Electric Institute
Electric Power Research Institute
Gas Research Institute
Home Builders Institute
Houston Lighting & Power Company
Hydro Quebec
Illinois Consolidated Telephone Co.
International Conference of Building Officials
Kansas Gas & Electric Company
Lone Star Gas Company
Michigan Consolidated Gas Company
Minnesota Blue Flame Gas Asso.
National Association of Home Builders
National Cable Television Association
National Joint Apprenticeship & Training Committee
Northern Illinois Gas
Oklahoma Gas & Electric Company
Oklahoma Natural Gas Company
Ontario Hydro
Pacific Gas & Electric Company
Pacific Power & Light Company
Paragon Design Resource S.W., Ltd.
Portland General Electric Company
Potomac Electric Power Company
Professional Builder
Southern California Edison Company
Southwest Gas
Southwestern Bell Telephone Company
Union Gas, Ltd.
U.S. Dept. of Housing & Urban Dev.
U.S. West
Virginia Electric and Power Company
Washington Gas Light Company
Wisconsin Electric Power Company

The Smart House Project will engage in activities the purpose of which will be to develop a coordinated home control and energy distribution system containing integral telecommunications and advanced safety features. The project is intended to design and develop a set of compatible products.

including integrated power and signal cabling to tie home electrical products into a single power and communications network; communications-capable appliances, heating and cooling equipment, utility meters and home electrical and electronic products; electric power conditioning and conversion equipment; controllers and software to make logical decisions, issue control instructions, and regulate the distribution of energy, information and instructions throughout the network; monitoring and control devices to detect and neutralize malfunctions in energy distribution within the home; telephone and CATV interfaces to allow information to be passed to and from the home over telephone and CATV lines; and input and output devices with which users can control and receive information from the network and the devices attached to it.

On June 14, 1985 NAHB filed its original notification pursuant to section 6(a) of the Act. On September 13, 1985, January 9, 1986, April 28, 1986, July 30, 1986, December 16, 1986, April 8, 1987, June 30, 1987, August 25, 1987, December 4, 1987, February 22, 1988, and April 5, 1988, NAHB filed additional written notifications. The Department of Justice published notices in the **Federal Register** in response to these additional notifications on October 10, 1985 (50 FR 41428), on January 28, 1986 (51 FR 3520), on May 16, 1986 (51 FR 18049), on August 28, 1986 (51 FR 30724), on January 15, 1987 (52 FR 1673), on May 8, 1987 (52 FR 17490), on July 30, 1987 (52 FR 28494), on September 22, 1987 (52 FR 35596), on January 5, 1988 (53 FR 186), on March 21, 1988 (53 FR 9154), and on May 3, 1988 (53 FR 15750), respectively.

The principal business address of the Smart House Project is 400 Prince Georges Center Boulevard, Upper Marlboro, Maryland 20772–8731.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

National Cooperative Research Act of 1984; OSI/Network Management Forum

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), the OSI/Network Management Forum (the "Forum") has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture, and (2) the nature and objectives of the venture. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(d) of the Act, the identities of the parties to the venture and general areas of planned activities, are given below.

The voting members to the venture are listed as follows:

Amdahl Corporation, P.O. Box 3470, 1250 East Argues Avenue, Sunnyvale, California 94088–3470

AT&T, 55 Corporate Drive, Room C02–34A05, Bridgewater, New Jersey 08807–6991

British Telecommunications PLC, British Telecom Centre, 81 Newgate Street, London, EC1A 7AJ, England

Digital Communication Associations, Inc., 1000 Alderman Drive, Alpharetta, Georgia 30201–4199

Hewlett-Packard Company, 19420 Homestead Avenue, Cupertino, California 95014

Northern Telecom Inc., 2435 North Central Expressway, Richardson, Texas 75080

STC Telecommunications, Oakleigh Road South, New Southgate, London N11 1HR, England

Telecom Canada, 160 Elgin Street—Floor 23, Ottawa, Ontario K1G 3J4, Canada

UNISYS Networks, 470 Chestnut Ridge Road, Woodcliff Lake, New Jersey 07675

In addition, the following companies are involved as associate members:

Avant-Garde Computing, Inc., 8000 Commerce Parkway, Mt. Laurel, New Jersey 08054–2227

Cable & Wireless PLC, Mercury House, 110–124 Theobalds Road, London WC 188RX, England

Dynatech Communications, 991 Annapolis Way, Woodbridge, Virginia 22191

Hekimian Laboratories, Inc., 9298 Gaither Road, Gaithersburg, Maryland 20877

Infotron Systems Corporation, 9 North Olney Avenue, Cherry Hill, New Jersey 08003

Interlan, Inc., 155 Swanson Road, Boxborough, Massachusetts 01719

Network Equipment Technologies, 400 Penobscot Drive, Redwood City, California 94063

Paradyne Corporation, 8550 Ulmerton Road, P.O. Box 2826, Largo, Florida 34641–3893

Prime Computer, Inc., 500 Old Connecticut Path, Framingham, Massachusetts 01701

Racal-Milgo, P.O. Box 407044, Ft. Lauderdale, Florida 33340–7044

Telwatch, 1241 Hawks Flight Court, El Dorado Hills, California 95630

The purpose of the Forum is to conduct research activities which will enable computer and telecommunications network management products manufactured by different vendors to operate with each other. In conducting its research activities, the Forum will focus on the reference model for Open Systems Interconnection ("OSI") which has been developed by the International Standards Organization (the "ISO"). Forum members will work together to contribute to the further development of those standards in instances where the standards have not yet been fully defined. In areas where the OSI model permits a series of options, Forum members will agree upon specific sets of options within the seven-layer OSI model which will promote product interoperability.

Network management can be broadly defined as a collection of hardware and software capabilities utilized in voice and data networks, which enable network service providers and users to identify, manage and control system reliability, configuration, security, accounting and performance.

Research work within the Forum will take place within various technical working groups. The research activities of these groups will include: (a) Identifying the current status of existing and draft network management standards produced by recognized international standards organizations such as the ISO, (b) generating interim technical specifications, using existing network management standards as a base, to achieve and demonstrate equipment interoperability, (c) developing and publishing documentation that will describe technical specification implementation methodologies and techniques, and (d) reexamining the interim technical specifications in light of further work conducted within standards bodies.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (88–101)]

Agency Report Forms Under OMB Review

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of agency report forms under OMB review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed information collection requests to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made the submission.

Copies of the proposed forms, the requests for clearance (S.F. 83's), supporting statements, instructions, transmittal letters and other documents submitted to OMB for review, may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Paperwork Reduction Project.

DATE: Comments are requested by January 9, 1989. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB Paper Reduction Project and the Agency Clearance Officer of your intent as early as possible.

ADDRESS: Philip D. Waller, NASA Agency Clearance Officer, Code NPN, NASA Headquarters, Washington, DC 20546; Paperwork Reduction Project (2700–0051), OMB, Room 3235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Shirley C. Peigare, NASA Reports Officer, (202) 453–1090.

Reports

Title: NASA FAR Supplement, Part 18–23, Environment, Conservation, and Occupational Safety.
OMB Number: 2700–0051.
Type of Request: Extension.
Frequency of Report: On occasion.
Type of Respondent: State or local governments, businesses or other for-profit, non-profit institutions, small businesses or organizations.
No. of Respondents: 375.
Annual Responses: 750.
Annual Burden Hours: 30,000.
Abstract-Need/Uses: Where unique facility safety or health requirements exist, including hazardous deliverables or operations, suitable contractor's safety and health plans are required as are accident reports.

November 29, 1988.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Comments on this information collection must be submitted on or before January 9, 1989.

ADDRESSES: Send comments to Ms. Ingrid Reyes, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, (202) 786–0249 and Mr. Jim Houser, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, DC 20503, (202) 395–7316.

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid Reyes, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, (202) 786–0249 from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what the form will be used for; (6) an estimate of the number of hours needed to fill out the form. None of these entries are subject to 44 U.S.C. 3504(h).

Category: New Forms

Title: Organizational Survey.
Form Number: Not Applicable.
Frequency of Collection: One Time only.
Respondents: Nonprofit organizations and groups.
Use: Application for funding.
Estimated Number of Respondents: 30.
Frequency of Response: One Time only.
Estimated Hours for Respondents to Provide Information: .25 per respondent.
Estimated Total Annual Reporting and Recording Burden: 7.5 hours.

Susan H. Metts,
Assistant Chairman for Administration.

BILLING CODE 7590-01-M

[Docket Nos. 50-317 and 50-318]

Baltimore Gas and Electric Co.; Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-53 and DPR-69, issued to the Baltimore Gas and Electric Company (the licensee), for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, located in Calvert County, Maryland.

The proposed amendments would (1) modify the current requirement of Technical Specification (TS) 6.2.2.g that the General Supervisor—Nuclear Operations (GS-NO) shall hold a senior reactor operator (SRO) license to a new requirement that the GS-NO shall hold or shall have held an SRO license at Calvert Cliffs; (2) add a new requirement to TS 6.2.2.g to require that the Assistant General Supervisor—Nuclear Operations shall hold an SRO license.

The proposed change to the SRO license requirement for the GS-NO would collaterally effect the qualifications required for the members of the Plant Operations and Safety Review Committee (POSRC). Currently, the POSRC includes a member, the GS-NO, with an active SRO license. Through modifying the SRO license requirement for the GS-NO, the POSRC will no longer contain any members that are required to maintain an SRO license.

This proposed TS revision is in response to the licensee's application for amendments dated March 15, 1988 as modified on December 2, 1988.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 9, 1989, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may

be delivered to the Commission's Public Document Room, Gelman Building, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Capra: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to D.A. Brune, Jr., General Counsel, Baltimore Gas and Electric Company, P.O. Box 1475, Baltimore, Maryland 21203, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i) through (v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards considerations in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated March 15, 1988, as modifed on December 2, 1988, which is available for public inspection at the Commission's Public Document Room, Gelman Building, 2120 L Street NW., Washington, DC 20555, and at the Local Public Document Room, Calvert County Library, Prince Frederick, Maryland.

Dated at Rockville, Maryland, this 5th day of December 1988.

For the Nuclear Regulatory Commission.

Robert A. Capra,

Director, Project Directorate I–1, Division of Reactor Projects I/II.

[FR Doc. 88–28266 Filed 12–7–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–317 and 50–318]

Baltimore Gas and Electric Co.; Modified Consideration of Issuance of Amendments To Facility Operating Licenses and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR–53 and DPR–69, issued to the Baltimore Gas and Electric Company (the licensee), for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, located in Calvert County, Maryland.

The proposed amendments were originally published in the Federal Register (53 FR 29791) on August 8, 1988 as a "Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing." Subsequently on October 25, 1988, the licensee requested a modification to the proposed amendment of Technical Specification 5.6.2, "Criticality-New Fuel." Currently, TS 5.6.2 requires that k_{eff} will not exceed 0.98 when the fuel is in place and various densities of unborated water are assumed including agueous foam moderation. The proposed modification would reduce the maximum k_{eff} limits for TS 5.6.2 from 0.98 to 0.95 and, in addition, would add the full flood condition to the various densities of unborated water conditions that are assumed in determining k_{eff}.

This proposed TS revision is in response to the licensee's application for amendments dated June 9, 1988 as modified on October 25, 1988.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 9, 1989, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be effected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, Gelman Building, 2120 L Street, NW., Washington, DC, by the

above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Capra: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to D.A. Brune, Jr., General Counsel, Baltimore Gas and Electric Company, P.O. Box 1475, Baltimore, Maryland 21203, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i) through (v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards considerations in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated June 9, 1988, as modified on October 25, 1988, which is available for public inspection at the Commission's Public Document Room, Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room, Calvert County Library, Prince Frederick, Maryland.

Dated at Rockville, Maryland, this 5th day of December, 1988.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket Nos. 50-250-OLA-4 and 50-251-OLA-4 (P/T Limits); ASLBP No. 89-584-01-OLA]

Florida Power and Light Co.; Establishment of Atomic Safety and Licensing Board To Preside in Proceeding

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

Florida Power and Light Company, Turkey Point Plant, Unit Nos. 3 and 4, Facility Operating Licenses Nos. DPR-31 and DPR-41.

This Board is being established pursuant to a notice published by the Commission on October 19, 1988 in the **Federal Register** (53 FR 40981 and 10988) entitled, "Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations." The proposed amendments would revise section 3.1.2 of the Technical Specifications by incorporating modified pressure and temperature (P/T) limits for the Reactor Coolant System (RCS) and pressurizer.

The Board is comprised of the following Administrative Judges:

B. Paul Cotter, Jr., Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, 5Washington, DC 20555.

Glenn O. Bright, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Jerry Harbour, Atomic Safety and Licensing Board Panel, 5U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 30th day of November 1988.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590-01-M

[Docket No. 50-309]

Maine Yankee Atomic Power Co.; Consideration of Issuance of Amendment To Facility Operating License and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-36 issued to Maine Yankee Atomic Power Company (the licensee), for operation of the Maine Yankee Atomic Power Station in Lincoln County, Maine.

The proposed amendment would modify Technical Specification 1.1, "Fuel Storage." Technical Specification 1.1 describes and defines those aspects of fuel storage which relate to the prevention of criticality in the fuel storage facility. The proposed amendment changes specification D from "Spent fuel shipping casks shall not be lifted over the spent fuel storage pool," to "Spent fuel shipping casks shall not be lifted over the spent fuel storage pool until all irradiated fuel within 10 rows of the cask laydown area has cooled a minimum of 60 days."

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 9, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's Rule of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of

BEST COPY AVAILABLE

the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission' Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–800–325–6000 (in Missouri 1–800–342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Richard H. Wessman, Project Directorate I–3 (petitioner's name and telephone number); (date petition was mailed); (plant name); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to J.A. Ritsher, Ropes and Gray, 255 Franklin Street, Boston, Massachusetts 02210, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomtic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i) through (v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated November 1, 1988, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room, Wiscasset Library, High St., P.O. Box 367, Wiscasset, Maine 04578.

Dated at Rockville, Maryland, this 2nd day of December 1988.

For the Nuclear Regulatory Commission.

Richard H. Wessman,

Director, Project Directorate I–3, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28268 Filed 12–7–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–346]

Toledo Edison Co. and The Cleveland Electric Illuminating Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–3, issued to Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees), for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 located in Ottawa County, Ohio.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would revise the provisions in the Davis-Besse Nuclear Power Station, Unit No. 1, Technical Specifications (TS's) relating to Steam and Feedwater Rupture Control System Instrumentation. Specifically, this amendment would revise Table 3.3–11, Section 3.3.2.2, Steam and Feedwater Rupture Control System (SFRCS) Instrumentation, to permit bypass of Functional Unit 1, Main Steam Pressure Low Instrument Channel, when steam pressure is below 700 psig vice 650 psig. The amendment also would change the main steam line pressure for automatic removal of the bypass to 750 psig from 650 psig.

The Need for the Proposed Action

With the present block-permissive value of 650 psig, the nominal pressure margin to the field setpoint for low-pressure SFRCS trip is only 38 psig. This small margin combined with instrument, inaccuracy, setability, and drift creates the possibility of an inadvertent and spurious SFRCS trip during plant cooldowns. Additionally, the arrangement of the instrumentation used for SFRCS low-pressure trip and that used for the block-permissive is such that the plant operators must maintain approximately the same pressure in both steam generators during cooldown, otherwise the steam generator with the lower pressure could experience a low-pressure trip before the block-permissive for the other steam generator is established.

The proposed changes are needed to reduce the potential for unnecessary isolation of a steam generator and challenge to the auxiliary feedwater system during plant cooldowns or startups by reducing the possibility of an inadvertent or spurious SFRCS trip on low main steam line pressure.

The Commission has evaluated the environmental impact of the proposed amendment and has determined that neither the probability of accidents nor the post-accident radiological releases would be greater than previously determined. The proposed amendment does not otherwise affect radiological plant effluents during normal operation. In addition, the proposed amendment does not have any influence upon occupational radiation exposure. Therefore, the Commission concludes that there are no significant radiological

environmental impacts associated with this proposed amendment.

With regard to potential nonradiological impacts, the proposed amendment does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on May 12, 1988 (53 FR 16920). No request for hearing or petition for leave to intervene was filed following this notice.

Alternatives to the Proposed Action

Since the Commission has concluded that the environmental effects of the proposed action are not significant, any alternative with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce the environmental impacts attributable to this facility and would only result in retaining the present potential for unnecessary isolation of a steam generator and challenge to an engineered safety feature.

Alternatives Use of Resources

This action does not involve the use of resources not previously considered in the Final Environmental Statement related to operation of the Davis-Besse facility.

Agencies for Persons Consulted

The Commission's staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated February 29, 1988 which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, and at the University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Dated at Rockville, Maryland, this 2nd day of December 1988.

For the Nuclear Regulatory Commission.

Albert W. De Agazio,

Acting Director, Project Directorate III–3, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulations.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by Office of Mangement and Budget

Agency Clearance Office—Kenneth Fogash, (202) 272–2142.

Upon written request copy available from: Securities and Exchange Commission, Office of Consumer Affairs, Washington, DC 20549.

New, Form 5, File No. 270–323
Rev., Form 4, File No. 270–125
Rev., Form 3, File No. 270–126

Notice is hereby given that pursuant to the Paperwoek Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for OMB approval amendments to Forms 3 and 4, as well as a new Form 5, which will restructure the manner in which trades by insiders are reported. The amendments should reduce the number of filings on Form 4, which is a report of changes in beneficial ownership. With respect to Form 3 currently approximately 13,265 respondents are effected and an estimated 2.5 burden hours are required per response. Currently 113,846 Forms 4 are filed annually at an estimated 2.5 burden hours per response. The estimated average burden hours are made solely for purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even a representative survey or study of the costs of SEC rules and forms.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–6004 and Gary Waxman, Clearance Officer, Office of Management and Budget (Paperwork Reduction Project 3235–0104, 0287, and 00XX), Room 3228, New Executive Office Building, Washington, DC 20503.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–26334; File No. SR–PSE–88–14]

Self-Regulatory Organizations; Pacific Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Revocation of a Market Maker Letter of Guarantee

On October 3, 1988, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") submitted to the Securities and Exchange Commission ("Commission") pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder, [2] a proposed rule change which provides that a Letter of Guarantee [3] is not[4] considered revoked until a final written notice of revocation is filed with the Exchange, and which adds a new Commentary providing that a market maker subject to an interim notice of revocation may effect only closing transactions in its market maker account.

The proposed rule change was noticed in Securities Exchange Act Release No. 26197 (October 18, 1988), 53 FR 43064 (October 25, 1988). No comments were received on the proposed rule change. On November 17, 1988, the Exchange filed clarifying amendments to the proposal.

The purpose of the proposal is to specify the obligations of a market maker who is subject to a written interim notice of revocation of a Letter of Guarantee with respect to open positions in the market maker account. Exchange Rule VI, section 77, is amended to reflect that a Letter of Guarantee is not considered revoked until a final written notice of revocation, as opposed to an interim notice of revocation, is filed with the Exchange. Additionally, Commentary .01, as amended, provides that a market maker [4] who is subject to an interim

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b–4 (1986).

[3] A Letter of Guarantee, issued by a clearing member and approved by the Options Clearing Corporation and the Exchange, must be in effect before a market maker can effect transactions on the floor of the Exchange.

[4] The amendment filed on November 17 (the "November amendment") replaced the term "individual" with "market maker" to make clear that only market makers can be subject to notices of revocation.

notice of revocation may effect only closing transactions in the market maker account during the period between the effective date of a written interim notice of revocation and the effective date of the final written notice of revocation. The November amendment to the proposed rule change also deleted language in the Commentary which implied that a market maker subject to an interim notice of revocation would have ceased to be a member of the Exchange. In fact, the interim notice of revocation was designed to permit the clearing firm to guarantee a market maker's closing transactions during the period between the time when the market maker ceased trading, *e.g.*, because of losses in excess of net capital requirements, and when he ceased to be a member of the Exchange.[5]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6.[6] Specifically, the Commission finds that the proposed rule change is consistent with section 6(b)(5) of the Act because it will protect investors and the public interest by setting out a market maker's obligation to effect only closing transactions when subject to an interim notice of revocation. The Commission believes the added certainty of the clearing firm guarantee during this period will facilitate transactions, enabling the market maker to close out Open positions in the market maker account in an orderly fashion. In addition, the clarification that a Letter of Guarantee is not considered revoked until a written notice is filed with the Exchange will provide more guidance and certainty to members as to the procedures for such revocation.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change (SR–PSE–88–14) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

[5] Of course, the market maker might not terminate his Exchange membership. In either case, the interim notice of revocation enables him to wind up his market making activities. If the market maker has terminated his membership, he could not effect even closing transactions; the clearing firm would close out open positions in the market maker account.

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Inc.

November 28, 1988.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following securities:

Sun Exploration and Production Company
Common Stock, $1.00 Par Value (File No. 7–4037)
Beckman Instruments, Inc.
Common Stock, $.10 Par Value (File No. 7–4038)
First Union Corporation
Common Stock, $3.33⅓ Par Value (File No. 7–4039)
The Jepson Corporation
Common Stock, $0.01 Par Value (File No. 7–4040)
Coles Myer, Ltd.
American Depositary Shares (File No. 7–4041)
Compumat, Inc.
Common Stock, $.01 Par Value (File No. 7–4042)
The Gitano Group, Inc.
Common Stock, $.10 Par Value (File No. 7–4043)
Huntway Partners, L.P.
Preference Units (File No. 7–4044)
CP National Corporation
Common Stock, $2.50 Par Value (File No. 7–4045)
Cincinnati Bell Inc.
Common Stock, $1 Par Value (File No. 7–4046)
Daxor Corporation
Common Stock, $0.01 Par Value (File No. 7–4047)
IGI, Inc.
Common Stock, $0.01 Par Value (File No. 7–4048)
Shaw Industries, Inc.
Common Stock, No Par Value (File No. 7–4049)
Kemper Municipal Income Trust
Common Shares, $.01 Par Value (File No. 7–4050)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before December 19, 1988, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secetary.

BILLING CODE 8010–01–M

[Release No. IC–16667; 812–7163]

ABT Growth and Income Trust et al.; Application

December 1, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: ABT Growth and Income Trust, ABT Utility Income Fund, Inc., ABT Investment Series, Inc., and the Southern Master Trust (together, the "Load Funds"), ABT Money Market Series, Inc. (the "No-Load Fund", and together with the Load Funds, the "Funds", and individually, a "Fund"), Palm Beach Capital Management, Ltd. ("PBCM"), CKW Financial Services, Inc. ("CKW"), and each future investment company or additional portfolio of an existing Fund that has a sales load structure and exchange program substantially identical to the existing Funds and for which PBCM or CKW (or any of their respective subsidiaries or affiliates) serve as investment adviser, subinvestment adviser or administrator, or as distributor, respectively, of such investment companies (the "Additional Funds").

Relevant 1940 Act Section: Order requested under section 11(a).

Summary of Application: Applicants seek an order to permit exchanges of shares among the Funds on a basis

described herein that may be at other than their respective net asset values at the time of the exchange.

Filing Date: The application was filed on October 26, 1988, and a letter, dated November 29, 1988, was filed as an exhibit thereto.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 27, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants c/o Palm Beach Capital Management, Ltd., 205 Royal Palm Way, Palm Beach, Florida 33480, Attention: Timothy W. Cox, Esquire.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney, at (202) 272–3026 or Stephanie M. Monaco, Branch Chief, at (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations

1. Each Fund is an open-end management investment company registered under the 1940 Act. CKW, a registered broker-dealer, serves or is expected to serve as the distributor of the shares of each Fund. PBCM, a registered investment adviser, serves as investment adviser of each Fund.

2. Shares of the No-Load Fund are sold at their relative net asset value without a sales charge. Shares of each of the Load Funds are offered at their relative net asset value, plus a maximum sales load of 4.75% of the public offering price per share, except for shares of the Southern Master Trust which are offered with a maximum sales load of 4.50% of the public offering price per share. As set forth in the prospectuses of the Load Funds, all sales charges are subject to reduction depending on the size of the investment.

3. Applicants seek the flexibility to allow shareholders of any No-Load Fund or any Load Fund to exchange all or a portion of their shares (including shares acquired through the reinvestment of dividends and capital gains distributions) for shares of certain other Funds for which the Distributor serves as principal underwriter as specified herein. Any sales load charged with respect to an acquired security will be a percentage that is no greater than the excess, if any, of the rate of the sales load applicable to that security in the absence of an exchange over the total rate of any sales load previously paid on the exchanged security. No redemption fee will be imposed with respect to the exchanged security.

4. Applicants seek the ability to permit the following exchange offers between Funds: (i) Shares of a Load Fund may be exchanged for shares of another Load Fund on the basis of relative net asset value without the payment of a sales load, except that if the sales load applicable to the shares of the Load Fund being acquired in the exchange exceeds the maximum sales load that could have been imposed in connection with the purchase of the shares being surrendered in the exchange (at the time such shares were acquired), without giving effect to any applicable reduction in sales loads, the difference will be deducted as an additional sales load and will be paid to the Distributor; (ii) shares of a No-Load Fund may be exchanged for shares of another No-Load Fund on the basis of relative net asset value without the payment of a sales load; (iii) shares of a Load Fund may be exchanged for shares of a No-Load Fund on the basis of relative net asset value without the payment of a sales load; and (iv) shares of a No-Load Fund may be exchanged for shares of any Load Fund subject to the sales load normally charged by the Load Fund (unless the investment in those shares was previously subject to a sales load by one of the Load Funds or was acquired by dividend or distribution reinvestment in a Load Fund).

5. In the event that a sales charge is imposed on an exchange, any right of accumulation as described in the Fund's prospectus would be considered in determining the sales charge applicable to the exchange. If a shareholder has executed a Letter of Intent whereby he immediately qualifies for a reduced sales charge upon the purchase of shares of a Load Fund and effects an exchange prior to completing the Letter of Intent, his account will be charged an appropriate sales charge prior to the exchange, taking into account the terms and conditions of any Letter of Intent then in effect. Also, each exchange will be subject to the minimum investment requirements of the particular Fund's shares that are to be acquired in the exchange.

6. Any shares exchanged that were acquired through reinvestment of dividends and capital gain distributions will be deemed to have been sold with a sales load, if any, equal to the sales load, if any, previously paid on the shares on which the dividend was paid or distribution made. Moreover, where a shareholder exchanges less than all of his shares of a particular Fund, the shares upon which the highest sales load was previously paid will be deemed to be exchanged first.

7. Funds reserve the right to impose a nominal administrative fee (in an amount not exceeding $5.00 per exchange or such greater amount as the SEC or its staff may permit), applied uniformly to all shareholders. The amount of any administrative fee imposed on an exchange will be disclosed in each Fund's prospectus and any sales literature that mentions the existence of the exchange privilege. Also, the existence of the administrative fee will be disclosed in any advertising that mentions the existence of the exchange privilege.

Applicants' Legal Analysis

1. Applicants submit that the exemption requested is appropriate and in the public interest, and is consistent with the policies underlying the provisions of the 1940 Act. Applicants submit that the purpose of the proposed exchange privilege between Funds is (i) to remove any ambiguity concerning Applicant's ability to offer or exchange Fund shares in the manner described above, and (ii) to permit a shareholder of any Fund in the ABT family of funds (all funds for which PBCM serves as adviser) to exchange, in a simple transaction, his Fund shares for shares of any other Fund on a fair and equitable basis when market, tax considerations or changes in the shareholder's investment objectives warrant such an exchange. Such exchange privilege will facilitate an investor's desire to hold shares of a particular Fund that offers objectives and policies best suited to his current goals without delay or unnecessary expense.

2. Applicants submit that if exchanges between Funds were always made at their relative net asset values, the distribution system of the Load Funds

would be disrupted because an investor could easily avoid the sales charge by acquiring No-Load Fund shares and immediately exchanging the shares so acquired for Load Fund shares. The offers of exchange proposed by the Applicants would avoid this problem, would be equitable to all shareholders and would benefit exchanging shareholders by crediting them for sales charges previously paid. CKW has established sufficient internal review procedures to ensure that exchanges are made at the request of investors and not for the brokers' personal gain and that it is actively monitoring customer complaints and will continue to be alert to the possible abuses that might occur regarding the exchange privilege.

3. Applicants submit that the proposed exchanges would be consistent with proposed Rule 11a–3 under the 1940 Act.

Applicants' Conditions

If the requested order is granted, the Applicants agree to the following conditions:

1. Any administrative fee or any scheduled variation thereof will be uniformly applied to all offerees of the class specified.

2. The exchange privilege among Funds, as well as any administrative fee, will comply with the requirements of revised proposed rule 11a–3 if and to the extent the Rule is adopted.

3. Shareholders of each Fund will be notified of any administrative fee that may be imposed on an exchange transaction by means of each Fund's prospectus and in other communications, including sales literature or advertising that describes the exchange program.

4. Shareholders of each Fund will be notified of the Fund's exchange program by means of the particular Fund's prospectus and in other communications, including sales literature or advertising.

5. Shareholders of each Fund will be notified by means of the particular Fund's prospectus and in sales literature and advertising that discusses the exchange privilege of the fact that the Fund reserves the right to modify or terminate its exchange privilege.

6. Shareholders will be notified in writing at least 60 days prior to any modification or termination of a particular Fund's exchange privilege, except in the case of a reduction or elimination or any administrative fee or sales load in which case notice shall not be required; provided, however, that the temporary cessation of the sale of Fund shares under extraordinary circumstances such as when the Fund is unable to invest effectively amounts in accordance with applicable investment objectives, policies and restrictions, or the suspension of the redemption of Fund shares pursuant to section 22(e) of the 1940 Act and the rules and regulations thereunder shall not be considered a modification or termination of the particular Fund's exchange privilege.

7. Applicants undertake to obtain an amended order from the SEC prior to any modification (*i.e.*, manner, frequency or basis) of a Fund's exchange privilege in a manner not described in the application; provided, however, that an amended order is not required in order (i) to terminate a Fund's exchange privilege, (ii) to impose a nominal administrative fee ($5.00 or less or such greater amount as the SEC or the staff may permit) or (iii) to reduce any such administrative fee imposed.

8. Applicants acknowledge that any order issued prusuant to this application is prospective in nature and, therefore, Applicants will not rely on any such exemptive order prior to its issuance as authority for any exchanges which occurred prior to the date of the order.

9. Reductions in the sales load of any of the Load Funds will be in accordance with the provisions of Rule 22d–1 under the 1940 Act.

10. Any Additional Funds sold with a sales load that offer an exchange privilege and that seek to utilize the exemption provided hereby will have sales load structures and exchange privileges substantially identical to one or more of the Funds included herein and will be subject to the representations and conditions included herein.

For the Commission, by the Division of Investment Mangement, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[File No. 22–18655]

Application and Opportunity for Hearing; Centex Acceptance Corp.

Notice is hereby given that Centex Acceptance Corporation ("Company") has filed an application (the "Application"), pursuant to section 310(b)(1)(ii) of the Trust Indenture Act of 1939, as amended (the "Act"), for a finding by the Securities and Exchange Commisson (the "Commission") that the trusteeship of The First National Bank of Chicago ("First National") under an indenture dated as of April 1, 1983 ("April Indenture"), as supplemented as of May 1, 1983, July 12, 1983, September 17, 1985, and August 1, 1987 between the Company and First National which was heretofore qualified under the Act, and as the proposed successor trustee under an indenture dated as of October 3, 1983 ("October Indenture") (supplemented as of December 8, 1983, January 16, 1984, July 11, 1984, March 29, 1985, September 15, 1985, and December 20, 1985), as amended and restated in its entirety as of September 24, 1986, supplemented as of November 26, 1986 and September 1, 1988 between the Company and RepublicBank Dallas, National Association ("RepublicBank") pursuant to which NCNB Texas National Bank ("NCNB"), as successor to RepublicBank is currently Trustee, which was heretofore qualified under the Act, is not so likely to involve a material conflict of interest as to make it necessary, in the public interest or for the protection of investors, to disqualify First National from acting as trustee under both of such indentures.

Section 310(b) of the Act provides, in part, that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in such section), it shall, within 90 days of ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of section 310(b) provides, with certain exceptions, that a trustee is deemed to have a conflicting interest if it is acting as trustee under another indenture under which any other securities of the same obligor are outstanding. However, pursuant to clause (ii) of such subsection (1), there may be excluded from the operation of section 310(b)(1) any indenture or indentures under which other securities of such obligor are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that the trusteeship under the qualified indentures is not so likely to involve a material conflict of interest as to make it necessary, in the public interest or for the protection of investors, to disqualify such trustee from acting as trustee under any such indentures.

The Company has alleged in the Application that:

1. Pursuant to the April Indenture, the Company has issued $165,477,000 aggregate principal amount of its GNMA-Collateralized Bonds ("Bonds"), Series A, B, G, P, Q, and R ("April Series"), respectively.

2. Pursuant to the October Indenture, the Company has issued $1,449,225,000

aggregate principal amount of its GNMA-Collateralized Bonds ("Bonds"), Series D, E, F, H, I, J, K, L, M, N, and O ("October Series"), respectively. NCNB, as successor to RepublicBank, is currently the Trustee.

3. The Bonds were registered for sale pursuant to Form S–3 Registration Statements under the Securities Act of 1933, as amended. Both of such Indentures and the trustees thereunder have been qualified under the Act.

4. Each Series of Bonds has been secured by a pledge and assignment to the independent trustee under the related Indenture of a separate and independent collateral package (a "Trust Estate") consisting of (i) GNMA Certificates, together with the payments to be received thereon, (ii) one or more accounts or funds maintained to receive and hold payments of principal and interest made on such GNMA Certificates pending distribution to Bondholders or, in certain instances meeting the applicable requirements of the rating agency or agencies rating the Bonds of such Series and specified in such Indenture, Company, (iii) if any of the GNMA Certificates pledged to secure such Series of Bonds are graduated payment GNMA Certificates, one or more reserve funds in the form of cash, a standby letter of credit or certain high quality eligible investments, and (iv) if required by the rating agency or agencies rating the Bonds of such Series, one or more reserve funds in the form of cash or a standby letter of credit.

5. The Indentures contain the provisions required by section 310(b) of the Act.

6. The Company intends to continue issuing from time to time pursuant to the Indentures new series of Bonds, in addition to the previously issued and currently outstanding Series of Bonds referenced above. Each such new series of Bonds will be issued on the same basis as described above and in the Application.

7. The Company intends to appoint First National as Trustee under the October Indenture.

8. As referenced above, the Bonds issued and to be issued by the Company under each Indenture are or will be secured by wholly separate and distinct pools of collateral so that, should First National have occasion to proceed against the trust assets or the security with respect to a particular Series of Bonds issued under either Indenture, such action would not effect the collateral, or the use of the collateral, with respect to any other Series of Bonds issued under the other Indenture or prejudice the rights of any of the holders of the Bonds. The proposal that First National serve as trustee under both Indentures is analagous to the situation contemplated by section 310(b)(1)(C) of the Act permitting the same person to act as trustee under two or more Indentures that are secured by wholly separate and distinct parcels of real estate.

9. The Company is not in default in any respect under the Indentures.

10. The company has waived notice of hearing, any right to a hearing on the issues raised by the Application and all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice.

For a more detailed account of the matters of fact and law asserted, all persons are referred to the Application, which is a public document on file in the offices of the Commission at the Public Reference Room, File Number 22–18655, 450 Fifth Street NW., Washington, DC 20549.

Notice is further given that any interested person may, not later than December 30, 1988, request in writing that a hearing be held on such matter, state the nature of his interest, the reasons for such request, and the issues of law or of fact raised by the Application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. At any time after said date, the Commission may issue an order granting the Application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest or for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 88–28205 Filed 12–7–88; 8:45 am]

BILLING CODE 8010–01–M

[Release No. IC 16668; (812–6939)]

Discover Credit Corp.; Application

December 1, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption from all provisions of the Investment Company Act of 1940 ("1940 Act").

Applicant: Discover Credit Corp.

Relevant 1940 Act Sections: Exemption requested pursuant to section 6(c) from all provisions.

Summary of Application: An amendment to an existing order (Investment Company Act Rel. No. 16006, September 28, 1987, "Existing Order") is sought to exempt Applicant from all provisions of the 1940 Act to permit it to operate as a finance subsidiary of Sears, Roebuck and Co. ("Sears") by borrowing money in domestic and foreign debt markets and utilizing the proceeds thereof to (1) lend funds to certain subsidiaries of Sears in exchange for such subsidiaries' unsecured promissory notes (as contemplated by the Existing Order with respect to certain of the subsidiaries), and (2) purchase certain accounts and notes receivable from such subsidiaries (as contemplated by the requested amended order).

Filing Dates: The application was filed on December 22, 1987, and amended on May 18, July 6, August 11, and November 22, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on December 27, 1988. Request a hearing in writing giving the nature of your interest, the reason for the request, and the issues you contest. Serve Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Discover Credit Corp., 12 Read's Way, New Castle, Delaware 19720.

FOR FURTHER INFORMATION CONTACT: Thomas Mira, Staff Attorney, (202) 272–3047, or Brion Thompson, Branch Chief, (202) 272–3016, (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier, (800) 231–3282, (in Maryland, (303) 258–4300).

Applicant's Representations

1. Under the terms of the Existing Order Applicant operates as a wholly-owned subsidiary of Sears and its

primary business is to finance various activities of certain direct and indirect subsidiaries of Sears operating within the Dean Witter Financial Services Group ("DCC Borrowers"). Under the Existing Order, Applicant raises funds for such financing by offering and selling commercial paper notes and other debt securities. Applicant recognizes that because a majority of its assets consist of unsecured promissory notes of the DCC Borrowers that it receives in exchange for the proceeds of its debt offerings lent to such Borrowers, it may be deemed to be an investment company under section 3(a) of the 1940 Act.

2. Applicant now seeks an amendment to the Existing Order that would permit Applicant to use the proceeds of its debt offerings to purchase from the DCC Borrowers and from direct and indirect subsidiaries of Sears within the Coldwell Banker Real Estate Group ("CBREG Borrowers") open credit card accounts receivable generated by the Discover Card and notes receivable generated in connection with loans for consumer purchases of automobiles, boats and recreational vehicles ("Receivables"). Such purchases would be in lieu of or in addition to receiving the unsecured promissory notes of the DCC and CBREG Borrowers. Applicant represents that no such Receivables will be purchased if they have been delinquent (i.e., more than 30 days past due in the payment of any scheduled installment) during the one-year period preceding the date of purchase.

3. Applicant states that the general terms and conditions under which its debt securities are or may be issued have not changed from those contemplated by the Existing Order, and that all protections afforded investors pursuant to the Existing Order will remain essentially the same. In this regard, Applicant points out that the investor protection afforded under the Existing Order based on the Net Worth Maintenance Agreement will remain identical because that agreement will not change in any respect if the requested order is granted. Under the terms of the Net Worth Maintenance Agreement, prior to issuance of any debt securities by Applicant, Sears and Applicant will enter into a contractual agreement which will provide that (i) Sears will continue to hold all legal title to and beneficial interest in all of the outstanding voting stock of Applicant; (ii) Sears will cause Applicant to have a tangible net worth (defined to mean the sum of the capital stock, paid-in capital and retained earnings of Applicant plus subordinated indebtedness of Applicant held by Sears or its subsidiaries after deducting the book value of all intangible assets of Applicant) of at least $1.00 until the retirement of all outstanding debt of, and all outstanding debt guaranteed by, Applicant; (iii) such agreement is for the benefit of the holders of all outstanding debt securities issued or guaranteed by Applicant; (iv) Applicant will, for the benefit of such holders, timely take all necessary action under such agreement to require Sears to perform its obligations thereunder; (v) each holder will have a direct and immediate right of action against Sears to enforce Sears' obligations under such agreement should Applicant fail to take such action; and (vi) such agreement may not be amended in a manner so as to relieve Sears of its obligations thereunder, and may only be amended in ways no less favorable to Applicant and its creditors.

4. Under the Existing Order the DCC Borrowers were required to agree, absent regulatory restrictions, to pay Applicant on borrowings at rates sufficient to maintain Applicant's earnings (before income taxes and fixed charges) at a level of at least 1.25 times Applicant's aggregate interest costs and fixed charges. Applicant states that, in order to provide additional flexibility in setting interest rates with respect to loans to the DCC and CBREG Borrowers, it now wishes ot reserve the right to reduce the minimum ratio of interest income to interest costs and fixed charges (after giving effect to Applicant's earnings from its receivables portfolio) to 1.15 times such costs and charges. Applicant represents that this additional flexibility will have no adverse effect on Applicant's ability to honor its principal and interest obligations to holders of its debt securities, or the ratings afforded Applicant's debt instruments. Applicant states that no reduction of this ratio is presently contemplated.

Applicant's Legal Analysis

1. Applicant argues that the activities contemplated by the requested amended order should not change its status as an entity not intended to be regulated under the 1940 Act, and that granting such order is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. Applicant submits that the Net Worth Maintenance Agreement, which Sears and Applicant entered into in connection with the Existing Order, provides the same protection to investors regardless of whether Applicant makes loans to, or purchases Receivable from, its affiliated borrowers. Sears' obligation under the Net Worth Maintenance Agreement to maintain Applicant's tangible net worth at not less than $1.00 until the retirement of all Applicant's outstanding debt is independent of any reason that Applicant (or, failing action by Applicant, holders of Applicant's debt securities) would have to make a claim under the Net Worth Maintenance Agreement. The Net Worth Maintenance Agreement would obligate Sears to take appropriate action whether any deficiency in Applicant's tangible net worth might arise from the failure of obligors on Receivables to satisfy their obligations or from the DCC or CBREG Borrowers' failure to satisfy their loan obligations to Applicant. As a result, Applicant concludes that an amendment to the Existing Order permitting the purchase of Receivables will have no impact on the essential protections afforded Applicant's investors under the terms of the Net Worth Maintenance Agreement.

2. Applicant also points out that, in enacting section 3(c)(5)(A) of the 1940 Act, Congress has made the policy determination that issuers primarily engaged in the business of "purchasing or otherwise acquiring notes, drafts, acceptances, open accounts receivable, and other obligations representing part or all of the sales price of merchandise, insurance and services" should not be regulated as investment companies. Applicant states that the open credit card accounts receivable and notes receivable referred to above that may be purchased from the DCC and CBREG Borrowers will be within the parameters of the section 3(c)(5)(A) exclusion. Applicant notes that it would have been unnecessary to obtain the Existing Order if it has been primarily engaged in the business of buying such Receivables. Applicant asserts that if the requested order is not granted, Applicant would be placed in the illogical position of being exempt from the 1940 Act with respect to its investment in the DCC and CBREG Borrowers' unsecured notes under the terms of the Existing Order *or* if it becomes primarily engaged in purchasing Receivables, but not exempt from the 1940 Act if it operates under the Existing Order *and* engages in activities permitted under section 3(c)(5)(A) of the 1940 Act. Because companies primarily purchasing Receivables are expressly excluded from investment company status by Congress, Applicant concludes that its purchases of Receivables from the DCC and CBREG Borrowers should not affect its current exempt status under the Existing Order, and requests

that the Existing Order be amended accordingly. Finally, Applicant acknowledges that any such amended order would not extend to Applicant's activities in the event Applicant becomes primarily engaged in the purchases of Receivables.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[Release No. IC-16670; File No. 811-5365]

Freedom Variable Annuity Funds

December 2, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for an Order under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Freedom Variable Annuity Funds ("Applicant").

Relevant 1940 Act Sections: Order requested under section 8(f).

Summary of Application: Applicant seeks an order under section 8(f) of the 1940 Act declaring that it has ceased to be an investment company.

Filing Date: The application was filed on July 22, 1988 and amended on October 28, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 27, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESS: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Freedom Variable Annuity Funds, One Beacon Street, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: Heidi Stam, Attorney (202) 272-3017 or Clifford E. Kirsch, Special Counsel (202) 272-2061 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. On October 16, 1987, the Applicant filed a notification of registration on Form N-8A and a registration statement on Form N-1A. The registration statement has not become effective, and there has been no public offering of any of Applicant's securities.

2. Applicant has not, within the last 18 months, transferred any of its assets to a separate trust, the beneficiaries of which were or are securityholders of Applicant.

3. No distributions have been made in connection with the winding-up of Applicant affairs.

4. Applicant's assets at the time of filing this application consist of $50 in cash received at the time of the sale of shares of each of Applicant's five series to Applicant's sole security-holder, Tucker Anthony Management Corporation. Such assets have been retained in order to maintain Applicant's legal existence. Such assets have not and will not be invested in any securities.

5. Applicant has no debts or other liabilities and is not a party to any litigation or administrative proceedings.

6. Applicant is not now engaged, and does not propose to engage, in any business activities other than those necessary for the winding-up of its affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16671; 811-4668]

MarketAmerica Trust; Application

December 2, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicant: MarketAmerica Trust.

Relevant 1940 Act Sections: Order requested under section 8(f) and Rule 8f-1.

Summary of Application: Application for an order declaring that Applicant has ceased to be an investment company.

Filing Date: The application was filed on August 10, 1988, and amended on November 14, 1988. Supplemental letters to the application were filed on November 23, 1988 and November 30, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 27, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicant, Metro Park III, 399 Thornall Street, Edison, New Jersey 08837.

FOR FURTHER INFORMATION CONTACT: Barbara Chretien-Dar, Staff Attorney, (202) 272-3022 or Karen L. Skidmore, Branch Chief, (202) 272-3023 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the Application; the complete Application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier, (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant was organized as a Massachusetts business trust on April 22, 1986, and registered under the Act as an open-end management investment company on May 9, 1986. Applicant consisted of five separate portfolios: Bond MarketAmerica Fund ("BMA Fund"), High Yield Equity Fund ("High Yield Fund"), OTC MarketAmerica Fund ("OTC Fund"), Stock MarketAmerica Fund ("SMA Fund"), and Stock MarketAmerica Plus Fund ("SMA Plus Fund"). MarketAmerica Group, Inc. ("MAG") served as Applicant's investment adviser and MarketAmerica Securities, Inc. ("MAS") acted as its principal underwriter.

2. Due to a deterioration in MAG's finances, Applicant's Board of Trustees asked MAG to seek additional financing or make inquiries regarding the availability of a replacement investment adviser. MAG was unable to secure additional financing and on November 20, 1987, Applicant's Board of Trustees voted to suspend all further sales of its

shares. The Board reached an agreement with Colonial Management Associates, Inc. ("CMA") pursuant to which assets of SMA Fund would be transferred to Colonial United States Equity Index Trust ("CUSEIT") in exchange for shares of CUSEIT. No replacement investment adviser was found for the other portfolios. Applicant notified brokers and account executives who had sold shares in these portfolios of its decision to discontinue sales of its shares, who in turn notified existing securityholders.

SMA Plus Fund; BMA Fund

3. The SMA Plus Fund and the BMA Fund never commenced a public offering of their respective shares nor do they propose to make a public offering or engage in business of any kind. Neither of these portfolios has any shareholders, debts or liabilities as of the time of this filing.

OTC Fund; High Yield Fund

4. The OTC Fund and the High Yield Fund both commenced their public offering on May 15, 1987.

5. As of November 20, 1987, the OTC Fund had total assets of $172,955 and net asset value per share of $8.88. The OTC Fund had 37 unaffiliated shareholders who redeemed their shares between November 20, 1987 and March 4, 1988. Affiliated shareholders redeemed their shares thereafter with the final redemption occurring on March 15, 1988. All shares of the OTC Fund were redeemed at a higher net asset value due to an increase in the value of the fund's portfolio securities. As of December 31, 1987, there were 19,357 shares outstanding with a net asset value per share of $9.45. Brokerage fees or commissions paid in connection with the disposition of OTC Fund's portfolio securities totaled $337.

6. As of November 20, 1987, the High Yield Fund had total net assets of $19,854 and a net asset value per share of $10.05. The portfolio consisted only of cash and cash items, such as high quality short-term commercial paper or United States Treasury Bills. The High Yield Fund had only three (3) unaffiliated shareholders who redeemed their shares on January 28 and 29, 1988 at a net asset value of $10.01 per share as next determined for those dates. The only affiliated shareholder redeemed its shares on February 1, 1988 at a next determined net asset value of $10.01. No liquidation expenses were charged to the High Yield Fund (*See* ¶ 10 below). No brokerage fees or commissions were incurred in the sale of the fund's portfolio securities.

7. Applicant represents that the liquidation of the OTC Fund and the High Yield Fund through voluntary shareholder redemptions and the Board of Trustee's decision to discontinue sales of Applicant's shares was in conformity with Applicant's Amended and Restated Declaration of Trust dated July 10, 1986, and applicable Massachusetts laws governing business trusts.

SMA Fund Merger

8. On March 16, 1988, Applicant's Board of Trustees, including those Trustees who were not interested persons of Applicant, approved an Agreement and Plan of Reorganization (the "Plan") on behalf of the SMA Fund under which all SMA Fund Assets would be transferred to CUSEIT, an open-end, diversified investment company, after concluding that the merger of the SMA Fund into CUSEIT was in the best interest of SMA Fund securityholders. A majority of Applicant's securityholders, present in person or by proxy, approved the Plan and transfer of assets at a special meeting held April 22, 1988.

9. Pursuant to the Plan, SMA Fund transferred substantially all its assets to CUSEIT in exchange for shares of beneficial interest in CUSEIT following the close of business April 26, 1988. SMA Fund then distributed the shares received to its shareholders on a pro rata basis. Each shareholder received CUSEIT shares based on the relative net asset value per share of the SMA Fund immediately prior to the exchange. As of the date of the exchange, there were 727,482 SMA Fund shares outstanding with an aggregate net asset value of $13,429,516 and a per share net asset value of $18.45. The CUSEIT shares received have the same voting rights as SMA Fund shares. No brokerage fees were incurred in the transfer of portfolio securities to CUSEIT.

Applicant's Expenses and Legal Status

10. Expenses relating to the liquidation of Applicant and the merger of the SMA Fund and CUSEIT, including legal and accounting fees, printing costs, and administrative expenses, totalled $96,708. Merger-related expenses were allocated between MAG and CMA. Liquidation-related expenses were allocated to MAG. Of these expenses, $29,560 were paid by MAG.

11. Applicant has retained no assets. Applicant has no debts or other liabilities that remained outstanding. Applicant has not, within the last 18 months, transferred any of its assets to a separate trust the beneficiaries of which are securityholders of Applicant.

12. As of this filing, Applicant has no securityholders. Applicant is not a party to any litigation or administrative proceeding. Applicant is not now engaged nor does it propose to engage in any business activities other than those necessary for the winding up of its affairs. Applicant's status as a Massachusetts business trust has terminated.

13. Applicant represents that it is current on all filings under the Act, including all N-SAR filings for each semi-annual period for which such filing is required.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 88-28202 Filed 12-7-88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 35-24765]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

December 1, 1988.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by December 27, 1988 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

The Connecticut Light and Power Company (70–7376)

The Connecticut Light and Power Company ("CL&P"), 107 Selden Street, Berlin, Connecticut 06037, a wholly owned subsidiary of Northeast Utilities, a registered holding company, has filed a post-effective amendment to its application-declaration pursuant to sections 6(b), 9(a), 10 and 12(c) of the Act and Rules 42 and 50(a)(5) thereunder.

By order dated May 18, 1987 (HCAR No. 24393), the Commission approved CL&P's proposal to issue and sell up to 8 million shares of Class A Preferred Stock ($200 million aggregate par value) ("Class A Preferred") in one or more series through December 31, 1988, with either a fixed dividend rate or an adjustable dividend rate. On June 2, 1987, CL&P issued 2 million shares ($50 million aggregate par value) of the Class A Preferred. CL&P now proposes to issue and sell the shares remaining unsold on or before December 31, 1989 and also requests authority to have the option of issuing the Class A Preferred as an auction rated preferred stock ("Auction Rated Stock"), under an exception from the competitive bidding requirements of Rule 50.

The Auction Rated Stock would have dividends established for short, successive periods, normally 49 days, through a bidding process among holders and prospective purchasers. Maximum dividend rates will apply in certain circumstances and will be based on specified percentages that will be determined by WMECO in consultation with the underwriter (currently expected to be no higher than 115% to 250%) of certain defined composite commercial paper rate. CL&P will pay all the auction fees, including the Trust Company fees and expenses, and a depository fee. In all other respects, the transactions as previously approved herein will remain unchanged.

CL&P is seeking an exception to permit it to engage the services of an investment banking firm to offer the Auction Rated Stock through a negotiated public offering, because, in addition to other factors, the auction process itself is essentially a competitive bidding process. CL&P is also requesting preliminary authorization to begin negotiations prior to the issuance of an order so that a selection of a lead underwriter for the Auction Rated Stock can be made. CL&P has stated that this authority is needed because the uniqueness and complexity of an Auction Rated Stock transaction requires that it begin negotiations with the potential underwriter as soon as possible. It may do so.

Columbia Gas System, Inc. et al. (70–7437)

The Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Delaware 19807, a registered holding company, and certain of its subsidiaries, Columbia Gas of Ohio, Inc., Columbia Gas of Pennsylvania, Inc., Columbia Gas of Kentucky, Inc. ("Kentucky"), Columbia Gas of New York, Inc. ("New York"), Columbia Gas of Virginia, Inc. ("Virginia"), Columbia Gas of Maryland, Inc., and Lynchburg Gas Company ("Lynchburg"), all located at 200 Civic Center Drive in Columbus, Ohio 43215, and Columbia Gulf Transmission Company, 3805 W. Alabama Avenue, Houston, Texas 77057, Columbia Gas Development Corporation, 5847 San Felipe, Houston, Texas 77027, Columbia Gas Development of Canada Ltd., 639 5th Avenue, SW., Calgary, Alberta, Canada T2P OM9, and Commonwealth Gas Pipeline Corporation ("Pipeline"), Commonwealth Gas Services, Inc. ("Services"), Commonwealth Propane, Inc. ("Propane"), all located at 800 Moorefield Park Drive in Richmond, Virginia 23236, and Columbia Gas System Service Corporation ("Service Co."), Columbia LNG Corporation, Columbia Hydrocarbon Corporation, Columbia Alaskan Gas Transmission Corporation, Columbia Coal Gasification Corporation, The Inland Gas Company, Inc., Tristar Ventures Corporation, all located at 20 Montchanin Road in Wilmington, Delaware 19807, and Columbia Natural Resources, Inc., and Columbia Gas Transmission Corporation, both located at 1700 MacCorkle Avenue, SE, in Charleston, West Virginia 25314 ("Subsidiaries"), have filed a post-effective amendment to the application-declaration in this matter pursuant to sections 6(b), 9, 10, 12(b) and 12(f) of the Act and Rules 43, 45 and 50(a)(5) thereunder.

By orders in this proceeding dated December 23, 1987 (HCAR No. 24541), January 7, 1988 (HCAR No. 24577), February 4, 1988 (HCAR No. 24571), March 30, 1988 (HCAR No. 24610) and August 30, 1988 (HCAR No. 24706), the Commission approved Columbia's proposals to provide short and long-term financing to certain of the Subsidiaries for the purpose of partially funding their 1988–1989 construction programs and for other corporate purposes, by making short-term open account advances, and through the issuance of, by the Subsidiaries, and the purchase of, by Columbia, installment promissory notes ("Installment Notes") and shares of common stock ("Common").

The Subsidiaries now seek approval to increase the amount of short and long-term financing for the period ending December 31, 1989 as follows:

Company	Previously authorized	Additional required	Total
	($000)	($000)	($000)
Long-Term Debt:			
Kentucky	11,400	1,500	12,900
Virginia	7,200	1,500	8,700
New York	4,500	200	4,700
Pipeline	0	10,800	10,800
Services	8,500	500	9,000
Propane	1,800	800	2,600
Service Co	2,600	1,100	3,700
Common:			
Kentucky	0	3,500	3,500
Virginia	0	3,800	3,800
New York	2,850	700	3,550
Pipeline	0	1,700	1,700
Services	6,000	1,700	7,700
Propane	1,300	700	2,000
Service Co	0	1,000	1,000
Short-Term Debt:			
Commonwealth Pipeline	2,000	4,000	6,000
Service Co	6,000	2,000	8,000

The terms and conditions of the additional Installment Notes, short-term debt and the form of Common will be the same as previously approved by the Commission.

On October 3, 1988, Columbia redeemed all the outstanding shares of its Adjustable Rate Cumulative Preferred Stock Series D, which were used as the basis for setting the interest rate on certain variable rate notes ("Notes") issued by the Subsidiaries to Columbia, and last approved for that purpose on December 31, 1984 (HCAR No. 23560). As a result, there no longer will be a practical means of computing an appropriate rate for such Notes. Therefore, Columbia requests approval of an agreement with the Subsidiaries which issued the Notes to begin, effective December 1, 1988, calculating interest on the Notes at a rate equal to the effective cost to Columbia of borrowings under its $750 million credit Agreement, dates as of October 5, 1988 (HCAR No. 24690, August 5, 1988).

Louisiana Power & Light Company (70–7580)

Louisiana Power & Light Company ("Louisiana"), 142 Delaronde Street, New Orleans, Louisiana 70114, a subsidiary of Middle South Utilities, Inc. ("MSU"), a registered holding company, has filed an application pursuant to sections 9(a) and 10 of the Act.

Pursuant to authority granted in prior Commission orders, Louisiana is currently leasing a portion of the nuclear fuel, including facilities incident to its

use ("Nuclear Fuel"), required for use at its Waterford 3 nuclear generating unit ("Waterford 3") from Bayou Fuel Company ("Bayou") (HCAR Nos. 20564, 22553, and 24444, May 31, 1987, June 28, 1982, and August 21, 1987, respectively). In order to restructure its leasing arrangements, Louisiana now proposes to enter into a Lease Agreement ("Lease") for the Nuclear Fuel with River Fuel Trust #2 ("Trust"). The Trust will be formed under the laws of the State of New York pursuant to a Trust Agreement between a commercial bank as trustor ("Trustor"), Bankers Trust Company, not in its individual capacity, but solely as trustee ("Trustee") and Louisiana, as beneficiary. The Trust will be specifically created for this restructuring by the Trustor.

It is proposed that the Trust will acquire the Nuclear Fuel owned by Bayou along with certain Nuclear Fuel owned by Louisiana. Promptly after such acquisition, Louisiana will terminate its lease agreement with Bayou, and Bayou will terminate its related credit agreements.

Under the terms of the Lease, the Trust will make payments to suppliers, processors and manufacturers necessary to provide Nuclear Fuel for Waterford 3, or Louisiana will make such payments and will be reimbursed by the Trust. The maximum obligation of the Trust to make payments for Nuclear Fuel initially will be $122 million at any one time outstanding, although the Trust may make such payments of up to $125 million.

Under the Lease, Louisiana, which may use System Energy Resources, Inc., a subsidiary of MSU, as its agent in this connection, will be responsible for operating, maintaining, repairing, replacing, and insuring the Nuclear Fuel and for paying all taxes and costs arising out of the ownership, possession or use thereof. The term of the Lease will be through January 31, 1994, which may be extended for one year by Louisiana giving notice prior to January 1, 1992, and each succeeding January 1 up to 2037, of its desire to so extend the term, and by the Trust's consenting to each such extension by Janaury 31, of the year in which such notice is given. In any event the Lease will terminate no later than January 31, 2039. Authorization is requested for additional extentions of the Lease through January 31, 2039 without seeking further Commission authorization prior to entering such extensions.

Payments under the Lease will be payable quarterly and will include (A) a Quarterly Lease Charge, as defined in the Lease, which will include allocated operational and financing costs of the Trust, and (B) a Burn-Up Charge, as defined, equal to the cost of the Nuclear Fuel consumed while the Nuclear Fuel is in the reactor and producing heat. When the Nuclear Fuel is not in the reactor and producing heat, Louisiana may elect to capitalize Quarterly Lease Charges or daily portions thereof so long as the commitment outstanding under the related Credit Agreement between the Trust and a commercial bank exceeds the sum of (i) the Stipulated Loss Value, as defined in the Lease, of the Nuclear Fuel, (ii) the amount of such charges and (iii) $3 million. Louisiana may consequently, subject to the foregoing limitation, defer rental payments until those times during commercial operation when the Nuclear Fuel is in the reactor and producing heat in the production of electric energy.

Massachusetts Electric Company, et al. (70–7582)

New England Electric System ("NEES"), a registered holding company, and Massachusetts Electric Company ("Mass Electric"), its wholly owned subsidiary, both located at 25 Research Drive, Westborough, Massachusetts 01582, have filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rules 43 and 45 thereunder.

NEES proposes, from time to time through December 31, 1990, to make one or more capital contributions to Mass Electric, not to exceed an aggregate of $30 million. The proposed capital contributions, along with the proposed issues of first mortgage bonds (which are the subject of a separate filing with the Commission, S.E.C. File No.70–7409), will permit Mass Electric to raise external funds while maintaining a proper balance of debt and equity.

Mass Electric will apply the funds received from the capital contributions toward the cost of, or the reimbursement of the treasury for, or the payment of short-term borrowings incurred for capitalizable additions and improvements to plant and property.

AEP Generating Company, et al. (70–7584)

AEP Generating Company ("AEP Generating"), and its parent, American Electric Power Company, Inc. ("AEP"), a registered holding company, both located at 1 Riverside Plaza, Columbus, Ohio 43215, have filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rule 43, 45 and 50(a)(5) thereunder.

AEP Generating proposes, from time to time through December 31, 1992, (i) to issue and reissue short-term notes ("Notes") pursuant to the Revolving Credit Agreement, as amended by Amendment No. 4 ("Agreement"), in an aggregate principal amount (including Notes heretofore issued) not to exceed $450 million at any time outstanding, and (ii) to issue Notes pursuant to certain term-loan agreements, ("Term Agreements") in an aggregate principal amount not to exceed $600 million, provided that the aggregate principal amount of Notes issued and outstanding under both the Agreement and the Term Agreements shall not exceed $650 million. This authorization is in addition to the authorization to incur short-term indebtedness recently requested in File No. 70–7550.

Under the Agreement, Notes may be issued in an aggregate amount of up to $450 million outstanding at any one time, bearing interest until maturity, at the prime rate of ½ of 1% above the London Interbank Offered Rate ("LIBOR"), at AEP Generating's option. Prime rate borrowings mature on the expiration date of the Agreement, and LIBOR rate borrowings mature in 1, 2, 3 or 6 months. Prime rate borrowings are prepayable. AEP Generating will pay a commitment fee of ⅜ of 1% per annum on the average daily unused amount of the commitment.

The Notes issued under the Term Agreement would bear interest at a fixed, fluctuating or some combination of fixed and fluctuating-rates, and will be outstanding at any one time in an aggregate principal amount of up to $600 million. They will have a term of not less than 9 months nor more than ten years. The actual rate of interest for each Note will be determined by negotiation at the time of issuance, but will not exceed 250 basis points above the yield at the time of issuance of U.S. Treasury obligations that mature on or about the date of maturity for fixed-rate Notes, or 200 basis points above the prime rate for fluctuating-rate Notes. AEP Generating may be required to pay a placement fee to third parties, not to exceed 0.5% of the amount borrowed.

AEP Generating and AEP also propose to execute, issue, deliver, and perform a new Capital Funds Agreement to replace the existing agreement between them. The new Capital Funds Agreement would require AEP to supply or cause to be supplied to AEP Generating amounts of capital (a) sufficient to satisfy certain capitalization ratios required by regulatory authorities, and (b) required by AEP Generating to complete construction of Rockport Generating Station Unit 2 ("Rockport") and to operate both units of Rockport, and (c) to perform its obligations under all loan,

VOL 53 ISS 236 DE 8 1988 UMI

credit, security, reimbursement, and indemnity agreements, and leases and related documents to which AEP Generating is presently, or at any time may become a party, and all preferred stock held by persons other than AEP. AEP and AEP Generating, are requesting authorization to make any capital contributions required by the New Capital Funds Agreement, and to take such other actions required in order to perform its obligations under such agreement.

Any proceeds realized from the sale of Notes will be used to pay at maturity and to refund long-term debt, to repay unsecured short-term indebtedness, to reimburse AEP Generating's treasury for construction expenditures, to redeem pollution control bonds, and for other corporate purposes.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 88-28204 Filed 12-7-88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 35-24767]

Filing Under the Public Utility Holding Company Act of 1935 ("Act")

December 1, 1988.

Notice is hereby given that the following filing has been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the declaration for a complete statement of the proposed transactions summarized below. The declaration and any amendment thereto are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the declaration should submit their views in writing by December 27, 1988 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant declarant at the address specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the declaration, as filed or as amended, may be permitted to become effective.

National Fuel Gas Company, et al. (70-7581)

Notice of Proposal to Issue and Sell Common Stock; Order Authorizing Proxy Solicitation

National Fuel Gas Company ("National"), 30 Rockefeller Plaza, New York, 10112, a registered holding company, has filed a declaration pursuant to sections 6(a), 7 and 12(e) of the Act and Rules 50(a)(5), 62 and 65 thereunder.

National proposes to amend its two stock option plans ("Plans"), as last authorized by the Commission on January 16, 1985 (HCAR No. 23575). Several of these amendments are subject to stockholder approval. National proposes to increase the number of shares of its common stock available for option or award under the Plans in the aggregate from 1,100,000 to 1,600,000 shares, and to extend the terms of both plans to December 7, 1998. The Plans have sold or awarded 685,464 shares of common stock under its existing authority so that with the addition of 500,000 shares herein the number of shares of National's common stock available under the Plans over the next 10 years will be 914,536 shares.

National has filed proxy solicitation material, and requests that the effectiveness of its declaration with respect to the solicitation of proxies for voting by its stockholders on the proposal to amend the Plans be accelerated as provided in Rule 62. National proposes to mail the notice of meeting, proxy statement and proxy to its stockholders on or about January 3, 1989, with a specified meeting date of February 16, 1989.

It appearing to the Commission that National's declaration regarding the proposed solicitation of proxies should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered that the declaration regarding the proposed solicitation of proxies be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8025-01-M

[Declaration of Disaster Loan Area #2322]

Arkansas; Declaration of Disaster Loan Area

As a result of the President's major disaster declaration on November 23, 1988, I find that Hot Spring, Johnson, Lonoke, Pulaski, and Van Buren Counties, in the State of Arkansas, constitute a disaster loan area due to tornadoes and severe storms beginning on November 15, 1988. Eligible persons, firms, and organizations may file applications for physical damage until the close of business on January 23, 1989, and for economic injury until the close of business on August 23, 1989, at the address listed below: Disaster Area 3 Office, Small Business Administration, 2306 Oak Lane, Suite 110, Grand Prairie, Texas 75051; or other locally announced locations. In addition, applications for economic injury from small businesses located in the contiguous counties of Arkansas, Clark, Cleburne, Conway, Dallas, Faulkner, Franklin, Garland, Grant, Jefferson, Logan, Madison, Montgomery, Newton, Perry, Pope, Prairie, Saline, Searcy, Stone, and White, in the State of Arkansas, may be filed until the specified date at this location.

The interest rates are:

	Percent
Homeowners With Credit Available Elsewhere	8.000
Homeowners Without Credit Available Elsewhere	4.000
Businesses With Credit Available Elsewhere	8.000
Businesses and Non-Profit Organizations Without Credit Available Elsewhere	4.000
Businesses and Non-Profit Organizations (EIDL) Without Credit Available Elsewhere	4.000
Others (Including Non-Profit Organizations) With Credit Available Elsewhere	9.125

The number assigned to this disaster is 232212 for physical damage and for economic injury the number is 667200.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

Date: November 28, 1988.

Bernard Kulik,

Deputy Associate Administrator for Disaster Assistance.

[Application No. 02/02-0524]

First Wall Street SBIC, L.P.; Filing of an Application for a License To Operate as a Small Business Investment Company

Notice is hereby given fo the filing of an application with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.103 (1988)) by First Wall Street SBIC, L. P. 44 Wall Street, New York, New York 1005, for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958, as amended, (15 U.S.C. *et seq.*), and the Rules and Regulations promulgated thereunder.

The formation and licensing of a limited partnership SBIC is subject to the provisions of § 107.4 of the Regulations.

The initial investors and their percent of ownership of the Applicant are as follows:

	Percentage of ownership
General Partner	
First Wall Street Management Co., Inc., 44 Wall Street, New York, NY 10005	8.3
Limited Partners	
J. Morton Davis, D.H. Blair & Co., Inc., 44 Wall Street, New York, NY 10005	50.0
Benjamin Co. 70 South Orange Avenue, Suite 111, Livingston, NJ 07039	16.7
15 Other limited partners none of whom own more than 5 percent	25.0
Investment Advisor	
D.H. Blair Advisors, Inc., 44 Wall Street, New York, NY 10005	

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including profitability and financial soundness in accordance with the Act and Regulations.

Notice is hereby given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator of Investment, Small Business Administration, 1441 "L" Street, NW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in New York, New York

[License No. 02/02-0521]

F/N Capital Limited Partnership; Issuance of a Small Business Investment Company License

On October 13, 1988, a notice was published in the **Federal Register** (53FR40161) stating that an application has been filed by F/N Capital Limited Partnership, with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1988)) for a license as a small business investment company.

Interested parties were given until close of business November 12, 1988, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 02/20–0521 on November 29, 1988, to F/N Capital Limited Partnership to operate as a small business investment company.

DEPARTMENT OF STATE

[Public Notice 1087]

Extension of the Restrictions on the Use of the United States Passport for Travel To, In, or Through Libya

On December 11, 1981, pursuant to the authority of Executive Order 11295 (31 FR 10603), and in accordance with 22 CFR 51.72(a)(3), the use of the United States Passport for travel to, in, or through Libya was restricted. These restrictions have subsequently been extended on November 29, 1982 (47 FR 54888), November 29, 1983 (48 FR 55529), November 29, 1984 (49 FR 47585), November 25, 1985 (50 FR 49809), December 9, 1986 (51 FR 44855), and December 10, 1987 (52 FR 46876). These actions were required by the unsettled relations between the United States and the Government of Libya and the threats of hostile acts against Americans in Libya.

The Government of Libya still maintains a decidedly anti-American stance and continues to emphasize its willingness to direct hostile acts against the United States and its nationals. The American Embassy in Tripoli remains closed, thus preventing the United States from providing routine diplomatic protection or consular assistance to Americans who may travel to Libya.

In light of these events and circumstances, I have determined that Libya continues to be an area "* * * where there is imminent danger to the public health or physical safety of United States travelers."

Accordingly, United States passports shall remain invalid for use in travel to, in, or through Libya unless specifically validated for such travel under the authority of the Secretary of State.

The Public Notice shall be effective upon publication in the **Federal Register** and shall expire at the end of one year unless sooner extended or revoked by Public Notice.

Date: December 1, 1988.

George P. Shultz,

Secretary of State.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: December 2, 1988.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

Alcohol, Tobacco and Firearms

OMB Number: 1512-0019
Form Number: ATF Form 6A (5330.3c)
Type of Review: Extension
Title: Release and Receipt of Imported Firearms, Ammunition and Implements of War

Description: This information collected is needed to verify importation of firearms, ammunition and implements of war. ATF Form 6A is completed by Federal firearms licensees, active duty military members, nonresident US citizens returning to the US, and aliens immigrating to the US.

Respondents: Individuals or households, Businesses or other for-profit, Small businesses or organizations
Estimated Number of Respondents: 20,000
Estimated Burden Hours Per Response: 24 minutes
Frequency of Response: On occasion
Estimated Total Reporting Burden: 8,000 hours
OMB Number: 1512-0199
Form Number: ATF F 5110.30
Type of Review: Extension
Title: Drawback on Distilled Spirits Exported

Description: ATF F 5110.30 is used by persons who export distilled spirits, wine and wish to claim a drawback or refund on taxes already paid in the U.S. The form describes the claimant, spirits or wine for tax purposes, amount of tax to be refunded, and a certification by the U.S. Government agent attesting to exportation.

Respondents: Businesses and other for-profit, Small businesses or organizations
Estimated Number of Respondents: 100
Estimated Burden Hours Per Response: 2 hours
Frequency of Response: On occasion
Estimated Total Reporting Burden: 10,000 hours
Clearance Officer: Robert Masarsky, (202) 566-7077, Bureau of Alcohol, Tobacco and Firearms, Room 7011, 1200 Pennsylvania Avenue, NW., Washington, DC 20226

Sunshine Act Meetings

Federal Register
Vol. 53, No. 236
Thursday, December 8, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL COMMUNICATIONS COMMISSION

FCC To Hold Open Commission Meeting, Monday, December 12, 1988
December 5, 1988.

The Federal Communications Commission will hold an *Open Meeting* on the subjects listed below on Monday, December 12, 1988, which is scheduled to commence at 2:00 p.m., in Room 856, at 1919 M Street NW., Washington, DC.

Agenda, Item No., and Subject

General—1—*Title:* Amendment of Parts 2 and 90 of the Commission's rules to provide for stolen vehicle recovery systems. *Summary:* The Commission will consider whether to initiate a rulemaking proposing to allocate frequencies and promulgate service rules for stolen vehicle recovery systems.

Private Radio—1—*Title:* In the matter of amendment of Part 90 of the Commission's rules to implement conditional authorization procedure for proposed private land mobile radio service stations. *Summary:* The Commission will consider proposals by the Special Industrial Radio Service Association, Inc. (SIRSA) and the National Association of Business and Educational Radio, Inc. (NABER) for implementation of a conditional authorization procedure for applicants filing properly coordinated license applications that involve no special or non-routine issues.

Private Radio—2—*Title:* In the matter of trunking in the private land mobile radio services for more effective and efficient use of the spectrum. *Summary:* The Commission will consider whether to adopt a notice of proposed rule making concerning the possible expansion of trunking and intercategory sharing on private land mobile frequency above 800 MHz.

Common Carrier—1—*Title:* In the matter of regulatory policies and international telecommunications, CC Docket No. 86–494. *Summary:* The Commission will consider petitions for reconsideration of the reporting requirements established in the report and order in this proceeding.

Mass Media—1—*Title:* In the matter of amendment of Part 73 of the Commission's rules to permit short-spaced FM station assignment by using directional antennas. *Summary:* The Commission will consider further action for MM Docket No. 87–121 concerning short-space transmitter sites of commerical antenna systems for that purpose.

Mass Media—2—*Title:* Resolution of interference between UHF Channels 14 and 69 and adjacent-channel land mobile operations. *Summary:* The Commission will consider whether to adopt rules designed to prevent cross-service interference problems between TV broadcast stations on Channels 14 and 69 and land mobile stations operating in adjacent spectrum.

Mass Media—3—*Title:* In the matter of amendment of § 73.3555 of the Commission's rules, the broadcast multiple ownership rules. *Summary:* The Commission will consider further action in MM Docket No. 87–7 relating to the radio-TV cross-ownership provisions of the Commission's broadcast mutliple ownership rules.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Audrey Sprivack, Office of Public Affairs, telephone number (202) 632–5050.

Issued: December 5, 1988.

6. On page 48404, in the first column, in the fourth complete paragraph, in the ninth line, "fees" should read "Fees".

7. On the same page, in the third column, in the last complete paragraph, in the fourth line, after "above" insert "was".

8. On page 48405, in the first column, in the sixth line, after "during the " insert "fee".

§ 1.16 [Corrected]

9. On page 48409, in the fifth line, in § 1.16(a), after "which is" insert "in".

§ 1.21 [Corrected]

10. On page 48412, in the seventh line, in § 1.21, "[(1)" should read "(1)]". Also, in the ninth line, "](2)" should read "[(2)".

§ 1.53 [Corrected]

11. On the same page, in the 2nd column, in the 5th line, in § 1.53(c), "to" should read "of"; in the 9th line, "submitted;" should read "submitted,"; in the 10th line, reverse the direction of the last arrow.

§ 1.60 [Corrected]

12. On page 48413, in the 1st column, in the 11th line, in § 1.60(b), "of" should read "or".

§ 1.445 [Corrected]

13. On page 48414, in § 1.445, in the second column of figures, in the first line, "380.00" should read "550.00".

Office of the Secretary

1989 Cost-of-Living Increase and Other Determinations

Correction

In notice document 88-25169 beginning on page 43932 in the issue of Monday, October 31, 1988, make the following corrections:

1. On page 43932, in the second column, in the last line, "$18,426.51" should read "$18,426.51".

2. On the same page, in the third column, in entry (7), in the first line, "the" should read "The".

3. On the same page, in the same column, under **SUPPLEMENTARY INFORMATION**, in the 12th line, insert a closing parenthesis after "(iii)". Also, in the 20th line, "requirement" should read "retirement".

4. On page 43933, in the third column, under **Average of the Total Wages for 1987**, in the third line, "$17,321.82" should read "$17,321.82".

5. On page 43934, in the first column, under *Average Wages*, in the third line, "$17,321.82" should read "$17,321.82".

6. On the same page, in the second column, in the last paragraph, in the third line, "$9,226,48" should read "$9,226.48".

7. In the third column, the second italic heading should read "*(b) Beneficiaries Aged 65 Through 69*".

8. On page 43935, in the first column, under "Average Wages", in the second line, "was" should read "way as".

9. On the same page, in the same column, under "Exempt Amount for Beneficiaries Under Age 65", in the 11th line, "in" should read "is".

10. On page 43936, in the first column, under *General*, in the eighth line, "contributions" should read "contribution".

11. On the same page, in the second column, in the fourth line, "benefit" should read "benefits". Also in the same column, under *General*, in the seventh line, "assets" was misspelled.

12. On the same page, in the third column, in the third line, "increase" was misspelled.

13. On the same page, in the table at the bottom of the page, in the heading of the second column, in the second line, "earnings" was misspelled. Make the same correction in the table at the top of page 43937.

7 CFR Part 3400

Special Research Grants Program; Administrative Provisions

AGENCY: Cooperative State Research Service, USDA.

ACTION: Final rule; amendment.

SUMMARY: This final rule amends the Cooperative State Research Service (CSRS) regulations relating to the administration of the Special Research Grants Program conducted under the authority of section 2(c)(1) of the Act of August 4, 1965, as amended (7 U.S.C. 450i(c)(1)). The issuance of the Special Research Grants Program regulations, published in the **Federal Register** (50 FR 5498–5504, dated February 8, 1985), established the procedures to be followed annually in the solicitation of special research grant proposals, the evaluation of such proposals, and the award of special research grants. This rule will amend those regulations to facilitate the evaluation of applications and the award of project grants by modifying the weight factors associated with the selection criteria and by making a few additional changes.

EFFECTIVE DATE: December 8, 1988.

FOR FURTHER INFORMATION CONTACT: Terry J. Pacovsky, Chief, Grants Administrative Management Office, Office of Grants and Program Systems, Cooperative State Research Service, U.S. Department of Agriculture, Washington, DC 20250–2200. (Telephone: (202) 475–5024).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the collection of information requirements contained in this rule have been approved under OMB Document No. 0524–0022.

Classification

This rule has been reviewed under Executive Order 12291 and it has been determined that it is not a major rule because it does not involve a substantial or major impact on the Nation's economy or on large numbers of individuals or businesses. There will be no major increase in cost or prices for consumers, individual industries, Federal, State, or local governmental agencies, or on geographical regions. It will not have a significant economic impact on competitive employment, investment, productivity, innovation, or on the ability of U.S. enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, it will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. No. 96–534 (5 U.S.C. 601).

Regulatory Analysis

Not required for this rulemaking.

Environmental Impact Statement

This regulation does not significantly affect the environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969, as amended.

Catalog of Federal Domestic Assistance

The Special Research Grants Program is listed in the Catalog of Federal Domestic Assistance under No. 10.200. For reasons set forth in the Final Rule-related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Background and Purpose

Under the authority of section 2(c)(1) of the Act of August 4, 1965, as amended, the Secretary of Agriculture is authorized to make grants to carry out research to facilitate or expand promising breakthroughs in areas of the food and agricultural sciences of importance to the Nation to land-grant colleges and universities, research foundations established by land-grant colleges and universities, State agricultural experiment stations, and to all colleges and universities having a demonstrable capacity in food and agricultural research. In the past, a Notice was published in the **Federal Register** annually announcing the availability of funds for special research grants and soliciting proposals. In addition, the Notice set forth the procedures and criteria for the evaluation of the proposals and procedures and conditions relating to the award and administration of these grants. On February 8, 1985, the Department published a Final Rule in the **Federal Register** (50 FR 5498–5504), which established and codified such procedures, criteria, and conditions to be employed annually. It standardized the rules applicable to the administration of the Special Research Grants Program and eliminated the need to republish them annually. On August 11, 1988, the Department published a Notice in the **Federal Register** (53 FR 30414–30416) proposing the amendment of this Rule and inviting comments from interested individuals and organizations. Written comments on that proposal were requested by September 12, 1988.

During the comment period, the Department received one response. A copy of this response may be examined in the Department's Office of Grants and Program Systems, Cooperative State Research Service, Suite 322, Aerospace Building, 901 D Street SW., Washington, DC 20250–2200.

Discussion of Comments

The respondent expressed concern that the proposed provision concerning laboratory animal care has the potential to impact substantially the cost and ability of Land-Grant universities to perform research and teaching activities involving agricultural animals in that it does not define the term "laboratory animal." The respondent noted that the absence of this definition becomes significant when related to § 3400.4(c)(13)(iii), *Laboratory Animal Care*, which has the potential to impose significant new requirements on the use of agricultural species for CSRS research activities. The respondent further explained that the new regulations should differentiate carefully between the requirements for the various species of laboratory (vertebrate) animals, as well as, between the purposes of the research and teaching activities. The respondent proposed that the new *Guide for the Care and Use of Agricultural Animals in Agricultural Research and Teaching* be applied to certain animal care and use options and, where appropriate, used as a standard in the regulations pertaining to the Special Research Grants Program.

We agree with the commenter that the term "laboratory animal" should be defined. The definition of *laboratory animal* as used in this rule is the same as the definition of "animal" in section 2(g) of the Animal Welfare Act of 1966, as amended, (7 U.S.C. 2132(g)). Accordingly, CSRS has made appropriate changes in § 3400.4(c)(13)(iii) of this rule to clarify the definition of *laboratory animal*, and it has revised the wording to provide that in the case of a laboratory animal used or intended for use in CSRS-administered research, grant recipients must adhere to the applicable requirements of the Animal Welfare Act and the regulations issued thereunder. In addition, CSRS has determined that the proposed provision, which would have required special grant recipients to adhere to the higher standard found in

either the *Guide for the Care and Use of Laboratory Animals*, NIH Publication No. 86–23 (Revised 1985) or the USDA regulations issued under the Animal Welfare Act, 9 CFR Parts 1, 2, 3, and 4, is potentially confusing since it may not be apparent when one standard would in fact prevail over another. Therefore, the reference to the NIH *Guide for the Care and Use of Laboratory Animals* has been eliminated.

In addition, CSRS has revised the proposed language of § 3400.4(c)(9) of this rule, concerning collaborative arrangements, to clarify that only an eligible recipient under the provisions of the Special Research Grants Program legislation (7 U.S.C. 450i(c)(1)) may be the recipient of a proposed grant.

List of Subjects in 7 CFR Part 3400

Grant programs—agriculture, Grants administration.

For the reasons set out in the preamble, Title 7, Chapter XXXIV, Part 3400 of the Code of Federal Regulations is amended as follows:

PART 3400—[AMENDED]

1. The authority citation for Part 3400 continues to read as follows:

Authority: Section 2(h) of the Act of August 4, 1965, as amended (7 U.S.C. 450i(h)).

§ 3400.2 [Amended]

2. In § 3400.2(j), the word "advise" is revised to read "advice".

3. Section 3400.4 is amended by redesignating paragraphs (c)(9) through (c)(15) as paragraphs (c)(10) through (c)(16), by adding new paragraphs (c)(9) and (c)(13)(iii), and by revising paragraphs (a)(2), (b), the heading of (c)(1), (c)(2), the first sentence of (c)(11)(ii), the third through last sentences of (c)(12), paragraph (c)(13)(i), the last sentence of (c)(13)(ii), the third sentence of (c)(15), and (c)(16) to read as follows:

§ 3400.4 How to apply for a grant.

(a) * * *

(2) Deadline dates for having proposal packages postmarked;

* * * * *

(b) *Grant Application Kit.* A Grant Application Kit will be made available to any potential grant applicant who requests a copy. This kit contains required forms, certifications, and instructions applicable to the submission of grant proposals.

(c) *Format for research grant proposals.*

(1) *Grant Application.* * * *

(2) *Title of Project.* The title of the project must be brief (80–character maximum), yet represent the major thrust of the research. This title will be used to provide information to the Congress and other interested parties who may be unfamiliar with scientific terms; therefore, highly technical words or phraseology should be avoided where possible. In addition, phrases such as "investigation of" or "research on" should not be used.

* * * * *

(9) *Collaborative arrangements.* If the proposed project requires collaboration with other research scientists, corporations, organizations, agencies, or entities, such collaboration must be fully explained and justified. Evidence should be provided to assure peer reviewers that the collaborators involved agree with the arrangements. It should be specifically indicated whether or not such collaborative arrangements have the potential for any conflict(s) of interest. Proposals which indicate collaborative involvement must state which proposer is to receive any resulting grant award, since only one eligible institution, as provided in § 3400.3 of this part, may be the recipient of a research project grant under one proposal.

* * * * *

(11) *Personnel support.* * * *

* * * * *

(ii) Vitae of the principal investigator(s), senior associate(s), and other professional personnel to assist reviewers in evaluating the competence and experience of the project staff.

* * *

* * * * *

(12) *Budget.* * * * A copy of the form which must be used for this purpose, along with instructions for completion, is included in the Grant Application Kit identified under § 3400.4(b) of this part and may be reproduced as needed by proposers. Funds may be requested under any of the categories listed, provided that the item or service for which support is requested is allowable under applicable Federal cost principles and can be identified as necessary for successful conduct of the proposed research project. *No funds will be awarded for the renovation or refurbishment of research spaces; purchases or installation of fixed equipment in such spaces; or for the planning, repair, rehabilitation, acquisition, or construction of a building or facility.* All research project grants awarded under this part shall be issued without regard to matching funds or cost sharing.

(13) *Research involving special considerations.* * * *

(i) *Recombinant DNA molecules.* All key personnel identified in a proposal and all endorsing officials of a proposed performing organization are required to comply with the guidelines established by the National Institutes of Health entitled, "Guidelines for Research Involving Recombinant DNA Molecules," as revised. The Grant Application Kit, identified above in § 3400.4(b), contains forms which are suitable for such certification of compliance.

(ii) *Human subjects at risk.* * * * The Grant Application Kit, identified above in § 3400.4(b), contains forms which are suitable for such certification.

(iii) *Laboratory animal care.* The responsibility for the humane care and treatment of any *laboratory animal*, which has the same meaning as "animal" in section 2(g) of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2132(g)), used in any research project supported with Special Research Grants Program funds rests with the performing organization. In this regard, all key personnel identified in a proposal and all endorsing officials of the proposed performing organization are required to comply with applicable provisions of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 *et seq.*) and the regulations promulgated thereunder by the Secretary of Agriculture in 9 CFR Parts 1, 2, 3, and 4. In the event that a project involving the use of a laboratory animal is recommended for award, the proposer will be required to submit a statement certifying such compliance.

* * * * *

(15) *Additions to project description.* * * * Each set of such materials must be identified with the title of the research project as it appears in the Grant Application and the name(s) of the principal investigator(s). * * *

(16) *Organizational management information.* Specific management information relating to a proposing individual or organization shall be submitted on a *one-time basis prior to the award of a research project grant* identified under this part if such information has not been provided previously under this or another program for which the sponsoring agency is responsible. Copies of forms recommended for use in fulfilling the requirements contained in this section are available upon request from the agency specified in this part.

4. Section 3400.7 is amended by revising paragraph (d)(3) to read as follows:

§ 3400.7 Use of funds; changes.

* * * * *

(d) *Changes in approved budget.* * * *

* * * * *

(3) Involve transfers of amounts previously budgeted for training costs directly related to the research project;

* * * * *

5. Section 3400.8 is amended by revising the last item to read as follows:

§ 3400.8 Other Federal statutes and regulations that apply.

* * * * *

35 U.S.C. 200 *et seq.*—Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs (implementing regulations are contained in 37 CFR Part 401).

6. Section 3400.10 is revised as follows:

§ 3400.10 Establishment and operation of peer review groups.

Subject to § 3400.5, the Secretary will adopt procedures for the conduct of peer reviews and the formulation of recommendations under § 3400.14.

7. Section 3400.15 is amended by revising the selection criteria appearing in the peer panel scoring form under paragraph (a) and constructing a revised form as follows:

§ 3400.15 Review criteria.

(a) * * *

Peer Panel Scoring Form

Part III

Department of Education

Cooperative Demonstration Program (Dropout Prevention); Notices

VOL 53 ISS 236 DE 8 1988 UMI

DEPARTMENT OF EDUCATION

Vocational Education Cooperative Demonstration Program (Dropout Prevention)

AGENCY: Department of Education.

ACTION: Notice of final priority and selection criteria for Fiscal Years 1988 and 1989.

SUMMARY: The Secretary establishes an absolute priority for the grant awards from fiscal years 1988 and 1989 appropriations under the Vocational Education Cooperative Demonstration Program (Dropout Prevention). Under the priority, funds are reserved for exemplary dropout prevention and reentry projects in vocational education that will be coordinated with an in-depth Federal evaluation of this program. The Secretary also uses new selection criteria in evaluating applications submitted for this competition.

EFFECTIVE DATE: This notice takes effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of this notice, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Kate Holmberg, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue, SW., (Mary E. Switzer Building, Room 4512) Washington, DC 20202–7242. Telephone: (202) 732–2363.

SUPPLEMENTARY INFORMATION:

Program Information

Although some statistics indicate that the overall dropout rate in this country may have leveled off or even decreased slightly in recent years, the dropout rate for some disadvantaged groups remains intolerably high. In addition, there are fewer career opportunities for those who drop out, as often they do not possess even the most basic skills required for most jobs.

The problem of high school dropouts is highlighted in the Senate Report No. 100–189 for Pub. L. 100–202 (Continuing Appropriations for Fiscal Year 1988). In this report, the Congress directed the Department of Education to make available $4,787,000 to support exemplary dropout prevention and reentry programs within vocational education. In addition, the Department is to evaluate the effectiveness of these programs. It is clear that Congress recognizes the serious, negative effects that the dropout problem has on our society and intends that funds be used to ameliorate this problem through the use of vocational education.

Many education program administrators believe that participation in vocational education programs can in itself help to lower dropout rates. Moreover, certain components of vocational training such as job readiness training, work experience, and individualized instruction have been found to be very effective in working with potential or actual dropouts. This program will be able to test these theories in order to demonstrate vocational education's role in dropout prevention.

The Secretary, therefore, will award grants under the Vocational Education Cooperative Demonstration Program (Dropout Prevention) for model exemplary projects that have proven to be effective in dealing with the problems of potential or actual dropouts. Applicants must be able to provide evidence of program success based on past performance.

In order to assess the effectiveness of the projects funded and to identify which of the exemplary projects have models most suitable for replication, the Department of Education will conduct an independent evaluation under this program.

On July 26, 1988, the Secretary published a notice of proposed priority and selection criteria for the Cooperative Demonstration Program (Dropout Prevention) in the **Federal Register** (53 FR 28170).

There are minor clarifying changes but no major differences between the notice of proposed priority and selection criteria and this final notice.

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priority and selection criteria, thirteen parties submitted comments on the proposed notice. An analysis of the comments follows:

Additional Items Should Be Included in the Selection Criteria

Comments: The Secretary received several suggestions to amend the selection criteria. One commenter said that parental involvement is an important part of any dropout program and should be included under criterion (c) *Program Factors.* Another commenter added that tutoring, mentoring, child care, and transportation from school to work are also positive factors in a successful dropout program. A third commenter wanted to see more points allotted to the criteria for (a) *Need* and (d) *Quality of Key Personnel.*

Discussion: The Secretary agrees that the items suggested for improving (c) *Program Factors* are beneficial and should be included. The Secretary also agrees that both (a) *Need* and (d) *Quality of Key Personnel* are important however, each is assigned 15 points, which should help to ensure that only projects that have a well-established need and quality personnel will be funded.

Changes: The selection criterion (c) *Program Factors* has been revised to reflect the above concerns including parental involvement which is an important priority in achieving student retention.

Clarity is Needed Regarding Certain Requirements for Award

Comments: The Secretary received several comments asking if the proposed model projects can be adopted from other locations. The commenters were concerned that some schools do not have the staff or resources to have collected empirical data on their own dropout programs.

Discussion: The priority for this program requires "evidence of the success of the approach the project will demonstrate." This would allow applicants to adopt models from another site and propose them for use under this program.

Changes: The priority statement clarifies that applicants may adopt model projects.

The Age Group To Be Served Needs To Be Clarified

Comments: Some commenters asked what age group is eligible to be served under this program. In particular, commenters asked if projects could serve 12-year-olds or older individuals who may have literacy needs. Another commenter wondered if the Department intended to target the elderly in this program.

Discussion: Although the focal group here is clearly potential or actual high school dropouts, it would not be appropriate to set age limits for this program. Since the ages of students served by vocational education vary from State to State, applicants may propose to serve the age groups that are appropriate for vocational programs in their State or locale.

Although the elderly were listed in proposed criterion (b)(4)—the standard language prohibiting discrimination—the Secretary did not intend to give special preference to this group.

Changes: The language in the criterion (b) *Plan of Operation* has been reworded accordingly.

Additional Priorities Should Be Added

Comments: Several commenters recommended that special priorities be established for "high risk" groups such as disadvantaged youth, teen parents, the limited English-proficient, and the incarcerated.

Some commenters also requested that the Department require coordination between the applicant and all other agencies, services, programs, schools, etc., that are serving the potential or actual dropouts.

In addition, one commenter wanted special priority to be given to applications that are cooperatively developed. Another said innovative ideas should get preference.

Discussion: The Secretary recognizes that "high risk" groups are disproportionately represented among the ranks of those who have dropped out. Although these groups are not singled out for special priority, applicants responding to the first selection criterion (a) *Need* should include the dropout rates for their own communities. Applications will be rated on the case they make for the need of their students for a dropout program.

The Secretary agrees that coordination among agencies serving the same population is beneficial. Although specific agency coordination is not required, coordination is included under criterion (b) *Program Factors* as an indicator of a potentially successful program.

The Secretary does not agree that priority should be given to cooperative ventures, since such a priority could result in the exclusion of self-contained projects. Applicants are in a better position to decide the most advantageous way of applying.

As for encouraging innovative ideas, the emphasis in this competition is on proven models. This in no way excludes innovative ideas. However, these ideas must have been tested and must be substantiated by data.

Changes: The language in criterion (b) *Plan of Operation* has been reworded accordingly.

The Proposed Federal Evaluation is Too Restrictive

Comments: One commenter suggested that because of the difficulty a small school might have in implementing the random assignment of students, it could be excluded from this competition.

Another commenter expressed concern that the evaluation design (in particular, the random assignment of students) could have negative social consequences by limiting the access of the needy population to the dropout project. This commenter suggested that a design based on school records would be sufficient to determine if the project is worthwhile, and that, therefore, random assignment of student would not be necessary.

A third commenter said that the requirement for providing empirical data on proven programs should be dropped.

Discussion: It is the Department's intent to identify a variety of program models that can be used for dropout prevention in the future. Random assignment of potentially eligible participants is the most rigorous method of evaluating program effects by comparing the impact of a program on participants, versus the impact of other available services on individuals with similar characteristics.

It is not the intent of this program to exclude rural or small schools from competition. A project will need more potentially eligible participants than openings to qualify for random assignment, but if random assignment is not feasible, a matched pairs method can be used.

The use of random assignment of potentially eligible participants to the program or to a control group will not limit the access of the eligible population to the program. Only the method of selecting potentially eligible participants will be changed to random assignment rather than, for example, order of referral or application The same number of people will be able to participate.

Changes: None.

A Federal Definition of Dropouts Should Be Included

Comments: One commenter raised the issue of the lack of a common definition and method for presenting statistical information on dropouts. The commenter suggested that the priority notice include a definition of "dropout" and guidelines for determining dropout rates.

Discussion: At this time, the methods for calculating dropout rates vary widely from State to State. Although the Department agrees that a standardized method of calculating dropout rates would be beneficial, it could be overly burdensome to require applicants to revise their methodologies for this competition. Applicants are asked to include their definition of "dropout" and to describe the method by which dropout rate calculations were made.

Changes: None.

What Additional Work Will Be Required of the Grantees in This Demonstration Program?

Comments: One commenter was concerned about the amount of extra work the grantees might have to undertake because of the requirement for comparison groups. This commenter agreed that collection of data was essential but was wary of unnecessary, burdensome work.

A second commenter wanted to know what materials, if any, the grantees will be responsible for developing under this program.

Discussion: An independent evaluator under contract with the U.S. Department of Education will be working with each project to ensure that comparable data are kept on program participants and comparison groups in a standardized format. These data, usually maintained routinely by a program or school, would include, for example, attendance, punctuality, disciplinary actions, grades, test scores, course completion, and program completion or withdrawal. No more than one day per month should be needed for project staff to fill out an evaluation study form using previously compiled data. All efforts will be made to keep this task a reasonable one.

In addition, depending upon the results of the Federal evaluation, some grantees may be encouraged to submit their projects to the National Diffusion Network in order to promote replication.

Changes: The description of the evaluation design has been revised to clarify the amount of additional work by the grantees.

Priority

In accordance with the Education Department General Administration Regulations (EDGAR), 34 CFR 75.105(c)(3), the Secretary establishes an absolute priority by reserving funds under the Cooperative Demonstration Program for grant awards from fiscal years 1988 and 1989 appropriations to support exemplary models of dropout and reentry projects within vocational education. Projects must exhibit exemplary approaches for encouraging vocational education students to remain in school or for encouraging dropouts to reenter school (or other alternative training programs) through vocational education programs. Exemplary approaches in past successful dropout projects have included such factors as small class size, individualized treatment, active recruitment, and thorough assessment and feedback on student progress as a part of their comprehensive programs. An applicant

VOL 53 ISS 236 DE 8 1988 UMI

may propose to use its own model project or adopt a model project from another site. Proposed projects should be located in communities with high dropout rates.

Applicants must provide evidence of the success of the approach their projects will demonstrate. Results of past performance must include empirical data on the performance of project participants such as improved dropout rates, increased attendance rates, and successful grade progression.

All applicants must agree to participate, if selected, in the Federal evaluation. That evaluation would require the applicants to establish control groups through random assignment of participants to their projects or to establish comparison groups through matched pairs. Applicants that are prohibited by State law from engaging in random assignment will be excused from consideration for this approach but may still be required to participate in the Federal evaluation through a matched pairs design.

Federal Evaluation

The Secretary intends to conduct an independent evaluation of the effectiveness of as many as two-thirds of the dropout prevention and reentry demonstration projects funded under this program. This in-depth evaluation will require collection and recording of data on the project and participants, entailing some additional effort on the part of project staff in recordkeeping. However, no more than one day of staff time per month should be needed for this task.

The in-depth evaluation will involve the use of comparison groups developed through:

- Random assignment of potentially eligible participants to the program or the control group, or
- The use of matched pairs—a method that identifies non-participants who have characteristics that are similar to those of the program participants.

The appropriate method of selecting a comparison group will be determined, based on program characteristics, by an independent evaluator under contract with the U.S. Department of Education. A project will need more potentially eligible participants than openings to qualify for random assignment. In order to match pairs, there must be a readily identifiable population from which selections can be made.

Random Assignment

Random assignment of potentially eligible participants is the most rigorous method of evaluating program effects. When participants are randomly assigned to a program or to a control group, all independent variables (i.e. ability, motivation, socioeconomic background) are controlled. Individuals in the control group will receive no services from the project funded under this program, but will be free to receive other available services. Random assignment is used to test the impact of the program on participants versus the impact of other available services on individuals with similar characteristics.

Matched Pairs

An alternative evaluation design is the selection of a comparison group that is matched with the participant group on various characteristics. While this design is used more frequently than random assignment, it is less rigorous. It is difficult to match participants with non-participants on multiple characteristics. As a result, differences in outcome measures between program participants and persons in the matched comparison groups are not necessarily related to program effects, but may be instead related to factors not matched. For instance, one of the most difficult factors to control for in a matched evaluation design is motivation. Program participants could be expected to be more motivated than non-participants unless program participants are randomly assigned.

The contractor will work closely with each project selected for in-depth evaluation in implementing the evaluation design procedures. In the Fall of 1989, the contractor will visit the selected project sites to observe program characteristics and practices such as problems and successes with program implementation, the employment of program strategies, and staff and participant interactions.

The in-depth evaluation will be implemented beginning in the Fall of 1989. Participants and controls will be assigned by the contractor through random assignment or matched pairing. Data will be collected from program participants and controls on factors such as demographic characteristics, family background, academic history, test scores, educational expectations, and attitudes toward education. Program participants who complete an open-exist program or leave the program prior to completion will be followed up on an ongoing basis. Participants and controls will be followed up in the Spring of 1990 and Spring of 1991 to collect information on outcome measures such as attendance, program or school retention, academic progress, vocational training, educational expectations, program completion, and job placement. The evaluation of the effectiveness of dropout prevention and reentry programs in vocational education will be based on a comparison of program participants and controls on these outcome measures.

Applicants should plan and budget for their own independent evaluations in the event they are not selected to participate in the Federal evaluation. The contractor will be available to provide technical assistance to projects not selected for Federal evaluation, including assistance in refining the design of their evaluation, data collection procedures, and survey forms, to facilitate the collection of comparable data by all funded projects. The Secretary will consider that the evaluation requirements in 34 CFR 75.590 are met by a grantee's participation in the in-depth Federal evaluation.

Criteria for Evaluating Applications

The Secretary will use the following selection criteria and to assign points as indicated, for this competition only.

(a) *Need* (15 points).

The Secretary reviews each application to determine the extent to which the project addresses the needs of the targeted population, including—

(1) A clear description of the needs of the proposed target population;

(2) Characteristics of that population, including numbers to be served directly;

(3) Community and State dropout rates, as well as the definition of "dropout" used by the applicant's community and how the dropout rates in the application were computed;

(4) Specific evidence of how the proposed project will meet the needs of the target population;

(5) A description of any ongoing and planned activities in the community relative to the need, including, if appropriate, the relationship to the State Plan for Vocational Education; and

(6) A clear statement of what the project seeks to demonstrate.

(b) *Plan of Operation* (20 points).

The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(1) A management plan that describes the chain of command, how staff will be managed, how coordination among staff will be accomplished, and timeliness for each activity;

(2) A clear description of, and the interrelationship among, goals, objectives, and activities;

(3) The way the applicant plans to use the resources and personnel from the grant to achieve each objective; and

(4) A clear description of how the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition.

(c) *Program Factors* (25 points).

The Secretary reviews each application to determine the extent to which there is—

(1) A clear description of the model to be used, including services to be provided, who will provide them, and how they will be provided;

(2) Evidence of past successful performance using this model, including empirical data such as lowered dropout rates, successful grade progression, improved attendance, and increased graduation or GED rates;

(3) A complete description of methodology to be used including some or all of the following components—

(i) A thorough assessment of individual students;

(ii) Flexibility in the structure of the present delivery system, e.g., in classroom hours, use of additional staff, classroom location, and student-teacher ratios;

(iii) Active recruitment;

(iv) Small class size;

(v) Thorough assessment and feedback of student progress;

(vi) Individualized treatment;

(vii) Tutoring and mentoring;

(viii) Adjustments for childcare;

(ix) Coordination of vocational instruction, academic instruction, and counseling services;

(x) Coordination with other agencies providing services to dropouts or potential dropouts;

(xi) Inclusion of some relevant work-related experience and transportation from school to work;

(xii) Parental involvement; and

(xiii) Community and business involvement.

(d) *Quality of Key Personnel* (15 points).

(1) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used on the project;

(iii) The time, including justification for the time, that each one of the key personnel, including the project director, will commit to the proposed project; and

(iv) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(2) To determine personnel qualifications, the Secretary considers experience and training in fields particularly related to the objectives of the project, as well as other information that the applicant provides.

(e) *Evaluation Plan* (15 points).

The Secretary reviews each application to determine the quality of the project's independent evaluation plan for the project, including the extent to which—

(1) The plan includes activities during the formative stages of the project to help to guide and improve the project, as well as a final evaluation that includes summary data and recommendations; and

(2) The plan includes, at a minimum, a description of the participant data to be collected based on the project objectives, tracking and followup of progress by all project participants throughout the project period, and outcome measures to be used for each objective.

(f) *Budget and Cost Effectiveness* (5 points).

The Secretary reviews each application to determine the extent to which—

(1) The budget is detailed and tied to the proposed activities;

(2) The budget narrative is explanatory and justifies expenses;

(3) The budget is adequate to support the project; and

(4) Costs are reasonable in relation to the objectives of the project.

(g) *Adequacy of Resources* (5 points).

The Secretary reviews each application to determine the adequacy of the resources, other than those to be funded by the Federal grant, that the applicant plans to devote to the project, including facilities, equipment, and supplies.

Additional Consideration

In selecting applications for funding, the Secretary may consider whether funding a particular application would contribute to the funding of a variety of approaches.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and strenthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

(Authority: 20 U.S.C. 2411.)

Dated: November 22, 1988.

Lauro F. Cavazos,

Secretary of Education.

[FR Doc. 88-28297 Filed 12-7-88; 8:45 am]

BILLING CODE 4000-01-M

[CFDA No. 84.199B]

Invitation of Applications for New Awards Under the Cooperative Demonstration Program (Dropout Prevention) From Fiscal Year 1988 and 1989 Appropriations

Purpose: To provide financial assistance for exemplary dropout prevention and reentry projects within vocational education that provide direct service to the individuals enrolled and that are capable of wide replication by service providers.

Deadline for Transmittal of Applications: February 13, 1989.

Deadline for Intergovernmental Review Comments: April 12, 1989.

Applications Available: December 13, 1988.

Funds Available: $4,337,000.

Estimated Range of Awards: $200,000–$500,000.

Estimated Average Size of Awards: $310,000.

Estimated Number of Awards: 14.

Note.—The Department is not bound by any estimate in this notice.

Project Period: Up to 36 months (two 18 month grant cycles).

Applicable Regulations: (a) The regulations in 34 CFR Part 400 and the Vocational Education Cooperative Demonstration Program Regulations in 34 CFR Part 412 with certain exceptions as noted in the Notice of Final Priority and Selection Criteria, published in this issue of the **Federal Register**, and (b) the Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations).

(2) 34 CFR Part 75 (Direct Grant Programs).

(3) 34 CFR Part 77 (Definitions that Apply to Department Regulations).

(4) 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(5) 34 CFR Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments).

Priority: To be eligible, an applicant must meet the priority established in the Notice of Final Priority and Selection Criteria published in this issue of the **Federal Register**.

For Applications or Information Contact: Kate Holmberg, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue, SW., Room 4512, Switzer Building, Washington, DC 20202-7242. Telephone: (202) 732-2363.

Program Authority: 20 U.S.C. 2411.

Dated: November 30, 1988.

Bonnie Guiton,

Assistant Secretary for Vocational and Adult Education.

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

Rules and Regulations

Federal Register
Vol. 53, No. 237
Friday, December 9, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1205

Privacy Act

AGENCY: Merit Systems Protection Board.

ACTION: Final rule.

SUMMARY: The U.S. Merit Systems Protection Board (Board) is amending its regulations at 5 CFR Part 1205 by revising the sections on fees and on administrative appeals. The fee provisions are being changed to establish a threshold for providing copies of records without charge to requesters; to establish a fee schedule for the duplication of records in various formats; and to establish a policy for collecting fees and requiring advance payment when fees exceed a stated amount. The administrative appeal provisions are being changed to provide for appeal of denial of requests for amendment of records to the Executive Director rather than to the Chairman of the Board.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Robert E. Taylor, Clerk of the Board, (202) 653–7262.

SUPPLEMENTARY INFORMATION:

List of Subjects in 5 CFR Part 1205

Privacy, Government employees.

Accordingly, the Board amends 5 CFR Part 1205 as follows:

PART 1205—PRIVACY ACT

1. Authority for Title 5 CFR Part 1205 continues to read:

Authority: 5 U.S.C. 552a.

2. Section 1205.16, is revised to read as follows:

§ 1205.16 Fees.

(a) No fees will be charged by the Board except for making copies of records.

(b) Photocopies of records duplicated by the Board shall be subject to a charge of 10 cents per page.

(c) If the fee to be assessed for any request is less than $25 (the cost to the Board of processing and collecting the fee), no charge will be made to the requester.

(d) Fees for duplicating audio and automated tapes will be charged at the actual cost to the Board, as follows:

(1) Audio tapes will be subject to a charge of $5.75 per cassette tape;

(2) Computer printouts will be subject to a charge of 0.1 cent per page;

(3) Records reproduced on magnetic computer tapes will be subject to a charge of $21 per tape; and

(4) Records produced on computer diskettes will be subject to a charge of $2.70 per diskette.

(e) If duplication costs exceed $25, the Board may notify the requester of the estimated amount prior to copying the records. The Board may require the requester to send an estimated fee.

(f) When the Board determines that the charges for a request are likely to exceed $250, the Board will require the requester to provide an advance payment of the entire fee before continuing to process the request.

(g) The Board will provide one copy of the amended parts of any record free of charge as evidence of the amendment.

3. Sections 1205.31 and 1205.32 are revised to read as follows:

§ 1205.31 Submission of appeal.

(a) A partial or complete denial of a request for amendment by the Clerk of the Board or a Regional Director may be appealed to the Executive Director, U.S. Merit Systems Protection Board, 1120 Vermont Avenue NW., Washington, DC 20419.

(b) Any appeal must be in writing, must be clearly marked "PRIVACY ACT APPEAL" on both the envelope and letter, and must include:

(1) A copy of the original request for amendment of the record;

(2) A copy of the denial; and

(3) A statement of the reasons the original denial should be overruled.

§ 1205.32 Determinations on appeal.

(a) The Executive Director will decide the appeal within 30 working days unless he or she determines that there is good cause for extension. If an appeal is improperly labeled, does not contain the necessary information, or is submitted to an inappropriate official, the time limitation for processing the appeal will run from the time it is received by the Executive Director.

(b) If the request for amendment of a record is granted on appeal, the Executive Director will direct that the amendment be made. A copy of the amended record will be provided to the requester.

(c) If the request for amendment of a record is denied, the Executive Director will notify the requester of the denial and inform the requester of:

(1) The basis for the denial;

(2) The right to judicial review of the decision under 5 U.S.C. 552a(g)(1)(A); and

(3) The right to file a concise statement with the Board stating the reasons the requester disagrees with the denial. This statement will become a part of the record.

Dated: December 6, 1988.

Robert E. Taylor,

Clerk of the Board.

BILLING CODE 7400–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 678]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule with request for comments.

SUMMARY: Regulation 678 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period December 9, 1988 through December 15, 1988. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

DATES: Regulation 678 (§ 907.978) is effective for the period December 9, 1988, through December 15, 1988. Comments are due January 9, 1989.

ADDRESS: Interested persons are invited to submit written comments concerning the possible impact of volume regulations on small entities. Comments must be sent in triplicate to the Docket Clerk, F&V, AMS, USDA, Room 2085–S, P.O. Box 96456, Washington, DC 20090–6456. Comments should reference the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular working hours.

FOR FURTHER INFORMATION CONTACT: R. Charles Martin, Volume Control Section, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 (7 CFR Part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issues thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

At the beginning of each marketing year, the Navel Orange Administrative Committee (Committee) submits a marketing policy to the U.S. Department of Agriculture (Department) which discussses, among other things, the potential use of volume and size regulations for the ensuing season. The Committee, in its 1988–89 season marketing policy, considered the use of volume regulation for the season. The Department reviewed that policy with respect to administrative requirements and regulatory alternatives in order to determine if the use of volume regulations would be appropriate.

There are approximately 125 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

Although handlers and/or marketers are affected by the issuance of weekly volume regulations, the intent of the Act is to benefit agricultural producers. The California-Arizona navel orange industry is characterized by a large number of growers located over a wide area. The production area is divided into four districts which span Arizona and part of California. The highest proportion of the production is located in District 1, Central California, which represented 84 percent of the total production in 1987–88. District 2 is located in the southern coastal area of California and represented 13 percent of the 1987–88 production; District 3 is the desert area of California and Arizona, which represented approximately 2 percent and District 4 is northern California and represented approximately 1 percent. The estimated production for the 1988–89 crop season is 73,200 cars (1 car equals 1,000 cartons; 1 carton equals 37.5 pounds).

The three basic outlets for California-Arizona navel oranges are the domestic fresh, export, and processing markets. The domestic (regulated) fresh market is the preferred market for California-Arizona navel oranges. It is estimated that 64 percent of the 1988–89 crop of 73,200 cars will be utilized in fresh domestic channels (47,000 cars), with the remainder being exported fresh (9 percent) or processed (27 percent). This compares to 45,087 cars shipped to fresh domestic markets in 1987–88, about 69 percent of the 1987–88 crop, totalling 65,594 cars.

Volume regulations issued under the authority of the Act and Marketing Order No. 907 are intended to provide benefits to both producers and consumers. Producers benefit in areas such as increased grower returns and improved market conditions. Reduced fluctuations in supplies and price result from pre-planned shipping levels, resulting in a more stable market. Consumers are assured of a steady supply of oranges in the market throughout the marketing season.

Benefits and costs of issuing regulations are difficult to quantify, as indicated in various studies regarding effects of marketing orders and criteria for measuring their effects. Although information currently available to the AMS is limited, the known costs to growers of implementing the regulations appear to be significantly offset when compared to the potential benefits of regulation.

The reporting and recordkeeping requirements under the navel orange marketing order are incurred by handlers of navel oranges. However, handlers in turn may require individual growers to utilize certain reporting and recordkeeping practices to enable handlers to carry out their functions. Costs incurred by handlers in connection with recordkeeping and reporting requirements may be passed on to growers.

If volume regulations were not to be used for the 1988–89 season, it is likely that most of these reporting and recordkeeping functions would still be carried out. The method of calculating the quantities of navel oranges for fresh shipments by handlers for any given week is based on information gathered over several previous weeks. Therefore, there is an incentive to keep and maintain records in anticipation of future implementation of regulation.

The foundation for the use of volume regulations under this marketing order is to foster market stability and enhance grower revenue. Prices for navel oranges, as well as other perishable agricultural commodities, tend to be relatively inelastic at the grower level. Thus, even a small variation in shipments can have a great impact on price and grower revenue. Under these circumstances, strong arguments can be advanced as to the benefits incurred by growers, particularly for smaller growers. Consequently, when weighing costs and benefits derived from the use of volume regulations, it seems highly probable that if actual data were available, the monetary benefit would far outweigh the costs. Therefore, it is the USDA's view that if a "significant economic impact on a substantial number of small entities" would be present, this impact would be positive rather than adverse.

The Fruit and Vegetable Division of the AMS, however, encourages the submission of comments on the

potential economic impact upon small entities from all interested parties. The Department's position on this certification of the regulatory action will be further evaluated in view of the applicable comments received.

This action is consistent with the marketing policy for 1988–89 adopted by the Committee. The Committee met publicly on December 6, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended by a vote of 6 to 4, a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the market for fresh navel oranges is good for large sizes and weak for small sizes.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

7 CFR Part 910

[Lemon Regulation 643]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 643 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 322,875 cartons during the period December 11 through December 17, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 643 (§ 910.943) is effective for the period December 11 through December 17, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act", 7 U.S.C. 601–674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1988–89. The Committee met publicly on December 6, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that the demand for lemons is good.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 154, 157, and 284

[Docket No. RM87–17–002; Order No. 493–B]

Natural Gas Data Collection System; Order Granting Reconsideration

Issued November 30, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is amending its regulations to extend from March 31, 1989 to October 31, 1989, the implementation date for electronic submission of certain rate, tariff and certificate filings. The Commission has received three requests urging the Commission to extend the implementation date for the electronic submission of rate, tariff and certificate filings. They argue that this date should be extended because the effort needed to prepare these filings and other complex filings that must be made in March and April of 1989 will place undue pressure on natural gas companies' limited data processing staffs.

EFFECTIVE DATE: November 30, 1988.

FOR FURTHER INFORMATION CONTACT: Julia Lake White, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357–8530.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 357–8997. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this order will be available on CIPS for 10 days from the date of issuance. The complete text of diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

Order Granting Reconsideration

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

The Federal Energy Regulatory Commission (Commission) is amending its regulations to extend from March 31, 1989 to October 31, 1989, the implementation date for electronic submission of certain rate, tariff and certificate filings.

In Order No. 493,[1] issued on April 5, 1988, the Commission amended its regulations to require that on or after September 30, 1988, rate filings (including the affected tariff sheets) submitted pursuant to § 154.63, certificate and abandonment applications (including the affected tariff sheets) under Subparts A, E and F of Part 157, blanket certificate applications under Subpart G of Part 284, and FERC Form Nos. 8, 11, and 16 in Part 260, must be filed on an electronic medium.[2] In Order No. 493–A, issued on August 1, 1988,[3] the Commission stayed the implementation date for the rate and tariff filings and certificate and abandonment applications until March 31, 1989.[4]

The Commission has received three requests for reconsideration and clarification of Order No. 493–A.[5] The requests urge the Commission to extend the implementation date for the electronic submission of rate, tariff and certificate filings. They argue that this date should be extended because the effort needed to prepare these filings and other complex filings that must be made in March and April of 1989 will place undue pressure on natural gas companies' limited data processing staffs.

The Commission is granting the requests by revising its regulations to provide that the implementation date for electronic data submission of rate, tariff, certificate and abandonment applications will be October 31, 1989. This will provide the Commission additional time to develop record formats for rate filings that will satisfy the various data presentation methods currently used by natural gas companies, and to enhance the record formats for tariffs and certificates. Also, this action will provide the industry more time to review and comment on the proposed record formats for rates, tariffs and certificates due to be issue on November 30, 1988. The Commission will schedule a second implementation conference under a separate notice to provide for this further review and comment period.

The Administrative Procedure Act [6] provides that in certain limited circumstances, a federal agency can, for good cause, issue an order effective upon issuance. The Commission finds that this order relieves natural gas companies from certain implementation dates that may be unduly burdensome. This order, therefore, is effective on November 30, 1988.

---

[1] 53 FR 15,023 (Apr. 27 1988), III FERC Stats. & Regs. ¶ 30,808, *reh'g* 53 FR 30,027 (Aug. 10, 1988), III FERC Stats. & Regs. ¶ 30,826 (Aug. 1, 1988).

[2] Order No. 493 also provided that: (1) On or after September 30, 1988, the tariff sheets filed pursuant to § 154.301(a) must be filed on an electronic medium, and that any natural gas company filing a general rate proceeding pursuant to section 4 of the Natural Gas Act and § 154.63, or submitting a restatement of the natural gas company's base tariff pursuant to § 154.303(e), must make a one-time only filing which resubmits the company's entire tariff, except for executed service agreements, on an electronic medium; and (2) on or after December 30, 1988, FERC Form Nos. 2, 2A, 14 and 15 must be submitted on an electronic medium.

[3] *Supra* note 1.

[4] The Commission also extended the implementation dates for electronic filing of FERC Form Nos. 8 and 11 to November 30, 1988, and of FERC Form No. 16 to April 30, 1989.

[5] Request of the Interstate Natural Gas Association of America (INGAA), filed November 7, 1988; Request for Clarification of Columbia Gas Transmission Corporation (Columbia Gas), filed on November 15, 1988; and Joint Petition of ANR Pipeline Company and Colorado Interstate Gas Company (ANR/CIG) for Reconsideration, filed on November 18, 1988.

[6] 5 U.S.C. 553(d)(3)(1982).

List of Subjects

18 CFR Part 154

Alaska, Natural gas, Pipelines, Reporting and recordkeeping requirements.

18 CFR Part 157

Administrative practice and procedure, Natural gas, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends Parts 154, 157 and 284, Title 18, Chapter I, "Code of Federal Regulations", as set forth below.

By the Commission.

Lois D. Cashell,

Secretary.

PART 154—RATE SCHEDULES AND TARIFFS

1. The authority citation for Part 154 continues to read as follows:

Authority: Natural Gas Act, 15 U.S.C. 717–717w (1982); Department of Energy Organization Act, 42 U.S.C. 7102–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142; Independent Offices Appropriations Act, 31 U.S.C 9701 (1982).

§ 154.1 [Amended]

2. In § 154.1, paragraphs (b) and (c), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.26 [Amended]

3. In § 154.26, paragraph (b), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.31 [Amended]

4. In § 154.31, paragraphs (a) and (b), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.32 [Amended]

5. In § 154.32, paragraphs (a) and (b), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.34 [Amended]

6. In § 154.34, paragraphs (a) (1) and (2), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.61 [Amended]

7. In § 154.61, the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.62 [Amended]

8. In § 154.62, paragraph (a), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.63 [Amended]

9. In § 154.63, paragraphs (b)(1)(iv), (b)(5), (c)(1)(i) and (ii), (d)(3) and (d)(4)(i), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 154.303 [Amended]

10. In § 154.303, paragraph (e)(1)(ii), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

PART 157—APPLICATIONS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND FOR ORDERS PERMITTING AND APPROVING ABANDONMENT UNDER SECTION 7 OF THE NATURAL GAS ACT

11. The authority citation for Part 157 continues to read as follows

Authority: Natural Gas Act, 15 U.S.C. 717–717w (1982); Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142.

§ 157.6 [Amended]

12. In § 157.6, paragraph (a)(1), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 157.14 [Amended]

13. § 157.14, paragraph (a), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 157.17 [Amended]

14. In § 157.17, paragraphs (a) and (b), the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

§ 157.20 [Amended]

15. In § 157.20, paragraphs (c) introductory text and (d) introductory text, the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

16. In § 157.205, paragraph (b) introductory text is revised to read as follows:

§ 157.205 Notice procedure.

* * * * *

(b) *Contents.* In addition to the fee prescribed in paragraph (c) of this section, for any activity subject to the requirements of this section, the certificate holder must file with the Secretary of the Commission before October 31, 1989, an original and fifteen copies, and on or after October 31, 1989, as prescribed in §§ 157.6(a) and 385.2011 of this chapter, a request for authorization under the notice procedures of this section that contains:

* * * * *

PART 284—CERTAIN SALES AND TRANSPORTATION OF NATURAL GAS UNDER THE NATURAL GAS POLICY ACT OF 1978 AND RELATED AUTHORITIES

17. The authority citation for Part 284 continues to read as follows:

Authority: Natural Gas Act, 15 U.S.C. 717–717w (1982) as amended; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142.

§ 284.221 [Amended]

18. In § 284.221, paragraph (b)(1) introductory text, the words "March 31, 1989" are removed and the words "October 31, 1989" are inserted in their place.

[FR Doc. 88–28136 Filed 12–8–88; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF JUSTICE

Parole Commission

28 CFR Part 2

Paroling, Recommitting and Supervising Federal Prisoners

AGENCY: Parole Commission, Justice.

ACTION: Final rule.

SUMMARY: The Parole Commission is extending the parole procedures and policies used for the YCA inmates in the class action litigation of *Watts* v. *Belaski*, Civil Action No. 78–M–495 (D. Colo.) to all offenders who have been sentenced under the repealed Youth Corrections Act (formerly 18 U.S.C. 5005 *et seq.*). The Parole Commission is taking this action to assist the Bureau of Prisons in its plan to transfer YCA prisoners to institutions across the country, and to reduce the possibility of disciplinary problems caused by the use of different parole policies for YCA prisoners confined in the same institution.

EFFECTIVE DATE: January 9, 1989.

FOR FURTHER INFORMATION CONTACT: Rockne Chickinell, Office of General Counsel, U.S. Parole Commission, 5550 Friendship Blvd., Chevy Chase, Maryland, 20815, telephone (301) 492–5959.

SUPPLEMENTARY INFORMATION: Since the Youth Corrections Act was repealed in October, 1984, the number of inmates sentenced under this act has continued to decrease as the sentences expire. The YCA population is rapidly moving to the point where it will be composed solely of parole violators serving the remainder of their 18 U.S.C. 5010(b) sentences (which normally expire 6 years from the date of conviction) and those inmates serving lengthy sentences imposed under section 5010(c) (which may be for a term up to the maximum sentence authorized for an adult prisoner).

In the class action litigation in *Watts v. Belaski*, the Bureau of Prisons has been required in several orders from the Court of Appeals for the Tenth Circuit and the U.S. District Court in Colorado to segregate YCA inmates from adult prisoners and the Parole Commission has been required to make response to treatment a significant factor in parole decision-making for the class members. *See, e.g., Watts v. Hadden*, 651 F.2d 1354 (10th Cir. 1981); *Benedict v. Rodgers*, 748 F.2d 543 (10th Cir. 1984) (related case); and *Watts. v. Hadden*, 627 F.Supp. 727 (D. Colo. 1986). In response to these decisions, the Bureau of Prisons has confined almost all YCA inmates at the Federal Correctional Institution, Englewood, Colorado, segregating them from adult prisoners. In recent years, the district court has permitted the Bureau to incarcerate some adult prisoners at FCI, Englewood in order to ensure that the facility is used to its approximate potential. The Parole Commission implemented a decision-making policy which provides for the consideration of an inmate's response to treatment along with the criteria specified at 18 U.S.C. 4206 (*i.e.*, severity of the offense and risk to the public) in determining when a *Watts* class member should be released on parole. The Commission did not extend the *Watts* procedures to YCA inmates who were not members of the *Watts* class, since it had prevailed in other courts which considered the issue of the proper criteria for deciding when YCA inmates should be paroled. *E.g., Adams v. Keller*, 736 F.2d 320 (6th Cir. 1984) (*en banc*).

Given the continuing decline in the number of YCA inmates, the Bureau of Prisons is developing a plan to transfer a number of YCA inmates presently at FCI, Englewood to institutions across the country, preferably an institution near the inmate's residence after release. Such transfers will be made with the permission of the district court in Colorado. As part of this plan, the Bureau requested the Parole Commission to consider extending the *Watts* parole policies to YCA inmates who are not members of the *Watts* class. In the Bureau's view, the extension of the *Watts* procedures to all YCA inmates would facilitate the Bureau's monitoring of the treatment of the remaining inmates wherever they may be confined and would reduce the possibility of any discipfinary problems caused by the use of different parole policies for YCA inmates confined in the same institution.

The Commission published a proposed rule which extended its present *Watts* policies to all youth offenders and sought public comment on the proposal. See 53 FR 34546 (September 7, 1988). No public comment was received by the Commission. There are no substantive changes from the proposed rule in this final version of the regulation. A number of editorial changes have been made, including the elimination of some passages covering only the policies or practices of the Bureau of Prisons. This rule will become effective on January 9, 1989 and will be used for any hearing or record review conducted on or after that date with regard to a YCA inmate or parolee.

This rule change will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

List of Subjects in 28 CFR Part 2

Administrative practice and procedure, Prisoners, Probation, Parole.

PART 2—[AMENDED]

28 CFR Part 2 is amended to add § 2.65 as follows:

§ 2.65 Youth Corrections Act.

(a) The provisions of this section only apply to offenders serving sentences imposed under former 18 U.S.C. section 5010 (b) and (c).

(b) *Approval of program plans.* (1) The criteria outlined in paragraph (d) of this section (on determining successful response to treatment) shall be considered in determining whether a proposed program plan will effectively reduce the risk to the public welfare presented by the YCA prisoner's release.

(2) If the prisoner's program plan has not already been approved by the Commission, the examiner panel shall be given the plan at a hearing for review and approval. The examiners shall indicate their approval or disapproval of the program plan (with relevant comments and recommendations) in the hearing summary.

(3) If the examiners consider the plan inadequate, they will discuss their concerns with institutional staff. If there is still a disagreement on the plan, the case will be referred by the Commission's regional administrator to the Bureau's regional correctional programs administrator with the recommended changes. Unresolved disputes concerning the adequacy of the program plan shall be decided by the Regional Commissioner and the Regional Director of the Bureau of Prisons. The Regional Commissioner shall render the final decision on approving or disapproving each program plan on behalf of the Commission. Once the program plan has been approved, subsequent approvals are not necessary, unless significant modifications are made by institutional staff.

(c) *Parole hearings and progress reports.* (1) Initial hearings shall be conducted in accordance with §§ 2.12 and 2.13. The examiner panel will discuss with the prisoner and a staff member who is knowledgeable about the case the program plan and the importance of good conduct and program participation is setting the release date.

(2) An interim hearing must be scheduled for a YCA prisoner every six months. In addition, within 60 days of receipt of any special progress from the warden recommending parole, the prisoner shall be scheduled for a special interim hearing, unless the recommendation can be timely considered at a regularly scheduled interim hearing. An institutional staff member who has personal knowledge of the case shall be present to assist the examiners in their evaluation of the prisoner's conduct, program performance, and response to treatment.

(3) After any interim hearing or review on the record, the Commission may advance the presumptive release date, let the date stand, or retard/rescind the date if the prisoner has committed disciplinary infractions or new criminal conduct.

(4) An interim hearing will not be scheduled after receipt of a progress report, if the Commission decides on the record to parole the prisoner as soon as a release plan is approved (normally within 60 days of the decision).

(5) The institution shall send a progress report to the Commission:

(i) No more than 60 days before each interim hearing;

(ii) Upon determining that a prisoner should be recommended for parole; and

(iii) Before presumptive parole date to allow for the pre-release record review under § 2.14(b).

The warden may forward progress reports to the Commission at other times in his discretion. Progress reports shall also be sent to the Commission every six months for prisoners who have waived interim hearings to enable the Commission to verify that these prisoners have satisfied the conditions of securing their release on an alternative parole date granted under the former YCA compliance plan (*i.e.*, completion of the program plan) or the normal presumptive release date (*i.e.*, obedience to institutional rules).

(6) For prisoners granted earlier parole dates under former compliance plans in *Watts* v. *Bleaski:* A prisoner may waive interim hearings under this section, in which case he would retain an alternative parole date previously granted to him or a presumptive parole date granted as a result of a finding that the prisoner had responded to treatment. A prisoner who waives an interim hearing under this section may, at any time, re-apply for the hearing and be considered under this section in accordance with the application/waiver provisions at § 2.11. The Commission will not review the program plans for prisoners who waive interim hearings pursuant to this paragraph, unless the prisoner subsequently is scheduled for a hearing to consider new criminal conduct or a rule infraction *and* a modification of the original program plan appears warranted due to the prisoner's new criminal offense or infraction. If the prisoner is scheduled for a hearing that may not be waived (*e.g.*, an interim hearing where there has been a finding of a disciplinary infraction since the last hearing, or any hearing scheduled pursuant to § 2.20 (b) through (f), this section will be applied at such hearing.

(7) *Warden's recommendation.* Based on the completion of the program by the prisoner, and the quality of effort demonstrated by the prisoner in completing the plan, the warden will recommend to the Commission a conditional release date for its consideration. This recommendation shall be accompanied by a report on the prisoner's participation and level of achievement in different aspects of his program.

(d) *Criteria for finding successful response to treatment programs.* (1) In determining whether a prisoner has successfully "responded to treatment" the Commission shall examine whether the prisoner has shown that he has received sufficient corrective training, counseling, education, and therapy that the public would not be endangered by his release. See former 18 U.S.C. 5006(f) (definition of "treatment" under the YCA). The Bureau of Prisons shall assist the Commission in this determination by informing the Commission when the prisoner has completed his program plan and by advising the Commission of the quality of effort demonstrated by the prisoner in completing the plan.

(2) In determining the extent of a prisoner's positive response to treatment, the Commission shall examine the degree by which the prisoner has increased the likelihood that his release would not jeopardize public welfare through his program performance and conduct record. See 18 U.S.C. 4206(a)(2). The starting report for the analysis of a prisoner's response to treatment will be the original parole prognosis reached by the use of the salient factor score, and an evaluation of the nature of the prisoner's prior criminal history and other characteristics of the prisoner. The nature of the current offense may also be considered in determining the risk to the public welfare presented by the prisoner's release. The Commission will then proceed to evaluate whether the prisoner's program participation and institutional conduct has improved the original risk prognosis and evidences an alteration of his valued system, including an understanding of the wrongfulness of his past criminal conduct. For those prisoners who have exhibited serious or violent criminal behavior, the Commission will exercise more caution in making a finding that the prisoner has responded to treatment to the degree that he should be released.

(3) With regard to program performance, significant weight will be given to the following factors in determining a prisoner's response to treatment. This is not intended as an exhaustive list.

(i) *Vocational training:* Where the inmate originally had few job skills, the acquisition of a marketable job skill through vocational training or an apprenticeship program.

(ii) *Education:* Participation in educational programs to acquire an educational level at least the level of a high school graduate.

(iii) *Psychological counseling and therapy:* Where the prisoner's behavior has shown that he may be affected by personality disorders or a mental illness that has hampered his ability to lead a law-abiding life, or that he may otherwise benefit from such programs, participation in psychological and/or other specialized programs which lead to a judgment by the therapist/counselor that the prisoner has significantly improved his ability to obey the law and favorably modified his value system. Participation in these programs will normally be required for a significant advancement of the presumptive release date for a prisoner who has either committed or attempted a crime of violence.

(iv) *Drug/alcohol abuse programs:* Where the prisoner has a history of drug/alcohol abuse, participation in a drug/alcohol abuse program which leads to the judgment by the therapist/counselor that there is a significant likelihood that the prisoner will not revert to drug/alcohol abuse and has thereby significantly improved his ability to obey the law.

(v) *Work:* Assuming the prisoner is physically and mentally able to do so and is not otherwise engaged in an institutional activity which prevents him from obtaining a job, participation in a job on a regular basis so as to demonstrate a stable life pattern and a favorable modification of his value system.

(4) Prison misconduct (*i.e.*, disobedience to institutional rules, escape) and new criminal conduct in the institution shall be considered in the decision as to whether (or to what degree) a prisoner has successfully responded to treatment. The rescission guidelines of 2.36 shall be used in retarding or rescinding the original presumptive release date set according to the guidelines and the factors described in 18 U.S.C. 4206. If the original presumptive date has been advanced based on response to treatment, the rescission guidelines may also be used to retard or rescind the new date to maintain institutional discipline, if the misconduct is not deemed serious enough to affect the decision that the prisoner has responded to treatment. But misconduct subsequent to the advancement of a release date based on a finding of response to treatment may also result in a reversal of that finding and the cancellation of any advancement of the original presumptive release date.

(e) *Setting the parole date (balancing Sec. 4206 factors with response to treatment).* At any hearing or review on the record, the presumptive release date may be advanced if it is determined that the prisoner has responded to a sufficient degree to his treatment programs. The amount of the advancement should be proportional to the degree of response evidenced by the prisoner. In making the advancement, no rule restricting the amount of the

reduction—whether based on the guidelines (§ 2.20) or the rule on superior program achievement (§ 2.60)—shall be used. The decision will be the result of a case-by-case evaluation in which response to treatment programs, the seriousness of the offense, and the original parole prognosis are all weighed by the Commission with no one factor capable of excluding all others.

(f) *Parole violators.* Parole violators returned to an institution following a local revocation hearing shall normally be considered for reparole under this section at a hearing within six months of their arrival at the institution.

(g) *Early termination from supervision.* (1) A review of the YCA parolee's file will be conducted at the conclusion of each year of supervision (following receipt of the annual progress report—Form F–3) and six months prior to the expiration of his sentence (after receipt of the final report).

(2) A YCA parolee shall not be continued on supervision beyond the time periods specified in the early termination guidelines (§ 2.43), unless case-specific factors indicate further supervision is warranted. The guidelines at § 2.43 shall not be routinely used to *deny* early discharge to a YCA parolee who has yet to complete two (or three) years of clean supervision.

(3) The Commission shall consider the facts and circumstances of each YCA parolee's case, focusing on the risk he poses to the public and the benefit he may obtain from further supervision. The nature of the offense and parolee's past criminal record shall be taken into account only to evaluate the risk that the parolee may still pose to the public.

(4) In denying early discharge, the Commission shall inform the probation office by letter (with a copy to the YCA parolee) of the reasons for continued supervision. The reasons should pertain, whenever possible, to the facts and circumstances of the YCA parolee's case. If there are no case-specific factors which indicate that discharge should be either granted to denied and further supervision appears warranted, the Commission may inform the YCA parolee that he is continued on supervision because of its experience with similarly situated offenders.

Dated: November 17, 1988.

Benjamin F. Baer,

Chairman, U.S. Parole Commission.

BILLING CODE 4410–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 915

Approval of Amendments to the Iowa Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval of an amendment to the Iowa permanent regulatory program (hereinafter referred to as the Iowa program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment repeals the exemption from regulation for coal extraction operations affecting one-half acre or less. The amendment is intended to clarify the State program by removing a provision which was preempted by Federal legislation.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. William J. Kovacic, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64104; Telephone: (816) 374–6405.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Interior conditionally approved the Iowa program effective April 10, 1981. Information pertinent to the general background and revisions to the permanent program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Iowa program, can be found in the January 21, 1981, **Federal Register** (46 FR 5885). Subsequent actions concerning proposed amendments are codified at 30 CFR 915.15.

II. Submission of Amendments

On June 9, 1988, the State of Iowa proposed to amend its permanent regulatory program by repealing language in its statute granting an exemption from regulation for coal extraction operations affecting one-half acre or less (Administrative Record No. IA–320). The proposed change revises Section 83.26 of the Code of Iowa by deleting subsection 2.

The Director announced receipt of the proposed amendment in the July 14, 1988, **Federal Register** (53 FR 26606) and, in the same notice, opened the public comment period and provided an opportunity for a public hearing on the substantive adequacy of the proposed amendment (Administrative Record No. IA–331). No public comments were received by August 15, 1988, the close of the comment period. The public hearing, scheduled for August 8, 1988, was not held because no one requested an opportunity to testify.

III. Director's Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.15 and 732.17, that the amendment submitted by Iowa on June 9, 1988, meets the requirements of SMCRA and 30 CFR Chapter VII as discussed below.

As originally approved, Section 83.26 of the Code of Iowa excluded coal extraction operations affecting one-half acre or less from regulation. Similarly, as originally enacted, section 528(2) of SMCRA exempted coal extraction operations affecting two acres or less. However, on May 7, 1987, the President signed Pub. L. 100–34, which repealed this exemption and preempted any corresponding acreage-based exemptions included in State laws or regulations. The amendment under consideration in this rulemaking removes the State statutory language preempted by Pub. L. 100–34. Therefore, the Director finds section 83.26 of the Code of Iowa, as revised by this amendment, to be no less stringent than section 528 of SMCRA. Removal of the acreage exemption from the Iowa statute will avoid confusion on the part of the public, which may not be aware of the Federal preemption.

IV. Public and Agency Comments

As discussed above, the Director solicited public comment and provided opportunity for a public hearing on the proposed amendments. No public comments were received and, since no one requested an opportunity to testify at a public hearing, no hearing was held.

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(11), comments were also solicited from various Federal and State agencies with an actual or potential interest in the Iowa program. None of the agencies notified offered any substantive comments.

V. Director's Decision

Based on the above findings, the Director is approving the proposed amendment submitted by Iowa on June 9, 1988. The Federal regulations at 30 CFR Part 915 codifying decisions concerning the Iowa program are being amended to implement this decision.

This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to bring their programs into conformity with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

VI. Procedural Determinations

National Environmental Policy Act. The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

Executive Order No. 12291 and the Regulatory Flexibility Act. On July 12, 1984, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for action directly related to approval or conditional approval of State regulatory programs. Therefore, for this action, OSMRE is exempt from the requirement to prepare a regulatory impact analysis, and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

Paperwork Reduction Act. This rule does not contain information collection requirements which require approval by the OMB under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 915

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Robert E. Boldt,

Deputy Director, Office of Surface Mining Reclamation and Enforcement.

Date: December 2, 1988.

For the reasons set out in the preamble, Title 30, Chapter VII, Subchapter T of the Code of Federal Regulations is amended as set forth below.

PART 915—IOWA

1. The authority citation for Part 915 is revised to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. Section 915.15 is amended by adding paragraph (h) to read as follows:

915.15 Approval of regulatory program amendments.

* * * * *

(h) The following amendment to the Iowa program, as submitted to OSMRE on June 9, 1988, is approved effective December 9, 1988: Revisions to Section 83.26 of the Code of Iowa repealing the provision excluding coal extraction operations affecting one-half acre or less from regulation.

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual; Miscellaneous Amendments

AGENCY: Postal Service.

ACTION: The Postal Service hereby describes the numerous miscellaneous revisions consolidated in the Transmittal Letter for issue 29 of the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations, see 39 CFR 111.1.

Most of the revisions are minor, editorial, or clarifying. Substantive changes, such as the revised regulations on ancillary service endorsements, and the revised regulations on eligibility of "Plus" issues for second-class mail privileges, have previously been published in the **Federal Register**.

EFFECTIVE DATE: December 18, 1988.

FOR FURTHER INFORMATION CONTACT: Paul J. Kemp, (202) 268-2960.

SUPPLEMENTARY INFORMATION: The Domestic Mail Manual has been amended by the publication of a transmittal letter for issue 29, dated December 18, 1988. The text of all published changes is filed with the Director of the Federal Register Subscribers to the Domestic Mail Manual receive these amendments automatically from the Government Printing Office.

The following excerpt from the Summary of Changes section of the transmittal letter for issue 29 covers the minor changes not previously described in interim or final rules published in the **Federal Register**.

Summary of Changes

Chapter 1, Domestic Mail Services. Section 115.231b, Mail Sealed Against Inspection, and 152.71, Who May Recall Mail, are revised to clarify matters concerning Customs clearance of domestic and international mail.

* * * * *

Section 122.422a is revised to clarify the existing regulations to specify acceptable wording and the location of address formats for mailers who choose to use the exceptional address format.

The following Exhibits in 122.63 are updated: 122.63c, Sectional Center Facilities Serving a Single Three-Digit ZIP Code Area; 122.63e, Optional Area Distribution Center (ADC) Labeling List for Use with Presort First-Class Mailings Only; 122.63o Area Distribution Center (ADC) labeling list for optional combined ZIP+4, and presorted first-class mail; and 122.63p, originating mixed states labeling list for mailer prepared second-class publications.

In 125.15, Airlift Mail, section 125.152b is revised to change the size limits for parcels of any class that are mailed from an APO/FPO outside the contiguous 48 states. The parcels may not be more than 100 inches in length and girth combined.

Section 137.16, General Instructions, is revised to clarify the procedures for handling undeliverable-as-addressed franked mail bearing a Washington, DC, return address.

In Part 137, Official Mail, section 137.264b is revised to change the limit for insured mail sent as penalty mail. Items insured for over $100 cannot be sent as penalty mail and must have postage and fees prepaid.

Section 137.275f(3) is revised to raise the minimum dollar amount for orders for penalty mail stamp stock. Each order must now total $50.

Section 137.275f(4) is revised to state that $1 and $5 denomination stamps can only be ordered in multiples of $10.

Section 137.276h(4)(b) is revised to raise the limit for insured mail sent as penalty merchandise return mail. Items insured for over $100 cannot be sent as penalty merchandise mail.

In 144.52, Place of Mailing, section 144.524a, is revised to state that metered mail, regardless of its class, may be deposited at the area mail processing center (AMPC) which does the initial distribution of the originating mail and serves the post office where the meter is licensed.

In 159.326, Other Mail, section 159.326f is revised to include postage-due mail. The post office retains postage-due mail for 10 days; and, if no one claims it within that timeframe, it returns the mail to the sender. This same retention and return policy applies to postage-due mail addressed to a post office box.

Section 159.327, Return of Third- and Fourth-Class Mail, is revised to state that the sender of third- and fourth-class mail may identify pieces considered

valuable and ensure their return by using one of the return postage guaranteed endorsements in Exhibits 159.151a-f.

In 164.1, Definition and Policy, section 164.13d is added to grant authority to the General Manager, Philatelic Sales Division, Philatelic and Retail Services Department, to allow backdating of mail for philatelic purposes. Permission to backdate mail for philatelic purposes must be obtained from the General Manager in writing.

Section 164.53i, Cancellation Deadlines, is added to state the Postal Service policy concerning cancellation deadlines for bulk orders of first day covers.

Section 164.73, Special Materials on Which Cancellations Are Requested, is revised to restate Postal Service policy concerning cancellations on special materials. The Postal Service is not responsible for smudged cancels or offsetting on this type of work.

In 164.82, Mailback Service, section 164.82a is revised to require that cover servicers or dealers obtain written authorization from the Philatelic Sales Division for more than 50 rubber composition cancellations. Section 164.82e is added to state the mailback service with overwrapping for cover servicers and dealers submitting 50 or more addressed covers will be subject to a service charge established by the Philatelic Sales Division. Section 164.82f is added to state that cover servicers and dealers wishing to use a protective envelope other than the protective overwrapping provided by the USPS for mailing first day covers must have a signed agreement on file with the Philatelic Sales Division.

Sections 164.83a, First-Day-of-Issue-Cancellations, 164.83b, Pictorial Cancellations, and 164.83d, Standard Cancellations, are revised to change the phrases "hand cancellations" and "hand-stamped cancellations" to "rubber composition cancellations," since not all such cancellations are done "by hand." Some are done by machine.

Section 176.22, Backdating, is added to specify that backdating of mail to comply with customer requests is prohibited unless authorized specifically by the General Manager, Philatelic Sales Division.

* * * * *

* * * * *

Section 441.121, *Application,* is revised to include the procedures for Form 3541–EX.

Section 441.151, *Application,* is revised to specify that if the frequency of the publication will include more than one issue during a week, Form 3541–EX must be completed and submitted with Form 3541, *Statement of Mailing—2nd Class Pubs Except Requester Publications.*

Section 444.1, *Change in Title, Frequency, or Office of Publication,* is revised to state that when the frequency of a publication is being changed to one that includes more than one issue during a week, Form 3541–EX must be completed by the publisher and submitted with Form 3510, *Application for Additional Entry, Reentry, or Special Rate Request for Second-Class Publication.*

Part 445, *Applications for Exceptional Dispatch and for the Acceptance of Air Freighted Second-Class Mail at Airport Mail Facilities (AMFs),* is revised in its entirety to incorporate the regulations that govern the acceptance at AMFs of second-class publications that were sent to those facilities as air freight.

Exhibit 447 is revised to add Form 3541–EX as page 4.

* * * * *

Sections 463.32a, *Optional City Sacks,* 464.32a, *Optional City Sacks,* 667.132b, *Optional City Sacks, and* 767.222, *Optional City Sacks,* are revised to include new labeling instructions for optional city sacks of second-, third-, and fourth-class mail. The requirements will make it possible to differentiate between labels of an optional city sack and a five-digit sack.

* * * * *

Sections 667.11, *General,* 667.911, and 667.92, *Authorizing Commingling,* are revised to clarify the exemption from packaging requirements for bulk rate third-class mailings.

* * * * *

Chapter Nine, Special Services. Section 917.342c, *Affixing Stamps or Meter Strips,* is revised to update the procedures for using Form 3611, *Postage Due Statement for Automated BRM,* when deducting postage charges from the mailer's Business Reply Advance Deposit Account.

Section 917.622, *Cards,* is revised to delay the implementation of the enforcement of basis paper weight requirements until January 1, 1989.

Minor, nonsubstantive changes include: 137.274c(1), 137.274c(2)(c), 144.37, 145.222, Exhibit 145.51b. Exhibit 145.51c, Exhibit 145.51d, 146.32, 262.2, 263.3, 294, 364.42a, 364.44, 425.225, 482.23a, 482.23b, 622.144f(1), 622.144f(2), 622.154f(1), 622.154f(3). 622.164d(1), 622.164f, 622.164f(5), 667.132a, 667.311b(5), and 682.

DEPARTMENT OF THE INTERIOR

Office of Hearings and Appeals

43 CFR Part 4

Department Hearings and Appeals Procedures

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Final rule.

SUMMARY: The Office of Hearings and Appeals (OHA) in the Department of the Interior (DOI) is revising its rules at 43 CFR Part 4, Subpart B, by adding a new provision to establish a procedure enabling a party to an administrative proceeding to submit privileged or confidential information as evidence and request limitation on the disclosure of that evidence. Certain existing regulations are also being revised to include references to the new provision.

EFFECTIVE DATE: January 9, 1989.

SUPPLEMENTARY INFORMATION:

I. Discussion of Rule

On June 3, 1987, OHA published its proposed rulemaking concerning the submission of confidential information in OHA proceedings in the **Federal Register** (52 FR 20755–57), indicating that comments would be accepted through July 6, 1987. Six letters containing comments from the public were received.

This rule amends Subpart B by adding a new section, 43 CFR 4.31, which establishes a procedure for submitting documents containing confidential information and for requesting limitation on the disclosure of such documents. The new section establishes conditions under which the confidential information may be provided to other participants to the proceeding. If such conditions are not adequate to protect the confidentiality of information forming the basis for a decision, the rule allows the decisionmaker to consider such evidence without disclosing it to the parties, but only if the proceeding is not conducted pursuant to 5 U.S.C. 554.

The rule amends § 4.22(b) by adding a provision to except documents and requests filed pursuant to § 4.31 from the general requirement for service on all parties. Subsection 4.31 documents and requests would be served only as required by that section.

Section 4.22(c) is amended by adding a provision for securing confidential information against unauthorized disclosure and retaining it with the official record.

The rule amends § 4.24(a)(4) to except evidence reviewed pursuant to § 4.31(d) from the provision that no decision can be based on evidence not open to inspection by the parties.

The rule amends § 4.27(b) by providing an exception for the disposition of *ex parte* matters as authorized by law from the prohibition of any *ex parte* communication as defined in that rule.

The final rule mainly differs from the proposed rule in its organization, not its substance. The provisions of § 4.31(e) of the proposed rule, for example, have been redesignated as § 4.31(d) and revised to more closely parallel the provisions of § 4.31(a). Changes were also made in response to public comments. Any reference in this preamble to a specific subsection of the rule relates to the final rule unless otherwise specified.

OHA notes that this rulemaking is not intended to affect the availability of information subject to disclosure under the FOIA, 5 U.S.C. 552; nor is it intended to authorize the withholding from Congress of information to which Congress is entitled under law.

II. Discussion of the Public Comments

One comment observed that in amending the first sentence of § 4.27(b)(1), the proposed rule would delete the remaining sentences of that subsection. The final rule retains those remaining sentences.

One comment noted that § 4.31, as proposed, required a party to submit, together with the document containing confidential information, a copy from which the information had been deleted. The comment observes that there may be circumstances where such deletion would be nearly impossible. For example, if the confidential information is embodied in a map, it would be extremely difficult to obliterate the confidential information without almost completely obscuring the information on the map. In response to this problem, the final rule provides that if it is not practicable to submit a copy of the document because deletion of the information would render the document unintelligible, a description of the document may be substituted.

One comment questions why the rule requires that a submitter of confidential information indicate in the document that it is exempt or contains information which is exempt from disclosure. This provision appeared in § 4.31(a)(2) of the proposed rule and now appears in § 4.31 (a)(1) and (d)(1). The primary purpose of this provision is to ensure that Government employees handling the document are aware of its exemption from disclosure so that they will take the necessary precautions to maintain its confidentiality.

One comment notes that § 4.31(d), as proposed, required the party requesting confidential information to adhere to the agreements against disclosure, but suggested that such agreement be verified in writing. We have responded to concerns about the enforceability of this provision by adding language to final § 4.31(c) requiring the party to agree in writing under oath to protect confidential information.

Several comments criticized the provision in § 4.31(d) that enables the presiding officer or an appeals board to consider information not available to all the parties to a proceeding. Some commenters contend that due process requires that such information always be made available, regardless of whether or not a proceeding arises under 5 U.S.C. 554.

Some of the concern appears to arise from a misunderstanding of the scope of the rule. Documents containing confidential information cannot be withheld under § 4.31(d) from another party in a proceeding under 5 U.S.C. 554. Nor can a document be withheld under § 4.31(d) from another party to any type of proceeding if that party's agreement to abide by the requirements of § 4.31(c) would adequately protect the confidentiality of the documents.

Several comments observe that § 4.31(d) provides that confidential information could be withheld from a party only if disclosure is "prohibited by law." The commenters question the breadth or narrowness of this provision, and note the difference between this standard and the provision set forth at § 4.31(a). It is important to note that subsection (a) applies to any proceeding and does not authorize the withholding of information from parties to a case who agree to keep the information confidential. Rather, that subsection concerns the exclusion of confidential information from the public record, and OHA considers it appropriate to give full effect to the exemptions contained in the FOIA. Subsection (d) differs from subsection (a) because it sets forth the requirements for withholding information from a party to a case. Under subsection (d), an FOIA exemption does not provide a sufficient basis for withholding information from a party who agrees to keep the information confidential; rather the party requesting nondisclosure under that provision must demonstrate that disclosure is prohibited by law. As we indicated in the notice of proposed rulemaking, the final rulemaking merely codifies the standard for disclosure which the Interior Board of Land Appeals has already applied a number of years. *Southern Union Exploration Co.*, 51 IBLA 89 (1980).

One comment refers to the provision in § 4.31(d)(2) that if the request for nondisclosure is intended to protect a nonparty, the party submitting the document must demonstrate that the nonparty refused to consent to the disclosure of the evidence to the other parties to the proceeding. The comment expresses concern that certain agencies tend to be overly protective in claiming that information upon which a decision is based is proprietary and also in claiming that agency-generated information is proprietary. To remedy this perceived problem, the comment recommends that the rule be clarified to indicate that "party" refers to the agency and not just to private parties. We reject this comment because we do not consider such clarification necessary. The procedural regulations under Part 4 are replete with references to party or person, and OHA has

required Government agencies as well as private parties to adhere to those regulations. Accordingly, a bureau or office of the Department can submit confidential information for review by OHA only in the same manner as a private party pursuant to this final rule.

One comment notes that § 4.31(d)(3) provides that a party requesting nondisclosure may withdraw the evidence if the request is denied, but further provides that the evidence may not be withdrawn if an FOIA request, administrative appeal from the denial of a request, or a lawsuit seeking release of the information is pending. The comment suggests that these provisions are inconsistent and recommends that the second provision be deleted. We have not deleted this provision. When a document is submitted pursuant to § 4.31, it arguably becomes an agency record for the purposes of the FOIA, and if an FOIA request has been filed, the agency may not allow the withdrawal of the information until final disposition of the FOIA request.

One comment expresses concern about the potential applicability of these rules to states and tribes operating under delegation or cooperative agreements with the Secretary under the Federal Oil and Gas Royalty Management Act (FOGRMA), 30 U.S.C. 1701. The comment observes that such delegates have agreed to abide by Federal disclosure and confidentiality laws and assume the liability for penalties for wrongful disclosure. The comment asserts that FOGRMA requires the Secretary to make available to such delegates all information including trade secrets and other confidential data bearing on the collection of royalties from Federal production in the particular state or tribal area. Accommodation of this concern requires no revision of the rule because the rule does not purport to restrict the availability of information to any person who has a statutory right to receive it. The regulation only restricts disclosure of information which is "exempt from disclosure" or where disclosure to a party would be "prohibited by law." If a person is entitled by statute or agreement to receive the information, such information is neither exempt from disclosure to that person nor is such disclosure prohibited by law.

III. Procedural Matters

Federal Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3507.

Executive Order 12291

The DOI has examined this rule according to the criteria of Executive Order 12291 (Feb. 17, 1981) and has determined that it is not major and does not require a regulatory impact analysis because the rule only sets forth the details of necessary procedures for hearings and appeals.

Regulatory Flexibility Act

The DOI has also determined, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, that this rule will not have a significant economic impact on a substantial number of small entities because the rule simply provides procedures for administrative review of agency actions.

National Environmental Policy Act

The Office of Hearings and Appeals has determined, on the basis of the categorical exclusion of regulations of a procedural nature set forth at 516 DM 2 Appendix 1, § 1.10, that this rule will not significantly affect the quality of the human environment.

Drafting

This rule was drafted by James R. Kleiler, an Attorney-Adviser with the Interior Board of Land Appeals in OHA.

List of Subjects in 43 CFR Part 4

Administrative practice and procedure, Lawyers.

Date: November 7, 1988.

Earl E. Gjelde,

Under Secretary.

Accordingly, 43 CFR Part 4, Subpart B, is revised as follows:

PART 4—DEPARTMENT HEARING AND APPEALS PROCEDURES

1. The authority citation for Part 4 continues to read as follows:

Authority: R.S. 2478, as amended, 43 U.S.C. 1201, unless otherwise noted.

Subpart B—General Rules Relating to Procedures and Practice

2. Section 4.22 is amended by revising paragraphs (b) and (c) to read as follows:

§ 4.22 Documents.

* * * * *

(b) *Service generally.* A copy of each document filed in a proceeding before the Office of Hearings and Appeals must be served by the filing party on the other party or parties in the case, except as otherwise provided by § 4.31. In all cases where a party is represented by an attorney, such attorney will be recognized as fully controlling the case on behalf of his/her client, and service of any document relating to the proceeding shall be made upon such attorney in addition to any other service specifically required by law or by order of a presiding official or an appeals board. Where a party is represented by more than one attorney, service upon one of the attorneys shall be sufficient.

(c) *Retention of documents.* All documents, books, records, papers, etc., received in evidence in a hearing or submitted for the record in any proceeding before the Office of Hearings and Appeals will be retained with the official record of the proceedings. However, the withdrawal of original documents may be permitted while the case is pending upon the submission of true copies in lieu thereof. When a decision has become final, an appeals board in its discretion may, upon request and after notice to the other party or parties, permit the withdrawal of original exhibits or any part thereof by the party entitled thereto. The substitution of true copies of exhibits or any part thereof may be required by the Board in its discretion as a condition of granting permission for such withdrawal. Transcripts of testimony and/or documents received or reviewed pursuant to § 4.31 of these rules shall be sealed against disclosure to unauthorized persons and retained with the official record, subject to the withdrawal and substitution provisions hereof.

* * * * *

3. Section 4.24 is amended by revising paragraph (a)(4) to read as follows:

§ 4.24 Basis of decision.

(a) * * *

(4) In any case, no decision after a hearing or on appeal shall be based upon any record, statement, file, or similar document which is not open to inspection by the parties to the hearing or appeal, except for documents or other evidence received or reviewed pursuant to § 4.31(d).

* * * * *

4. Section 4.27 is amended by revising paragraph (b)(1) to read as follows:

§ 4.27 Standards of conduct.

* * * * *

(b) *Ex parte communication*—(1) *Prohibition.* Except to the extent required for the disposition of *ex parte* matters as authorized by law, there shall be no communication concerning the merits of a proceeding between any party to the proceeding or any person interested in the proceeding or any representative of a party or interested person and any Office personnel

involved or who may reasonably be expected to become involved in the decisionmaking process on that proceeding, unless the communication, if oral, is made in the presence of all other parties or their representatives, or, if written, is furnished to all other parties. Proceedings include cases pending before the Office, rulemakings amending this Part 4 that might affect a pending case, requests for reconsideration or review by the Director, and any other related action pending before the Office. The terms "interested person" and "person interested in the proceeding" include any individual or other person with an interest in the agency proceeding that is greater than the interest that the public as a whole may have. This regulation does not prohibit communications concerning case status or advice concerning compliance with procedural requirements unless the area of inquiry is in fact an area of controversy in the proceeding. Any oral communication made in violation of this regulation shall be reduced to writing in a memorandum to the file by the person receiving the communication and shall be included in the record. Any written communication made in violation of this regulation shall be included in the record. In proceedings other than informal rulemakings copies of the memorandum or communication shall be provided to all parties, who shall be given an opportunity to respond in writing.

* * * * *

5. A new § 4.31 is added to Subpart B to read as follows:

§ 4.31 Request for limiting disclosure of confidential information.

(a) If any person submitting a document in a proceeding under this part claims that some or all of the information contained in that document is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (5 U.S.C. 552), is information referred to in section 1905 of title 18 of the United States Code (disclosure of confidential information), or is otherwise exempt by law from public disclosure, the person:

(1) Must indicate in the document that it is exempt, or contains information which is exempt, from disclosure;

(2) Must request the presiding officer or appeals board not to disclose such information except to the parties to the proceeding under the conditions provided in paragraphs (b) and (c) of this section, and must serve the request upon the parties to the proceeding. The request shall include the following items:

(i) A copy of the document from which has been deleted the information for which the person requests nondisclosure; if it is not practicable to submit such copy of the document because deletion of the information would render the document unintelligible, a description of the document may be substituted;

(ii) A statement specifying why the information is confidential, if the information for which nondisclosure is requested is claimed to come within the exception in 5 U.S.C. 552(b)(4) for trade secrets and commercial or financial information;

(iii) A statement specifying the justification for nondisclosure, if the information for which nondisclosure is requested is not within the exception in 5 U.S.C. 552(b)(4).

(b) If information is submitted in accordance with paragraph (a) of this section, the information will not be disclosed except as provided in the Freedom of Information Act, in accordance with Part 2 of this title, or upon request from a party to the proceeding under the restrictions stated in paragraph (c) of this section.

(c) At any time, a party may request the presiding officer or appeals board to direct a person submitting information under paragraph (a) of this section to provide that information to the party. The presiding officer or board will so direct, unless paragraph (d) of this section is applicable, if the party requesting the information agrees under oath in writing:

(1) Not to use or disclose the information except in the context of the proceeding conducted pursuant to this part; and

(2) To return all copies of the information at the conclusion of the proceeding to the person submitting the information under paragraph (a) of this section.

(d) If any person submitting a document in a proceeding under this Part other than a hearing conducted pursuant to 5 U.S.C. 554 claims that a disclosure of information in that document to another party to the proceeding is prohibited by law, notwithstanding the protection provided under paragraph (c) of this section, such person:

(1) Must indicate in the original document that it contains information of which disclosure is prohibited;

(2) Must request that the presiding officer or appeals board review such evidence as a basis for its decision without disclosing it to the other party or parties, and serve the request upon the parties to the proceeding. The request shall include a copy of the document or description as required by paragraph (a)(2)(i) of this section and state why disclosure is prohibited, citing pertinent statutory or regulatory authority. If the prohibition on disclosure is intended to protect the interest of a person who is not a party to the proceeding, the party making the request must demonstrate that such person refused to consent to the disclosure of the evidence to other parties to the proceeding.

(3) If the presiding officer or an appeals board denies the request, the person who made the request shall be given an opportunity to withdraw the evidence before it is considered by the presiding official or board unless a Freedom of Information Act request, administrative appeal from the denial of a request, or lawsuit seeking release of the information is pending.

(e) If the person submitting a document does not submit the copy of the document or description required by paragraph (a)(2)(i) or paragraph (d)(2) of this section, the presiding officer or appeals board may assume that there is no objection to public disclosure of the document in its entirety.

(f) Where a decision by a presiding officer or appeals board is based in whole or in part on evidence not included in the public record or disclosed to all parties, the decision shall so state, specifying the nature of the evidence and the provision of law under which disclosure was denied, and the evidence so considered shall be retained under seal as part of the official record.

43 CFR Public Land Order 6691

[CO-930-09-4214-10; C-44666]

Withdrawal of National Forest System Land for Protection of Deep Creek Caves, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws approximately 2,761 acres of National Forest System lands from mining for a period of 100 years for the protection of Deep Creek Caves near Glenwood Springs, Colorado. These lands have been and remain open to such other forms of disposition as may by law be made of National Forest System lands and to mineral leasing.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM, Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215, 303-236-1768.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described National Forest System lands, which are under the jurisdiction of the Secretary of Agriculture, are hereby withdrawn from location and entry under the United States mining laws (30 U.S.C. Ch. 2) to protect unique and irreplaceable geologic features:

Sixth Principal Meridian

White River National Forest

T. 4 S., R. 87 W.,
Sec. 16: Lots 1-4;
Sec. 17: Lots 1-8, S½N½, E½W½SW¼, E½SW¼, SE¼;
Sec. 18: Lots 5-12, E½W½, W½W½NE¼, W½SE¼;
Sec. 19: Lots 5-12, W½SE¼NE¼, W½E½, E½W½, W½NE¼SE¼, SE¼SE¼;
Sec. 20: Lots N½NE¼, NE¼NW¼, SW¼SW¼, SW¼SE¼SW¼;
Sec. 30: Lots 5, 6, 8, E½NW¼, NE¼.

The areas described aggregate approximately 2,761.62 acres of National Forest System lands.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of National Forest System lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 100 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

J. Steven Griles,

Assistant Secretary of the Interior.

November 29, 1988.

BILLING CODE 4310-JB-M

43 CFR Public Land Order 6693

[WY-930-09-4214-10; WYW 101899]

Withdrawal of Public Land for Natural Corrals Archeological Site; WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws 357.34 acres of public land from surface entry and mining for a period of 20 years for the Bureau of Land Management to protect the Natural Corrals Archeological Site. The land has been and remains open to mineral leasing.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Tamara Gertsch, BLM, Wyoming State Office, P.O. Box 1828, Cheyenne, Wyoming 82003, 307-772-2072.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public land is hereby withdrawn from settlement, sale, location, or entry under the general land laws, including the United States mining laws (30 U.S.C. Ch. 2), but not from leasing under the mineral leasing laws, to protect a Bureau of Land Management archeological site:

Sixth Principal Meridian

T. 21 N., R. 101 W.,
Sec. 18, lots 1-3, W½NE¼, E½NW¼, NE¼SW¼, NW¼SE¼.

The area described contains 357.34 acres in Sweetwater County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the land under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

DEPARTMENT OF JUSTICE

48 CFR Parts 2801, 2804, 2806, 2845, and 2852

[Justice Acquisition Circular 88-2]

Amendments to the Justice Acquisition Regulations (JAR) Regarding Waiver of Requirements for Preaward Contract Review, Increase in Contract Review Thresholds, and Government Property

AGENCY: Office of the Procurement Executive, Justice Management Division, Justice.

ACTION: Final rule.

SUMMARY: Justice Acquisition Circular (JAC) 88-2 amends the JAR, 48 CFR, Chapter 28 as follows: To amend Part 2801 to implement Attorney General Order 1298-88 which delegates authority to the Assistant Attorney General for Administration and/or the Procurement Executive to waive any requirement for preaward contract review, except those specifically required by statute; to increase the contract review threshold; to add a new Part 2845 to provide Government property reporting requirements; and, make editorial amendments.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: W.L. Vann, Procurement Executive, Justice Management Division, telephone (202) 272-8354.

SUPPLEMENTARY INFORMATION: The determination is hereby made that these amendments must be issued as a final rule. Any delay in issuing these amendments could impair the Department's ability to provide timely contractual support to its ongoing activities. These amendments were not published for public comment because they do not have an effect beyond the internal operating procedures of the agency.

The Director, Office of Management and Budget, by memorandum dated December 14, 1984 exempted agency procurement regulations from review under Executive Order 12291 except for selected areas. The exemption applies to this rule. The Department of Justice certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601-612).

List of Subjects in 48 CFR Parts 2801, 2804, 2806, 2845, and 2852.

Government procurement.

Harry H. Flickinger,

Assistant Attorney General for Administration.

For the reasons set out in the preamble, Title 48, Chapter 28 of the Code of Federal Regulations is amended as follows.

The authority citation for Parts 2801, 2804, 2806, and 2852 continues to read as follows:

Authority: 28 U.S.C. 510, 40 U.S.C. 486(c); 28 CFR 0.75(j); 28 CFR 0.76(j); and, 28 CFR Part 39.

PART 2801—DEPARTMENT OF JUSTICE ACQUISITION REGULATION SYSTEM

Subpart 2801.3—[Amended]

2801.301 [Amended]

1. Section 2801.301(c) is amended by adding "(AAG/A)" at the end of the last sentence.

Subpart 2801.6—[Amended]

2. A new section 2801.602-3 Ratification of unauthorized commitments is added as follows:

2801.602-3 Ratification of unauthorized commitments.

The HCA may delegate to subordinate individuals approval of ratification requests of $5,000 and below; however, in no case shall the authority be delegated below the level of chief of the contracting office.

3. Section 2801.602-70 Office of the Procurement Executive is amended by revising (a), (b), (c), and (d) to read as follows:

2801.602-70 Office of the Procurement Executive.

(a) Prior to execution of any contractual action which:

(1) Exceeds $50,000 and was solicited using other than full and open competition procedures, including amendments or modifications to these contracts which cause the total contract costs to exceed $50,000;

(2) Exceeds $100,000 and was solicited using full and open competition procedures, including amendments or modifications to these contracts which cause total contract costs to exceed $100,000; or,

(3) All contracts evaluated on the basis of system life costs and/or are evaluated on the basis of option pricing regardless of dollar value,

the contracting officer shall forward the proposed contract action to the Office of the Procurement Executive for review. For the purposes of this section contractual actions include all pre-award and post-award contractual actions above the thresholds in paragraphs (a)(1) through (3) above, including but not limited to modifications, ratifications, and options but excluding orders from Federal Supply Schedules and orders from Basic Ordering Agreements. Review by the Office of the Procurement Executive is applicable to all organization elements in the Department with the exception of the FBI. It is the responsibility of the FBI's Contract Review Board to ensure that procurement actions are awarded in conformity with applicable statutes, regulations, and procedures. This exemption does not exempt the FBI from other oversight responsibilites of the Office of the Procurement Executive, including Procurement Executive review and approval of justifications for other than full and open competition on contracts over $10 million.

(b) Prior to submission to the Procurement Executive, the legal office for each bureau-level procurement activity is responsible for reviewing and approving all such procurement actions for legal sufficiency.

(c) The AAG/A and/or the Procurement Executive may waive any requirement for preaward contract review, except one specifically required by statute. Requests for waivers shall be submitted to the Procurement Executive in accordance with paragraph (d) of this section.

(d) Except for extreme emergencies, waiver requests must be in writing and include a detailed explanation as to why a waiver is required as well as information explaining reasons why a contract or class of contracts cannot be reviewed on a preaward basis. Telephone waivers may be granted in extreme emergencies. All contract documents that are available at the time a waiver request is made must accompany the request for review. All available documents will be reviewed to assure that the award is legally sufficient prior to the granting of a waiver. A postaward review of the completed contract file is required. Waivers will not be granted near the end of a fiscal year for the purpose of obligating year end funds.

* * * * *

2801.603 [Amended]

4. Section 2801.603(b)(2) is amended by adding the word "than" in the last sentence between "lower" and "the".

PART 2804—ADMINISTRATIVE MATTERS

Subpart 2804.70—[Removed]

5. Subpart 2804.70 is removed.

VOL 53 ISS 237 DE 9 1988 UMI

PART 2806—COMPETITION REQUIREMENTS

Subpart 2806.5—[Amended]

2806.501 [Amended]

6. Section 2806.501(b) is amended by removing the words "or be in direct supervision of" from the last sentence.

SUBCHAPTER G—CONTRACT MANAGEMENT

7. Part 2845 is added as follows:

PART 2845—GOVERNMENT PROPERTY

2845.000 Scope of part.

Subpart 2845.1—General

2845.102 Policy.
2845.105 Records of Government property.

Subpart 2845.5—Management of Government Property in the Possession of Contractors

2845.505–14 Reports of Government property.

Subpart 2845.6—Reporting, Redistribution, and Disposal of Contractor Inventory

2845.603 Disposal methods.

Authority: 28 U.S.C. 510; 40 U.S.C. 486(c); 28 CFR 0.75 (j) and 28 CFR 0.76(j).

2845.000 Scope of part.

This part prescribes policies and procedures for providing Department of Justice property to contractors; contractors' use, and management of Departmental property; and reporting, redistribution and disposal of contractor property.

Subpart 2845.1—General

2845.102 Policy.

Subject to the provisions in Part 45 of the Federal Acquisition Regulations:

(a) The contracting officer is responsible for the delivery of Government property to contractors and serves as property administrator unless property administration responsibilities are explicitly delegated in the contract. Property management responsibilities may be delegated to contracting officer's technical representatives or other representatives authorized to act in the contracting officer's behalf with respect to Government-furnished property.

(b) The contracting officer shall ensure that contractor property responsibilities are clearly delineated and that, consistent with internal bureau policies and procedures, requirements are coordinated with the bureau property managers before award and throughout the course of a contract in which property is furnished.

2845.105 Records of Government property.

If departmental elements maintain the Government's official property management records, the contract records may be kept as a separate account in the bureau's internal property management system, in which case the contracting officer or formally designated property administrator shall serve as custodian of the account.

Subpart 2845.5—Management of Government Property in the Possession of Contractors

2845.505–14 Reports of Government property.

(a) In compliance with FAR 45.505–14, by January 31 of each year, DOJ contractors shall furnish the cognizant contracting officer an annual report of the Department of Justice property for which they are accountable as of the end of the calendar year.

(b) By March 1 of each year, bureaus shall submit a summary report of Departmental property furnished under each contract, as of the end of the calendar year, to the Facilities and Administrative Services Staff, Justice Management Division. The report shall be categorized in accordance with FAR Subpart 45.505 and shall include contracts for which the bureau maintains the official government records.

Subpart 2845.6—Reporting, Redistribution, and Disposal of Contractor Inventory

2845.603 Disposal methods.

Policies pertaining to reutilization and disposal of Department of Justice property, including requirements for internal screening, waivers, and disposal reporting, are prescribed in the Justice Property Management Regulations Subpart 128–43. Unless otherwise specified, the "plant clearance officer" shall be a designated utilization and disposal representative of a bureau's property management office.

PART 2852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 2852.1—[Amended]

2852.105–70 [Amended]

8. Paragraph 2852.105–70(b) is amended by removing "DOJ" from the last sentence.

Subpart 2852.2—[Amended]

2852.232–79 [Amended]

9. Clause 2852.232–79 Inspection and Acceptance is revised to read as follows:

* * * * *

Inspection and Acceptance

(a) Inspection and acceptance of the supplies or services to be furnished hereunder shall be performed at *——— by the COTR or his designated representative, in accordance with the Inspection clause and any other provisions specified in this contract. The Government reserves the right to conduct any tests it deems reasonably necessary to ensure that the supplies or services provided conform in all respects to the contract specifications. Supplies or services which upon inspection are found not to be in conformance with contractual specifications shall be promptly rejected and notice of such rejection, together with appropriate instructions, will be provided the contractor by the Contracting Officer.

(b) The Government will use its best efforts to inspect and accept/reject the supplies or services provided within **——— days. Failure of the Government to so inspect the supplies or services within the above stated time shall not be construed as acceptance of such supplies or services.

(End of Clause)
(Oct. 1988)

* Contracting officer to insert the appropriate place of inspection:

** Contracting officer to insert the appropriate number of days required for inspection and acceptance.

[FR Doc. 88–28082 Filed 12–8–88; 8:45 am]
BILLING CODE 4410–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1152

[Ex Parte No. 274 (Sub-No. 11A)]

Abandonment Regulations; Costing (Implementation of the Railroad Accounting Principles Board Findings)

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission is adopting abandonment (and subsidy) rule changes in 49 CFR Part 1152 to implement the recent findings of the Railroad Accounting Principle's Board. The proposed rules were published in the **Federal Register** on May 16, 1988, at 53 FR 17234. Specifically, the Commission will: (1) Determine opportunity cost in abandonment proceedings (and "return on investment" in subsidy proceedings) using the nominal cost of capital rate; (2) include

as a reduction (or increase) of opportunity cost (and return on investment in subsidy proceedings) any projected holding gains (or losses) that would accrue to the carrier from retention of the branch line assets for a one-year period; and (3) add a new "Forecast Year" column to Exhibit 1 showing the projected operating results on the line during the 12-month period beginning with the month of the abandonment filing.

Also, we have decided to continue our practice of not making a deferred tax adjustment in abandonment (and subsidy) proceedings.

EFFECTIVE DATE: The rules are effective January 9, 1989.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 275–7489 (TDD for hearing impaired: (202) 275–1721.)

SUPPLEMENTARY INFORMATION: The revised rules are set forth below.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pickup in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 275–1721.)

The rule modifications will not have a significant economic impact on a substantial number of small entities. Nor will this action significantly affect either the quality of the human environment or energy conservation.

List of Subjects in 49 CFR Part 1152

Administrative practice and procedure, Railroads, Reporting and recordkeeping requirements, Uniform System of Accounts, Abandonment and discontinuances, Investigations, Public use conditions, Environmental protection, National Trail System, National resources, Recreation and recreation areas.

Decided: December 2, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips. Commissioners Lamboley and Phillips concurred with separate expressions.

Noreta R. McGee,

Secretary.

Title 49, Subtitle B, Chapter X, Part 1152 of the Code of Federal Regulations is amended as follows:

PART 1152—ABANDONMENT AND DISCONTINUANCE OF RAIL LINES AND RAIL TRANSPORTATION UNDER 49 U.S.C. 10903

1. The authority citation for 49 CFR Part 1152 continues to read as follows:

Authority: 5 U.S.C. 553, 559 and 704; 11 U.S.C. 1170; 16 U.S.C. 1247(d); and 49 U.S.C. 10321, 10362, 10505, 10903, 11161, 11162, 11163, *et seq.*

2. In Subpart A, § 1152.2, paragraphs (h) through (o) are redesignated as paragraphs (i) through (p) and a new paragraph (h) is added to read as follows:

§ 1152.2 Definitions.

* * * * *

(h) "Forecast Year" means the 12-month period, beginning with the first day of the month in which the application is filed with the Commission, for which future revenues and costs are estimated.

* * * * *

3. In Subpart C, § 1152.22, paragraphs (d)(3) through (d)(5) are redesignated as (d)(4) through (d)(6), a new paragraph (d)(3) is added and paragraph (e)(2) is revised to read as follows:

§ 1152.22 Contents of application.

* * * * *

(d) * * *

(3) The carrier shall compute an estimate of the future revenues attributable, avoidable costs and reasonable return on the value for the line to be abandoned, for the "Forecast Year" (as defined in § 1152.2(h)) in the form called for in Exhibit 1. The carrier shall fully support and document all dollar amounts shown in the Forecast year column including an explanation of the rationale and key assumptions used to determine the Forecast Year amounts.

* * * * *

(e) * * *

(2) Identification of significant users, as defined in § 1152.2(n), by name, address, principal commodity, and by tonnage and/or carloads for each of the 2 calendar years immediately preceding the filing of the abandonment or discontinuance application and for that part of the current year for which information is available.

* * * * *

4. In Subpart D, § 1152.30, paragraph (a)(2) is revised to read as follows:

§ 1152.30 General.

(a) * * *

(2) This subpart also sets forth a method by which the carrier may establish its Forecast Year estimates and Estimated Subsidy Payment to be included in its application (§ 1152.22(d) of this part). Furthermore, an offeror of financial assistance may use this method to formulate a subsidy offer and/or Proposed Subsidy Payment under 49 U.S.C. 10905 and § 1152.27 of Subpart C of this part.

* * * * *

5. In Subpart D, § 1152.34 is amended by revising paragraphs (a)(1), (b)(3), (c)(1) introductory text, (d) introductory text, (d)(2), (d)(3), (d)(4), (d)(5) and (d)(6) and adding a new paragraph (e) to read as follows:

§ 1152.34 Return on investment.

* * * * *

(a)(1) Return on investment-freight cars. Return on investment-freight cars shall be determined by multiplying the current values of each type of car developed in § 1152.32(g)(1) by one minus the ratio of accumulated depreciation to the total original cost investment. This will determine the net current value for each type of car. The net current value for each type of car will then be multiplied by the nominal rate of return calculated in paragraph (d) of this section to obtain nominal return on investment for each type of car. The total return on investment will then be calculated by deducting the projected holding gain (loss) for the forecast and or subsidy year from the nominal return on investment for each type of car.

* * * * *

(b) * * *

(3) The return on investment for each category or type locomotive shall be the nominal rate of return less the holding gain (loss). The nominal rate of return is calculated by multiplying the replacement cost determined in paragraph (b)(1) of this section by the nominal rate of return determined in paragraph (b)(2) of this section. The holding gain (loss) shall be gain (loss) projected to occur during the forecast and/or subsidy year.

* * * * *

(c) * * *

(1) The investment base to which the nominal return element shall apply shall be the sum of:

* * * * *

(d) Reasonable return. A rail carrier shall furnish to the Commission, and to any financially responsible person considering making a offer of a rail service continuation payment, a substantiated statement showing its current nominal cost of capital. The railroad's nominal cost of capital shall be the current before tax cost of capital, weighted to the capital structure, and adjusted for the effects of the combined

statutory Federal and State income tax rates. This rate of return expressed as a percent, shall be calculated as follows:

* * * * *

(2) The current nominal cost of debt shall be determined by taking the average of all debt instruments (including bonds, equipment trust certificates, financial lease arrangement, et cetera) issued by the carrier in the most recent 12 month period. The debt cost calculated by this procedure is a before-tax rate and is not adjusted for inflation or income taxes.

(3) The current nominal after tax cost of equity shall be an amount equal to that which a prudent investor would expect to earn through investment in the market place. The current after tax nominal cost of equity is divided by 1 minus the combined statutory Federal and State income tax rates. This will develop the nominal cost of equity on a before tax basis.

(4) The current nominal before-tax cost of debt is multiplied by the current percentage of debt to total capital to obtain a weighted before-tax nominal cost of current debt.

(5) The current nominal before-tax cost of equity is multiplied by the current percentage of equity to total capital to obtain a weighted nominal before-tax cost of current equity.

(6) The results of paragraphs (d)(4) and (d)(5) are added together to determine the current nominal cost of capital.

(e) Holding gain (loss)-road properties. The railroad shall determine the holding gain (loss) that is projected to occur during the forecast and/or subsidy year.

6. In Subpart D, § 1152.36 is revised to read as follows:

§ 1152.36 Submission of revenue and cost data.

The following information shall be submitted by applicant as Exhibit 1 to an abandonment or discontinuance application (§ 1152.22(d)) and shall be developed in accordance with the methodology established in §§ 1152.31 through 1152.35, as applicable. Such information, form and methodology shall also be used by an offeror of financial assistance to formulate a Proposed Subsidy Payment (§ 1152.27).

	Base year operations	Forecast year operations	Projected subsidy year operations
Revenues attributable for—			
1. Freight originated and/or terminated on branch			
2. Bridge traffic			
3. All other revenue and income			
4. Total revenues attributable (lines 1 through 3)			
Avoidable costs for—			
5. On-branch costs (lines 5a through 5i)			
a. Maintenance of way and structures			
b. Maintenance of equipment			
c. Transportation			
d. General administrative			
e. Deadheading, taxi, and hotel			
f. Overhead movement			
g. Freight car costs			
h. Revenue taxes			
i. Property taxes			
6. Off Branch Costs			
7. Total avoidable costs (line 5 plus line 6)			
Subsidization costs for—			
8. Rehabilitation [1]			
9. Administration costs (subsidy year only) [2]			
10. Casualty reserve account [2]			
11. Total subsidization costs (lines 8 through 10)			
Return on value for—			
12. Freight cars			
13. Locomotives			
14. Road properties			
a. Current valuation of road properties			
b. Nominal rate of return			
c. Nominal return on road properties (line 14a times 14b)			
d. Holding gain (Loss) on road properties (forecast and subsidy years only)			
e. Total return on road properties (line 14c minus 14d)			
15. Total return on value (Sum of lines 12, 13, and 14e)			
16. Avoidable loss from operations (line 4 minus line 7)			
17. Estimated forecast year loss from operations (line 4 minus lines 7 and 15)			
18. Estimated subsidy (line 4 minus lines 7, 11, and 15)			

[1] This projection shall be computed in accordance with § 1152.22 (n).
[2] Omit in applications pursuant to §§ 1152.22 and 1152.23.

7. In Subpart E, § 1152.41, paragraph (e)(2) is revised to read as follows:

§ 1152.41 Contents of the application

* * * * *

(e) * * *

(2) Identification of significant users, as defined in § 1152.2(n), by name, address, principal commodity, and by tonnage and/or carloads for that part of the current year and the previous calendar year for which information is available.

* * * * *

BILLING CODE 7035-01-M

VOL 53 ISS 237 DEC 9 1988 UMI

Proposed Rules

Federal Register
Vol. 53, No. 237
Friday, December 9, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 113

[Docket No. 87-185]

Viruses, Serums, Toxins, and Analogous Products; Standard Requirements for Bovine Virus Diarrhea Vaccine etc.

AGENCY: Animal and Plant Health Inspections Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed action would codify in the regulations standard requirements for evaluating Bovine Virus Diarrhea Vaccine, Chlamydia Psittaci Vaccine, Bovine Rhinotracheitis Vaccine, Pasteurella Hamemolytica Vaccine (Bovine Isolate), Pasteurella Multocida Vaccine (Bovine Isolate), and Pasteurella Multocida Vaccine (Avian Isolate). The purpose of this rule is to make the proposed uniform standard requirements and test methods available for use by any producer making the products concerned. Certain section designations would be changed to allow for the addition of the new standard requirements.

DATED: Consideration will be given only to comments postmarked or received on or before January 9, 1989.

ADDRESSES: Send an original and three copies of written comments to Regulatory Analysis and Development, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 87-185. Comments received may be inspected at USDA, Room 1141, South Building, 14th and Independence Ave., SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Peter L. Joseph, Senior Staff Veterinarian, Veterinary Biologies, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, Room 838, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-6332.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This proposed rule contains no new or amended recordkeeping, reporting, or application requirements or any type of information collection requirement subject to the Paperwork Reduction Act of 1980.

Executive Order 12291

This proposed action has been reviewed under Executive Order 12291 and Department Regulation 1512-1 and has been classified as a "Nonmajor Rule."

The proposed action would not have a significant effect on the economy and would not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local Government agencies, or geographic regions. It would also not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises, in domestic markets. Its purpose is to publish in the regulations the test methods and procedures currently used by manufacturers to evaluate certain animal biologics.

Certification Under the Regulatory Flexibility Act

Pursuant to requirements set forth in the Regulatory Flexibility Act (5 U.S.C. 601), the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not result in adverse economic impact on a substantial number of small entities. Its purpose is to codify in the regulations standard requirements for veterinary biological products.

Background

Standard requirements consist of test methods, procedures, and criteria established by the Animal and Plant Health Inspection Service for evaluating biological products for purity, safety, potency, and efficacy. Until such standard requirements for a given biological product are codified in the regulations (9 CFR Part 113), the test methods, procedures, and criteria to be used in the evaluation of the product are developed by the licensees and are written into the applicable Outlines of Production which are required to be filed with the Animal and Plant Health Inspection Service for each veterinary biological product. Outlines of production are required to be approved by the Animal and Plant Health Inspection Service.

When uniform standard requirements for a biological product have been approved by the Animal and Plant Health Inspection Service, they are proposed for codification in the regulations. Each of the standard requirement test methods proposed in these amendments has been used for evaluation of at least two currently licensed products. Development of such requirement is accomplished through cooperative efforts involving academic institutes, research organizations, licensees and applicants, and the National Veterinary Services Laboratories. Codification assures uniformity and general availability of the standard requirements.

These proposed amendments contain the standard requirements for all products containing live and modified live pasteurella haemolytica bacteria and pasteurella multocida bacteria, live chlamydia psittaci, and killed bovine virus diarrhea virus and bovine rhinotracheitis virus.

To allow for the addition of the proposed standard requirements for killed virus vaccines, and new standard requirements in the future, certain sections in this part would be redesignated.

List of Subjects in 9 CFR Part 113

Animal biologics.

Accordingly, 9 CFR Part 113 would be amended as follows:

1. Authority Citation for Part 113 would be revised to read as follows:

Authority: 21 U.S.C. 151-159; 37 FR 28477, 28646; 38 FR 19141.

2. In 9 CFR Part 113—Standard Requirements, certain sections, footnotes, and references thereto, would be redesignated and for the convenience of the user the table of contents would read as follows:

PART 113—STANDARD REQUIREMENTS

Applicability

Sec.
113.1 Compliance.
113.2 Testing aids.
113.3 Sampling of biological products.
113.4 Exemptions to tests.
113.5 General testing.
113.6 APHIS testing.
113.7 Multiple fractions.
113.8 In vitro tests in lieu of animal tests for immunogenicity.
113.9 New potency test.
113.10 Testing of bulk material for export or for further manufacture.

Standard Procedures

113.25 Culture media for detection of bacteria and fungi.
113.26 Detection of viable bacteria and fungi except in live vaccine.
113.27 Detection of extraneous viable bacteria and fungi in live vaccines.
113.28 Detection of mycoplasma contamination.
113.29 Determination of moisture content in desiccated biological products.
113.30 Detection of Salmonella contamination.
113.31 Detection of avian lymphoid leukosis.
113.32 Detection of Brucella contamination.
113.33 Mouse safety tests.
113.34 Detection of hemagglutinating viruses.
113.35 Detection of viricidal activity.
113.36 Detection of pathogens by the chicken inoculation test.
113.37 Detection of pathogens by the chicken embryo inoculation test.
113.38 Guinea pig safety test.
113.39 Cat safety tests.
113.40 Dog safety test.
113.41 Calf safety test.
113.42 Detection of lymphocytic choriomeningitis contamination.
113.43 Detection of chlamydial agents.
113.44 Swine safety test.
113.45 Sheep safety test.
113.46 Detection of cytopathogenic and/or hemadsorbing agents.
113.47 Detection of extraneous agents by the fluorescent antibody technique.

Ingredient Requirements

113.50 Ingredients of biological products.
113.51 Requirements for primary cells used for production of biologics.
113.52 Requirements for cell lines used for production of biologics.
113.53 Requirements for ingredients of animal origin used for production of biologics.
113.54 Sterile diluent.
113.55 Detection of extraneous agents in Master Seed Virus.

Live Bacterial Vaccines

113.64 General requirements for live bacterial vaccines.
113.65 Brucella Abortus Vaccine.
113.66 Anthrax Spore Vaccine—Nonencapsulated.
113.67 Erysipelothrix Rhusiopathiae Vaccine.
113.68 Pasteurella Haemolytica Vaccine, Bovine.
113.69 Pasteurella Multocida Vaccine, Bovine.
113.70 Pasteurella Multocida Vaccine, Avian Isolate.
113.71 Chlamydia Psittaci Vaccine (Feline Pneumonitis), Live Chlamydia.

Inactivated Bacterial Products

113.100 Bacterins, toxoids, bacterin-toxoids, and bacterial extracts.
113.101 Leptospira Pomona Bacterin.
113.102 Leptospira Icterohaemorrhagiae Bacterin.
113.103 Leptospira Canicola Bacterin.
113.104 Leptospira Grippotyphosa Bacterin.
113.105 Leptospira Hardjo Bacterin.
113.106 Clostridium Chauvoei Bacterin.
113.107 Clostridium Haemolyticum Bacterin.
113.108 Clostridium Novyi Bacterin-Toxoid.
113.109 Clostridium Sordellii Bacterin-Toxoid.
113.110 Clostridium Botulinum Type C Bacterin-Toxoid.
113.111 Clostridium Perfringens Type C Toxoid and Bacterin-Toxoid.
113.112 Clostridium Perfringens Type D Toxoid and Bacterin-Toxoid.
113.113 Autogenous Biologics.
113.114 Tetanus Toxoid.
113.115 Staphylococcus Aureus Bacterin-Toxoid.
113.116 Pasteurella Multocida Bacterin, Avian Isolate, Type 4.
113.117 Pasteurella Multocida Bacterin, Avian Isolate, Type 1.
113.118 Pasteurella Multocida Bacterin, Avian Isolate, Type 3.
113.119 Erysipelothrix Rhusiopathiae Bacterin.
113.120 Salmonella Typhimurium Bacterin.
113.121 Pasteurella Multocida Bacterin.
113.122 Salmonella Choleraesuis Bacterin.
113.123 Salmonella Dublin Bacterin.

Killed Virus Vaccines

113.200 General requirements for killed virus vaccines.
113.201 Canine Distemper Vaccine, Killed Virus.
113.202 Canine Hepatitis Vaccine, Killed Virus.
113.203 Feline Panleukopenia Vaccine, Killed Virus.
113.204 Mink Enteritis Vaccine, Killed Virus.
113.205 Newcastle Disease Vaccine, Killed Virus.
113.206 Wart Vaccine, Killed Virus.
113.207 Encephalomyelitis Vaccine, Eastern and Western, Killed Virus.
113.208 Avian Encephalomyelitis Vaccine, Killed Virus.
113.209 Rabies Vaccine, Killed Virus.
113.210 Feline Calicivirus Vaccine, Killed Virus.
113.211 Feline Rhinotracheitis Vaccine, Killed Virus.
113.212 Bursal Disease Vaccine, Killed Virus.
113.213 Pseudorabies Vaccine, Killed Virus.
113.214 Parvovirus Vaccine, Killed Virus (Canine).
113.215 Bovine Virus Diarrhea Vaccine, Killed Virus.
113.216 Bovine Rhinotracheitis Vaccine, Killed Virus.

Live Virus Vaccines

113.300 General requirements for live virus vaccines.
113.301 Ovine Ecthyma Vaccine.
113.302 Distemper Vaccine—Mink.
113.303 Bluetongue Vaccine.
113.304 Feline Panleukopenia Vaccine.
113.305 Canine Hepatitis Vaccine.
113.306 Canine Distemper Vaccine (Ferret Avirulent).
113.307 Canine Distemper Vaccine (Ferret Virulent).
113.308 Encephalomyelitis Vaccine, Venezuelan.
113.309 Bovine Parainfluenza Vaccine.
113.310 Bovine Rhinotracheitis Vaccine.
113.311 Bovine Virus Diarrhea Vaccine
113.312 Rabies Vaccine.
113.313 Measles Vaccine.
113.314 Feline Calicivirus Vaccine.
113.315 Feline Rhinotracheitis Vaccine.
113.316 Canine Parainfluenza Vaccine.
113.317 Parovirus Vaccine (Canine).
113.318 Pseudorabies Vaccine.
113.319–113.324 [Reserved].
113.325 Avian Encephalomyelitis Vaccine.
113.326 Avian Pox Vaccine.
113.327 Bronchitis Vaccine.
113.328 Fowl Laryngotracheitis Vaccine.
113.329 Newcastle Disease Vaccine.
113.330 Marek's Disease Vaccines.
113.331 Bursal Disease Vaccine.
113.332 Tenosynovitis Vaccine.

Diagnostics and Reagents

113.400–113.405 [Reserved].
113.406 Tuberculin, Intradermic.
113.407 Pullorum antigen.
113.408 Avian mycoplasma antigen.
113.409 Tuberculin—PPD Bovis, Intradermic.

Blood Origin Products

113.450 General requirements for biological products of animal blood origin.
113.451 Tetanus Antitoxin.
113.452 Erysipelothrix Rhusiopathiae Antiserum.
113.453 Canine Distemper Hepatitis-Leptospira Antiserum.
113.454 Clostridium Perfringens Type C Antitoxin.
113.455 Clostridium Perfringens Type D Antitoxin.

3. 9 CFR Part 113, under the heading "Live Bacterial Vaccines," would be amended by adding new §§ 113.68 through 113.71 to read as follows:

§ 113.68 Pasteurella Haemolytica Vaccine, Bovine.

Pasteurella Haemolytica Vaccine, Bovine, shall be prepared as a desiccated live culture bacterial vaccine of an avirulent or modified strain of *Pasteurella haemolytica*, identified as

serotype 1. Only Master Seed which has been established as pure, safe, and immunogenic shall be used for vaccine production. All serials of vaccine shall be prepared from the first through the fifth passage from the Master Seed.

(a) The Master Seed shall meet the applicable general requirements prescribed in § 113.64 and the requirements in this section.

(b) Each lot of Master Seed used for vaccine production shall be tested for immunogenicity. The immunogenicity of a selected bacterial count from the lot of Master Seed shall be established as follows:

(1) Fifteen *Pasteurella haemolytica* susceptible calves shall be used as test animals (10 vaccinates and 5 controls) for each route of administration recommended on the label.

(2) An arithmetic mean count of the colony forming units from vaccine produced from the highest passage of the Master Seed shall be established before the immunogenicity test is conducted. The 10 calves to be used as vaccinates shall be injected as recommended on the label with a predetermined quantity of vaccine bacteria. The five control calves shall be held separately from the vaccinates. To confirm the dosage calculation, five replicate titrations shall be conducted on a sample of the bacterial vaccine used. Only plates containing between 30 and 300 colonies shall be considered in a valid test.

(3) The vaccinates and controls shall be examined and their average body temperature determined prior to challenge. Fourteen to twenty-one days postvaccination, the vaccinates and controls shall each be challenged by the respiratory route with a (virulent) pneumonia producing *Pasteurella haemolytica* serotype 1 culture and observed for 5 to 7 days. The challenge culture and instructions for preparation for use shall be furnished or approved by the Animal and Plant Health Inspection Service.

(4) A satisfactory challenge shall be evidenced in the controls by progression of clinical signs consistent with respiratory system infection following challenge, including but not limited to lacrimation, mucoid nasal exudates, expiratory dyspnea, tachypnea, pulmonary rales, and cough possibly terminating in death; moribundity, depression with anorexia; diarrhea with substantial weight loss; or any combination of these symptoms.

(5) Lung lesion response to challenge will be assessed in all calves. Lung lesions will be assessed at necropsy in calves that succumb to challenge. Surviving calves will be euthanized on day five to seven following challenge and lung lesions assessed at necropsy. Lung lesion scores will be used in the assessment of the response to challenge exposure. If a significant difference in lung lesion scores cannot be demonstrated between vaccinates and controls using a scoring system approved by the Animal and Plant Health Inspection Service, the Master Seed is unsatisfactory.

(6) The Master Seed shall be retested for immunogenicity in 3 years unless use of the lot previously tested is discontinued. Only five vaccinates and five controls need to be used in the retest: Provided, that at least four of five vaccinates and four of five controls shall meet the criteria prescribed in paragraphs (b)(4) and (b)(5) of this section.

(7) An Outline of Production change must be made before authority for use of a new lot of Master Seed is granted by the Animal and Plant Health Inspection Service.

(c) *Test Requirements for release.* Each serial and subserial shall meet the applicable general requirements prescribed in 9 CFR 113.64 and the requirements in this paragraph. Any serial or subserial found unsatisfactory by a prescribed test shall not be released.

(1) *Safety Test.* Samples of completed product from each serial or first subserial shall be tested for safety in calves as provided in 9 CFR 113.41(a) and 113.41(b) except, that the equivalent of two doses of vaccine shall be used and administered in the manner recommended on the label.

(2) *Bacterial count requirements.* Final container samples of completed product shall be tested for bacterial count using the method used in paragraph (b)(2) of this section. Two replicate titrations shall be conducted on each serial and subserial. Each sample shall be rehydrated with accompanying sterile diluent to the volume indicated on the label. To be eligible for release, each serial and subserial shall have a bacterial count sufficiently greater than that of the vaccine used in the immunogenicity test to assure that, when tested at any time within the expiration period, each serial and subserial shall have a bacterial count at least two times greater than that used in the immunogenicity test.

§ 113.69 Pasteurella Multocida Vaccine, Bovine.

Pasteurella Multocida Vaccine, Bovine, shall be prepared as a desiccated live culture bacterial vaccine of an avirulent or modified strain of *Pasteurella multocida*, of bovine origin. Only Master Seed which has been established as pure, safe, and immunogenic shall be used for vaccine production. All serials of vaccine shall be prepared from the first through the fifth passage from the Master Seed.

(a) The Master Seed shall meet the applicable general requirements prescribed in § 113.64 and the requirements in this section.

(b) Each lot of Master Seed used for vaccine production shall be tested for immunogenicity. The immunogenicity of a selected bacterial count from the lot of Master Seed shall be established as follows:

(1) Fifteen *Pasteurella multocida* susceptible calves shall be used as test animals (10 vaccinates and 5 controls) for each route of administration recommended on the label.

(2) An arithmetic mean count of the colony forming units from vaccine produced from the highest passage of the Master Seed shall be established before the immunogenicity test is conducted. The 10 calves to be used as vaccinates shall be injected as recommended on the label with a predetermined quantity of vaccine bacteria. The five control calves shall be held separately from the vaccinates. To confirm the dosage calculation, an arithmetic mean count shall be established by conducting five replicate titrations on a sample of the bacterial vaccine used. Only plates containing between 30 and 300 colonies shall be considered in a valid test.

(3) The vaccinates and controls shall be examined and their average body temperature determined prior to challenge. Fourteen to twenty-one days post vaccination, the vaccinates and controls shall each be challenged by the respiratory route with a (virulent) pneumonia producing *Pasteurella multocida* culture and observed for 7 to 10 days. The challenge culture and instructions for preparation for use shall be furnished or approved by the Animal and Plant Health Inspection Service.

(4) A satisfactory challenge shall be evidenced in the controls by progression of clinical signs consistent with respiratory system infection following challenge, including but not limited to acute illness with higher body temperature and respiration rate, lacrimation, mucoid nasal exudate, expiratory dyspnea, tachypnea, pulmonary rales, and cough, possibly terminating in death; moribundity, depression with anorexia; diarrhea with substantial weight loss; or any combination of these symptoms.

(5) Lung lesion response to challenge will be assessed in all calves. Lung

lesions will be assessed at necropsy in calves that succumb to challenge. Surviving calves will be euthanized on day 7 to 10 following challenge and lung lesions assessed at necropsy. Lung lesion scores will be used in the assessment of the response to challenge exposure. If a significant difference in lung lesion scores cannot be demonstrated between vaccinates and controls using a scoring system approved by the Animal and Plant Health Inspection Service, the Master Seed is unsatisfactory.

(6) The Master Seed shall be retested for immunogenicity in 3 years unless use of the lot previously tested is discontinued. Only five vaccinates and five controls need to be used in the retest: Provided, that at least four of five vaccinates and four of five controls shall meet the criteria prescribed in paragraphs (b)(4) and (b)(5) of this section.

(7) An Outline of Production change must be made before authority for use of a new lot of Master Seed is granted by the Animal and Plant Health Inspection Service.

(c) *Test requirements for release.* Each serial and subserial shall meet the applicable general requirements prescribed in 9 CFR 113.64 and the requirements in this paragraph. Any serial or subserial found unsatisfactory by a prescribed test shall not be released.

(1) *Safety Test.* Samples of completed product from each serial or first subserial shall be tested for safety in calves as provided in 9 CFR 113.419(a) and 113.41(b) except, that the equivalent of two doses of vaccine shall be used and administered in the manner recommended on the label.

(2) *Bacterial count requirements.* Final container samples of completed product shall be tested for bacterial count using the method used in paragraph (b)(2) of this section. Two replicate titrations shall be conducted on each serial and subserial. Each sample shall be rehydrated with accompanying sterile diluent to the volume indicated on the label. To be eligible for release, each serial and subserial shall have a bacterial count sufficiently greater than that of the vaccine used in the immunogenicity test count per dose established to assure that, when tested at any time within the expiration period, each serial and subserial shall have a bacterial count at least two times greater than that used in the immunogenicity test.

§ 113.70 Pasteurella Multocida Vaccine, Avian Isolate.

Pasteurella Multocida Vaccine, Avian Isolate, shall be prepared as a desiccated live culture of an avirulent or modified strain of Pasteurella Multocida. Only Master Seed which has been established as pure, safe, and immunogenic shall be used for vaccine production.

(a) The Master Seed shall meet the applicable general requirements prescribed in § 113.64 and the requirements in this section.

(b) Each lot of Master Seed used for vaccine production shall be tested for immunogenicity in each species and for each serotype for which the Master Seed is claimed to give protection.

(1) Thirty Pasteurella Multocida susceptible birds shall be used as test animals (20 vaccinates and 10 controls) for each bird species, route of administration, and serotype for which protection is claimed on the label.

(2) An arithmetic mean count of colony forming units from vaccine produced from the highest passage of Master Seed shall be established before the immunogenicity test is conducted. The 20 birds to be used as vaccinates shall be inoculated, as recommended on the label with a predetermined quantity of vaccine bacteria. The 10 control birds shall be held separately from the vaccinates. To confirm the dosage calculation, an arithmetic mean count shall be established by conducting five replicate titrations on a sample of the bacterial vaccine used. Only plates containing between 30 and 300 colonies shall be considered in a valid test.

(3) Not less than 14 days after vaccination, each of 20 vaccinates and each of 10 unvaccinated controls shall be challenged intramuscularly with a virulent Pasteurella multocida strain, for which protection is claimed, and observed daily for a 14 day post-challenge period.

(4) Eight or more of the unvaccinated controls must die for the test to be valid. If at least 14 of 20 of the vaccinates do not survive the 14 day post challenge period, the Master Seed is unsatisfactory at the selected bacterial count.

(5) The Master Seed shall be retested for immunogenicity in 3 years and shall meet the criteria prescribed in paragraph (b)(4) of this section.

(c) *Test requirements for release.* Each serial and subserial shall meet the applicable requirements in § 113.64 and the requirements in this paragraph. Any serial or subserial found unsatisfactory by a prescribed test shall not be released.

(1) *Safety test.* Samples of completed product from each serial or first subserial shall be tested for safety.

(i) Ten birds of a species for which the vaccine is recommended shall be given the equivalent of 10 doses each of the vaccine and observed for 10 days. If the vaccine is recommended for more than one species, only one species needs to be tested.

(ii) If unfavorable reactions attributable to the vaccine occur during the observation period in two or more of the test birds, the serial is unsatisfactory.

(iii) If unfavorable reactions occur which are not attributable to the test vaccine, th: test is inconclusive and may be repeated once. If the results of the second test are not satisfactory, or if the test is not repeated, the serial shall be considered unsatisfactory.

(2) *Bacterial count requirements.* Two final container samples of each serial or subserial shall be tested for bacterial count using the method used in paragraph (b)(2) of this section.

(i) Two final container vials of completed product shall be tested for the number of viable organisms per dose of rehydrated vaccine. Each vial shall be rehydrated with accompanying diluent or sterile purified water to the volume recommended on the label. To be eligible for release, each serial and subserial shall have a colony count sufficiently greater than that of the vaccine used in the immunogenicity test to assure that, when tested at anytime within the expiration period, each serial and subserial shall have a bacterial count at least two times greater than that used in such immunogenicity test.

(ii) If the average count of the initial test is less than the required minimum, the serial or subserial may be retested one time using four additional final container vials. If the average count of the four vials is less than the required minimum, the serial or subserial is unsatisfactory. If the average count of the four vials is not less than the minimum count and the average count of the initial test is less than one-third the retest count, the initial test will be considered the result of test system error and the serial or subserial is satisfactory. If the average count of the four vials is not less than the minimum count and the average of the initial test is one-third or more of the retest count, a new average count shall be determined from the counts of all six vials. If the new average is not less than the required minimum, the serial or subserial is satisfactory.

§ 113.71 Chlamydia Psittaci Vaccine (Feline Pneumonitis), Live Chlamydia.

Chlamydia Psittaci Vaccine (Feline Pneumonitis), Live Chlamydia, shall be prepared from chlamydia-bearing cell culture fluids or embryonated chicken eggs. Only Master Seed which has been established as pure, safe, and immunogenic shall be used for vaccine production. All serials of vaccine shall be prepared from the first through the fifth passage from the Master Seed.

(a) The Master Seed shall meet the applicable requirements prescribed in § 113.135 and the requirements in this section. Master Seed propagated in chicken embryos shall be tested for pathogens by the chicken embryo test prescribed in § 113.37. If found unsatisfactory by any prescribed test, the Master Seed shall not be used.

(b) Each lot of Master Seed used for vaccine production shall be tested for immunogenicity. The immunogenicity of a selected dose from the lot of Master Seed shall be established as follows:

(1) Thirty feline pneumonitis susceptible cats shall be used as test animals (20 vaccinates and 10 controls). Blood samples shall be drawn and individual serum samples tested. The cats shall be considered suitable for use if all serums are negative for pneumonitis antibody in a complement fixation test or other test of equal sensitivity.

(2) A geometric mean titer of the dried vaccine produced from the highest passage of the Master Seed shall be established before the immunogenicity test is conducted. The 20 cats used as vaccinates shall be administered a predetermined quantity of vaccine by the method to be recommended on the label and the remaining 10 cats shall be held as controls. To confirm the dosage calculations, five replicate titrations shall be conducted on a sample of the vaccine dilution used. If two doses are used, five replicate confirming titrations shall be conducted on each dose.

(3) Twenty-one or more days after the final dose of vaccine, the vaccinates and controls shall each be challenged intranasally with a minimum of 10,000 yolk sac LD50 of virulent feline pneumonitis furnished or approved by the Animal and Plant Health Inspection Service and observed each day for 28 days postchallenge. The rectal temperature of each animal shall be taken and the presence or absence of clinical signs noted and recorded each day.

(i) If less than 8 or 10 controls show clinical signs of feline pneumonitis infection other than fever, the test is inconclusive and may be repeated.

(ii) If a significant difference in clinical signs cannot be demonstrated between vaccinates and controls using a scoring system approved by the Animal and Plant Health Inspection Service, the Master Seed is unsatisfactory.

(4) The Master Seed shall be retested for immunogenicity in 3 years unless use of the lot previously tested is discontinued. Either 10 vaccinates and 6 controls or 5 vaccinates and 3 controls shall be used in the retest.

(i) If less than five of six or three of three of the controls in the retest show clinical signs of feline pneumonitis infection other than fever, the test is inconclusive and may be repeated.

(ii) A significant difference in clinical signs shall be demonstrated between vaccinates and controls in a valid test as prescribed in paragraph (c)(3)(ii) of this section.

(5) An Outline of Production change must be made before authority for use of a new lot of Master Seed is granted by the Animal and Plant Health Inspection Service.

(c) *Test requirements for release:* Except for § 113.135(a)(3)(ii), each serial and subserial shall meet the requirements prescribed in § 113.135 and in this paragraph. Final container samples of completed product shall be tested. Any serial or subserial found unsatisfactory by a prescribed test shall not be released.

(1) The test for pathogens prescribed in § 113.37 shall be conducted on each serial or one subserial of avian origin vaccine.

(2) *Chlamydia titer requirements.* Final container samples of completed product shall be tested for chlamydia titer using the titration method used in paragraph (b)(2) of this section. To be eligible for release, each serial and each subserial shall have a titer sufficiently greater than the titer of vaccine used in the immunogenicity test prescribed in paragraph (b) of this section to assure that when tested at any time within the expiration period, each serial and subserial shall have a titer 0.7 greater than that used in such immunogenicity test but not less than 2.5 ID50 per dose.

4. In 9 CFR Part 113, the following sections would be redesignated as follows:

§§ 113.250–113.255 [Redesignated as §§ 113.450–113.455]

a. Sections 113.250–113.255, "Blood Origin Products," would be redesignated as §§ 113.450–113.455;

§§ 113.200–113.203 [Redesignated as §§ 113.400–113.409]

b. Sections 113.200–113.203, "Diagnostics and Reagents," would be redesignated as §§ 113.400–113.409;

§§ 113.135–113.167 [Redesignated as §§ 113.300–113.332]

c. Sections 113.135–113.167, "Live Virus Vaccine," would be redesignated as §§ 113.300–113.332, and "Vaccine" would be changed to "Vaccines;"

§§ 113.120–113.134 [Redesignated as §§ 113.200–113.216]

d. Sections 113.120–113.134, "Killed Virus Vaccines," would be redesignated as §§ 113.200–113.216; and

§§ 113.85–113.108 [Redesignated as §§ 113.100–113.123]

e. Sections 113.85–113.108, "Inactivated Bacterial Products," would be redesignated as §§ 113.100–113.123.

5. 9 CFR Part 113, under the heading "Killed Virus Vaccines," would be amended to add new §§ 113.215 and 113.216 to read as follows:

§ 113.215 Bovine Virus Diarrhea Vaccine, Killed Virus.

Bovine Virus Diarrhea Vaccine, Killed Virus, shall be prepared from virus-bearing cell culture fluids. Only Master Seed virus which has been established as pure, safe, and immunogenic shall be used for preparing seed cultures for vaccine production. All serials of vaccine shall be prepared from the first through the fifth passage from the Master Seed.

(a) The Master Seed shall meet the applicable general requirements prescribed in § 113.200 and the requirements of this section.

(b) The immunogenicity of vaccine prepared from the Master Seed in accordance with the Outline of Production shall be established by a method acceptable to the Animal and Plant Health Inspection Service. Vaccine used for this test shall be at the highest passage from the Master Seed and at the minimum preinactivation titer provided in the Outline of Production.

(c) *Test requirements for release.* Each serial and subserial shall meet the applicable general requirements prescribed in § 113.120 and the special requirements provided in this paragraph. Any serial or subserial found unsatisfactory by a prescribed test shall not be released.

(1) *Safety.* Vaccinates used in the potency test in paragraph (c)(2) of this section shall be observed each day during the prechallenge period. If unfavorable reactions occur, including respiratory signs, which are attributable

to the vaccine, the serial is unsatisfactory. If unfavorable reactions occur which are not attributable to the vaccine, the test is inconclusive and may be repeated one time. If results of the second test are not satisfactory, or if the test is not repeated, the serial is unsatisfactory.

(2) *Potency.* Bulk or final container samples of completed product shall be tested for potency using the method described in this paragraph.

(i) Eight bovine virus diarrhea susceptible calves (five vaccinates and three controls) shall be used as test animals. The animals shall be at the minimum age recommended for vaccination. Individual serum samples shall be collected, inactivated, and individually tested for neutralizing antibody.

(ii) A constant virus decreasing serum neutralization test in cell culture using 50–300 TCID50 of virus shall be used. Calves shall be considered susceptible if there is no neutralization at 1:2 final serum dilution. Other tests of equal sensitivity approved by the Animal and Plant Health Inspection Service may be used.

(iii) The five calves used as vaccinates shall be administered one dose of vaccine as recommended on the label. If two doses are recommended, the second dose shall be given according to the interval recommended on the label.

(iv) Fourteen days or more after the last vaccination, blood samples shall be drawn and the individual serum samples inactivated and tested for bovine virus diarrhea virus neutralizing antibody by the same method used to determine susceptibility.

(v) *Test interpretation.* If the controls have not remained seronegative at 1:2, the test is a No Test (NT) and may be repeated. If at least four of the five vaccinates in a valid test have not developed 50 percent endpoint titers of 1:8 or greater and the remaining vaccinate has not developed at 50 percent endpoint titer of 1:4, the serial is unsatisfactory, except as provided in paragraph (c)(2)(vi) of this section.

(vi) *Virus Challenge Test.* If the results of a valid serum neutralization test are unsatisfactory, the vaccinates and controls may be challenged with virulent bovine virus diarrhea virus furnished or approved by the Animal and Plant Health Inspection Service. The animals shall be observed for 14 days post-challenge. If two of the three control calves do not show a temperature rise to 104.5 F and develop respiratory or clinical signs of bovine virus diarrhea, the test is inconclusive and may be repeated one time. If two or more vaccinates show a temperature of 104.0 F for 2 or more days and develop respiratory or clinical or other signs, the serial is unsatisfactory.

(vii) The prevaccination and postvaccination sera from a satisfactory potency test shall be submitted to the National Veterinary Services Laboratories for confirmatory testing.

§ 113.216 Bovine Rhinotracheitis Vaccine, Killed Virus.

Infectious Bovine Rhinotracheitis Vaccine, Killed Virus, shall be prepared from virus-bearing cell culture fluids. Only Master Seed virus which has been established as pure, safe, and immunogenic shall be used for preparing seed cultures for vaccine production. All serials of vaccine shall be prepared from the first through the fifth passage from the Master Seed.

(a) The Master Seed shall meet the applicable general requirements prescribed in § 113.120 and the requirements of this section.

(b) The immunogenicity of vaccine prepared in accordance with the Outline of Production shall be established by a method acceptable to the Animal and Plant Health Inspection Service. Vaccine used for this test shall be at the highest passage from the Master Seed and at the minimum preinactivation titer provided in the Outline of Production.

(c) *Test requirements for release.* Each serial and subserial shall meet the requirements prescribed in § 113.120 and the special requirements provided in this paragraph. Any serial or subserial found unsatisfactory by a prescribed test shall not be released.

(1) *Safety.* Vaccinates used in the potency test in paragraph (c)(2) of this section shall be observed each day during the prechallenge period. If unfavorable reactions occur, which are attributable to the vaccine, the serial is unsatisfactory. If unfavorable reactions occur which are not attributable to the vaccine, the test is inconclusive and may be repeated one time. If the results of the second test are not satisfactory, or if the test is not repeated, the serial is unsatisfactory.

(2) *Potency.* Bulk or final container samples of completed product shall be tested for potency using the method described in this paragraph.

(i) Eight infectious bovine rhinotracheitis susceptible calves (five vaccinates, three controls) shall be used as test animals. The animals shall be at the minimum age recommended for vaccination. Individual serum samples shall be collected, inactivated, and individually tested for neutralizing antibody.

(ii) A constant virus decreasing serum neutralization test in cell culture using 50–300 TCID50 of virus shall be used. Calves shall be considered susceptible if there is no neutralization at 1:2 final serum dilution. Other tests of equal sensitivity acceptable to the Animal and Plant Health Inspection Service may be used.

(iii) The five calves used as vaccinates shall be administered one dose of vaccine as recommended on the label. If two doses are recommended, the second dose shall be given according to the interval recommended on the label.

(iv) Fourteen or more days after the last vaccination, blood samples shall be drawn and the individual serum samples inactivated and tested for infectious bovine rhinotracheitis virus neutralizing antibody by the same method used to determine susceptibility.

(v) *Test interpretation.* If the three controls have not remained seronegative at 1:2, the test is a No Test (NT) and may be repeated. If at least four of the five vaccinates in a valid test have not developed 50 percent endpoint titers of 1:8 or greater and the remaining vaccinate has not developed a 50 percent endpoint titer of 1:4, the serial is unsatisfactory, except as provided in paragraph (c)(2)(vi) of this section.

(vi) *Virus Challenge Test.* If the results of a valid serum neutralization test are unsatisfactory, the vaccinates and controls may be challenged with virulent infectious bovine rhinotracheitis virus furnished or approved by the Animal and Plant Health Inspection Service. The animals shall be observed each day for 14 days post-challenge. If two of the three control calves do not show a temperature rise to 104.5 F and develop respiratory or other clinical bovine rhinotracheitis, the test is a No Test (NT) and may be repeated one time. If more than one of the vaccinates shows a temperature of 104.0 F for 2 or more days or if more than one of the vaccinates develops respiratory or clinical or other signs, the serial is unsatisfactory.

(vii) The prevaccination and postvaccination sera from a satisfactory potency test shall be submitted to the National Veterinary Services Laboratories for testing by the Animal and Plant Health Inspection Service.

Done in Washington, DC, this 29th of November 1988.

Larry B. Slagle,

Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF ENERGY

10 CFR Part 785

Class Patent Waiver

AGENCY: Department of Energy.

ACTION: Proposed rule; cancellation of public hearing.

SUMMARY: On November 4, 1988, the Department of Energy published in the **Federal Register** a proposed rule 10 CFR Part 785, Class Patent Waiver (53 FR 44602). That notice provided for a Public Hearing on the matter to be held on December 13, 1988, and provided further that requests to present oral statements thereon must be received no later than November 30, 1988.

Since no requests to present oral statements thereon have been received by the Department, the Public Hearing on the matter scheduled for December 13, 1988 is cancelled.

FOR FURTHER INFORMATION CONTACT: Richard E. Constant, Department of Energy, Assistant General Counsel for Patents, GC–42, Washington, DC 20585; Telephone: (202) 586–2802.

Frank S. Ruddy,

General Counsel.

BILLING CODE 6450–01–M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 129

International Trade; International Market Assistance

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: In compliance with the Small Business International Trade and Competitiveness Act, Pub. L. No. 100–418, SBA is proposing to amend its regulations on international trade to reflect changes made to SBA's Office of International Trade. The proposed rule sets forth the services the Office of International Trade intends to provide to assist small businesses to increase their ability to compete in international markets.

DATES: Comments must be submitted by January 9, 1989.

ADDRESS: Comments should be submitted to Julius Toma, Office of International Trade, Small Business Administration, Rm. 501–A, 1441 L Street, Washington, DC 20416, (202) 653–7794.

FOR FURTHER INFORMATION CONTACT: Julius Toma (202) 653–7794.

SUPPLEMENTARY INFORMATION: The proposed rule incorporates into existing regulations changes made to the SBA Office of International Trade by the provisions of the Small Business International Trade and Competitiveness Act (1988).

Section 129.100 of the proposed regulation reflects Congressional policy on small busness international trade and competitiveness. That policy requires SBA to cooperate with the Department of Commerce and other relevant Federal and State agencies to aid and assist small businesses to increase their ability to compete in international markets. In carrying out its decisions and actions, the Office of International Trade will be guided by the principles enumerated in the statute and restated in the proposed rule, § 129.100 (a) through (f).

Section 129.200 of the proposed regulation reflects greater statutory specification of the Office's activities. Information on existing trade promotion, trade finance, trade adjustment, trade remedy assistance and trade data collection programs will be disseminated and marketed through a distribution network composed of SBA and Department of Commerce regional and local offices and the Small Business Development Centers (SBDCs).

Small businesses interested in market research, identifying areas of demand in foreign markets, or sub-sectors of the small business community with strong export portential will be encouraged to use SBA's Export Information System (XIS) Data Reports, available through SBA regional, local or SBDC offices. Small businesses will also be advised of the many sources of market research available through the Department of Commerce, such as International Market Research studies or Country Market Surveys.

Small Business considering the formation of international joint ventures will be advised of the resources available to identify potentially compatible firms, including the Department of Commerce's Export Mailing List Service and Trade Opportunities Program.

The Office, through the distribution network, will also make available to small business exporters information on existing domestic and foreign credit checking agencies that screen foreign and domestic firms for commercial and credit purposes.

Information on the availability of existing translation services will be identified and publicized through the distribution network, other Federal agencies, and relevant state and local export promotion programs.

Information and assistance in the formation and utilization of export trading companies, export management companies and research and development pools will be provided in cooperation with the Department of Commerce's Office of Export Trading Company Affairs.

Small businesses interested in obtaining counseling with respect to initiating and participating in any procedures relating to the administration of the United States trade laws will be advised of services provided by the Trade Remedy Assistance Office of the International Trade Commission or referred to the national coordinator of the Export Legal Assistance Network (ELAN). ELAN is a nationwide network of attorneys knowledgeable in export-related matters who have agreed to provide free initial consultations to small busineses new to the export market. The network includes a number of attorney with expertise in trade remedy proceedings who will participate under the same agreement.

Section 129.300 of the proposed regulation related to small business access to export financing programs. The Office will facilitate the access of small busineses to relevant export and pre-export financing programs of the Export-Import Bank, SBA and the private sector. This will be carried out by marketing existing Federal programs to financial institutions and the small business community. Additional training will also be provided to appropriate SBA personnel on export finance programs of SBA and the Export-Import Bank. A series of export finance briefings and education programs will be used to encourage financial intermediaries, such as lending institutions, to utilize existing Federal and State export financing programs.

Section 129.400 provides that the Office will work with experts in relevant fields to develop recommendations for policies and programs that will actively assist small businesses in the export process. The recommendations will be developed at a seminar to be held within one year from the date of enactment of the statute. The seminar will also be used to make recommendations on the utility of a subsequent international conference on small business and trade.

Compliance with Executive Orders 12291 and 12612, the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., and the Paperwork Reduction Act 44 U.S.C. Chapter 35

This proposed rule is not a major rule for purposes of Executive Order 12291.

because it is not likely to have an economic impact of over $100 million annually; the total Office budget does not exceed $1.5 million and the primary effect of the rule is to modify program office operations. Nor will it increase costs to consumers, individual industries, Federal and State government agencies or geographic regions, nor can it have an adverse effect on competition, employment investment, productivity, innovation or the ability of U.S. based businesses in domestic or export markets. For purposes of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, SBA certifies that this proposed rule will not, if promulgated in final form, have a significant economic impact on a substantial number of small entities because the primary effect will be to modify program office operations. For purposes of the Paperwork Reduction Act, 44 U.S.C. Chapter 35, SBA certifies that the proposed rule if adopted, would not impose any additional reporting or record-keeping requirements. Finally, this proposed rule, if adopted in final form will not require a Federalism Assessment pursuant to E.O. 12612.

List of Subjects in 13 CFR Part 129

Foreign Trade, Small businesses, Technical Assistance.

For the reasons set forth above, Part 129 of Title 13, Code of Federal Regulations, is proposed to be amended as follows:

PART 129—[AMENDED]

1. The authority citation for Part 129 is proposed to be revised as follows:

Authority: Title VIII of Pub. L. 100–418, Secs. 2 and 8. Small Business Act, as amended (15 U.S.C. 631, 637(b); secs 7(i) and 7(j) of the Small Business Act, as amended (15 U.S.C. 636 (i) and (j); sec. 302(c)(2), Domestic Volunteer Service Act, Pub. L. 93–113, 87 Stat. 404; E.O. 11871 dated July 18, 1975.

§§ 129.1 through 129.4 [Designated as Subpart A]

§§ 129.5 [Removed]

§§ 129.6 through 129.9 [Redesignated as §§ 129.5 through 129.8 and Designated Subpart B]

Subpart C—[Reserved]

2. It is proposed that §§ 129.1–129.4 be designated as Subpart A—General, that § 129.5 be removed, that §§129.6–129.9 be redesignated as §§ 129.5–129.8 and that such sections be designated as Subpart B—Service Corps of Retired Executives (SCORE) and Active Corps of Executives (ACE)—Payment of Out-of-Pocket Expenses to Volunteers, and that a new Subpart C be added and designated as Subpart C—[Reserved].

3. A new Subpart D is proposed to be added to read as follows:

Subpart D—Office of International Trade

129.100 Policy.
129.200 Export Assistance.
129.300 Access to Export Financing Programs.
129.400 Stimulating Small Business Exports.

Subpart D—Office of International Trade

§ 129.100 Policy.

It is the declared policy of Congress that the Small Business Administration, acting in cooperation with the Department of Commerce and other relevant Federal and State agencies, should aid and assist small businesses to increase their ability to compete in international markets by:

(a) Enhancing their ability to export;

(b) Facilitating technology transfers;

(c) Enhancing their ability to compete effectively and efficiently against imports;

(d) Increasing the access of small businesses to long-term capital for the purchase of new plant and equipment used in the production of goods and services involved in international trade;

(e) Disseminating information concerning State, Federal, and private programs and initiatives to enhance the ability of small businesses to compete in international markets; and

(f) Ensuring that the interests of small businesses are adequately represented in bilateral and multilateral trade negotiations.

§ 129.200 Export assistance.

SBA's Office of International Trade offers several services to assist small businesses to increase their ability to compete in international markets.

(a) The Office works in close cooperation with the Department of Commerce and other Federal agencies, Small Business Development Centers (SBDCs) engaged in export promotion efforts, regional and local SBA offices, the small business community, and relevant state and local export promotion programs to provide information to small businesses on:

(1) Existing trade promotion, trade finance, trade adjustment, trade remedy assistance and trade data collection programs through use of the SBA's regional, district and branch offices and the SBDC network;

(2) Marketing, including computerized marketing data and marketing leads;

(3) The formation of joint ventures;

(4) Existing programs which prescreen foreign buyers for commercial and credit purposes;

(5) Existing translation services, including those available through colleges and universities participating in the SBDC program; and

(6) Conferences on exporting and international trade sponsored by the public and private sector.

(b) In addition, the Office of International Trade works with the Department of Commerce, the International Trade Commission, and other Federal agencies, Small Business Development Centers (SBDCs) engaged in export promotion efforts, regional and local SBA offices, the small business community, and relevant state and local export promotion programs to:

(1) Identify sub-sectors of the small business community with strong export potential;

(2) Identify areas of demand in foreign markets;

(3) Assist in increasing international marketing by developing a mechanism to link potential sellers and buyers;

(4) Assist small businesses in the formation and utilization of export trading companies, export management companies and research and development pools authorized under section 9 of the Small Business Act, 15 U.S.C. 631, *et seq.*; and

(5) Assist small businesses in obtaining counseling with respect to initiating and participating in any proceedings relating to the administration of the United States trade laws.

§ 129.300 Access to export financing programs.

The Office of International Trade works in cooperation with the Export-Import Bank of the United States, the Department of Commerce, other relevant Federal agencies, and the States to develop programs through which export specialists in SBA's regional offices, regional, district and branch loan officers, and SBDC personnel can facilitate the access of small businesses to relevant export and pre-export financing programs available from the Export-Import Bank, the SBA and the private sector. Such programs include:

(a) Providing information to small businesses on financing available under various Export-Import Bank programs;

(b) Assisting in the development of financial intermediaries and facilitating the access of those intermediaries to existing financing programs; and

(c) Promoting greater participation by private financial institutions in export

finance, particularly those institutions already participating in loan programs under the Small Business Act, 15 U.S.C. 631 *et seq.*

§ 129.400 Stimulating small business exports.

The Office of International Trade works with experts in the fields of international trade and small business development and representatives of small businesses, associations, the labor community, academic institutions, and Federal, State and local governments to develop recommendations designed to stimulate exports from small businesses.

Dated: November 25, 1988.

James Abdnor,

Administrator.

[FR Doc. 88-28233 Filed 12-8-88; 8:45 am]

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-NM-177-AD]

Airworthiness Directives: Boeing Models 737-300, 757, and 767 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to certain Boeing Models 737-300, 757 and 767 series airplanes, which would require the replacement of all 1½-turn pull rings with 2-turn pull rings in each oxygen module assembly, and the inspection and replacement, if necessary, of certain oxygen generators which may be defective. This proposal is prompted by reports of failures of the oxygen generators during a functional test at an airline, failures of the pull rings during one cabin decompression, and tests by the manufacturer. This condition, if not corrected, could lead to the oxygen generator not activating, resulting in no supplemental oxygen supply to passengers and flight attendants when necessary.

DATE: Comments must be received no later than February 7, 1989.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-177-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124 and the Puritan-Bennett Aero Systems Co., Attn: Customer Services Dept., 10800 Pflumm Road, Lenexa, Kansas 66215.

This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. David Herron, Systems and Equipment Branch, ANM-130S; telephone (206) 431-1949. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-177-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

During functional tests of the passenger oxygen system conducted by an airline, some of the oxygen generators failed to activate. Upon further investigation, it was found that some of the pull rings which link the oxygen mask lanyard to the oxygen generator actuating mechanism release cable were uncoiling. During the same test, an oxygen generator failed to activate when the release cable was successfully pulled. Subsequent investigation revealed that the cause was a malfunctioning percussion primer.

During tests of the pull rings at the manufacturer, it was determined that a 1½-turn ring lacked sufficient strength in tension to activate the oxygen generator on a consistent basis. The failure of the oxygen generator to activate due to the pull ring separation has occurred in service at least once

The malfunctioning percussion primer in the oxygen generator is due to a previous manufacturing problem that has now been corrected. The problem was limited to an identifiable lot

The FAA has reviewed and approved Boeing Service Bulletins 767-35A0014 dated December 17, 1987, 757-35A(XXX) Revision 1, dated December 10, 1987 and 737-35A1029, Revision 2, dated September 29, 1988, which describe the replacement of the 1½-turn pull ring with 2-turn pull rings. These service bulletins also identify the airplanes to be inspected for the suspect lot of oxygen generators to be replaced

The inspection and replacement, if necessary, of the oxygen generators is described in Puritan-Bennett Aero Co Service Bulletin 117003-13-35-1, dated December 17, 1987. This service bulletin has been reviewed and approved by the FAA and is referenced in the Boeing service bulletins.

Since this condition is likely to exist or develop on other airplanes of these same type designs, an AD is proposed which would require replacement of all 1½-turn pull rings with 2-turn pull rings in the oxygen assembly, and inspection and replacement, if necessary, of certain oxygen generators on certain Boeing Model 737-300, 757, and 767 airplanes, in accordance with the service bulletins previously mentioned.

There are approximately 842 Model 737-300, 757, and 767 series airplanes of the affected design in the worldwide fleet. It is estimated that 475 airplanes of U.S. registry would be affected by this AD, that it would take approximately 17.2 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S operators is estimated to be $326,800.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore,

in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Boeing Models 737, 757, or 767 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Boeing Model 737-300, 757, and 767 series airplanes, identified in Boeing Alert Service Bulletins 737-35A1029, Revision 2, dated September 29, 1988; 757-35A0006, Revision 1, dated March 10, 1988; and 767-35A0014, dated December 17, 1987; certificated in any category. Compliance required within the next 3,000 hours time-in-service after the effective date of this AD, unless previously accomplished.

To prevent failure of the oxygen generator to activate when required, accomplish the following:

A. Inspect Puritan chemical generators, P/N 11700-13, for Serial Numbers 06339 through 06559, and replace those units in accordance with Puritan-Bennett Service Bulletin 117003-13-35-1 dated December 17, 1987.

B. Inspect and, if installed, replace 1½-turn oxygen generator lanyard rings with 2-turn rings as follows:

1. For Model 767 series airplanes, in accordance with Boeing Alert Service Bulletin 767-35A0014 dated December 17, 1987;

2. For Model 757 series airplanes, in accordance with Boeing Alert Service Bulletin 757-35A0006, Revision 1, dated March 10, 1988;

3. For Model 737-300 series airplanes, in accordance with Boeing Alert Service Bulletin 737-35A1029, Revision 2, dated September 29, 1988.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note. The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Seattle Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modification by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124-2207 and the Puritan-Bennett Aero Systems Co., Attn: Customer Services Dept., 10800 Pflumm Road, Lenexa, Kansas 66215. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on December 1, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 88-NM-173-AD]

Airworthiness Directives: Boeing Model 737-300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to certain Boeing Model 737-300 series airplanes, which would require inspection for clearance between the engine fuel feed tube and adjacent thermal anti-ice (TAI) duct, and adjustment or replacement, if necessary. This action is prompted by two reports of fuel leaks caused by chafing of the fuel feed tube in the number two engine front right wing strut area. This condition, if not corrected, could result in fuel leakage causing a potential strut fire hazard.

DATE: Comments must be received no later than February 7, 1989.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-173-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen S. Bray, Propulsion Branch ANM 140S; telephone (206) 431-1969. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA.

Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-173-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

During the course of an investigation, incidents of chafing and fuel leaks were found in the right strut fairing on Boeing Model 737-300 airplanes. It was determined that the fuel feed tube assembly had chafed through due to contact with the TAI duct assembly. Two operators reported that fuel was noted to be dripping from the number two engine strut area on two airplanes. One airplane showed leakage after 4,500 flight hours, the other after 7,500 flight hours. This condition, if not corrected, could result in fuel leakage causing a potential strut fire hazard.

The FAA has reviewed and approved Boeing Alert Service Bulletin 737-28A1077, dated October 6, 1988, which describes procedures for inspection of the right wing strut fairing leading edge area for specified minimum clearance between the engine fuel feed tube assembly and the adjacent TAI duct, and adjustment or replacement, if necessary.

Since this condition is likely to exist or develop on other airplanes of the same type design, an AD is proposed which would require inspection of the right strut fairing leading edge, and modification or replacement, if necessary, in accordance with the service bulletin previously mentioned.

There are approximately 500 Model 737-300 series airplanes of the affected design in the worldwide fleet. It is estimated that 175 airplanes of U.S. registry would be affected by this AD, that it would take approximately 7.5 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $52,500.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive, or negative, on a substantial number of small entities because few, if any, Model 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [AMENDED]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 737-300 series airplanes, listed in Boeing Alert Service Bulletin 737-28A1077, dated October 6, 1988, certificated in any category. Compliance required within three months after the effective date of this AD, unless previously accomplished.

To prevent a fire hazard associated with fuel leak, due to the fuel feed tube assembly chafing against the thermal anti-ice duct, accomplish the following:

A. Inspect and, if necessary, adjust fuel feed tube assembly clearance in accordance with Boeing Alert Service Bulletin 737-28A1077, dated October 6, 1988. Replace chafed tubes, before further flight, with a serviceable tube.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on December 1, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 88-AGL-9]

Proposed Alteration of VOR Federal Airways; Minnesota

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Withdrawal of Notice of Proposed Rulemaking.

SUMMARY: This notice withdraws the Notice of Proposed Rulemaking (NPRM), Airspace Docket No. 88-AGL-9, which was published in the **Federal Register** on June 14, 1988. That NPRM proposed to alter the description of Federal Airway V-412 located in the vicinity of Redwood Falls, MN, by realigning that segment via a north dogleg. Flight inspection data has confirmed the fact V-412 cannot be certified because the en route centerline radial failed its flight check.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9250.

The Proposed Rule

On June 14, 1988, a Notice of Proposed Rulemaking was published in the **Federal Register** to alter the description of Federal Airway V-412 located in the vicinity of Redwood Falls, MN, by realigning a segment of that airway. This action withdraws that NPRM. Flight inspection data has confirmed the fact V-412 cannot be certified because

the en route centerline radial failed its flight check. No comments were received on the NPRM.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR federal airways.

The Withdrawal

Accordingly, pursuant to the authority delegated to me, the Notice of Proposed Rulemaking, Airspace Docket No. 88–AGL–9, as published in the **Federal Register** on June 14, 1988 (53 FR 22182) is hereby withdrawn.

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

Issued in Washington, DC, on November 29, 1988.

Harold W. Becker,

Acting Manager, Airspace—Rules and Aeronautical Information Division.

[FR Doc. 88–28315 Filed 12–8–88; 8:45 am]

BILLING CODE 4910–13–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL–3487–9]

Approval and Promulgation of State Implementation Plans; Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of public comment deadline.

SUMMARY: By this notice, EPA is extending from December 7, 1988, to December 27, 1988, the deadline for receiving written comments on the Agency's proposed approval of a technical amendment to the state-wide sulfur dioxide emission limit as a revision to the Washington State Implementation Plan (SIP).

DATE: Comments must be received or postmarked on or before December 27, 1988.

ADDRESS: Comments should be addressed to: Laurie M. Kral (10A–88–4), Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue AT–082, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: David C. Bray, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue AT–082, Seattle, Washington 98101. Telephone: (206) 442–4253. FTS: 399–4253.

SUPPLEMENTARY INFORMATION: On November 7, 1988 (53 FR 44911) EPA solicited public comment on its proposal to approve a revision to WAC 173–400–040(6) (except paragraphs (a) and (b)) and its proposal to rescind approval of the exception provisions in the current SIP (WAC 173–400–040(6)(a) (i) and (ii)). The revision to WAC 173–400–040(6) involves a technical amendment which clarifies the averaging time for the sulfur dioxide emission limit.

As a result of a request to extend the public comment period, EPA is granting a 15 day extension. The party requesting the extension also requested additional information which, although not part of this rulemaking docket, is relevant with respect to EPA's SIP requirements for averaging times and exception provisions. A copy of this request and the information provided to the requester have been placed into the docket.

Interested parties are invited to comment on all aspects of this proposal. Comments should be submitted, preferably in triplicate, to the address listed in the front of this notice.

Date: November 2, 1988.

Ralph R. Bauer,

Acting Regional Administrator.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is proposing to grant a petition submitted by BF Goodrich Intermediates Company, Incorporated, Calvert City, Kentucky, to conditionally exclude certain solid wastes generated at its Calvert City facility from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 268, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists. Today's proposed decision is based on an evaluation of waste-specific information provided by the petitioner.

The Agency is also proposing the use of an organic leachate model and a fate and transport model and their application in evaluating the waste-specific information provided by the petitioner. These models have been used in evaluating the petition to predict the concentration of hazardous constituents released from the petitioned waste, once it is disposed of.

DATES: EPA is requesting public comments on today's proposed decision and on the applicability of the organic leachate and fate and transport models used to evaluate the petition. Comments will be accepted until January 23, 1989. Comments postmarked after the close of the comment period will be stamped "late."

Any person may request a hearing on this proposed decision and/or the models used in the petition evaluation by filing a request with Joseph Carra, whose address appears below, by December 27, 1988. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send three copies of your comments to EPA. Two copies should be sent to the Docket Clerk, Office of Solid Waste (OS–305), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. A third copy should be sent to Jim Kent, Variances Section, Assistance Branch, PSPD/OSW (OS–343), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Identify your comments at the top with this regulatory docket number: "F–88–BFEP–FFFFF."

Requests for a hearing should be addressed to Joseph Carra, Director, Permits and State Programs Division, Office of Solid Waste (OS–340), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

The RCRA regulatory docket for this proposed rule is located at the U.S. Environmental Protection Agency, 401 M Street SW., (sub-basement), Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Call (202) 475–9327 for appointments. The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424–9346, or at (202) 382–3000. For technical information concerning this notice, contact Mr. Robert Kayser, Office of Solid Waste (OS–343), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382–4536.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit one or more of the characteristics of hazardous wastes identified in Subpart C of Part 261 (*i.e.*, ignitability, corrosivity, reactivity, and extraction procedure (EP) toxicity) or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To have their wastes excluded, petitioners must show that wastes generated at their facilities do not meet any of the criteria for which the wastes were listed. See 40 CFR 260.22(a) and the background documents for the listed wastes. In addition, the Hazardous and Solid Waste Amendments (HSWA) of 1984 require the Agency to consider any factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous characteristics (*i.e.*, ignitability, corrosivity, reactivity, and EP toxicity), and must present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. See 40 CFR 260.22(a), 42 U.S.C. 6921(f), and the background documents for the listed wastes. Although wastes which are "delisted" (*i.e.*, excluded) have been evaluated to determine whether or not they exhibit any of the characteristics of hazardous waste, generators remain obligated to determine whether or not their waste remains non-hazardous based on the hazardous waste characteristics.

In addition to wastes listed as hazardous in 40 CFR 261.31 and 261.32, residues from the treatment, storage, or disposal of listed hazardous wastes and mixtures containing hazardous wastes also are eligible for exclusion and remain hazardous wastes until excluded. See 40 CFR 261.3 (c) and (d)(2). The substantive standard for "delisting" a treatment residue or a mixture is the same as previously described for listed wastes.

B. Approach Used to Evaluate This Petition

In making a delisting determination, the Agency evaluates each petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). If the Agency believes that the waste remains hazardous based on the factors for which the waste was originally listed, EPA will propose to deny the petition. If, however, the Agency agrees with the petitioner that the waste in non-hazardous with respect to the original listing criteria, EPA then will evaluate the waste with respect to other factors or criteria, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. The Agency considers whether the waste is acutely toxic, and considers the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the quantities of waste generated, and any other additional factors which may characterize the petitioned waste.

The Agency is proposing to use such information to identify plausible exposure routes for hazardous constituents present in the waste and, is proposing to use an organic leachate model and a fate and transport model to predict the concentration of hazardous constituents that may be released from the petitioned waste after disposal and to determine the potential impact of the unregulated disposal of BF Goodrich's petitioned waste on human health and the environment. Specifically, the models will be used to predict compliance-point concentrations which will be compared directly to the levels of regulatory concern for particular hazardous constituents.

EPA believes that this fate and transport model represents a reasonable worst-case waste disposal scenario for the petitioned waste, and that a reasonable worst-case scenario is appropriate when evaluating whether a waste should be relieved of the protective management constraints of RCRA Subtitle C. Because a delisted waste is no longer subject to hazardous waste control, the Agency is generally unable to predict and does not control how a waste will be managed after delisting. Therefore, EPA currently believes that it is inappropriate to consider extensive site-specific factors. For example, a generator may petition the Agency for delisting of a metal hydroxide sludge which is currently being managed in an on-site landfill and provide data on the nearest drinking water well, permeability of the aquifer, dispersivities, etc. If the Agency were to base its evaluation solely on these site-specific factors, the Agency might conclude that the waste, at that specific location, cannot affect the closest well, and the Agency might grant the petition. Upon promulgation of the exclusion, however, the generator is under no obligation to continue to manage the waste at the one-site landfill. In fact, it is likely that the generator will either choose to send the delisted waste off-site immediately, or will eventually reach the capacity of the on-site facility and subsequently send the waste off-site to a facility which may have very different hydrogeological and exposure conditions.

The Agency also considers the applicability of ground-water monitoring data to its evaluation of delisting petitions. In this case, the Agency determined that, because BF Goodrich is seeking an upfront delisting (*i.e.*, an exclusion for wastes not yet generated), ground-water monitoring data collected from the area where the petitioner plans to dispose of the waste is not necessary. Because the petitioned wastestream is not currently generated or disposed of, ground-water data would not characterize the effects of the petitioned waste on the underlying aquifer at the disposal site, and thus, would serve no purpose.

BF Goodrich petitioned the Agency for an upfront exclusion (for wastes that have not yet been generated) based on the analytical data obtained from Vulcan Materials Company's treatment system (see 51 FR 16860, May 7, 1986), untreated waste characteristics (BF Goodrich's untreated waste), and process descriptions. Additionally, the Agency is proposing that verification testing requirements (*i.e.*, required analytical testing of representative samples obtained from BF Goodrich's full-scale treatment system verifying that the treatment system is on-line and operating as described in the petition), be made conditions of the exclusion. These conditions, if the exclusion is

BEST COPY AVAILABLE

granted, will be implemented in order to show that, once on-line, the treatment system can render the waste non-hazardous by meeting the Agency's verification testing limitations (*i.e.*, the maximum allowable levels of the hazardous constituents of concern present in the waste, below which, the waste would not be considered hazardous).

From the evaluation of BF Goodrich's upfront delisting petition, a list of constituents was developed for the verification testing, and tentative maximum allowable treated waste concentrations for these constituents were derived by back calculating from the regulatory standards through the use of the proposed fate and transport model for a landfill management scenario. These levels (*i.e.*, "delisting levels") are proposed conditions of the delisting.

The Agency encourages the use of upfront delisting petitions because they have the advantage of allowing the applicant to know that treatment levels for constituents should be sufficient to render specific waste non-hazardous, before investing in new or modified waste treatment systems. Therefore, upfront delisting will allow new facilities to receive exclusions prior to generating wastes, which without upfront exclusions, would unnecessarily have been considered hazardous. Upfront delistings for existing facilities can be processed concurrently during construction or permitting activities; therefore, new or modified treatment systems should be capable of producing wastes that are considered non-hazardous sooner than otherwise would be possible. At the same time, conditional batch testing requirements to submit data verifying that the delisting levels are achieved by the fully operational manufacturing/treatment systems will maintain the integrity of the delisting decision and will ensure that only non-hazardous wastes are removed from Subtitle C control.

Finally, the Hazardous and Solid Waste Amendments of 1984 specifically require the Agency to provide notice and an opportunity for comment before granting or denying a final exclusion. Thus, a final decision will not be made on this petition proposed today until all public comments (including those at requested hearings, if any) are addressed.

II. Disposition of Petition

BF Goodrich Intermediates Company, Incorporated, Calvert City, Kentucky

1. Petition for Exclusion

BF Goodrich Intermediates Company, Incorporated (BFG), located in Calvert City, Kentucky, produces chlorine and caustics for industrial use. BFG petitioned the Agency to conditionally exclude from regulation as a hazardous waste its brine purification muds and saturator insolubles, presently listed as EPA Hazardous Waste No. K071—"Brine purification muds from the mercury cell process in chlorine production, where separately prepurified brine is not used." The listed constituent of concern for K071 waste is mercury.

BFG petitioned to exclude its waste because it does not believe that the waste meets the criteria for which it was listed. BFG also believes that its treatment process will generate a non-hazardous waste because the constituent of concern, although present in the waste, is both low in concentration and is in an essentially immobile form. BFG further believes that the waste will not be hazardous for any other reason (*i.e.*, there are no additional hazardous constituents or factors that could cause the waste to be hazardous). Review of this petition included consideration of the original listing criteria, as well as the additional factors required by the Hazardous and Solid Waste Amendments of 1984. See section 222 of the Amendments, 42 U.S.C. 6921(f), and 40 CFR 260.22(d) (2)–(4). Today's proposal to grant this petition for delisting is the result of the Agency's evaluation of BFG's petition.

2. Background

BFG petitioned the Agency to exclude its treatment residues on April 6, 1987 and subsequently provided additional information to complete its petition. In support of its petition, BFG submitted (1) detailed descriptions of its manufacturing and proposed waste treatment processes; (2) a list of all the raw materials used in both the manufacturing and treatment processes; (3) analytical results from total constituent analyses for mercury, cyanide, sulfide, and oil and grease; (4) analytical results from EP leachate analyses for all the EP toxic metals; and, (5) results from testing for the hazardous waste characteristics performed on the untreated wastes. (BFG submitted this data to demonstrate that their untreated wastes and Vulcan Material's untreated wastes were similar in composition.) Because BFG has not yet completed the installation of its treatment system, BFG did not submit (1) results from total constituent or EP toxicity analyses for the EP toxic metals, nickel, and cyanide; (2) results from the total constituent analysis for reactive sulfide and reactive cyanide; (3) results from the analysis for total oil and grease content; and, (4) results of testing for the hazardous waste characteristics from representative samples of the treated brine purification muds or treated saturator insolubles. Instead, BFG is relying on the analytical data presented in Vulcan Materials' (Vulcan) delisting petition (see 51 FR 16860, May 7, 1986). BFG believes that the analytical data presented by Vulcan is representative of the treated waste that BFG will generate because (1) BFG's and Vulcan's production processes are similar and use the same raw materials; (2) BFG's untreated waste and Vulcan's untreated waste are similar in composition; and, (3) BFG plans to use a treatment system that will be identical to the one used by Vulcan. (The Agency granted Vulcan Materials Company a final exclusion on November 17, 1986—see 51 FR 41486.) Once BFG's treatment system is on-line, EPA proposes that BFG be required to submit the results of total constituent analyses for reactive cyanide and reactive sulfide, total oil and grease content, and results of EP toxicity analyses for all the EP toxic metals, nickel, and cyanide (using distilled water in the cyanide extractions) on treated batches of waste. BFG also will be required to determine if the treated wastes meet any of the characteristics specified in 40 CFR 261.21 through 261.23 (see section 6 *Verification Testing Conditions*).

BFG produces chlorine and caustics using a mercury cell process (*i.e.*, electrolysis of sodium chloride brine). During the brine manufacturing process, rock salt is mixed with the depleted brine in the saturator tank. Approximately 98 percent of the rock salt dissolves. The remaining two percent consists of impurities including, calcium, magnesium, sulfates, dirt, and rocks. These impurities settle to the bottom of the saturator tank for "blowdown" (*i.e.*, removal). The blowdown (or saturator insolubles) is pumped to the saturator solids collection tank for subsequent treatment. To purify the replenished brine, the brine is pumped from the saturator tank to a clarifier and then through a series of brine filters. The settled solids on the bottom of the brine clarifier are removed and pumped to the clarifier solids collection tank. Solids accumulated on the brine filters are removed by

backwashing and are pumped to the brine filter solids collection tank.

The purified brine is cooled and then flows into the electrolytic cells containing dimensionally stable anodes and flowing mercury cathodes. Sodium chloride is removed from the brine by electrolysis and the depleted brine containing low levels of mercury is pumped back to the brine saturator tank, where additional rock salt is added in a continuous closed loop operation. During the process the saturator insolubles, clarifier blowdown and brine filter backwash solids may become contaminated with mercury.

BFG proposes to use a waste treatment system identical to the one used by Vulcan. As mentioned above, the brine clarifier blowdown will be sent to the waste treatment plant and stored in the brine clarifier solids collection tank. The brine filter backwash also will be sent to the waste treatment plant to be stored in the brine filter solids collection tank. The brine clarifier blowdown and brine filter backwash (collectively termed the brine purification muds) will be pumped to a pH adjustment tank where sulfuric acid will be added for pH control. The combined wastes then will be pumped to a hypochlorite treatment tank where sodium hypochlorite will be added in order to convert the mercury to a more soluble form. Residual chlorine, generated in the hypochlorite treatment tank, will be collected and vented back to the plant's chlorine recovery system. (The chlorine recovery system operates outside of the mercury cell process and does not contribute any waste to the mercury waste treatment system.) The brine purification muds then will be pumped to a rotary vacuum filter where they will be washed with diluted hydrochloric acid and rinsed with two water sprays and dried. BFG claims that the acid washing step will reduce the waste's mercury content by removing (*i.e.*, pre-leaching) the leachable mercury from the waste. BFG plans to dispose of the vacuum filter cake resulting from the rotary vacuum filter at an off-site sanitary landfill, if the exclusion is granted. The mercury-bearing filtrate and water rinse removed by the rotary vacuum filter will be sent to a separate treatment system for pH adjustment, reduction, and filtration. The filtration residual will be disposed at an off-site hazardous waste landfill and is not a subject of this petition.

Blowdown from the saturator (saturator insolubles) will be collected in the saturator solids collection tank. The saturator insolubles (blowdown) then will be washed. In the washing step, depleted acid brine (*i.e.*, brine which has undergone electrolysis) is added to the saturator solids collection tank in order to solubilize the mercury to accelerate mercury leaching. After washing, the depleted acid brine and soluble mercury will be gravity drained from the saturator solids collection tank and pumped back to the brine saturator tank for replenishment. The remaining treated saturator insolubles will be disposed of at an off-site landfill, if the petition is granted. As stated earlier, the recirculation of depleted acid brine to the brine purification system introduces trace concentrations of mercury into the saturator insolubles and brine purification muds.

3. Agency Analysis

As stated above, BFG has not submitted any analytical information characterizing the treated brine purification muds or saturator insolubles because their treatment system is not yet on-line. BFG instead is relying on the analytical data previously submitted to the Agency by Vulcan. Vulcan, in support of its petition, submitted the EP extraction results (mass of a particular constituent per unit volume of extract) for mercury from each batch of the treated brine purification muds and saturator insolubles. See "Test Methods for Evaluating Solid Wastes: Physical/Chemical Methods," U.S. EPA, Office of Solid Waste and Emergency Response, Publication SW–846 (third edition), November 1986, method No. 1310.

The Agency previously granted a conditional temporary exclusion to Vulcan; at that time, the Agency established a maximum EP leachate level of mercury as 0.05 mg/l. Vulcan, therefore, was required to retreat any waste exhibiting an EP leachate concentration of mercury above 0.05 mg/l. See 46 FR 61272, December 16, 1981. In accordance with this requirement, Vulcan was required to retreat only one batch of treated brine purification muds. Furthermore, even though the maximum allowable EP leachate concentration of mercury was 0.05 mg/l, 218 of the 266 batches (82 percent) of treated brine purification muds and 96 of the 101 batches (95 percent) of treated saturator insolubles exhibited EP leachate levels of mercury at 0.016 mg/l or less.

EPA susequently promulgated final conditional exclusion to Vulcan that established the 0.0129 mg/l verification testing level (*i.e.*, "delisting level") of EP leachate mercury. Since the final exclusion set a mercury leachate level that superceded that of the temporary conditional exclusion, Vulcan successfully retreated all samples exhibiting more than the 0.0129 mg/l level. See 51 FR 16860, May 7, 1986.

BFG is also relying on Vulcan's analytical data on the treated wastes for both the total constituent (*i.e.*, mass of a particular constituent per mass of waste) and EP leachate concentrations for the EP toxic metals, nickel, and cyanide, as well as for total oil and grease content. See 51 FR 16860, May 7, 1986. Vulcan's treated waste exhibited a maximum of 92 mg/kg of total oil and grease; therefore, EP analyses did not have to be modified in accordance with the Oily Waste EP methodology (*i.e.*, wastes having more than one percent total oil and grease may either have significant concentrations of the constituents of concern in the oil phase, which may not be assessed using the standard EP leachate procedure, or the concentration of oil and grease may be sufficient to coat the solid phase of the sample and interfere with the leaching of metals from the sample). See SW–846 method number 1330.

To support the contention that FBG's and Vulcan's untreated wastes were similar in composition, BFG submitted analytical data characterizing its untreated wastes. BFG provided the results of EP leachate analyses for all the EP toxic metals from two samples of the brine clarifier solids, two samples of the saturator insolubles, and two samples of the brine filter backwash solids. The brine clarifier solids and saturator insolubles samples were collected in September and December, 1980, and the brine filter backwash solids samples were collected on August and October, 1980. Except for mercury, none of the EP toxic metals were present in the wastes at concentrations exceeding six times the National Primary Drinking Water Regulations. The maximum EP leachate concentration of mercury was 0.037 mg/l. The maximum total constituent concentrations of mercury, cyanide, and sulfide were 26.5 mg/kg, 0.1 mg/kg, and 0.1 mg/kg, respectively. The maximum total oil and grease content was 100 mg/kg. Lastly, based on analytical results, the untreated wastes did not exhibit the characteristics ignitability, corrosivity, or reactivity. (The Agency notes that BFG supplied these limited data to support the contention that BFG and Vulcan produced similar wastes.)

BFG also submitted material safety data sheets (MSDS) for all raw materials and chemical inputs to its manufacturing processes. Review of BFG's MSDSs indicated that a filter aid (flocculent) contained petroleum distillates. Therefore, it is possible for petroleum distillates to enter the waste treatment

VOL 53 ISS 237 DE 9 1988 UMI

system. Although petroleum distillates are not specifically listed in 40 CFR Part 261 Appendix VIII, petroleum distillates can contain benzene, toluene, and xylene, which are constituents listed in Appendix VIII. BFG, therefore, was requested to either provide analytical test results for these constituents or a mass-balance demonstration of the maximum possible total constituent concentrations of benzene, toluene, and xylene. BFG elected to provide a mass-balance demonstration which showed, based on a maximum total concentration of 0.1 percent of benzene, toluene, and xylene in the filter aid and a maximum usage of 4 ppm of the filter aid (which is normally used at very low concentrations), a calculated maximum total constituent concentration of 4 ppb for each of the three constituents in the saturator insolubles and brine purification muds. (These data were used in the Agency's evaluation—see section 4—*Agency Evaluation*.)

Based on Vulcan's data, BFG also claims that the treated waste will not exhibit any of the characteristics of ignitability, corrosivity, or reactivity. BFG submitted limited analytical data indicating that the untreated saturator insolubles and brine purification muds do not exhibit any of the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23.

BFG submitted a signed certification stating that based on current annual waste generation, it anticipates generating annually no more than 6,500 tons of treated mercury brine purification muds and saturator insolubles. The Agency reviews a petitioner's estimates and, on occasion, has requested a petitioner to re-evaluate estimated waste volume. EPA accepts BFG's certified estimate of 6,500 tons (approximately 6,420 cubic yards).

EPA does not generally verify submitted test data before proposing delisting decisions, and has not verified the data upon which it proposes to grant BFG's exclusion. The sworn affidavit submitted with this petition binds the petitioner to present truthful and accurate results. The Agency, however, conducts a spot-check sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions, and may randomly select to visit this facility in the future for spot-sampling.

4. Agency Evaluation

The Agency considered the appropriateness of alternative disposal scenarios for the treated mercury brine purification muds and treated saturator insolubles and decided that a landfill scenario is the most reasonable, worts-case scenario for these wastes. Under a landfill disposal scenario, the major exposure route of concern for any hazardous constituents would be ingestion of contaminated ground water. The Agency, therefore, evaluated the petitioned waste using its vertical and horizontal spread (VHS) landfill model which predicts the potential for ground-water contamination from wastes that are landfilled. See 50 FR 7882 (February 26, 1985), 50 FR 48896 (November 27, 1985), and the RCRA public docket for these notices for a detailed description of the VHS model and its parameters. This modeling approach, which includes a ground-water transport scenario, was used with conservative, generic parameters, to predict reasonable worst-case contaminant levels in ground water at a hypothetical receptor well (*i.e.*, the model estimates the ability of an aquifer to dilute the toxicant from a specific volume of waste). In addition, the Agency used its organic leachate model (OLM) to estimate the leachable portion of the organic constituents in the petitioned waste. See 50 FR 48953 (November 27, 1985), 51 FR 41084 (November 13, 1986), and the RCRA public docket for these notices for a detailed description of the OLM and its parameters. The results of the OLM analysis were used in conjunction with the VHS model to estimate the potential impact of the organic constitutents on the underlying ground water. The Agency requests comments on the use of the OLM and VHS model as applied to the evaluation of BFG's waste.

Specifically, the delisting levels (*i.e.*, verification testing levels) were determined by back-calculating from the appropriate regulatory standard for each constituent (the maximum level allowed at the compliance point) through the VHS model, and are shown in Table 1. A detailed description of these calculations is available in the docket to this notice.

TABLE 1.—VHS MODEL: MAXIMUM ALLOWABLE EP LEACHATE LEVELS MERCURY BRINE MUDS AND SATURATOR INSOLUBLES

Constituents	Regulatory standards (mg/l) [1]	Verification levels (mg/l)
Arsenic	0.05	0.316
Barium	1.0	6.31
Cadmium	0.01	0.063
Chromimum	0.05	0.316
Cyanide	0.7	4.42
Lead	0.05	0.316
Mercury	0.002	0.0126
Nickel	0.5	3.16
Selenium	0.01	0.063
Silver	0.05	0.316

[1] See "Docket Report on Health-Based Regulatory Levels and Solubilities used in the Evaluation of Delisting Petitions," June 8, 1988, in the RCRA public docket.

The Agency has reviewed Vulcan's treatment data and believes that the Vulcan treatment system is capable of treating mercury brine purification muds and saturator insolubles to meet these back-calculated levels. The Agency compared the analytical data characterizing both BFG's and Vulcan's untreated wastes and believes that the two wastes are similar in composition. See 51 FR 16860, May 9, 1986, and the accompanying RCRA docket. Because BFG will be using an identical treatment system to treat comparable wastes, the Agency believes that BFG's treatment system will treat BFG's wastes so that they can meet below the verification testing limits presented in Table 1.

The Agency also calculated the mobile portion of the total constituent concentrations of the organics, derived from mass balance arguments (described above), that may potentially be present in the waste (as contaminants from the filter aid used by BFG) using the OLM. The leachable content of benzene, toluene, and xylene then were evaluated using the VHS model in order to assess the potential impacts of these constituents upon the ground water. The calculated compliance-point concentrations for these organic constituents are shown in Table 2. A detailed description of these calculations is available in the docket. The calculated compliance-point concentrations for benzene, xylene, and toluene were below the levels of regulatory concern.

TABLE 2—VHS/OLM MODEL: CALCULATED COMPLIANCE-POINT CONCENTRATIONS MERCURY BRINE MUDS AND SATURATOR INSOLUBLES

Constituents	Compliance-point concentrations (mg/l)	Levels of regulatory concern (mg/l) [1]
Benzene	1.3×10^{-4}	0.005
Xylene	5.69×10^{-5}	70
Toluene	8.24×10^{-5}	10

[1] See "Docket Report on Health-Based regulatory Levels and Solubilities used in the Evaluation of

BEST COPY AVAILABLE

Delisting Petitions," June 8, 1988, in the RCA public docket.

The Agency reviewed BFG's list of raw materials and material safety data sheets and did not identify any other hazardous constituents of concern being used by BFG, other than those already evaluated, and believes that no other hazardous constituents of concern are likely to be present or formed as reaction products or by-products of BFG's waste. Vulcan did not supply analytical data characterizing either the reactive sulfide or reactive cyanide levels in the treated mercury brine purification muds or treated saturator insolubles because at the time Vulcan petitioned to exclude its wastes, the Agency did not require these data. BFG does not use cyanide or sulfide; therefore, these constituents could only enter the wastestream as contaminants. However, based on an evaluation of Vulcan's data and BFG's limited analytical data, EPA believes that the total constituent concentration of cyanide will not exceed the Agency's interim standard for reactive cyanide of 250 mg/kg because the total constituent concentration of cyanide is 0.1 mg/kg. See internal Agency memorandum dated July 12, 1985, regarding "Interim Agency Thresholds for Toxic Gas Generation" in the RCRA Public docket. Likewise, the Agency does not believe that the level of reactive sulfide in BFG's wastes will exceed the interim standard of 500 mg/kg because the total constituent concentration of sulfide is 0.1 mg/kg. See internal Agency memorandum dated July 12, 1985, regarding "Interim Agency Thresholds for Toxic Gas Generation" in the RCRA Public docket.

Lastly, the manufacturing and treatment processes are believed to be uniform and consistent since the facility neither operates as a job shop nor has seasonal product variations. Thus, EPA believes that the wastes generated by BFG will continue to resemble Vulcan's wastes.

5. Conclusion

The Agency is proposing that BFG's mercury brine purification muds and saturator insolubles, when treated with the "Vulcan technology," be considered non-hazardous if they meet certain verification testing requirements. The Agency believes that these treated wastes should not present a significant hazard to either human health or the environment. The Agency proposes to grant a conditional exclusion to BFG Intermediates Company's Calvert City Plant, located in Calvert City, Kentucky, for both its mercury brine purification muds (*i.e.*, brine clarifier solids and brine filter backwash solids) and saturator insolubles, described in their petition as EPA Hazardous Waste No. K071, when treated using the "Vulcan technology." If the proposed rule becomes effective BFG's mercury brine purification muds and saturator insolubles, when treated using the "Vulcan technology," would no longer be subject to regulation under 40 CFR Parts 262 through 268 and the permitting standards of 40 CFR Part 270.

6. Verification Testing Conditions

As stated earlier, the proposed exclusion contains verification testing requirements. If the final exclusion is granted, the petitioner will be required both to verify that the treatment system is on-line and operating as described in the petition, and to show that, once on-line, the treatment system can meet the Agency's verification testing limitations (*i.e.*, "delisting levels"). These proposed conditions are specific to the upfront exclusion petitoned by BFG.

This proposed exclusion is conditional upon the following:

(1) BFG must collect representative grab samples of each treated batch of mercury brine purification muds and of each treated batch of saturator insolubles prior to disposal and must analyze for the EP leachate concentration of mercury. Analyses must be performed according to SW–846 methodologies. Any treated batch of mercury brine purification muds or saturator insolubles which exhibits EP leachate concentrations of mercury exceeding 0.0128 mg/l must either be retreated or managed and disposed in accordance with Subtitle C of RCRA. BFG must report the analytical data within 90 days after the treatment of the first full-scale batch, and every 90 days following the initial report.

The Agency is proposing to require BFG to continue to test each batch of mercury brine purification muds and saturator insolubles prior to disposal for the EP leachate concentration of mercury in order to ensure that the EP leachate consentration of mercury has been reduced below the level of regulatory concern. This continuing mercury testing requirement is included because it may occasionally be necessary to retreat treated batches of either the mercury brine purification muds and/or saturator insolubles in order to reduce the concentration of EP leachate mercury to meet the delisting level.

(A) BFG must collect weekly composite samples comprised of representative grab samples from each batch of mercury brine purification muds generated during the particular week. BFG must analyze the weekly composite samples for the EP leachate concentrations of all the EP toxic metals, nickel, and cyanide (using distilled water instead of acetic acid in the cyanide extraction), the total constituent concentrations of reactive sulfide and reactive cyanide, total oil and grease content, and the characteristics of ignitability, corrosivity, and reactivity. Analyses must be performed according to SW–846 methodologies. BFG must report the analytical test data within 90 days after the treatment of the first full-scale batch, and every 90 days following the initial report.

(B) BFG must collect weekly composite samples comprised of representative grab samples from each batch of saturator insolubles generated during the particular week. BFG must analyze the weekly composite samples for the EP leachate concentrations of all the EP toxic metals, nickel, and cyanide (using distilled water instead of acetic acid in the cyanide extraction), the total constituent concentrations of reactive sulfide and reactive cyanide, total oil and grease content, and the characteristics of ignitability, corrosivity, and reactivity. Analyses must be performed according to SW–846 methodologies. BFG must report the analytical test data within 90 days after the treatment of the first full-scale batch, and every 90 days following the initial report.

(3) If, under conditions (2)(A) or (2)(B), the EP leachate concentrations for arsenic, chromium, lead, or silver exceed 0.316 mg/1; for barium exceeds 6.31 mg/1; for cadmium or selenium exceeds 0.063 mg/1; for nickel exceeds 3.16 mg/1; or for cyanide exceeds 4.42 mg/1, the waste exhibits any of the characteristics of ignitability, corrosivity, or reactivity, or if the total constituent concentrations of reactive cyanide or reactive sulfide exceed 250 mg/kg and 500 mg/kg, respectively, the waste must either be retreated or managed and disposed in accordance with Subtitle C of RCRA.

(4)(A) The requirements of condition (2)(A) shall be terminated by EPA when the results of four consecutive weekly composite samples for the mercury brine purification muds show the maximum allowable levels in condition (3) are not exceeded and the Chief, Variances Section, notifies BFG that the requirements of condition (2)(A) have been lifted.

(B) The requirements of condition (2)(B) shall be terminated by EPA when the results of four consecutive weekly composite samples for the saturator insolubles show the maximum allowable levels in condition (3) are not exceeded and the Chief, Variances Section, notifies BFG that the requirements of condition (2)(B) have been lifted.

The Agency is not requiring testing for the three organic constituents listed in Table 2 because mass balance analyses indicate that the constituents would not be present at levels of regulatory concern. The Agency, however, is proposing a mechanism both to collect a minimum of four weekly composite samples and to terminate the testing and reporting requirements of conditions (2)(A) and (2)(B) after four consecutive weeks of meeting the delisting levels

listed in condition (3), for the following reasons.

First, the Agency is proposing to require sufficient analytical data from BFG necessary to demonstrate that BFG's treatment system is on-line and operating properly before terminating the testing and reporting requirements of conditions (2) (A) and (B). The Agency determined through its review of similar petitions that approximately four weeks are required for a facility to train operators and to collect sufficient data to verify that the full-scale treatment process is operating correctly. Accordingly, the Agency is proposing that BFG be required to collect a minimum of four weekly composite samples of both the mercury brine purification muds and saturator insolubles.

Second, based both on the data submitted by Vulcan and the characteristics of BFG's untreated wastes, the Agency believes that consistently non-hazardous levels of the EP toxic metals, nickel, cyanide, reactive sulfide, and reactive cyanide can be generated from BFG's fully-operational treatment system. Thus, the Agency believes that, in this case, a requirement for continued testing, after four consecutive weekly composite samples of the mercury brine purification muds and/or saturator insolubles meet the delisting levels of condition (3), is not necessary to protect human health and the environment. (As discussed above, EPA is proposing continual testing for mercury.)

Lastly, the termination of the sampling and reporting requirements of conditions (2)(A) and (2)(B) after four consecutive weekly composite samples of the mercury brine purification muds and saturator insolubles meet the delisting levels of condition (3) is consistent with existing policy that testing may be terminated for continuously generated wastes after taking a minimum of four representative samples if those wastes are well mixed and uniformly produced. (EPA normally requests a minimum of four samples of a continuously generated waste.) See "Test Methods for Evaluating Solid Wastes: Physical/Chemical Methods," U.S. EPA, Office of Solid Waste and Emergency Response, Publication SW–846 (third edition), and "Petitions to Delist Hazardous Wastes—A Guidance Manual," U.S. EPA, Office of Solid Waste, (EPA/530–SW–85–003), April 1985.

Future upfront delisting proposals and decisions issued by the Agency may include different testing and reporting requirements based on an evaluation of the uniformity of the process and of the waste, of the waste volume (including whether there is a fixed volume of waste or an infinite source), and of other factors normally considered in the petition review process. For example, wastes with variable constituent concentrations, discussed in previous delisting decisions (*e.g.*, see 51 FR 41323, November 14, 1986), may require continuous batch testing.

(5) Within one week of system start-up, BFG must notify the Chief, Variances Section (see address below) when the full-scale system is on-line and waste treatment has begun. The test data from Conditions (1), (2)(A), and (2)(B) must be kept on file by BFG for inspection purposes and must be compiled, summarized, and submitted to the Chief, Variances Section, PSPD/OSW (OS–343), U.S. EPA, 401 M Street, S.W., Washington, D.C. 20460 within the time period specified in conditions (1), (2)(A), and (2)(B), respectively. Failure to submit the required data will be considered by the Agency sufficient basis to revoke BFG's exclusion to the extent directed by EPA. All data must be accompanied by the following certification statement:

"Under civil and criminal penalty of law for the making or submission of false or fraudulent statements or representations (pursuant to the applicable provisions of the Federal Code which include, but may not be limited to, 18 U.S.C. § 6928), I certify that the information contained in or accompanying this document is true, accurate and complete.

As to the (those) identified section(s) of this document for which I cannot personally verify its (their) truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete.

In the event that any of this information is determined by EPA in its sole discretion to be false, inaccurate or incomplete, and upon conveyance of this fact to the company, I recognize and agree that this exclusion of wastes will be void as if it never had effect or to the extent directed by EPA and that the company will be liable for any actions taken in contravention of the company's RCRA and CERCLA obligations premised upon the company's reliance on the void exclusion."

(Name of Certifying Person)

Date

(Title of Certifying Person)

If made final, the proposed exclusion will only apply to the processes covered by the original demonstration. The facility would require a new exclusion if its manufacturing or treatment processes are altered, and accordingly would need to file a new petition. The facility must treat waste generated from changed processes as hazardous until a new exclusion is granted.

Although management of the waste covered by this petition would be relieved from Subtitle C jurisdiction upon final promulgation of an exclusion, the generator of a delisted waste must either treat, store, or dispose of the waste in an on-site facility, or ensure that the waste is delivered to an off-site storage, treatment, or disposal facility, either of which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste. Alternatively, the delisted waste may be delivered to a facility that beneficially uses or reuses, or legitimately recycles or reclaims the waste, or treats the waste prior to such beneficial use, reuse, recycling, or reclamation.

III. Effective Date

This rule, if promulgated, will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here, because this rule, if promulgated, would reduce the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense that would be imposed on this petitioner by an effective date six months after promulgation and the fact that a six-month deadline is not necessary to achieve the purpose of section 3010, EPA believes that this exclusion should be effective immediately upon promulgation. These reasons also provide a basis for making this rule effective immediately, upon promulgation, under the Administrative Procedures Act, pursuant to 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposal to grant an exclusion is not major, since its effect, if promulgated, would be to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction would be achieved by excluding waste generated at a specific facility from EPA's lists of hazardous wastes, thereby enabling this facility to treat its waste as non-hazardous. There is no additional impact, therefore, due to today's rule. This proposal is not a major regulation, therefore, no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an

agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment, if promulgated, will not have an adverse economic impact on small entities since its effect would be to reduce the overall costs of EPA's hazardous waste regulations and would be limited to one facility. Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous materials, Waste treatment and disposal, Recycling.

Authority: Sec. 3001 RCRA, 42 U.S.C. 6921.

Date: December 1, 1988.

Jeffery D. Denit,

Deputy Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR Part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6922).

2. In Table 2 of Appendix IX, add the following wastestreams in alphabetical order:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 2.—WASTES EXCLUDED FROM SPECIFIC SOURCES

Facility	Address	Waste description
•	•	•
BF Goodrich Intermediates Company, Inc.	Calvert City, KY	Brine purification muds and saturator insolubles (EPA Hazardous Waste No. K071) after [insert date of final rule's publication]. This exclusion is conditional upon the submission of data obtained from BFG's full-scale treatment system because BFG's original data was based on data presented by another petitioner using an identical treatment process. To ensure that hazardous constituents are not present in the waste at levels of regulatory concern once the full-scale treatment facility is in operation, BFG must implement a testing program. This testing program must meet the following conditions for the exclusion to be valid: (1) BFG must collect representative grab samples of each treated batch of mercury brine purification muds and of each treated batch of saturator insolubles prior to disposal and must analyze for the EP leachate concentration of mercury. Analyses must be performed according to SW–846 methodologies. Any treated batch of mercury brine purification muds or saturator insolubles which exhibits EP leachate concentrations of mercury exceeding 0.0126 mg/1 must either be retreated or managed and disposed in accordance with Subtitle C of RCRA. BFG must report the analytical data within 90 days after the treatment of the first full-scale batch, and every 90 days following the initial report. (2)(A) BFG must collect weekly composite samples comprised of representative grab samples from each batch of mercury brine purification muds generated during the particular week. BFG must analyze the weekly composite samples for the EP leachate concentrations of all the EP toxic metals, nickel, and cyanide (using distilled water instead of acetic acid in the cyanide extraction), the total constituent concentrations of reactive sulfide and reactive cyanide, total oil and grease content, and the characteristics of ignitability, corrosivity, and reactivity. Analyses must be performed according to SW–846 methodologies. BFG must report the analytical test data within 90 days after the treatment of the first full-scale batch, and every 90 days following the initial report. (2)(B) BFG must collect weekly composite samples comprised of representative grab samples from each batch of saturator insolubles generated during the particular week. BFG must analyze the weekly composite samples for the EP leachate concentrations of all the EP toxic metals, nickel, and cyanide (using distilled water instead of acetic acid in the cyanide extraction), the total constituent concentrations of reactive sulfide and reactive cyanide, total oil and grease content, and the characteristics of ignitability, corrosivity, and reactivity. Analyses must be performed according to SW–846 methodologies. BFG must report the analytical test data within 90 days after the treatment of the first full-scale batch, and every 90 days following the initial report. (3) If, under condition (2)(A) or (2)(B), the EP leachate concentrations for arsenic, chromium, lead, or silver exceed 0.316 mg/1; for barium exceeds 6.31 mg/1; for cadmium or selenium exceeds 0.063 mg/1; for nickel exceeds 3.16 mg/1; or for cyanide exceeds 4.42 mg/1, the waste exhibits any of the characteristics of ignitability, corrosivity, or reactivity, or if the total constituent concentrations of reactive cyanide or reactive sulfide exceed 250 mg/kg and 500 mg/kg, respectively, the waste must either be retreated or managed and disposed in accordance with Subtitle C of RCRA. (4)(A) The requirements of condition (2)(A) shall be terminated by EPA when the results of four consecutive weekly composite samples for the mercury brine purification muds show the maximum allowable levels in condition (3) are not exceeded and the Chief, Variances Section, notifies BFG that the requirements of condition (2)(A) have been lifted. (4)(B) The requirements of condition (2)(B) shall be terminated by EPA when the results of four consecutive weekly composite samples for the saturator insolubles show the maximum allowable levels in condition (3) are not exceeded and the Chief, Variances Section, notifies BFG that the requirements of condition (2)(B) have been lifted.

TABLE 2.—WASTES EXCLUDED FROM SPECIFIC SOURCES—Continued

Facility	Address	Waste descnption
		(5) Within one week of system start-up, BFG must notify the Chief, Variances Section (see address below) when the full-scale system is on-line and waste treatment has begun. The test data from Conditions (1), (2)(A), and (2)(B) must be kept on file by BFG for inspection purposes and must be compiled, summarized, and submitted to the Chief, Variances Section, PSPD/OSW (OS-343), U.S. EPA, 401 M Street SW., Washington, DC 20460 within the time period specified in conditions (1), (2)(A), and (2)(B), respectively. Failure to submit the required data will be considered by the Agency sufficient basis to revoke BFG's exclusion to the extent directed by EPA. All data must be accompanied by the following certification statement: "Under civil and criminal penalty of law for the making or submission of false or fraudulent statements or representations (pursuant to the applicable provisions of the Federal Code which include, but may not be limited to, 18 U.S.C. 6928), I certify that the information contained in or accompanying this document is true, accurate and complete. As to the (those) identified section(s) of this document for which I cannot personally verify its (their) truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete. In the event that any of this information is determined by EPA in its sole discretion to be false, inaccurate or incomplete, and upon conveyance of this fact to the company, I recognize and agree that this exclusion of wastes will be void as if it never had effect or to the extent directed by EPA and that the company will be liable for any actions taken in contravention of the company's RCRA and CERCLA obligations premised upon the company's reliance on the void exclusion."

BILLING CODE 6560-50-M

40 CFR Part 372

[OPTS-400020; FRL-3488-6]

Sodium Hydroxide; Toxic Chemical Release Reporting; Community Right-to-Know

AGENCY: Environment Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is granting a petition by proposing to delete sodium hydroxide (solution) from the list of toxic chemicals under section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Sodium hydroxide does not meet section 313 criteria, and is dangerous only under conditions of (a) direct ingestion, which has no relationship to section 313 reporting, or (b) chemical spills, which are specifically covered under other reporting authorities. The proposal to delete sodium hydroxide is based on the Agency's conclusion that there is no evidence that sodium hydroxide releases cause adverse affects to human health or the environment under ordinary exposure scenarios. EPA recognizes the potentially dangerous properties of sodium hydroxide; however, these properties are only of concern under controlled conditions or misuse of the chemical. Therefore, EPA proposes to amend 40 CFR Part 372 by deleting sodium hydroxide.

DATE: Written comments must be submitted on or before February 7, 1989.

ADDRESSES: Written comments should be submitted in triplicate to: OTS Docket Clerk, TSCA Public Docket Office (TS-793), Environmental Protection Agency, Room NE-G004, 401 M Street, SW., Washinton, DC 20460. Attention: Docket Control Number OPTS-400020.

FOR FURTHER INFORMATION CONTACT: Renee Rico, Petition Coordinator, Emergency Planning and Community Right-to-Know Information Hotline, Environmental Protection Agency, Mail Stop OS-120, 401 M Street, SW., Washington, DC 20460, Toll free: 800-535-0202, In Washington, DC, and Alaska, 202-479-2449.

SUPPLEMENTARY INFORMATION:

I. Introduction

A. Statutory Authority

The proposed deletion is issued under section 313 (d) and (e)(1) of Title III of the Superfund Amendments and Reauthorization Act of 1986 (Pub. L. 99-499, "SARA" or "the Act"). Title III of SARA is also referred to as the Emergency Planning and Community Right-to-Know Act of 1986.

B. Background

Section 313 of SARA Title III requires certain facilities using toxic chemicals to report annually their environmental releases of such chemicals. Section 313 establishes an initial list of toxic chemicals that is composed or more than 300 chemicals and chemical categories. Any person may petition the Agency to add chemicals to or delete chemicals from the list.

EPA issued a statement of petition and guidance in the **Federal Register** of February 4, 1987 (52 FR 3479), to provide guidance regarding the recommended content and format for submitting petitions. The Agency must respond to petitions within 180 days either by initiating a rulemaking or by publishing an explanation of why the petition is denied.

In addition to responding to petitions, EPA has authority under section 313(d) to modify the list of chemicals in order to further the objectives of section 313. EPA has therefore begun to evaluate candidates for addition to the list based on data available to the Agency from its various chemical review and assessment activities. EPA anticipates that this review will result in the initiation of a rulemaking proceeding during calendar year 1989.

II. Description of Petition

On April 22, 1988, the Agency received a petition from The Chlorine Institute, Inc. to delete sodium hydroxide (NaOH) solution from the list of toxic chemicals. NaOH can exist in both solid and solution form, but since only NaOH solution is listed under section 313, only the solution is covered by the petition.

III. EPA's Review of Sodium Hydroxide

A. Toxicity Evaluation

1. *Acute toxicity.* NaOH is a strongly alkaline, caustic substance that is acutely toxic to human tissue upon direct contact. The extent of damage is dependent on concentration and duration of exposure, and can range from irritation to corrosion, erosion, chemical burn, and, in extreme and isolated cases, risk of early death. Most reported cases of tissue damage have involved occupational incidents or accidents in the home due to mishandling or misuse of NaOH-containing products. NaOH is not expected to be acutely toxic at concentrations that are reasonably likely to exist beyond facility site boundaries as a result of continuous, or frequently recurring releases.

2. *Chronic toxicity.* The only available data on humans pertain to the workplace. However, there are no data that indicate that individuals occuptationally exposed for long period to 0.5 to 2.0 mg/m^3 or NaOH (as an 8-hour time-weighted average) suffer serious or irreversible chronic effects. Levels in ambient air are expected to be well below the levels encountered in the workplace.

3. *Carcinogenicity.* Under extremely unusual circumstances, there is some indication that NaOH may indirectly lead to the development of cancer in humans. None of these observed cases were of occupational origin nor were they the result of exposure to concentrations of NaOH that may reasonably be expected to occur in the environment. All cases involved a massive ingestion of NaOH (lye) which resulted in traumatic tissue destruction. These cancers appear to be the result of tissue destruction and scarring, rather than a direct action of NaOH itself (similarly, tissue destruction from severe burns can also result in cancer).

4. *Environmental effects.* NaOH is only slightly toxic to fish in acute exposures, and there is no indication of chronic effects. NaOH is not persistent in the environment and is not expected to bioaccumulate in organisms.

5. *Reproductive and developmental effects; heritable genetic mutations; neurological disorders.* There is insufficient information to evaluate NaOH in terms of reproductive, developmental, mutagenic, or neurological toxicity.

B. Use, Release, and Exposure

1. *Manufacture.* EPA estimates that air releases of NaOH during manufacture will be minor, ranging from 0 to 25 kg/yr per plant. This corresponds to a maximum inhalation exposure of less than 1 μg/yr/person.

2. *Processing and use.* The Agency estimates that the worst-case ambient air levels of NaOH may result from use in bottle washing operations in breweries in which no control technology is used. Average and maximum ambient air levels were calculated at 0.071 μg/m ^{3} and 24 μg/m^3, respectively.

C. Summary of Technical Review

NaOH is acutely toxic to human tissue, producing effects ranging from irritation to corrosion to risk of early death. The extent of damage is dependent upon concentration and duration of exposure. However, no acute human health effects are expected to result from exposures to concentrations of NaOH encountered in the environment under normal release conditions.

In terms of chronic human health effects, ingestion of massive doses of NaOH has led to the development of cancer in humans; however, it is believed that the cancer is a result of tissue destruction and scar formation and that it is not due to a direct carcinogenic potential of NaOH itself.

NaOH is only slightly toxic in the aquatic environment.

IV. Explanation for Proposed Action To Delete

EPA is granting the petition submitted by The Chlorine Institute by proposing to delete NaOH from the section 313 list of toxic chemicals. The decision to grant the petition is based on the EPA's evaluation of NaOH's toxicity and the levels of NaOH exposure to which humans may be subject. The Agency believes that there is no evidence that NaOH releases cause adverse affects to human health or the environment under ordinary exposure scenarios. The substance's toxic properties are dependent upon concentration and duration of exposure. Only under aberrant conditions of exposure (i.e., spills directly onto skin; deliberate ingestion) does NaOH pose a serious health hazard.

EPA does not believe that NaOH meets the statutory criterion of section 313(d)(2)(A) regarding acute human health effects, specifically, that the "* * * chemical is known to cause or can reasonably be anticipated to cause significant adverse human health effects at concentration levels that are reasonably likely to exist beyond facility boundaries as a result of continuous, or frequently recurring, releases." EPA's review of the toxicity and exposure information indicates that NaOH will not cause significant adverse acute human health effects under these circumstances.

NaOH can, however, present a danger in (1) deliberate or accidental exposure to consumer products (e.g. swallowing drain-cleaner) or (2) spills from transportation or industrial accidents. Section 313 data does not bear in any way on the first situation and only tangentially on the second (if a spill were to occur at a facility covered by section 313) by providing annual release data which would incorporate any environmental releases from spills. Neither circumstance represents "continuous, or frequently recurring, releases."

Nor does NaOH meet the criterion of section 313(d)(2)(B) which states that the "* * * chemical is known to cause or can reasonably be anticipated to cause in humans: (i) cancer or teratogenic effects, or (ii) serious or irreversible * * * reproductive dysfunction * * * neurological disorders * * * heritable genetic mutations, or * * * other chronic health effects." NaOH has been reported to cause cancer in humans in situations involving acute exposures to large quantities of the chemical. This appears to be an indirect effect of NaOH and is most likely the result of massive physical destruction of tissue and subsequent scarring. A NIOSH study concluded that observed carcinomas were "undoubtedly sequelae of tissue destruction and scar formation, rather than the result of a direct carcinogenic action of NaOH itself." No evidence is available to suggest that NaOH is even indirectly involved in tumor development in situations not involving massive tissue destruction. Thus, EPA does not believe that NaOH causes or can be reasonably anticipated to cause cancer in humans in the manner anticipated by the statutory language of section 313(d)(2)(B), and there is no evidence to suggest any other chronic health effects from exposure to NaOH.

Section 313(d)(2)(C) establishes a criterion pertaining to ecotoxicity: the "* * * chemical is known to cause or can reasonably be anticipated to cause, because of (i) its toxicity (ii) its toxicity and persistence in the environment or, (iii) its toxicity and tendency to bioaccumulate in the environment, a significant adverse effect on the environment of sufficient seriousness, in the judgement of the Administrator, to warrant reporting under this section." NaOH is only slightly toxic to fish in acute exposures and there is no indication of chronic effects. NaOH is not persistent in the environment and is

not expected to bioaccumulate in aquatic organisms. Thus, EPA does not believe that NaOH causes or can be reasonably anticipated to cause a significant adverse effect on the environment of sufficient seriousness to warrant reporting under section 313.

EPA's decision to propose removing NaOH from the list of section 313 chemicals is not meant to suggest that the Agency considers NaOH to be a "safe" chemical. The dangerous caustic nature of NaOH under unusual conditions is abundantly clear. Rather, EPA's proposal to delete NaOH reflects the fact that the chemical does not meet the toxicity criteria set forth in section 313(d)(2). Critical information on exposures of concern for NaOH is captured under other reporting requirements.

Regarding spills of NaOH, statutory mechanisms exist by which information on spills of NaOH will be made available to the public. For example, NaOH is a hazardous substance under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Releases of 1,000 pounds or more of NaOH must be reported to the National Response Center under CERCLA section 103 and to State and local authorities under Title III section 304. In addition, data on storage of NaOH for emergency planning purposes are already being collected at the local level. Under sections 311 and 312 of Title III, facilities are required to submit lists and inventories of chemicals on-site to local emergency planning committees to plan for emergencies and inform the public about the kinds of chemicals in their communities.

EPA does not believe that deleting NaOH from the section 313 list will result in any significant loophole in providing the public with important information concerning the spills of NaOH. Because reporting of spills under section 313 is only required to be submitted to EPA as part of an overall annual release number, no direct and immediate notice to the public of such an accidental release or spill of NaOH would be available through the section 313 reports or through the computer data base, i.e. only annual release figures would be available. Information concerning accidental releases or spills of NaOH will be available to the public through the statutory reporting requirements discussed above.

This finding does not necessarily reflect a general policy for listing or delisting other bases or acids for the purposes of section 313 reporting. EPA welcomes comments on the proposal to delete NaOH as well as on the approach EPA has taken here to evaluate the health and environmental impacts of NaOH in the context of the Congressionally mandated criteria for listing or delisting section 313 chemicals.

V. Rulemaking Record

The record supporting this proposed rule is contained in docket control number OPTS–400020. All documents, including an index of the docket, are available to the public in the TSCA Public Docket Office from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The TSCA Public Docket Office is located at EPA Headquarters, Room. NE–G004, 401 M Street, SW., Washington, DC 20460.

VI. Request for Public Comment

The Agency requests comments on all the analyses conducted for this review and on the Agency's proposal to delete NaOH from the list of toxic chemicals. EPA also requests that any pertinent data on NaOH be submitted to the address at the front of this document. All comments must be submitted on or before February 7, 1989.

VII. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore, requires a Regulatory Impact Analysis. EPA has determined that this proposed rule is not a "major rule" because it will not have an effect on the economy of $100 million or more.

This proposed rule would decrease the impact of the section 313 reporting requirements on covered facilities and would result in cost-savings to industry, EPA, and States. Therefore, this is a minor rule under Executive Order 12291.

This proposed rule was submitted to the Office of Management and Budget (OMB) under Executive Order 12291.

There are 19 companies manufacturing NaOH at 45 sites in the U.S. EPA estimates the number of processors that might be subject to reporting requirements to be more than 10,000. The cost savings of delisting for industry over a 10-year period are estimated at $67 million, while the savings for EPA are estimated to be $1.5 million (10-year present values using a 10 percent discount rate).

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act of 1980, the Agency must conduct a small business analysis to determine whether a substantial number of small entities will be significantly affected. Because the proposed rule results in cost savings to facilities, the Agency certifies that small entities will not be significantly affected by the rule.

C. Paperwork Reduction Act

This proposed rule does not have any information collection requirements under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

List of Subjects in 40 CFR Part 372

Community right-to-know, Environmental protection, Reporting and recordkeeping requirements, Toxic chemicals.

Dated: November 29, 1988.

Victor J. Kimm,

Acting Assistant Administrator, Office of Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR Part 372 be amended as follows:

1. The authority citation for Part 372 would continue to read as follows:

Authority: 42 U.S.C. 11013 and 11028.

§ 372.65 [Amended]

2. Section 372.65 (a) and (b) are amended by removing the entire entry for sodium hydroxide (solution) under paragraph (a) and removing the entire CAS. No. entry for 1310–73–2 under paragraph (b).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 57

Grants for Centers for Excellence

AGENCY: Public Health Service, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes regulations to implement Grants for Centers for Excellence, authorized by section 788A of the Public Health Service Act, as added by the Excellence in Minority Health Education and Care Act.

DATE: As discussed below, comments are invited. To be considered, comments must be received no later than February 7, 1989.

ADDRESSES: Written comments should be addressed to J. Jarrett Clinton, M.D., Director, Bureau of Health Professions (BHPr), Health Resources and Services Administration, Room 8–05, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. All comments received

will be available for public inspection and copying at the Office of Program Development, BHPr, Room 7–74, Parklawn Building, at the above address weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Clay E. Simpson, Jr., Ph.D., Director, Division of Disadvantage Assistance, Bureau of Health Professions, Health, Resources and Services Administration, Parklawn Building, Room 8A–09, 5600 Fishers Lane, Rockville, Maryland 20857; telephone number: 301 443–2100.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Health, Department of Health and Human Services, with the approval of the Secretary, proposes to amend Part 57 of Title 42 of the Code of Federal Regulations by removing Subpart V, entitled "Grants for Training in Emergency Medical Services", and adding a new Subpart V to implement section 788A of the Act, as established by Pub. L. 100–97, the Excellence in Minority Health Education and Care Act, enacted on August 18, 1987. Section 788A authorizes the Secretary to make grants to health professions schools to assist such schools in supporting programs of excellence in health professions education for minority individuals. A grant under this section shall be used by a health professions school to:

(1) Develop a plan to achieve institutional improvements, including financial independence, to enable such school to support programs of excellence in health professions education for minority individuals;

(2) Improve the capacity of such school to recruit and retain faculty;

(3) Provide improved access to the library and information resources of such school;

(4) Establish, strengthen, or expand programs to enhance the academic performance of students in such school;

(5) Establish, strengthen, or expand programs to increase the number and quality of applicants for admission to such school; and

(6) Develop curricula and carry out faculty training programs in order to enable such school to become, for the Nation's health care providers, a resource with respect to the health problems of minority communities, such as higher infant mortality rates and higher incidences of acquired immunodeficiency syndrome.

The major provisions of these proposed regulations are described below:

Section 57.2103 Who is eligible to apply for a grant?

Section 788A of the Act authorizes support only for a health professions school which: (1) Is a school as described in section 701(4) of the Act; and (2) has received support under section 788B of the Act (Advanced Financial Distress Assistance) for Fiscal Year (FY) 1987. However, these eligibility criteria were broadly expanded by the language of the Labor, Health, Human Services, and Education Appropriations for FY 1989, Pub. L. 100–436, enacted on September 20, 1988, to include any university which award a graduate degree in the health professions and which has a majority enrollment of minority students. This eligibility provision will end at the expiration of FY 1989 and the controlling eligibility provision will be that of section 788A as originally authorized. Therefore, these regulations have been written in accordance with the original section 788A eligibility provision. Should eligibility for support under section 788A again be changed, either by a legislative extension of the language of the FY 1989 Appropriations or by other Congressional action, the applicable legislation will, of course, control. If appropriate, the regulations will then be revised to reflect any such legislation.

Section 57.2104 Project requirements.

The Department proposes to implement section 788A by awarding grants for projects which support a minimum of three of the six statutory purposes listed above. One of these must be purpose (1) above, which relates to the development of a plan to achieve institutional improvements. It is also proposed that this plan be submitted by the grantee within 6 months of the date of the grant award. This approach is proposed for the following reasons:

1. The implementation plan would provide a means of assessing a grantee's progress in achieving its targeted improvements and financial independence. The specified time frame of 6 months from the grant award date for submission of the plan is intended to coincide with the submission of a continuation award application and the accompanying progress report.

2. The Department recognizes that the remaining five purposes include areas of need that may not exist for every potential grantee. Therefore, it is proposed that an applicant include in its application at least two of these purposes which would be appropriate for its institutional needs.

Also with respect to purpose (5), which relates to establishing, strengthening, or expanding programs to increase the number and quality of applicants for admission to such school, these proposed regulations would require that this activity not be offered to students before they enter the freshman year of high school. The Department believes that directing this activity to students at this level of education would maximize the available resources and would enable this program to reach students at the point in their education when course selection and career decisions begin to impact preparation leading to health careers. The offering of such activity prior to the ninth grade level is not considered a cost effective approach due to the length of time involved before elementary-level students are at the point of application to health professions schools, the numbers of students who could realistically be expected to pursue such a course, and the effort which would be involved in tracking these students to determine actual impact of the program. The Department also believes that by allowing these activities to take place as early as the freshman year, relationships will be encouraged between the health professions schools, and high schools, particularly those schools which emphasize a curriculum in math and science.

Regulatory Flexibility Act and Executive Order 12291

These regulations govern financial assistance programs in which participation is voluntary. The rule will not exceed the threshold level of $100 million established in section (b) of Executive Order 12291. For these reasons, the Secretary has determined that this rule is not a major rule under Executive Order 12291 and a regulatory impact analysis is not required. Further, because the rule does not have a significant economic impact on a substantial number of small entities, a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980 is not required.

Paperwork Reduction Act of 1980

Section 57.2109 contains information collection requirements which are subject to the Office of Management and Budget (OMB) review. We have submitted an information request to OMB for approval of these requirements under section 3504(h) of the Paperwork Reduction Act of 1980. Other organizations and individuals desiring to submit comments on the information collections should direct them to the

agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (Room 3208), Washington, DC 20505, ATTN: Desk Officer of HHS.

List of Subjects in CFR Part 57

Dental health, Education of the disadvantaged, Educational facilities, Educational study programs, Emergency medical services, Grant programs-education, Grant programs-health, Health facilities, Health professions, Loan programs-health, Medical and dental schools, Student aid.

Accordingly, the Department of Health and Human Services proposes to amend Part 57 of Title 42 of the Code of Federal Regulations as set forth below:

(*Catalog of Federal Domestic Assistance*, No. 13.157, Grants for Centers for Excellence)

Dated: August 25, 1988.

Robert E. Windom,

Assistant Secretary for Health.

Approved: September 21, 1988.

Otis R. Bowen,

Secretary.

PART 57—GRANTS FOR CONSTRUCTION OF TEACHING FACILITIES, EDUCATIONAL IMPROVEMENTS, SCHOLARSHIPS, AND STUDENT LOANS

1. 42 CFR Part 57 is amended by removing Subpart V, entitled "Grants for Training in Emergency Medical Services" and adding a new Subpart V, entitled "Grants for Centers for Excellence" to read as follows:

Subpart V—Grants for Centers for Excellence

Sec.

57.2101 To what projects do these regulations apply?
57.2102 Definitions.
57.2103 Who is eligible to apply for a grant?
57.2104 Project requirements.
57.2105 How will applications be evaluated?
57.2106 How long does grant support last?
57.2107 For what purposes may grant funds be spent?
57.2108 What additional Department regulations apply to grantees?
57.2109 What other audit and inspection requirements apply to grantees?
57.2110 Additional conditions.

Authority: Sec. 788A of the Public Health Service Act, as established by Pub. L. 100–97, 101 Stat. 713–714 (42 U.S.C. 295g–8a).

Subpart V—Grants for Centers for Excellence

§ 57.2101 To what projects do these regulations apply?

These regulations apply to grants awarded to public or nonprofit private health professions schools to assist such schools in supporting programs of excellence in health professions education for minority individuals.

§ 57.2102 Definitions.

"Act" means the Public Health Service Act, as amended.

"Health professions school" means any accredited school of medicine, dentistry, osteopathy, pharmacy, optometry, podiatry, veterinary medicine, public health, and chiropractic or graduate program in health administration as defined in section 701(4) of the Act and as accredited in section 701(5) of the Act.

"Minority" means an individual whose race/ethnicity is classified as American Indian or Alaskan Native, Asian or Pacific Islander, Black, or Hispanic.

"Nonprofit" means an entity owned and operated by one or more corporations or associations, no part of the net earnings of which inures or may lawfully inure to the benefit of any private shareholder or individual.

"Secretary" means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services to whom the authority involved has been delegated.

"State" means, in addition to the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands (the Republic of Palau), the Republic of the Marshall Islands, and the Federated States of Micronesia.

§ 57.2103 Who is eligible to apply for a grant?

A health professions school described in section 701(4) which has received support under section 788B (Advanced Financial Distress Assistance) of the Act for Fiscal Year 1987, may apply for a grant under this subpart. Each eligible applicant desiring a grant under this subpart shall submit an application in the form and at the time the Secretary may prescribe.[1]

§ 57.2104 Project requirements.

(a) The Secretary will award grants to meet the cost of carrying out three or more of the following six purposes, one of which must be the purpose provided in paragraph (a)(1) of this section:

(1) Develop a plan to achieve institutional improvements, including financial independence, to enable such school to support programs of excellence in health professions education for minority individuals. This plan must be submitted within 6 months of the date of grant award;

(2) Improve the capacity of such school to recruit and retain faculty;

(3) Provide improved access to the library and information resources of such school;

(4) Establish, strengthen, or expand programs to enhance the academic performance of students in such school;

(5) Establish, strengthen, or expand programs to increase the number and quality of applicants for admission to such school. Activities designed to increase the number and quality of applicants to these schools may not be offered to students prior to the ninth grade; and

(6) Develop curricula and carry out faculty training programs in order to enable such school to become, for the Nation's health care providers, a resource with respect to the health problems of minority communities, such as higher infant mortality rates and higher incidences of acquired immunodeficiency syndrome.

(b) Each project must evaluate its program based on the evaluation plan provided in the grant application.

§ 57.2105 How will applications be evaluated?

(a) After consulting with the National Advisory Council on Health Professions Education, established in section 702 of the Act, the Secretary will decide which applications to approve by considering, among other factors:

(1) The degree to which the applicant can arrange to continue the proposed project beyond the federally funded project period;

(2) The degree to which the proposed project meets three or more of the purposes as described in § 57.2104;

(3) The relationship of the objectives to the goals of the implementation plan that will be developed pursuant to § 57.2104(a)(1);

(4) The administrative and managerial ability of the applicant to carry out the project in a cost effective manner;

(5) The adequacy of the staff and faculty to carry out the program;

(6) The soundness of the budget for assuring effective utilization of grant fund, and the proportion of total program funds which come from non-federal sources and the degree to which they are projected to increase over the grant period;

[1] Applications and instructions (Form PHS 6025–1, OMB 0915–0060) may be obtained from the Grants Management Officer, Bureau of Health Professions, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

(7) The number of individuals who can be expected to benefit from the project; and

(8) The overall impact the project will have on strengthening the school's capacity to train minority health professionals and increase the supply of minority health professionals available to serve minority populations in underserved areas.

(b) In determining the funding of applications approved under paragraph (a) of this section, the Secretary will consider any special factors relating to national needs as the Secretary may from time to time announce in the **Federal Register.**

§ 57.2106 How long does grant support last?

(a) The notice of grant award specifies the length of time the Secretary intends to support the project without requiring the project to recompete for funds. This period, called the project period, will not exceed 3 years.

(b) Generally, the grant will initially be funded for 1 year, and subsequent continuation awards will also be for 1 year at a time. Decisions regarding the continuation awards and the funding levels of these awards will be made after consideration of such factors as the grantee's progress, including the degree that the projected portion of non-federal funds supporting the project has been met, and management practices, the existence of legislative authority, and the availability of funds. In all cases, continuation awards require a determination by the Secretary that continued funding is in the best interest of the Federal Government.

(c) Neither the approval of any application nor the award of any grant shall commit or obligate the United States in any way to make any additional, supplemental, continuation, or other award with respect to any approved application or portion of an approved application. For continuation support, grantees must make separate application at such times and in such a form as the Secretary may prescribe.

§ 57.2107 For what purposes may grant funds be spent?

(a) A grantee shall only spend funds it receives under this subpart according to the approved application and budget, the authorizing legislation, terms and conditions of the grant award, applicable cost principles specified in Subpart Q of 45 CFR Part 74, and these regulations.

(b) Any balance of federally obligated grant funds remaining unobligated by the grantee at the end of a budget period may be carried forward to the next budget period, for use as prescribed by the Secretary, provided a continuation award is made. If at any time during a budget period it becomes apparent to the Secretary that the amount of Federal funds awarded and available to the grantee for that period, including any unobligated balance carried forward from prior periods, exceeds the grantee's needs for the period, the Secretary may adjust the amounts awarded by withdrawing the excess. A budget period is an interval of time (usually 12 months) into which the project period is divided for funding and reporting purposes.

(c) The grantee may spend grant funds with the Secretary's prior approval to pay individual participants in the program a per diem up to a maximum daily amount established by the Secretary when the grantee determines that—

(1) The training program requires the individual to establish a temporary new residence;

(2) The program is offered at a time when the individual would not be at the training site in a regular course of education or employed as a faculty member at that institution; and

(3) No other Federal financial assistance program is authorized to provide this support.

(d) The grantee may spend grant funds with the Secretary's prior approval to provide one round trip per participant between the place of residence and the training site, provided that conditions in paragraphs (c) (1) and (2) of this section are met.

(e) The grantee may not spend grant funds for stipends, licensing exams, loan or schoarship support, support of research faculty or projects and related activities, establishment of research centers, establishment of planning offices, support of commercial ventures, entertainment, dependency allowances, new construction of facilities, acquisition of land, fund raising, or for sectarian instruction or any religious purposes.

§ 57.2108 What additional Department regulations apply to grantees?

Several other regulations apply to grants under this subpart. These include, but are not limited to:

42 CFR Part 50, Subpart D—Public Health Service grant appeals procedure

45 CFR Part 16—Procedures of the Departmental Grant Appeals Board

45 CFR Part 46—Protection of human subjects

45 CFR Part 74—Administration of grants

45 CFR Part 75—Informal grant appeals procedures

45 CFR Part 80—Nondiscrimination under programs receiving Federal assistance through the Department of Health and Human Services effectuation of Title VI of the Civil Rights Act of 1964

45 CFR Part 81—Practice and procedure for hearings under Part 80 of this Title

45 CFR Part 83—Regulation for the administration and enforcement of sections 799A and 845 of the Public Health Service Act [1]

45 CFR Part 84—Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance

45 CFR Part 86—Nondiscrimination on the basis of sex in education programs and activities receiving or benefiting from Federal financial assistance

45 CFR Part 91—Nondiscrimination on the basis of age in HHS programs or activities receiving Federal financial assistance

§ 57.2109 What other audit and inspection requirements apply to grantees?

Each grantee must, in addition to the requirements of 45 CFR Part 74, meet the requirements of section 705 of the Act, concerning audit and inspection.

§ 57.2110 Additional conditions.

The Secretary may impose additional conditions in the grant award before or at the time of the award if he or she determines that these conditions are necessary to assure or protect the advancement of the approved activity, the interest of the public health, or the conservation of grant funds.

Cable television.

Order Reopening the Period For Filing Comments

Adopted: November 10, 1988.
Released: November 21, 1988.

In the matter of inquiry into the availability of broadcast television signals on cable television systems, MM Docket No. 88–138.

By the Chief, Mass Media Bureau.

1. By this *Order*, we are reopening the above-captioned proceeding to afford parties an opportunity to comment on two reports that have been added to the record. These reports are: *Cable System Broadcast Signal Carriage Survey Report*, September 1, 1988, a staff report by the Policy and Rules Division, Mass Media Bureau of the FCC; and *Broadcast Station Carriage Survey*, September, 1988, a report prepared by the Research and Policy Analysis Department of the National Cable Television Association. We request that parties limit their comments to the information presented in these reports. The reports are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 239), 1919 M Street NW., Washington, DC. Copies of the reports can also be purchased from the Commission's copy contractor, International Transcription Services, (202) 857–3800, 2100 M Street NW., Washington, DC. 20037.

2. Accordingly, *it is ordered*, pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, That the period for filing comments in the above captioned proceeding is *reopened* to and including December 21, 1988. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. To file formally in this proceeding, participants must file an original and five copies of all comments. If participants want each Commissioner to receive a personal copy of their comments, an original plus nine copies must be filed. Comments should be sent to Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments will be available for public inspection during regular business hours in the Dockets Reference Room (Room 239) of the Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

3. For further information concerning this proceeding, contact Scott Roberts, Policy and Rules Division, Mass Media Bureau, (202) 632–6302.

Federal Communications Commission.

Alex D. Felker,

Chief, Mass Media Bureau.

BILLING CODE 6712–01–M

DEPARTMENT OF DEFENSE

48 CFR Parts 203 and 252

Department of Defense Federal Acquisition Regulation Supplement; Improper Business Practices and Personal Conflicts of Interest

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule and request for comments.

SUMMARY: This proposed rule revises DFARS coverage concerning employment prohibitions on persons convicted of fraud or other defense contract related felonies. These revisions are required by Section 831, Pub. L. 100–456, (10 U.S.C. 2408), which became effective September 29, 1988.

DATE: Comments on the proposed changes should be submitted in writing to the Executive Secretary, DAR Council, at the address shown below on or before January 9, 1989, to be considered in the formulation of the final rule. Please cite DAR Case 88–309 in all correspondence related to this issue.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Charles W. Lloyd, Executive Secretary, DAR Council, ODASD (P)/DARS, c/o OASD (P&L) (M&RS), Room 3D139, The Pentagon, Washington, DC 20301–3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, telephone (202) 697–7266.

SUPPLEMENTARY INFORMATION:

A. Background

Section 831 of the FY 1989 Department of Defense Authorization Act (Pub. L. 100–456) amended the provisions of 10 U.S.C. 2408(a) regarding employment prohibitions on persons convicted of fraud or other defense contract related felonies. This amendment added to existing prohibitions the additional prohibitions that defense contractors may not permit felons convicted of fraud or any other felony arising out of contracts with the Department of Defense to serve as a consultant to any defense contractor or in any other way as determined by regulation prescribed by the Secretary of Defense. This rule implements this amendment and adds acting as an agent or representative to the prescribed activities in order to make these prohibitions consistent with those contained in FAR 9.405. In addition, Section 831 increased the period of these employment prohibitions to a minimum of 5 years and permits waiver only in the interest of national security. These amended prohibitions were effective with enactment of Pub. L. 100–456 on September 29, 1988. This rule revises existing DFARS clauses to reflect these amendments and adds a new DFARS clause to provide for the waiver procedure.

B. Regulatory Flexibility Act.

This proposed rule is not expected to have significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because it will not diminish any existing preferences for small businesses, affect small purchase procedures, impose either special skill requirements, administrative costs, or unusual business practices upon small business. It is also required by a statute requiring uniform application. An Initial Regulatory Flexibility Analysis has therefore not been performed. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected DFARS Subpart will also be considered in accordance with Section 610 of the Act. Such comments must be submitted separately and cite DAR Case 88–610D in correspondence.

C. Paperwork Reduction Act.

The rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 203 and 252

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Therefore, it is proposed that 48 CFR Parts 203 and 252 be amended as follows:

1. The authority citation for 48 CFR Parts 203 and 252 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

PART 203—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

2. Section 203.571–1 is revised to read as follows:

203.571–1 Scope.

This subpart prescribes policies and procedures to implement 10 U.S.C. 2408 which prohibits defense contractors from employing in a managerial or supervisory capacity on any defense contract, persons convicted of fraud or any other felony arising out of a contract with the Department of Defense, or allowing those persons to serve on the contractor's board of directors, as a consultant, or as an agent or representative. The nature and length of the statutory prohibitions depend upon the date of conviction.

3. Section 203.571–3 is revised to read as follows:

203.571–3 Policy.

(a) It is DoD policy that a contractor shall not knowingly allow a person, convicted after September 29, 1988, of fraud or any other felony arising out of a contract with the Department of Defense, to serve (1) in a management or supervisory capacity on any defense contract or subcontract or (2) upon its board of directors or (3) as a consultant or (4) as an agent or representative, for a period of five years from the date of conviction or for the period of any resultant debarment of the convicted person, whichever is longer, unless waived in accordance with agency procedures in the interests of national security.

(b) Contractors shall not allow a person convicted prior to September 29, 1988, of fraud or any other felony arising out of a contract with the Department of Defense to serve in a management or supervisory capacity on any defense contract or subcontract or upon its board of directors, for a period of one year from the date of conviction or for the period of any resultant debarment of the convicted person, whichever is longer.

4. Section 203.571–6 is added to read as follows:

203.571–6 Waiver.

(a) Requests for waiver submitted under DFARS 252.203–7001(e) shall be reviewed by the contracting officer. If the contracting officer decides the requested waiver is not required in the interests of national security, the contracting officer shall deny the request and advise the contractor accordingly. If the contracting officer decides the requested waiver may be in the interests of national security, the contracting officer shall forward the request to the Head of the Agency or designee.

(b) The Head of the Agency or its designee shall report all waivers granted and the reasons therefor to the Under Secretary of Defense for Acquisition who shall forward the report to Congress as required by 10 U.S.C. 2408(a)(3).

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

5. Section 252.203–7001 is revised to read as follows:

252.203–7001 Special prohibition on employment.

As prescribed at 203.571–6, insert the following clause in all solicitations and contracts other than those entered into using the small purchase procedures of FAR Part 13:

SPECIAL PROHIBITION ON EMPLOYMENT (XXX 1988)

(a) Definitions. "Arising out of a contract with the Department of Defense," as used in this clause, means any act in connection with (1) attempting to obtain, (2) obtaining, or (3) performing a contract or subcontract of any agency, department, or component of the Department of Defense.

"Conviction of fraud or any other felony", as used in this clause, means any conviction for fraud or a felony in violation of state or Federal criminal statutes whether entered on a verdict or plea, including a plea of nolo contendere, for which sentence has been imposed.

(b) 10 U.S.C. 2408 prohibits a person who is convicted of fraud or any other felony arising out of a contract with the Department of Defense from working in a management or supervisory capacity on any defense contract or serving in various other capacities for a defense contractor for up to five years from the date of conviction, as set forth in (c) below. Defense contractors are subject to a criminal penalty of not more than $500,000 if they are convicted of knowingly employing a person under a prohibition or allowing that person to serve in violation of 10 U.S.C. 2408.

(c)(1) The Contractor agrees not to knowingly employ any person, convicted after September 29, 1988, of fraud or any other felony arising out of a contract with the Department of Defense, in a management or supervisory capacity on any Department of Defense contract or subcontract or allow that person to serve either on its board of directors, as a consultant, or as an agent or representative for a period of five (5) years from the date of conviction or for the period of any resultant debarment of the convicted person, unless waived.

(2) The Contractor agrees not to knowingly employ any person, convicted prior to September 29, 1988, of fraud or any other felony arising out of a contract with the Department of Defense, in a management or supervisory capacity on any Department of Defense contract or subcontract or allow that person to serve on its board of directors for a period of one (1) year from the date of conviction or for the period of any resultant debarment.

(d) In addition to the criminal penalties contained in 10 U.S.C. 2408, the Government may consider other available remedies, such as suspension or debarment, may direct the cancellation of the contract at no cost to the Government, or terminate this contract for default.

(e) The Contractor may submit written requests for waiver of the prohibitions in (c)(1) above to the Contracting Officer who will process such requests in accordance with DFARS 203.571–4. Requests shall clearly identify the person involved, the nature of the conviction and resultant sentence or punishment imposed, the reasons for the requested waiver and an explanation of why waiver of the prohibitions of (c)(1) above is in the interests of national security.

(f) The Contractor agrees to include the substance of this clause, including this paragraph, appropriately modified to reflect identity and relationship of the parties, in all subcontracts exceeding $25,000.

(End of clause)

Federal Railroad Administration

49 CFR Part 209

[FRA Docket No. RSEP–6, Notice No. 1]

[RIN 2130–AA49]

Railroad Safety Enforcement Procedures; Disqualification Proceedings

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: FRA proposes to amend Part 209 Subpart A and add a new Subpart D prescribing procedures for disqualifying railroad employees, including managers and supervisors, and other agents from performing safety-sensitive functions in the rail industry. Section 3(a) of the Rail Safety Improvement Act of 1988 authorizes FRA to disqualify such individuals who are shown to be unfit to perform safety-sensitive functions, based on the individual's violation of an FRA safety rule, regulation, order or standard. The procedures proposed in

this NPRM are intended to assure the prompt and efficient conduct of disqualification proceedings under the Act while affording administrative due process to those against whom such proceedings are initiated.

DATES: (1) Written comments (three copies) must be received no later than January 10, 1989. Comments received on or after that date will be considered to the extent possible without incurring additional expense or delay.

(2) An informal hearing on this proposal will be held on January 5, 1989, at 10:00 a.m. at Room 6332, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Prepared statements (five copies) must be received no later than January 2, 1989. Any person who desires to make an oral statement at the hearing is requested to notify the Docket Clerk at least five working days prior to the hearing.

ADDRESSES: Written comments and prepared statements should be submitted to the Docket Clerk (RCC-30), Office of Chief Counsel, FRA, 400 Seventh Street SW., Washington, DC 20590. Persons desiring to be notified that their written comments have been received by FRA should submit a stamped, self-addressed postcard with their comments. The Docket Clerk will indicate on the postcard the date the comments were received and return the postcard to the addressee. Written comments will be available for examination, both before and after the closing date for comments, during regular business hours in Room 8201 of the Nassif Building at the above address.

FOR FURTHER INFORMATION CONTACT: Peter J. Hannums, Trial Attorney, Office of Chief Counsel, FRA, 400 Seventh Street SW., Washington, DC, 20590. Telephone: (202) 366-0637.

SUPPLEMENTARY INFORMATION:

Comments Invited

Because these are rules of procedure, public comment is not required by 5 U.S.C. 553(b)(3)(A) for the promulgation of these regulations. However, FRA believes that, in view of the adversarial nature of the proceedings and the grave consequences of the issuance of disqualification orders against railroad employees, including managerial and supervisory officials and other agents, the public should be given the opportunity to take part fully in the rulemaking process. Interested persons are invited to participate at the public hearings or through written submissions, or both.

Legislative Background

Section 3(a)(4) of the Rail Safety Improvement Act of 1988 ("RSIA"), Pub. L. 100-342, 102 Stat. 624 (June 22, 1988), which amends section 209 of the Federal Railroad Safety Act of 1970 ("FRSA") (to be codified at 45 U.S.C. 438(f)), authorizes FRA to issue orders disqualifying railroad employees, including supervisors, managers, and other agents from performing safety-sensitive functions in the rail industry. Before such an individual may be disqualified, he or she must receive notice alleging that he or she violated a rule, regulation, order, or standard issued under the Federal railroad safety laws, and that based in whole or in part on the violation, the individual is unfit to perform safety-sensitive functions. In addition, the individual must have received an opportunity for a hearing. The RSIA, however, specifically reserves the FRA's authority under section 203 of the FRSA (45 U.S.C. 432) to issue an emergency order immediately disqualifying an individual when he or she is engaging in unsafe practices that create an emergency situation involving a hazard of death or injury to persons.

Prior to the RSIA, FRA had no enforcement authority over an individual who violated its safety regulations. FRA's sole remedy was against the employing railroad. With enactment of the RSIA, FRA is empowered to (1) impose civil monetary penalties against individuals for willful violations of the rail safety regulations (See 53 FR 28594, July 28, 1988, Amendments to Railroad Safety Regulations to * * * Make Civil Penalties Available Against Individuals), and (2) disqualify individuals from performing safety-sensitive functions in the rail industry for violations that render the individual unfit to perform those functions.

Section-by-Section Analysis

1. Technical amendments have been proposed to various sections of Part 209, Subpart A, to conform the general provisions for railroad safety enforcement proceedings applicable to Subpart B, assessment of penalties under the Hazardous Materials Transportation Act, and Subpart C, issuance of compliance orders, to the new Subpart D, disqualification proceedings. Specifically, §§ 209.1, 209.3, 209.7, 209.9, 209.13, and 209.15 will be amended to reflect the inclusion of Subpart D within Part 209. In addition, § 209.5 will be amended to permit service by first-class mail of motions and requests for admissions and to require that a certificate of service accompany each pleading filed with the agency.

2. Proposed § 209.301 states the purpose for Subpart D, the establishment of the rules of practice for disqualification proceedings of railroad employees and agents from safety-sensitive functions in the rail industry. It is the view of FRA that railroad accidents caused, directly or indirectly, by violations of safety regulations may be prevented or avoided by disqualifying individuals who have shown themselves to be unfit to perform the safety-sensitive functions described in proposed § 209.303. Two purposes would be accomplished by suspending or barring such an individual from these functions in the rail industry: First, the person would be prevented from further violating safety regulations and the railroad's rules; and second, the person's suspension would serve to deter him or her and other railroad employees and agents from committing future violations. In the most serious cases, permanent disqualification could be deemed appropriate.

The exercise of FRA's disqualification authority does not supersede the railroad's independent disciplinary authority or any employee's rights secured under a collective bargaining agreement for review of a disciplinary action imposed under the carrier's independent authority. Those rights would not be applicable, of course, to a suspension imposed by FRA under this rule. FRA's disqualification authority is both narrower and broader than discipline imposed by a railroad on an employee. It is narrower in the sense that an employee may be disqualified only from performing safety-sensitive functions; the employee may remain in an active status with the railroad performing functions that are not designated as safety-sensitive. In a railroad disciplinary proceeding, however, an employee may be suspended without pay from his or her position. FRA's disqualification authority is broader in the sense that FRA may bar a railroad employee from performing safety-sensitive functions with any railroad, not just the employee's persent employer. In summary, an FRA disqualification order is independent of any disciplinary action that may be taken by a railroad against an employee for violating an FRA regulation, rule, order, or standard.

3. Proposed § 209.303 delineates the individuals in the rail industry who may be subject to disqualification by specifying the functions they perform. The proposed section lists these

functions that FRA views to be safety-sensitive within the meaning and intent of the FRSA, as amended by the RSIA. First, railroad employees who are assigned to perform services under the Hours of Service Act, 45 U.S.C. 61–64b, will be covered. Employees covered by the Hours of Service Act include those engaged in or connected with the movement of any train (primarily engineers, brakemen, firemen, and conductors); those who dispatch, report, transmit, or receive orders pertaining to or affecting train movements (primarily operators and dispatchers); and those engaged in installing, repairing, or maintaining signal systems (primarily signalmen and certain electricians).

Second, railroad employees and agents engaged in inspecting, installing, repairing or maintaining track and roadbeds will be subject to disqualification for safety regulation violations. Third, employees engaged in inspecting, repairing, and maintaining locomotives and freight cars will be covered. Fourth, employees who conduct training and testing of other employees required by FRA's safety regulations will be covered. Fifth, railroad supervisors, managers, or agents who supervise or perform the foregoing safety-sensitive functions will be subject to disqualification for safety regulation violations. Finally, supervisors, managers, or agents who are in a position to direct the commission of violations of FRA safety regulations may be disqualified from serving in any position in which they would have the ability to direct subordinates to violate safety regulations.

It is FRA's position that a person who is disqualified from performing safety-sensitive functions will be disqualified from performing all of the foregoing functions listed, not just the ones inherent to his or her job class. For example, a disqualified engineer may not perform work in any of the other safety-sensitive functions described for any railroad. The engineer could remain in an active duty status with his or her employing railroad in a position that does not require the performance of safety-sensitive functions. The proposed rule, however, neither precludes nor requires reassignment to a position that is not safety-sensitive.

4. Proposed § 209.305 sets forth the action that initiates a disqualification proceeding. The FRA Chief Counsel, after an initial determination that an alleged violation of a safety regulation establishes that an individual is unfit to perform safety-sensitive functions, issues a notice of disqualification order to the individual. The charging document is referred to as a notice of disqualification order to make clear that its issuance is an extremely serious matter, and if an individual chooses to ignore it, he or she may receive a disqualification order for the terms and duration set forth in the notice. See § 209.307(c), which discusses the repercussions of an individual's failure to reply to a notice of disqualification order. Consideration was given to entitling the charging document a notice of proposed disqualification, but FRA was concerned that this terminology could cause a recipient to misunderstand the severity of the action, and fail to recognize the need to reply to the notice. Comments are invited on this issue.

Paragraph (b) of this section prescribes the contents of the notice to include: A statement of the rule, regulation, order, or standard allegedly violated (e.g., identification of the regulation violated, the date of the violation, and a brief description of the underlying facts); the factual allegations supporting the initial determination that the individual is unfit to perform safety-sensitive functions (e.g., identification of the relevant factors cited in proposed § 209.329 and underlying facts in support thereof, which form the basis for the terms and conditions of the proposed disqualification); the terms and conditions, including effective dates, of the proposed disqualification (e.g., the duration and effective dates of any suspension or, if termination of a suspension is conditioned upon a subsequent evident other than the passage of time (completion of prescribed training, rehabilitation, respondent's application for permission to return to safety-sensitive service, etc.), identification of the event, if any, that will permit the individual to resume performance of safety-sensitive functions); and notice of the consequences of the individual's failure to reply to the charges.

Paragraph (b) also requires that the notice advise the individual of his or her following rights: To answer the charges in writing and provide supporting documentary evidence; to make an informal response to the Chief Counsel; to request an eventiary hearing; and to be represented by counsel or other designated representative.

Paragraph (c) requires the Chief Counsel to provide with the notice a copy of the material supporting the charges. The material relied on generally will include a copy of an FRA Safety Inspector's violation report and supporting exhibits, and may include other non-privileged information. Nothing in this section precludes the Chief Counsel from presenting at a subsequent hearing under § 209.325 any evidence of the charges set forth in the notice that the Chief Counsel acquired after service thereof upon the respondent.

5. Proposed § 209.307 describes the individual's reply rights to a notice of disqualification order and prescribes the time limit for submitting the reply and the basis for requesting extensions. Within 20 days of service of the notice of disqualification order, the individual must reply in writing to the charges, and he or she may submit documentary evidence in support of the reply. Although it is the FRA's policy to disfavor extension requests, the Chief Counsel may extend the reply period when the Chief Counsel concludes, for example, that the individual's right to reply to the notice would be materially impaired if the extension was denied. The individual may also make an informal response to the Chief Counsel, or request an evidentiary hearing. The individual may, of course, decide to forgo submitting a written reply and stipulate to the charges and consent to imposition of the disqualification order set forth in the notice. In any event, FRA believes that the interests of all parties will be best served by the efficient, expeditious conduct of these proceedings. The individual against whom charges have been made deserves a prompt determination as to his or her fitness, and the public safety demands no less. FRA will welcome any comments with respect to the means by which this process can be concluded more quickly.

Paragraph (c) prescribes the adverse consequences of an individual's failure to reply to a notice of disqualification order. Specifically, it will be treated as a waiver of the individual's right to contest the charges or the disqualification order that were the subjects of the notice. In that event, the Chief Counsel may find the individual unfit, issue and serve him or her with the disqualification order, and provide a copy of the order to the railroad by which the individual is employed.

6. Proposed § 209.309 prescribes the procedures for an informal response to a notice of disqualification order, the objective of which is to settle the charges against the individual without resort to litigation. If the parties are unable to reach a settlement within 30 days of service of the individual's reply upon the Chief Counsel, the Chief Counsel will terminate negotiations. The individual may then exercise his right to

a hearing within 10 days from service of the Chief Counsel's notice of termination of settlement negotiations. The individual does not waive his right to a hearing by filing a written response to the charges and requesting a conference with the Chief Counsel. (See paragraph (e)).

Paragraphs (a) and (b) provide that an individual who elects to pursue the informal process will file his or her written response, which may include supporting documents, and request a conference with the Chief Counsel. Pursuant to paragraphs (c) and (d), based on the individual's written response and information provided at any conference, the Chief Counsel will consider the issues raised in the notice of disqualification order and take one or more of the following actions: Dismiss the charges and notice of disqualification order; mitigate the proposed disqualification; sustain the charges and proposed disqualification; or settle the charges and the proposed disqualification. If the Chief Counsel dismisses the charges, the Chief Counsel will notify the individual in writing. If, without achieving settlement, the Chief Counsel mitigates the proposed disqualification or sustains the charges and the proposed disqualification, the Chief Counsel will issue an amended notice of disqualification order together with written notice to the individual that the charges cannot be resolved informally. If a settlement is achieved, the Chief Counsel will issue an order conforming to the terms of the settlement as soon as practicable after the settlement agreement is signed. Each settlement agreement will contain a written waiver from the charged individual of his or her right to any further hearing or appeal.

This informal process is intended to provide charged individuals with a relatively fast and inexpensive way to resolve the charges against them.

7. Proposed § 209.311 governs an individual's request for a hearing. Under paragraph (a), an individual who requests a hearing must do so within 20 days of service of the notice of disqualification order or, if the individual pursues an informal response, within 10 days of service of the notice of termination of settlement negotiations. The written request must be signed by the individual and include, at a minimum, the following information: Name, address, and phone number of the individual and his or her representative, if any; a specific response to the charges, admitting, denying, or explaining each allegation contained in the notice of disqualification order; and a description of the claims and defenses that the individual intends to raise at the hearing.

Under paragraph (b), upon receipt of a proper hearing request, the Chief Counsel shall arrange for the appointment of a presiding officer. Presiding officials for disqualification hearings will be Administrative Law Judges from the Department's Office of Hearings who are assigned cases by the Chief Administrative Law Judge. The Administrative Law Judge assigned will schedule the hearing.

8. Proposed § 209.313 specifies the material comprising the official record in each disqualification proceeding)—i.e., notice of disqualification order, reply, exhibits, hearing transcript, pleadings, stipulations, admissions, rulings, and orders. If no hearing is held because a settlement is reached and a stipulated disqualification order is issued, the record could consist of the settlement agreement, the order, the notice of disqualification order, supporting documentation (generally a violation report with supporting exhibits), and the individual's reply.

9. Proposed § 209.315 specifies the procedures for filing written motions and objections thereto. Objections must be filed within 10 days after service of the motion. The presiding officer may modify the time limit for objecting and rule on oral motions. No time limit is prescribed for filing motions. If that becomes an issue in a proceeding, the presiding officer has the authority to make appropriate rulings.

10. Proposed § 209.317 governs the procedures for obtaining requests for admission of facts, the genuineness of documents, and the application of law to facts. Requests for admission do not involve the participation of the presiding official unless the parties cannot resolve compliance issues that may arise. Answers to requests for admission or objections must be served within 20 days of service of the request. Failure to answer or object within that time period will result in an admission of the matter requested. Objections to requests may be tested by filing a motion to compel with the presiding officer who has the authority to compel an answer. Any matter admitted that is entered into the record is conclusively established.

11. Proposed § 209.319 provides that only the presiding officer, not the Chief Counsel, may issue subpoenas under § 209.7 after disqualification proceedings have been initiated by the issuance and service of a notice of disqualification order under proposed § 209.305. Since the Chief Counsel will serve as the prosecutor in disqualification proceedings, it would not be appropriate for him or her to issue subpoenas on behalf of FRA or to rule on requests for subpoenas filed by subjects of those proceedings.

12. Proposed § 209.321 governs the procedure for requesting, obtaining, and using depositions of witnesses at the hearing. The deposition of a witness may only be introduced as evidence at a disqualification proceeding if the witness is unavailable for the hearing. "Unavailable" as a witness includes the situations described in Rule 804(a) of the Federal Rules of Evidence (i.e., subject matter of declarant's proposed testimony is privileged, declarant refuses to testify despite an order of the presiding officer to do so, declarant testifies to lack of memory of the subject matter of the proposed testimony, declarant is unable to be present or to testify because of death or physical or mental illness, and declarant is absent from the hearing and the proponent is unable to procure the declarant's attendance by subpoena). If the witness is available, he or she must testify at the hearing. Any prior deposition may be used for impeachment purposes, and if the witness' testimony at the hearing is inconsistent with the prior deposition, the deposition may be introduced as substantive evidence.

Depositions may be taken only for good cause after a proper motion is granted by the presiding officer and an appropriate order is entered. Objections to motions for depositions are governed by proposed § 209.315.

The objective of this section is to limit the use of depositions to those situations in which a witness is reasonably expected to be unavailable for the hearing. The deposition should be taken, therefore, to preserve the testimony of the witness. It is not to be used as a discovery tool.

13. Proposed § 209.323 establishes the requirement for, and the minimum contents of, a prehearing conference. One of the primary purposes of a prehearing conference is to shorten the hearing, or eliminate it if settlement is achieved. Also, since discovery is limited in disqualification proceedings, it gives the parties the opportunity to exchange witness lists and exhibits that are approved by the presiding officer. The intent of the regulations is to provide for a fair, expeditious, and relatively inexpensive procedure to adjudicate proposed disqualification orders. FRA believes that the efficient use of requests for admission and stipulations coupled with the exchange of witness lists and exhibits at the

VOL 53 ISS 237 DEC 9 1988 UMI

prehearing conference should contribute to a fair hearing, while avoiding the cost, in dollars and time, of the broad, extensive discovery permitted in judicial proceedings under the Federal Rules of Civil Procedure.

14. Proposed § 209.325 contains the requirements for disqualification hearings conducted by administrative law judges. Witnesses will testify under oath and a verbatim transcript of the hearing will be made.

Paragraphs (b) and (e) prescribe the broad powers of the presiding officer in controlling the proceeding and conducting the hearing. Paragraph (c) sets forth the burden of proof for the Chief Counsel. The Chief Counsel has the burden of production and persuasion as to the facts alleged in the notice of disqualification order, respondent's unfitness and the reasonableness of the terms of the proposed disqualification. When the Chief Counsel, however, proves that the individual committed a willful violation of one of the requirements of 49 CFR Parts 213 through 236, the individual is conclusively presumed to be unfit to perform safety-sensitive functions. While the individual may not, therefore, proffer evidence to rebut the finding of his or her unfitness, he or she may adduce evidence in an effort to mitigate the conditions of the proposed disqualification. Should the Chief Counsel prove that the individual committed a violation of any of the foregoing safety requirements, but not willfulness, the burden shifts to the individual to prove that he or she is fit to perform safety-sensitive functions. In addition, the individual may proffer evidence in mitigation of the proposed disqualification. The standard of proof for both parties in the foregoing circumstances will be the preponderance of the evidence, the traditional standard used in most administrative and civil judicial proceedings.

15. Proposed § 209.327 prescribes the requirements for issuance and contents of the decision and order by the presiding officer. Each decision will be accompanied by a dispositive order, either a dismissal order or an appropriate disqualification order.

The decision of the presiding officer is the final agency action, and it is not subject to further review within the Department. An individual, therefore, who receives an adverse decision from the presiding officer has no administrative appeal rights. A presiding officer's decision, including a disqualification order, may only be reviewed by the individual's filing of a civil suit in an appropriate United States District Court. The Chief Counsel, however, may not seek judicial review of a presiding officer's decision.

FRA invites comments on whether the individual or the Chief Counsel, or both, should be permitted to appeal a presiding officer's decision to the FRA Administrator—if the Administrator was not involved in the issuance of the notice of disqualification order—or to some other Departmental official—if the Administrator was involved in the issuance of the notice. If an administrative appeal is allowed, the presiding officer's decision would be the initial decision, and the final decision would be made by the FRA Administrator or other designated reviewing official in the agency.

16. Proposed § 209.329(a) establishes a per se rule that proof of an individual's willful violation of any of the requirements of 49 CFR Parts 213 through 236 establishes that individual's unfitness. FRA's definition of a "willful" violation is discussed in detail in Appendix A to Part 209 of 49 CFR. See 53 FR 28594, 28597 (July 28, 1988). It is FRA's belief that an individual who willfully violates a safety requirement is not fit to perform safety-sensitive functions in the rail industry. For example, an employee or supervisor who is responsible for providing blue signal protection to other employees and who intentionally and voluntarily fails to display a blue signal when required by 49 CFR 218.25, is unfit to perform safety-sensitive functions. After the Chief Counsel proves the willful violation cited in the foregoing example, the only issue remaining in the proceeding is whether the terms of the disqualification order proposed are reasonable.

Proposed § 209.329(b) establishes the individual's burden of proof, as discussed in paragraph 14, above.

Paragraph (c) sets forth an illustrative list of factors to be used by the Chief Counsel and the presiding officer in fashioning an appropriate disqualification order. Given the sheer newness of this remedy, the seriousness of a disqualification action against an individual, and the myriad considerations that should be taken into account in developing an appropriate disqualification order, FRA is not at this time proposing a general schedule of offenses and penalties for disqualification proceedings. There may be aggravating factors involved in an individual's violation of a safety requirement that warrant the imposition of a lengthy or permanent disqualification. For example, an engineer who is drinking an alcoholic beverage while operating a locomotive in violation of 49 CFR 219.101(a) is unfit and could be barred from employment as an engineer or in any other position involving the performance of safety-sensitive functions for a lengthy period of time. On the other hand, there may be factors involved in an individual's violation of a safety requirement that warrant the imposition of a lesser disqualification period for a non-willful violation.

17. Proposed § 209.331(c) imposes a requirement on an individual who is subject to a disqualification order to disclose the existence of the order and to provide a copy of it to his or her current employer or a prospective employer in the railroad industry. Any individual who violates this requirement may be subject to another disqualification proceeding in which FRA will seek to bar permanently the individual from performing safety-sensitive functions and, if the violation is willful, the individual may be assessed a fine of between $1,000 and $5,000. (See proposed § 209.335).

Proposed paragraphs (a) and (b) impose disclosure requirements on railroads in an effort to prevent employees and agents from working in safety-sensitive positions for railroads other than the employee's present employer. For example, if a person is serving under a 120-day disqualification order, that person will be prohibited from working in the rail industry in any of the safety-sensitive functions identified in § 209.303. If the individual applies for a position involving the performance of safety-sensitive functions with any railroad, the railroad that is considering hiring him or her must inquire of the person's former employer as to whether he or she is presently subject to a disqualification order. Upon receipt of such an inquiry, the person's former employer must inform the inquiring railroad of the terms and conditions of any effective disqualification order. Failure of any railroad or other employer in the rail industry to meet the requirements of this section shall subject them, under proposed § 209.335, to a civil penalty of between $5,000 and $10,000.

18. Proposed § 209.333 prohibits an individual who is subject to a disqualification order from working for a railroad in any manner inconsistent with the terms and conditions of the order. In addition, railroads must not allow such individuals to work in any manner inconsistent with the order. For example, a person who is subject to a disqualification order suspending the person for 120 days and requiring the completion of a specified training

program may not be employed by a railroad in a position involving the performance of safety-sensitive functions until the expiration of 120 days and completion of the program. Violations of these provisions will subject the offending parties to the penalties proposed in § 209.335.

Regulatory Impact

E.O. 12291 and DOT Regulatory Policies and Procedures

This proposed rule has been evaluated in accordance with existing policies and procedures, and is considered to be non-major under Executive Order 12291 but significant under DOT policies and procedures (44 FR 11034, February 26, 1979). The proposed rule would not have any direct or indirect economic impact because it does not impose any additional regulatory burden on either railroads or individuals. Therefore, no further analysis of economic impact is required. The potential cost to an individual for participating in a disqualification proceeding and the imposition of a disqualification may and, hopefully, will serve as a deterrent to individuals who might contemplate violating safety regulations. These disqualifications, therefore, may result in the avoidance of substantial costs associated with railroad accidents caused, directly or indirectly, by violations of safety regulations. FRA welcomes any comments on this issue.

Regulatory Flexibility Act

FRA certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities. There are no direct or indirect economic impacts for small units of government, businesses, or other organizations. State rail agencies remain free to participate in the administration of FRA's rules but are not required to do so.

Paperwork Reduction Act

The proposed rule has information collection requirements in § 209.331. FRA is submitting these information collection requirements to the Office of Management and Budget for approval under the Paperwork Reduction Act of 1980. Any comments on these revised information collection requirements should be provided to Mr. Gary Waxman, Regulatory Policy Branch, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Washington, DC 20503. Copies of any such comments should also be submitted to the docket of this rulemaking at the address provided above.

Environmental Impact

FRA has evaluated these proposed regulations in accordance with its procedures for ensuring full consideration of the potential environmental impacts of FRA actions, as required by the National Environmental Policy Act and related directives. This notice meets the criteria that establish this as a non-major action for environmental purposes.

Federalism Implications

This proposed rule will not have a substantial effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with Executive Order 12612, preparation of a Federalism Assessment is not warranted.

List of Subjects in 49 CFR Part 209

Railroad safety, Railroad safety enforcement procedures.

In consideration of the foregoing, FRA proposes to amend Chapter II, Subtitle B, of Title 49, Code of Federal Regulations as follows:

PART 209—[AMENDED]

1. The authority citation for Part 209 continues to read as follows:

Authority: 45 U.S.C. 6 and 13, as amended; 45 U.S.C. 34, as amended; 45 U.S.C. 43, as amended; 45 U.S.C. 64a, as amended; 45 U.S.C. 431, 437, and 438, as amended; 49 App. U.S.C. 26(h), as amended; 49 App. U.S.C. 1655(e), as amended; Pub. L. 100–342; and 49 CFR 1.49(c), (d), (f), (g), and (m).

Subparts B and C also issued under 49 App. U.S.C. 1802, 1804, 1808, and 1809; and 49 CFR 1.49(s).

2. Amend the table of contents to add new subpart D as follows:

Subpart D—Disqualification Procedures

Sec.
209.301 Purpose and scope.
209.303 Coverage.
209.305 Notice of disqualification order.
209.307 Reply.
209.309 Informal response.
209.311 Request for hearing.
209.313 Official record.
209.315 Motions.
209.317 Requests for admission.
209.319 Subpoenas.
209.321 Testimony by deposition.
209.323 Prehearing conference.
209.325 Hearing.
209.327 Decision and order.
209.329 Assessment considerations.
209.331 Enforcement of disqualification order.
209.333 Prohibitions.
209.335 Penalties.

3. Revise § 209.1(b) to read as follows:

§ 209.1 Purpose.

* * * * *

(b) Exercise of the authority vested in the Secretary by the Federal Railroad Safety Act of 1970, 45 U.S.C. 421, 431–441, as amended by the Rail Safety Improvement Act, Pub. L. 100–342 (June 22, 1988) (49 CFR 1.49(m)); and

* * * * *

4. Amend § 209.3 by revising paragraph (e) and adding new paragraphs (f) through (i) to read as follows:

§ 209.3 Definitions.

* * * * *

(e) "Respondent" means a person upon whom the FRA has served a notice of probable violation, notice of investigation, or notice of disqualification order.

(f) "Motion" means a request to a presiding officer to take a particular action.

(g) "Presiding Officer" means any person authorized by the Administrator to preside over any hearing or to make a decision on the record, including an administrative law judge.

(h) "Day" means calendar day.

(i) "Pleading" means any written submission setting forth claims, allegations arguments, or evidence.

5. Amend § 209.5 by adding new paragraphs (d) and (e) to read as follows:

§ 209.5 Service.

* * * * *

(d) Service of requests for admission and motions may be made by first-class mail, postage prepaid.

(e) Each pleading must be accompanied by a certificate of service specifying how and when service was made.

6. Revise § 209.7(j) to read as follows:

§ 209.7 Subpoena; witness fees.

* * * * *

(j) Attendance of an FRA employee who had engaged in an investigation related to a proceeding under Subpart B, C, or D of this part for the purpose of providing testimony at the proceeding may be assured by filing a request with the Chief Counsel at least 15 days before the date of the hearing. The request must indicate the present intent of the requesting person to call the employee as a witness and state generally why the witness will be required.

7. Revise § 209.9 to read as follows:

§ 209.9 Filing.

All materials filed with FRA or any FRA officer in connection with a proceeding under Subpart B, C, or D of this part shall be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street SW., Washington, DC 20590, except that documents produced in accordance with a subpoena shall be presented at the place and time specified by the subpoena.

8. Revise § 209.13 to read as follows:

§ 209.13 Consolidation.

At the time a matter is set for hearing under Subpart B, C, or D of this part, the Chief Counsel may consolidate the matter with any similar matter(s) pending against the same respondent or with any related matter(s) pending against other respondent(s) under the same subpart. However, on certification by the presiding officer that a consolidated proceeding is unmanageable, the Chief Counsel will rescind or modify the consolidation.

9. Revise § 209.15 to read as follows:

§ 209.15 Rules of evidence.

The Federal Rules of Evidence for United States Courts and Magistrates shall be employed as general guidelines for proceedings under Subparts B, C, and D of this part. However, all relevant evidence shall be received into the record.

10. Add a new Subpart D to read as follows:

Subpart D—Disqualification Procedures

§ 209.301 Purpose and scope.

(a) This subpart prescribes the rules of practice for administrative proceedings relating to the determination of an individual's fitness for performing safety-sensitive functions under section 209(f) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 438(f)).

(b) The purpose of this subpart is to prevent accidents and casualties in railroad operations that result from the presence in the work force of railroad employees, including managers and supervisors, and agents who have demonstrated their unfitness to perform the safety-sensitive functions described in § 209.303. Employees and agents who evidence such unfitness may be disqualified, under specified terms and conditions, temporarily or permanently, from performing safety-sensitive functions. This subpart does not preempt a railroad from initiating disciplinary proceedings against its employees, including managers and supervisors, under its collective bargaining agreements or in the normal and customary manner.

§ 209.303 Coverage.

This subpart applies to the following individuals:

(a) Railroad employees who are assigned to perform service subject to the Hours of Service Act (45 U.S.C. 61–64b) during a duty tour, whether or not the person has performed or is currently performing such service, and any person who performs such service.

(b) Railroad employees or agents who:

(1) Inspect, install, repair, or maintain track and roadbed;

(2) Inspect, repair or maintain, locomotives and freight cars;

(3) Conduct training and testing of employees required by the FRA's safety regulations; or

(c) Railroad managers, supervisors, or agents when they:

(1) Perform the safety-sensitive functions listed in paragraphs (a) and (b) of this section;

(2) Supervise and otherwise direct the performance of the safety-sensitive functions listed in paragraphs (a) and (b) of this section; or

(3) Are in a position to direct the commission of violations of any of the requirements of Parts 213 through 236 of this title.

§ 209.305 Notice of disqualification order.

(a) FRA, through the Chief Counsel, begins a disqualification proceeding by serving a notice of disqualification order on the respondent charging him or her with having violated one or more rules, regulations, orders, or standards prescribed by the FRA, which render the respondent unfit to perform safety-sensitive functions described in § 209.303.

(b) The notice of disqualification order issued under this section shall contain:

(1) A statement of the rule(s), regulation(s), order(s), or standard(s) that the respondent is alleged to have violated;

(2) A statement of the factual allegations that form the basis of the initial determination that the respondent is not fit to perform safety-sensitive functions;

(3) A statement of the effective date, duration, and other conditions, if any, of the proposed disqualification;

(4) A statement of the respondent's right to answer the charges in writing and furnish affidavits and any other documentary evidence in support of the answer;

(5) A statement of the respondent's right to make an informal response to the Chief Counsel;

(6) A statement of the respondent's right to request a hearing and the procedures for requesting a hearing;

(7) A statement of the respondent's right to counsel or other designated representatives; and

(8) Notice of the consequences of the respondent's failure to take any of the actions described in § 209.307(a).

(c) The Chief Counsel shall enclose with the notice of disqualification order a copy of the material that is relied on in support of the charges. Nothing in this section precludes the Chief Counsel from presenting at a subsequent hearing under § 209.325 any evidence of the charges set forth in the notice that the Chief Counsel acquired after service thereof upon the respondent.

§ 209.307 Reply.

(a) Within 20 days of the service of notice of disqualification order issued under § 209.305, the respondent must reply in writing to the charges. The respondent may furnish affidavits and any other documentary evidence in support of the reply. Further, the respondent may elect to—

(1) Stipulate to the charges and consent to the imposition of a disqualification order under the conditions set forth in the notice;

(2) Make an informal response as provided in § 209.309; or

(3) Request a hearing as provided in § 209.325.

(b) The Chief Counsel may extend the reply period for good cause shown, provided the request for extension is served before the expiration of the period provided in paragraph (a) of this section.

(c) Failure of the respondent to reply to the notice of disqualification order within the period provided in paragraph (a) of this section or an extension thereto provided under paragraph (b) of this section constitutes a waiver of the respondent's right to appear and contest the charges or the proposed disqualification. Respondent's failure to reply authorizes the Chief Counsel, without further notice to the respondent, to find the respondent unfit for the performance of the safety-sensitive functions described in § 209.303 and to order the respondent disqualified from performing them for the period and under the other conditions described in the notice of disqualification order. The Chief Counsel shall serve respondent with the disqualification order and provide a copy of the order to the

BEST COPY AVAILABLE

railroad by which the respondent is employed.

§ 209.309 Informal response.

(a) If the respondent elects to make an informal response to a notice of disqualification order, he or she shall submit to the Chief Counsel such written explanations, information, or other materials as respondent may desire in answer to the charges or in mitigation of the proposed disqualification.

(b) The respondent may include in an informal written response a request for a conference. Upon receipt of such a request, the Chief Counsel shall arrange for a conference at a desiganted time and place.

(c) Written explanations, information, or materials submitted by the respondent and relevant information presented during any conference held under this section shall be considered by the Chief Counsel in reviewing the notice of disqualification order, including the question of the respondent's fitness and the conditions of any disqualification that may be imposed.

(d) After consideration of an informal response, including any relevant information presented at a conference, the Chief Counsel may dismiss the notice of disqualification order in whole or in part. If the notice of disqualification order is not dismissed in whole and if the respondent and the Chief Counsel settle the charges against the respondent, the settlement shall be evidenced by a disqualification order issued by the Chief Counsel reflecting the settlement and by a written statement from the respondent stipulating to the charges contained in the disqualification order, consenting to the imposition of the disqualification under the conditions set forth in the disqualification order, and waiving his or her right to appeal. The duration of the disqualification period may be less than, but shall be no greater than, the period set forth in the notice. If settlement of the charges against the respondent is not achieved, the Chief Counsel shall terminate settlement discussions no later than 30 days from service of the informal response upon the Chief Counsel by sending respondent written notice that the charges against the respondent cannot be resolved through the informal process.

(e) By electing to make an informal response to a notice of proposed disqualification, the respondent does not waive the right to a hearing. However, the respondent must submit the hearing request required by § 209.311(a) within 10 days of written notice from the Chief Counsel that the charges against respondent cannot be resolved through the informal process. Failure to submit such a request constitutes a waiver of the respondent's right to appear and contest the charges or the proposed disqualification.

§ 209.311 Request for hearing.

(a) If the respondent elects to request a hearing, he or she must submit a written request within the time periods specified in § 209.307(a) or § 209.309(e) to the Chief Counsel referring to the case number that appears on the notice of the proposed disqualification. The request must contain the following:

(1) The name, address, and telephone number of the respondent and of the respondent's designated representative, if any;

(2) A specific response admitting, denying, or explaining each allegation of the notice of disqualification order;

(3) A description of the claims and defenses to be raised by the respondent at the hearing; and

(4) The signature of the respondent or the representative, if any.

(b) Upon receipt of a request for a hearing complying with the requirements of paragraph (a) of this section, the Chief Counsel shall arrange for the appointment of a presiding officer and transmit the disqualification file to the presiding officer, who shall schedule the hearing for the earliest practicable date.

§ 209.313 Official record.

The notice of disqualification order, respondent's reply, exhibits, and a verbatim record of testimony, if a hearing is held, and all pleadings, stipulations, and admissions filed and rulings and orders entered in the course of the proceeding shall constitute the exclusive and official record.

§ 209.315 Motions.

Motions shall be in writing, filed with the presiding officer, and copies served upon the parties in accordance with § 209.5, except that oral motions may be made during the course of any hearing or appearance before the presiding officer. Each motion shall state the particular order, ruling, or action desired and the grounds therefor. Unless otherwise specified by the presiding officer, any objection to a written motion must be filed within 7 days from the date of service of the motion.

§ 209.317 Requests for admission.

(a) A party may serve upon any other party written requests for the admission of the genuineness of any relevant documents identified within the request, the truth of any relevant matters of fact, and the application of law to the facts as set forth in the request.

(b) Each matter of which an admission is requested shall be deemed to be admitted unless, within 20 days after service of the request, the party to whom the request is directed serves upon the party requesting the admission a written answer or objection addressed to the matter, signed by the party.

(c) The answer shall specifically admit or deny the matter or set forth in detail the reasons why the answering party cannot truthfully admit or deny the matter. If an objection is made, the reasons therefor shall be stated.

(d) Any matter admitted under this section is conclusively established unless the presiding official permits withdrawal or amendment of the admission.

(e) Upon motion, the presiding officer may order any party to respond to a request for admission.

§ 209.319 Subpoenas.

Only the presiding officer may issue, deny, quash, or modify subpoenas under this subpart in accordance with § 209.7.

§ 209.321 Testimony by deposition.

(a) For good cause shown, the testimony of any witness who may be unavailable to testify at the hearing may be taken by oral deposition before any disinterested person who is authorized by law to administer oaths.

(b) Any party desiring to take the deposition of such a witness shall file and serve a written motion setting forth the name of the witness, the date, time, and place of the deposition, the subject matter of the witness' expected testimony, whether any party objects to the taking of the deposition, and the reasons why such deposition should be taken.

(c) Such notice as the presiding officer shall order will be given for the taking of a deposition, but this shall not be less than 7 days written notice unless the parties agree to a shorter period.

(d) Each witness testifying upon deposition shall be sworn and the adverse party shall have the right to cross-examine. The questions propounded and the answers thereto, together with all objections made, shall be reduced to writing, subscribed by the witness, and certified by the reporter. Subject to such objections to the questions and answers as were noted at the time of taking the deposition and would be valid were the witness personally present and testifying, such deposition may be offered in evidence by any party to the proceeding. No part

of a deposition shall be admitted in evidence unless there is a showing that the witness is unavailable and the other reasons for the taking of the deposition in the first instance exist at the time of the hearing.

§ 209.323 Prehearing conference.

(a) The parties shall meet with the presiding officer for a conference before the hearing to consider:

(1) Formulation and simplification of the issues;

(2) Stipulations, admissions of fact, and admissions of the contents and authenticity of documents;

(3) Advance rulings from the presiding officer on the admissibility of evidence;

(4) Identification of witnesses, including the scope of their testimony, and of hearing exhibits;

(5) Possibility of settlement; and

(6) Such other matters as the presiding officer deems necessary to expedite the disposition of the proceeding.

(b) The record shall show the matters disposed of by order and by agreement in such a prehearing conference. The subsequent course of the hearing shall be controlled by such action.

§ 209.325 Hearing.

(a) When a hearing is requested and scheduled under § 209.113, a presiding officer designated by the Chief Administrative Law Judge of the Department convenes and presides over the hearing. Testimony by witnesses shall be given under oath and the hearing shall be recorded verbatim.

(b) The presiding officer may:

(1) Administer oaths and affirmations;

(2) Issue subpoenas as provided by § 209.7;

(3) Adopt procedures for the submission of evidence in written form;

(4) Take or cause depositions to be taken as provided in § 209.321;

(5) Rule on offers of proof and receive relevant evidence;

(6) Examine witnesses at the hearing;

(7) Convene, recess, reconvene, adjourn, and otherwise regulate the course of the hearing;

(8) Hold conferences for settlement, simplification of the issues, or any other proper purpose; and

(9) Take any other action authorized by or consistent with the provisions of this subpart and permited by law that may expedite the hearing or aid in the disposition of an issue raised therein.

(c) FRA has the burden of proof, by a preponderance of the evidence, as to the facts alleged in the notice of disqualification order, the reasonableness of the conditions of the disqualification proposed, and, except as provided in § 209.329 (a) and (b), the respondent's fitness to perform safety-sensitive functions. The Chief Counsel may offer relevant evidence, including testimony, in support of the allegations contained in the notice of disqualification order and conduct such cross-examination as may be required for a full disclosure of the material facts.

(d) The respondent may appear and be heard on respondent's own behalf or through respondent's designated representative. The respondent may offer relevant evidence, including testimony, in defense of the allegations or in mitigation of the proposed disqualification and conduct such cross-examination as may be required for a full disclosure of the material facts.

(e) The record shall be closed at the conclusion of the hearing. However, when the presiding officer allows the parties to submit argument, briefs, or documents previously identified for introduction into evidence, the record shall be left open for such time as the presiding officer grants for that purpose.

§ 209.327 Decision and order.

(a) The presiding officer shall prepare the decision after the closing of the record. That decision may dismiss the notice of disqualification order, in whole or in part, sustain the charges and proposed disqualification, or sustain the charges and mitigate the conditions of the proposed disqualification.

(b) If the presiding officer sustains the charges and the proposed disqualification, dismisses some of the charges, or mitigates the disqualification, the presiding officer shall issue and serve an appropriate order disqualifying respondent from engaging in any of the safety-sensitive functions described in § 209.303. If the presiding officer dismisses the charges set forth in the notice of disqualification order, a dismissal order shall be issued and served.

(c) Each decision shall contain:

(1) Findings of fact and conclusions of law, as well as the reasons or bases therefor, upon all the material issues of fact and law presented on the record;

(2) An order, as described in paragraph (b) of this section; and

(3) The dates any disqualification is to begin and end and other conditions, if any, that the repondent must satisfy before the disqualification order is discharged.

(d) The decision shall be served upon the Chief Counsel and the respondent. The Chief Counsel shall provide a copy of the disqualification order to the railroad by which the respondent is employed.

(e) The decision of the presiding officer is final, constitutes final agency action, and is not subject to further administrative review.

§ 209.329 Assessment considerations.

(a) Proof of respondent's willful violation of one of the requirements of Part 213 through 236 of this title establishes a conclusive presumption that the respondent is unfit to perform the safety-sensitive functions described in § 209.303.

(b) Proof of a respondent's violation of one the requirements of Parts 213 through 236 of this title establishes a rebuttable presumption that the respondent is unfit to perform the safety-sensitive functions described in § 209.303. The respondent has the burden of proving, by a preponderance of the evidence, that he or she is fit, taking account of the factors in paragraph (c) of this section, to perform the foregoing safety-sensitive functions for the period and under the other conditions, if any, proposed in the notice of disqualification order. In determining the duration and other conditions, if any, of the disqualification order, the presiding officer shall consider all relevant factors, which include the factors enumerated in paragraph (c) of this section.

(c) Relevant factors in determining appropriate disqualification orders under §§ 209.309 and 209.327 include, but are not limited to, the following:

(1) The nature and circumstances of the violation, including whether the violation was intentional, technical, or inadvertent, was committed willfully, or was frequently repeated; or whether respondent's actions were in obedience to a direct order of a railroad supervisor or other higher level official;

(2) The adverse impact or the potentially adverse impact of the violation on the health and safety of persons and the safety of property;

(3) The railroad's operating rules, safety rules, and repair and maintenance standards;

(4) Repair and maintenance standards adopted by the industry;

(5) The consistency of the conditions of the proposed disqualification with disqualification orders issued against other employees for the same or similar violations;

(6) Whether the respondent was on notice of any safety regulations that were violated or whether the respondent had been warned about the conduct in question;

(7) The respondent's past record of committing violations of safety regulations, including previous disqualifications imposed, civil penalties

VOL
53
ISS
237
DE
9
1988
UMI

assessed, railroad disciplinary actions, and criminal convictions therefor;

(8) The civil penalty scheduled for the violation of the safety regulation in question;

(9) Mitigating circumstances surrounding the violation, such as the existence of an emergency situation endangering persons or property and the need for the respondent to take immediate action; and

(10) Such other factors as may be warranted in the public interest.

§ 209.331 Enforcement of disqualification order.

(a) A railroad that employs or formerly employed an individual serving under a disqualification order shall inform prospective or actual employers of the terms and conditions of the order upon receiving notice that the disqualified employee is being considered for employment with or is employed by another railroad to perform any of the safety-sensitive functions described in § 209.303.

(b) A railroad that is considering hiring an individual to perform the safety-sensitive functions described in § 209.303 shall ascertain from the individual's previous employer, if such employer was a railroad, whether the individual is subject to a disqualification order.

(c) An individual subject to a disqualification order shall inform his or her employer of the order and provide a copy thereof within 5 days after receipt of the order. Such an individual shall likewise inform any prospective employer who is considering hiring the individual to perform any of the safety-sensitive functions described in § 209.303 of the order and provide a copy thereof within 5 days after receipt of the order or upon application for the position, whichever first occurs.

§ 209.333 Prohibitions.

(a) An individual subject to a disqualification order shall not work for any railroad in any manner inconsistent with the order.

(b) A railroad shall not employ any individual subject to a disqualification order in any manner inconsistent with the order.

§ 209.335 Penalties.

(e) Any individual who violates §§ 209.331(c) and 209.333(a) may be permanently disqualified from performing the safety-sensitive functions described in § 209.303. Any individual who willfully violates §§ 209.331(c) and 209.333(a) may also be assessed a civil penalty of at least $1,000 and not more than $5,000.

(b) Any railroad that violates §§ 209.331 (a) and (b) and 209.333(b) may be assessed a civil penalty of at least $5,000 and not more than $10,000.

Issued in Washington, DC on December 6, 1988.

John H. Riley,

Federal Railroad Administrator.

Notices

Federal Register
Vol. 53, No. 237
Friday, December 9, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 88-028N]

Standards and Labeling Division Policy Memoranda; Semi-Annual Listing

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document lists and makes available to the public memoranda issued by the Standards and Labeling Division (SLD), Technical Services, Food Safety and Inspection Service (FSIS), which contain significant new applications or interpretations of the Federal Meat Inspection Act, the Poultry Products Inspection Act, the regulations promulgated thereunder, or departmental policy concerning labeling.

FOR FURTHER INFORMATION CONTACT: Ashland L. Clemons, Acting Director, Standards and Labeling Division, Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-6042.

SUPPLEMENTARY INFORMATION: FSIS conducts a prior approval program for labels or other labeling (specified in 9 CFR 317.4, 317.5, 381.132 and 381.134) to be used on federally inspected meat and poultry products. Pursuant to the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*), and the regulations promulgated thereunder, meat and poultry products which do not bear approved labels may not be distributed in commerce.

FSIS's prior label approval program is conducted by label review experts within SLD. A variety of factors, such as continuing technological innovations in food processing and expanded public concern regarding the presence of various substances in foods, has generated a series of increasingly complex issues which SLD must resolve as part of the prior label approval process. In interpreting the Acts or regulations to resolve these issues, SLD may modify its policies on labeling or develop new ones.

Significant or novel interpretations or determinations made by SLD are issued in writing in memorandum form. This document lists those SLD policy memoranda issued from April 1, 1988, through October 1, 1988.

Persons interested in obtaining copies of any of the following SLD policy memoranda, or in being included on a list for automatic distribution of future SLD policy memoranda, may write to: Printing and Distribution Section, Paperwork Management Branch, Administrative Services Division, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

Memo No.	Title and date	Issue	Reference
022B	Use of the term "Fresh" on Meat and Poultry Products, July 11, 1988.	Under what conditions may the term "fresh" be used on approved labeling of meat and poultry products?.	Supersedes Policy Memo 022A.
083A	Check-Off Blocks on Labeling, May 12, 1988	Should check-off blocks on immediate container labeling be used for identifying products that look alike or are different in composition?.	NA.
101A	Use of Quality Grade Terms and Subjective Terms on Labels, August 30, 1988.	How and when may terms which denote quality grades and certain other subjective terms be used on labels for meat and/or poultry products?.	Supersedes Policy Memo 101.
111	Labeling of Meat and Poultry Stick Items, June 6, 1988	What is the required labeling for meat and poultry stick items, (e.g., "beef sticks," "pepperoni sticks," or "beef jerky")?.	9 CFR 317 and 381, Subpart N; FSIS Notice 70-87.
112	Caramel Coloring, June 6, 1988	How are products to be labeled when they contain caramel coloring?.	NA.
113	Labeling of Products Which Are Artificially Colored, June 24, 1988.	How should products which are artificially colored be labeled?.	Policy Memos No. 112 and 095.
114	Point of Purchase Materials, July 6, 1988	To establish guidelines for use of point of purchase, promotional materials for meat and poultry products.	Policy memo N. 085B.
115	Pressure Sensitive Stickers, July 11, 1988	What are the guidelines for the review and approval of pressure sensitive stickers on meat and poultry products?.	NA.
116	Canadian Style Bacon Made With/From Pork Sirloin Hips, July 11, 1988.	What is the appropriate labeling for a Canadian Style Bacon product made exclusively from, or which includes the sirloin end or hip portion of pork loins?.	Policy Memo 050B; 9 CFR 319.104; Policy Memos 87A and 109.
117	Smoke Flavoring, August 30, 1988	What are the labeling requirements for products containing a component to which smoke flavoring has been added?.	9 CFR 317.2 (j)(3) and 381.119.

The SLD policies specified in these memoranda will be uniformly applied to all relevant labeling applications unless modified by future memoranda or more formal Agency action. Applicants retain all rights of appeal regarding decisions based upon these memoranda.

Done at Washington DC, on December 6, 1988.

Ashland L. Clemons,

Acting Director, Standards and Labeling Division, Technical Services, Food Safety and Inspection Service.

International Trade Administration

[A-583-009]

Color Television Receivers, Except for Video Monitors, From Taiwan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of Final Results of Antidumping Duty Administrative Review.

SUMMARY: On May 29, 1987, the Department of Commerce published the preliminary results of its administrative review and tentative determination to revoke in part of the antidumping duty order on color television receivers, except for video monitors, from Taiwan.

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke in part. Based on the comments we received we have changed the final results from those presented in our preliminary results of review for AOC International Inc., Fulet Electronic Industrial Co., Ltd., Hitachi Television (Taiwan) Ltd., Nettek Corp., Ltd., RCA Taiwan, Ltd., Sampo Corp., Shin-Shirasuna Electric Corp., and Tatung Co. We also confirm our tentative determination to revoke in part with respect to Capetronic.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Maureen C. McPhillips or Phyllis L. Derrick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377-1130/2923.

SUPPLEMENTARY INFORMATION:

Background

On May 29, 1987, the Department of Commerce ("the Department") published in the Federal Register (52 FR 20130) the preliminary results of its administrative review of and tentative determination to revoke in part the antidumping duty order on color television receivers, except for video monitors, from Taiwan (49 FR 18337, April 30, 1984). The Department has now completed the administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Act").

Scope of the Review

Imports covered by the review are shipments of color television receivers, except for video monitors, complete or incomplete, from Taiwan. The order covers all color television receivers regardless of tariff classification.

The merchandise is currently classifiable under item numbers 684.9246, 684.9248, 684.9520, 684.9522, 684.9253, 684.9255, 684.9256, 684.9258, 684.9562, 684.9263, 684.9270, 684.9275, 684.9655, 684.9656, 684.9658, 684.9660, and 684.9663 of the *Tariff Schedules of the United States Annotated* and item number 8528.10.80 of the *Harmonized System.* The review covers eleven manufacturers and/or exporters of Taiwanese color television receivers, except for video monitors, to the United States, and the period April 1, 1985 through March 31, 1986.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke in part as provided by § 353.53a(c) of the Commerce Regulations. We received comments from the petitioners (International Brotherhood of Electrical Workers, International Union of Electronic, Electrical, Technical, Salaried and Machine Workers, AFL-CIO-CLC, Independent Radionic Workers of America, Industrial Union Department, AFL-CIO), Zenith Electronics Corporation, and the respondents, Hitachi, Sampo, Shin-Shirasuna, and Tatung.

We received additional comments from the respondents, the petitioners, and Zenith concerning mathematical or clerical errors. We have corrected such errors, but have not addressed them specifically in this notice.

Comment 1: Zenith states that constructed value calculations should not be adjusted for circumstance-of-sale expenses. The Department should delete all downward adjustments from its calculations.

Particularly with regard of Tatung, Zenith notes that the general, selling, and administrative expenses used in computing constructed value were exceeded by claimed direct selling expenses used to adjust the constructed value calculations.

Department's Position: We disagree. Section 773(a)(4)(B) of the Act provides that where it is established that the amount of any difference between United States price and foreign market value is due to differences in circumstances of sale, "due allowance shall be made." Section 773(a) of the Act does not distinguish constructed value from any other method of determining foreign market value. Thus, circumstance-of-sale adjustments are required where constructed value is used as the basis for foreign market value, just as they are required where home market or third-country prices are used. *See Timken Co. v. United States* 673 F. Supp. 495 (1987); *See also* the final results of the first administrative review on *Color Television Receivers, Except for Video Monitors, from Taiwan,* (51 FR 56895, December 29, 1986) and *Tapered Roller Bearings from Japan,* (52 FR 30700, August 17, 1987).

We have corrected an inadvertent error, however, and have reduced the amounts for circumstance-of-sale

adjustments made to Tatung's constructed value.

Comment 2: Zenith contends that the Department has failed to take into account the average age and balance of accounts payable relating to a respondent's home market sales activity, as opposed to product process activity. With respect to discounts, rebates, and differences in circumstances of sale in the home market, Zenith maintains that the true cost to the respondent is not the amount paid out, but rather that amount minus the savings realized by paying that amount sometime after the obligation to pay was incurred.

Department's Position: When an expense is inherent in a transaction (*e.g.* credit costs when payment is delayed), yet no sales-specific quantification of such costs exists, we impute expenses/costs. The Department avoids imputing expenses/costs where a company quantifies the actual expenses/costs and provides adequate documentation of those expenses. Our examination of the rebate and/or discount system used by the Taiwanese manufacturers indicates that the amount of the rebate/discount paid to the customer accurately represents the expense to the seller. *See Television Receivers, Monochrome and Color, From Japan, Final Results of Antidumping Duty Administrative Review,* (53 FR 4050, February 11, 1988).

Comment 3: Zenith contends that the Department should ascertain whether AOC's and Tatung's home market advertising adjustment claims are allocated over the total value of all types of sales which benefit from advertising and not just over the sales to the purchaser categories serving as the basis for the foreign market value calculation.

Department's Position: Tatung and AOC allocated home market advertising over the total value of all sales in the home market.

Comment 4: Zenith and the petitioners maintain that AOC, Fulet, Sampo, and Tatung should not have included certain non-selling general and administrative expenses in their calculation of the ESP offset. In addition, Zenith asserts that Fulet, Tatung, and Sampo should not be allowed to claim a financing expense on their home market inventories during the pre-sale period. The petitioners state that Fulet's general and administrative expenses are not selling expenses, but instead are fixed overhead expenses that are not related to Fulet's sales of color televisions under review. Fulet should explain how its home market indirect selling expenses relate to sales of color televisions in the home market.

Department's Position: From the documents submitted by respondents, the Department is satisfied that all the expenses included in the ESP offset are indirect selling expenses. Certain of the general expenses are associated with selling and respondents, therefore, included these expenses in the calculation of indirect expenses. We have accepted respondents' calculation of an indirect interest expense for the inventory carrying period from the time the merchandise leaves the central warehouse until the merchandise is sold in the home market. This period is equivalent to the time we use to calculate an inventory carrying cost for all ESP sales, *i.e.,* from the time the goods leave the central warehouse until they are shipped to the ultimate purchaser in the U.S. We agree with the petitioners that the inventory carrying cost should be calculated based on the cost of the inventory and not the inventory's invoice price. This is consistent with our methodology on the U.S. side. *See* the *Study of Antidumping Adjustments Methodology and Recommendations for Statutory Change* (November, 1985), p.10. We have corrected this calculation in our final determination.

Comment 5: Zenith states that failure to require respondents to submit full costs of manufacture for model matches should be corrected and the final calculations should include differences in merchandise determined by comparison of such fully developed costs.

Department's Position: We disagree. All respondents, where appropriate, submitted sufficient cost information to adjust for differences in the physical characteristics of the merchandise. Differences in manufacturing costs which are not due to physical differences in the merchandise itself do not qualify as adjustments. Comparing total manufacturing costs, as Zenith suggests, would result in characterizing all cost differences as resulting from physical differences in the merchandise, regardless of what actually generates the differences.

Comment 6: The petitioners and Zenith contend that the Department must account for taxes forgiven on exports by adding to U.S. price the amount actually forgiven and by capping that amount at the level of such taxes collected on home market sales and passed through to home market purchasers. It is not correct for the Department to conclude that a full pass through occurred and deduct such amount from the home market price. Zenith cites for support the ruling of the Court of International Trade ("CIT") in *Zenith* v. *United States* (April 24, 1986). AOC, Fulet, Sampo, and Tatung assert that indirect taxes exempted on exports should be added to the U.S. price, rather than deducted from the home market price. The Department's approach of deducting the amount of the exempted tax from home-market price misuses the statutory provisions for "best information available." However, the Department correctly determined that Taiwan's indirect taxes have been passed through to the home market customer.

Department's Position: The CIT issued its final decision in *Zenith* on January 14, 1988. Because the Department has appealed that decision, we are continuing to assume that all indirect taxes in the home market are included in the price paid by the ultimate customers. We did not attempt to measure the amount of tax "passed through" to customers in the Taiwanese market for several reasons.

First, we do not agree that the statutory language limiting the amount of the adjustment to the amount of the commodity tax "added to or included in the price" of televisions sold in Taiwan requires the Department to measure the incidence of the tax in an economic sense. Second, applying such an interpretation would be contrary to the obligations of the United States under the GATT Dumping Code. Third, measuring the incidence of the commodity tax in Taiwan would be an enormous and extremely complex task. The Department simply lacks the resources, in terms of both manpower and expertise, to shoulder such a burden. We do, however, agree that the amount of commodity tax forgiven by reason of the export of televisions to the United States must be added to United States price (USP) under the statute. We have made this change in the final determination.

For this review we did not have the tax base or tax that would have been paid on the exported televisions. As the best evidence of the tax forgiven by reason of export, we have assumed that the amount of commodity tax would be identical for the U.S. models and the home market comparison models.

Comment 7: Zenith argues that the Department should have included samples and damaged set sales in its preliminary determination. Accordingly, all Hitachi sales must be included in the final analysis, along with all movement and carrying costs associated with merchandise damaged beyond repair. Fulet's accommodation sales should be compared with ordinary home market sales, not home market accommodation sales.

Department's Position: We agree in part. Sample sales should be included in the analysis. The Department requested that any sales of samples sold within the meaning of section 772 of the Act be included in respondents' submissions and we have no reason to believe that any such sales were not included. Because we could not distinguish between insurance claims, damaged set sales, and billing mistakes in Hitachi's irregular sales information, we have chosen to include all such sales in the final determination.

We believe that comparing Fulet's accommodation sales in both markets results in the closest possible concordance between levels of trade as required by 19 CFR 353.19. We made these comparisons because the accommodation sales category in both markets involves sales to customers other than unrelated dealers. *See* the final results of the first administrative review in this case, cited *supra*.

Comment 8: Zenith is unsure whether the Department, with regard to Hitachi and RCA, included selling expenses incurred in the home market with respect to sales to the United States.

Department's Position: Hitachi and RCA only maintain production facilities in Taiwan. There are no selling expenses incurred by Hitachi and RCA at their production facilities.

Comment 9: Zenith states that the Department erroneously treated selling commissions in the United States as though they consist entirely of indirect expenses. Commissions in the U.S. should be broken down into their direct and indirect expense components and the offset to FMV should be capped at the level of the indirect expense element.

Department's Position: We disagree. Respondents have demonstrated that commissions paid to unrelated parties bear a direct relationship to the sales under consideration. It is not necessary to examine how the commissionaire spent the money; to the seller it is a direct expense, incurred only because a particular sale was made. We have treated these expenses as direct circumstance-of-sale adjustments according to § 353.15 of the regulations and, where appropriate, have deducted indirect selling expenses in the market where there is no commission up to the amount of the commission in the other market.

Comment 10: Zenith maintains that the Department should correct its exporter's sales price calculations by deducting the amount of antidumping-related legal expenses which respondents paid during the period under review.

Department's Position: We disagree. As a matter of administrative practice, the ITA does not consider legal fees incurred in connection with the antidumping duty investigations to be related directly or indirectly to sales. This practice is stated in our *Study of Antidumping Adjustments Methodology and Recommendations for Statutory Change* (November, 1985), p. 40. The antidumping law was intended to offset actual margins of dumping. Legal fees are incurred in defense against an allegation of dumping and are not expenses directly related to sales. The inclusion of legal fees as a circumstance-of-sale adjustment could alone produce a margin. *See* the final results of the first administrative review in this case, cited *supra*.

Comment 11: Zenith contends that the Department should reduce USP by the amount of estimated antidumping duties paid along with the amount of estimated ordinary duties paid.

Department's Position: We disagree. Unlike ordinary duties, antidumping duties paid upon entry of the merchandise are only estimates. We do not know the actual amounts per sale until we complete an administrative review of the period. To subtract these estimates from USP would cause higher margins, thereby skewing the accuracy of the Department's results. The Department would then need to determine the difference between the actual and estimated duty amounts and adjust its calculations accordingly. Because of the imprecise nature of such an exercise, the Department's practice is to make no adjustment for these duty deposits.

Comment 12: Zenith questions the lack of a royalty expense on U.S. sales by some of the respondents.

Department's Position: The Department requested information on any royalty paid by respondents in its questionnaire. We have no reason to believe the information submitted was inaccurate or otherwise insufficient.

Comment 13: Zenith maintains that the Department's present method of establishing the deposit rate as a percentage of reviewed entries' statutory USP, rather than as a percentage of their lower entered value, understates the best estimate of ultimate liability on future entries.

Department's Position: At the time of entry of any shipment, U.S. price has yet to be determined. Since cash deposits of estimated antidumping duties are required at that time, we instruct Customs to require such cash deposits expressed as a percentage of the only information available, which is entered value. *See Television Receivers, Monochrome and Color, from Japan,* (52 FR 8940, March 27, 1987).

Comment 14: The petitioners and Zenith object to the arbitrary determination of 0.5 percent as *de minimis*. In *Carlisle Tire & Rubber Co.* v. *United States*, the court acknowledged that, in the absence of a valid rule, the Department must explain the basis for *de minimis*.

Department's Position: In *Carlisle Tire and Rubber Co.* v. *United States*, 634 F. Supp. 419 (1986), the Court of International Trade held that the Department must either promulgate a rule in accordance with the Administrative Procedures Protective Act establishing 0.5 percent as the *de minimis* standard for its determinations or must explain the basis for each individual determination in which it decides that a weighted-average dumping margin below 0.5 percent is *de minimis*. The Department has elected to promulgate a rule establishing 0.5 percent as the *de minimis* standard for all antidumping and countervailing duty determinations, which is now final, 52 FR 30660–30662, (August 17, 1987). This rule adds § 353.24 to the antidumping regulations and § 355.8 to the countervailing duty regulations.

Comment 15: Zenith contends that the Department's failure to perform verification allowed the respondents to distort their calculations. The Department must continue to make the same changes in corresponding claims submitted for this review as it did following verification in the first annual review.

Department's Position: In accordance with section 776 of the Act, it is the Department's practice to conduct verifications only when we receive a request for revocation from a respondent or when we receive a request from the domestic industry and have not conducted a verification during the previous two reviews. We conducted a verification in the previous administrative review of this case. We agree with Zenith concerning consistency with our consideration of claims in the previous review. However, adjustments were made based upon verified information in the first review and concerned clerical or methodological errors specific to that review. Where circumstances have differed in this review, *i.e.*, where respondents have corrected such errors, we have not made adjustments to corresponding claims. Where the information presented indicates that circumstances have remained constant, *i.e.*, where respondents have not corrected such errors, we have made

adjustments to the data as we did in the previous review.

Comment 16: Zenith asserts that certain of AOC's model comparisons do not reflect the greatest degree of physical similarity available. The Department's statement regarding the ESP comparisons suggests that an apparently identical model was rejected in favor of an apparently less similar match. At the same time, a match between apparently very similar models was rejected in favor of a match between evidently less similar models. Zenith urges the Department to ensure that all information from the record of the preceding review which it considered in arriving at its decision in this review is contained in the administrative record of this review.

Department's Position: We agree with Zenith's model match comments and have corrected the error to use those matches which are most similar. We have also incorporated any data used from our previous analysis into the record of the current review.

Comment 17: Zenith maintains that the Department should resolve the inconsistency in its treatment of AOC's home market commissions. If AOC paid no home market commissions, then the Department should make no provision for the adjustment to home market price by whatever values may appear in AOC's data set for the commission variable. If on the other hand, home market commissions were paid, then the Department may not adjust foreign market value by any more than the difference between home market and U.S. commissions. To provide adjustments both for home market commissions and for an offset of U.S. commissions risks the calculation of artificially low foreign market values resulting from two downward adjustments, when only one is justified.

Department's Position: We agree and have corrected the error. AOC paid no commissions in the home market.

Comment 18: The petitioners and Zenith challenge AOC's claim for commission income realized on export sales. They maintain that the trading company's payments to AOC were not revenue from the sale of color televisions, but payments for services and, if allowed, should be considered only as an offset to AOC's indirect selling expenses.

Department's Position: We agree and have denied the claim.

Comment 19: Zenith notes several errors in Hitachi's cost of production figures. Zenith and the petitioners urge the Department to include the additional constructed value information supplied by Hitachi. In addition, the Department should apply an inflation factor to certain of the cost figures or at least account for the lengthy period from production to sale during which Hitachi was carrying these unsold receivers.

Department's Position: We have corrected the errors in Hitachi's constructed value calculations. According to section 773(e)(1)(A) of the Act, constructed value must consist of all fabrication costs associated with the merchandise. We used the costs of those color televisions which were produced closest to the date of exportation. Hitachi reported the actual costs to produce this merchandise and we have used these costs in our final determination.

The cost of carrying merchandise in inventory is indirect and is not absorbed by one particular television set, but by the company's entire operations. It is not necessary to specifically allocate indirect expense to particular models or sales. Therefore, we have used Hitachi's average inventory carrying costs in our final determination. Also, we did not find a high rate of inflation in Taiwan warranting an adjustment to the costs that were actually incurred.

Comment 20: Zenith points to several clerical errors in Hitachi's warranty claim. The petitioners maintain that the Department should treat the labor portion of Hitachi's U.S. warranty claim as a direct expense because it is not clear whether the labor services were performed within the company or by outside service centers.

Hitachi objects to the Department's model-by-model treatment of warranty expenses. It contends that the facts of this case justify the use of an average warranty cost based on historical experience in order to avoid the distortions that arise from deducting the specific amount of warranty expense incurred for each model sold during the period, including discontinued models and new models.

Department's Position: We have corrected all the warranty errors noted by Zenith. We agree with the petitioners that the labor portion of Hitachi's warranty is a direct expense. The majority of labor performed was completed by outside service centers. We have continued to calculate warranty claims on a model-by-model basis, except where the warranty claims exceeded actual sales revenue of the model during the period of review. In such instances, we have allocated actual warranty costs of a model and its successor over sales of both models. This allocation, in our view, offers the best approximation of the eventual warranty costs for the sales under consideration.

Comment 21: Zenith maintains that Hitachi's response does not contain an explanation for negative quantities of sales which appear to be the equivalent of a rebate in other uncancelled sales to that customer.

Department's Position: The negative sales quantities in Hitachi's response were caused by credit memos which reflect price changes or corrections.

Comment 22: Zenith asserts that Shin-Shirasuna made sales of certain models to Canada below cost. The sales below cost meet the ten percent guideline and should not be used in the margin analysis. Zenith also contends that each cost of production calculated is understated.

Department's Position: In our cost of production analysis for sales to Canada, we found a clerical error. With this correction, we have found certain sales to Canada to be below their costs of production. We excluded these sales from our consideration of sales to Canada as the basis for foreign market value.

Comment 23: Zenith points to discrepancies in bank commissions on third-country sales made by Shin-Sirasuna. It states that certain bank commission charges used in the Department's analysis are too high.

Department's Position: The differences between Shin-Shirasuna's submission and certain bank charges used in the Department's analysis, noted by Zenith, derive from the Department's use of weight-averaging of bank commissions on third-country sales.

Comment 24: Zenith and the petitioners contend that, if subcontractor costs cover the purchase of direct materials and/or direct labor, they should be included in the differences in merchandise calculation for Shin-Shirasuna. In addition, the petitioners remark that Shin-Shirasuna has not reported any variable overhead costs in its physical difference claim. These direct overhead costs for color televisions should be broken out and taken into account.

Department's Position: Shin-Shirasuna states that it does not distinguish between fixed and variable components in its subcontractor cost. Therefore, we have treated these costs as variable expenses and have included this component in calculating the adjustment for differences in the physical characteristics of the merchandise. Shin-Shirasuna did not report any variable overhead costs in its physical difference claims because it claims that its factory overhead expenses are essentially fixed in nature. We have reviewed Shin-

Shirasuna's response and agree with their assessment.

Comment 25: Zenith notes in the final determination in the preceding review, the Department correctly ruled that for purposes of antidumping calculations the cost of parts purchased by Shin-Shirasuna Taiwan from Shin-Shirasuna Japan is Shin-Shirasuna Taiwan's purchase price, not Shin-Shirasuna Japan's acquisition cost as Shin-Shirasuna had claimed. It appears that, in this review, the Department has employed Shin-Shirasuna Japan's acquisition cost rather than Shin-Shirasuna Taiwan's purchase price for calculating certain differences in merchandise adjustments.

Department's Position: In this review, Shin-Shirasuna Taiwan did not purchase parts from Shin-Shirasuna Japan. Therefore, we have used the prices as reported.

Comment 26: Zenith maintains that Shin-Shirasuna's material cost differences yield a lower difference than is justified by the parts list submitted in the original questionnaire response.

Department's Position: Zenith has miscalculated Shin-Shirasuna's difference in merchandise adjustments. Shin-Shirasuna's parts lists contain all parts included in the production of these models. When we calculate our difference in merchandise adjustment, we look only to those factors that are uniquely associated with the cost of manufacture of the physical differences. This does not include price differences of identical parts, as represented by Zenith's calculation.

Comment 27: Zenith requests that the Department determine whether there is an overlap between the costs reported by Shin-Shirasuna in the differences in merchandise and the packing costs data.

Department's Position: Shin-Shirasuna provided separate lists for packing materials and materials pertaining to its difference in merchandise claims. We have no evidence that costs reported in one list overlapped with costs reported in the other.

Comment 28: Zenith states that a number of sales appear to be missing from Shin-Shirasuna's final submission.

Department's Position: Shin-Shirasuna has corrected the error and has submitted the additional U.S. sales. We have included these sales in our analysis.

Comment 29: Zenith and the petitioners question Shin-Shirasuna's failure to report a stamp tax, when all other Taiwanese firms have indicated payment of this internal tax. In addition, the petitioners contend that an export promotion fee should be deducted from U.S. price.

Department's Position: We agree and have adjusted our calculations to include a stamp tax on all sales exported from Taiwan. Shin-Shirasuna included the stamp tax in its general and administrative expenses in constructed value. We have taken this item out of the constructed value calculations and made the appropriate deduction from U.S. price. The export promotion fee was included in the bank charges category and we deducted this amount from U.S. price.

Comment 30: The petitioners maintain that Tatung's home market discounts and rebates should be considered indirect selling expenses, for which no circumstance-of-sale adjustments are warranted, because they are not directly related to home market sales under review. Certain of the incentive programs are triggered not by sales of the subject color televisions, but by a dealer's purchases over time of various consumer products in sufficient overall values and/or quantities to be eligible for the incentives. Other programs are similarly triggered not by sales of Tatung's color televisions, but by either a separate and subsequent transaction, such as a trade-in for which Tatung pays for value received, or by the quantity of a dealer's overall purchases of consumer products generally from Tatung.

Department's Position: We disagree. We have continued to accept Tatung's discount and rebate claims as directly related to sales and deducted these claims from foreign market value as we did in our preliminary determination. When rebate programs were based on a variety of products, Tatung correctly allocated a proportionate share of the rebates to sales of comparison television models in the home market. *See* the *Study of Antidumping Adjustment Methodology and Recommendations for Statutory Change*, (November, 1985), p. 60. However, we agree with petitioners concerning rebates paid on trade-ins of merchandise and have continued to exclude this portion of Tatung's rebate claim.

Comment 31: Zenith maintains that the general and administrative expenses included in Sampo's constructed value calculations appear to be understated. Sampo should have generated the percentage figure by allocating financing and general expenses over cost of goods sold instead of allocating its expense over sales value.

Department's Position: The allocation of financing and general expenses over costs of goods sold was reflected in our preliminary determination. We have continued to follow this methodology in our final determination.

Comment 32: Zenith states that the Department failed to perform a cost of production test on Sampo's sales in the home market. During the preceding review, Sampo claimed circumstance-of-sale adjustment amounts which, in the aggregate, reduced constructed value to below the cost of manufacture.

Department's Position: Zenith did not provide any "reasonable grounds to believe or suspect" that Sampo's sales were below cost, as defined in section 773(b) of the Act. The only basis for Zenith's cost allegation was a clerical error from the previous review. Because we corrected that error in the previous review's final results, we did not consider Zenith's allegations as still valid.

Comment 33: The petitioners and Zenith claim that Fulet incorrectly allocated its home market advertising expenses. They request that all Fulet's general television home market advertising expenses be allocated over sales of all home market color televisions, not just the comparison models. Zenith asserts that Fulet has not provided the information necessary to determine the appropriate attribution and/or allocation of the expenses that may qualify for an adjustment and that Fulet has claimed more than the entire amount of advertising expenses it incurred. Zenith also contends that certain categories of Fulet's advertising expenses are not directly attributable to comparison model sales and some categories are not eligible as circumstance-of-sale adjustments at all. In addition, the petitioners point to pre-paid advertising expenses in Fulet's financial statements amortized over several years. All of these advertising expenses should be excluded from Fulet's claimed home market advertising adjustment.

Department's Position: Fulet correctly allocated its home market advertising expenses according to the methodology delineated in our questionnaire. We found certain clerical errors in Fulet's advertising calculations, however, and have corrected them in our final determination. Since all of Fulet's home market sales are sales of comparison models, all color television advertising is incurred in connection with the sales during the review period. Fulet provided the Department with primary source documents from which it determined per-model expenses. These direct and indirect expenses are the total of advertising costs reported by Fulet for the review period. For an explanation of the pre-paid advertising expense, *see* Comment 35.

VOL 53 ISS 237 DE 9 1988 UMI

Comment 34: Zenith submits that the Department must conduct a cost of production examination of all Fulet's accommodation sales.

Department's Position: We disagree. Zenith had sufficient information prior to the preliminary determination concerning Fulet's accommodation sales to allow the filing of a timely allegation of sales at less than the cost of production. Absent such an allegation sufficiently prior to the preliminary determination to allow for collection and analysis of cost data, we will not institute a cost of production inquiry. *See,* 51 FR 29046, § 353.31(c)(ii), August 13, 1986.

Comment 35: Zenith and the petitioners allege that Fulet has understated its U.S. advertising expenses. Fulet should provide an explanation of the derivation of its direct advertising expenses and reallocate cooperative advertising only over the color televisions sold in the U.S. Fulet should also explain whether it included export-related advertising expenses incurred in the home market in its U.S. claim. In addition, the petitioners claim that an advertising expense clearly resulted from Fulet's barter transaction and that this expense should be accounted for as a U.S. advertising expense.

Department's Position: Fulet claimed only a portion of total advertising expenses as a direct adjustment to U.S. price. This is the figure quoted by the petitioners. The remainder is included in indirect expenses. Fulet's allocation of cooperative advertising is based on sales value and pertains only to the U.S. model that received this form of advertising. Fulet also included export-related advertising expenses in its indirect expense category. We have accepted Fulet's allocation of its U.S. advertising expenses as we have no basis not to. As for Fulet's barter transaction, Fulet received a credit towards future advertising in the U.S. in exchange for the subject color televisions. Because the credit for advertising services received from this transaction was not used until the subsequent review period, we have deferred action on this matter in this review.

Comment 36: Zenith requests that the Department examine its constructed value calculation for Nettek. In all probability, the difference in merchandise adjustment should be removed.

Department's Position: Since we constructed the value of similar, not such merchandise, an adjustment for physical differences was necessary.

Comment 37: The petitioners request that the Department investigate certain volume discrepancies in the various submissions made by Hitachi, RCA, Shin-Shirasuna, and Tatung.

Department's Position: The discrepancies noted by the petitioners were caused by clerical errors in the programming, in the case of Tatung, and by missing U.S. sales in Shin-Shirasuna's calculations. We have corrected both errors. The sales figures for Hitachi questioned by the petitioners are for imports of the merchandise from Taiwan and not sales in the United States. RCA's initial sales figures were incomplete and were subsequently revised.

Comment 38: The petitioners contend that they are impaired in their analysis by the lack of access to documents considered verification exhibits by respondents. When no verification is conducted, there should be no "verification exhibits."

Department's Position: It is our policy not to release a respondent's supporting source documents under an administrative protective order when we have requested this additional information solely to further clarify a respondent's claim. Release of such documents can be damaging to the competitive position of the respondent. If petitioners did not agree with our position, the proper remedy was to appeal to the Court of International Trade while this review was in progress. 19 U.S.C. 1677(f)(c)(2).

Comment 39: The petitioners believe that the tentative determination to revoke with respect to Capetronic is premature. It is not clear that there have been no sales at less than fair value for at least two years. Moreover, the first review's results as to Capetronic are being appealed.

Department's Position: The Department has established 0.5 percent as the *de minimis* standard for its determination, 52 FR 30660–30662, (August 17, 1987). Capetronic has had *de minimis* margins for at least two years. We are proceeding with the revocation process with regard to Capetronic. Under section 516A of the Act, petitioners may contest the Department's decision to revoke its order with respect to Capetronic. *See* 19 U.S.C. 1516A(a)(2)(B)(iii).

Comment 40: The petitioners maintain that the Department failed to analyze sales between AOC and an unrelated trading company as purchase price transactions. The sales invoice between AOC-Taipei and the unrelated trading company shows that AOC knew at the time of sale that the merchandise was destined for the United States. In the past, the Department has analyzed such sales as purchase price transactions.

Department's Position: We disagree. AOC controlled the price by the unrelated trading company to both related and unrelated U.S. purchasers. The unrelated trading company only served to facilitate the export of the merchandise. In this situation, we regard the trading company as acting only as an agent of AOC.

Comment 41: The petitioners state that the sales AOC made to unrelated buyers with terms confirmed by AOC–USA before the date of importation should be analyzed as ESP transactions and not purchase price transactions. They maintain that AOC-Taipei did not ship to an unrelated customer and that AOC–USA did not act solely as a processor of sales-related documentation, but clearly functioned as the U.S. marketing arm of AOC-Taipei.

Department's Position: We disagree. We have continued to treat these transactions as purchase price sales because AOC's subsidiary in the U.S. serves merely as the facilitator of the transaction and importer of record for the merchandise and not the U.S. marketing arm of AOC-Tapei. The merchandise was shipped directly from the manufacturer to the unrelated party without being introduced into the inventory of the other party. This was the customary commercial channel for sales between the parties involved. Furthermore, the subsidiary acted only as a processor of sales-related documentation and a communication link with the unrelated U.S. buyer.

Comment 42: The petitioners contend that the Department incorrectly accepted AOC's reported claim that all of its U.S. advertising expenses were directed at the trade rather than end-users. They assert that AOC–USA has been participating in some kind of dealer cooperative advertising program. The Department should reject AOC's U.S. advertising claim and use the best information available. The best information available would be to offset completely the direct advertising expenses claimed by AOC on its home market sales.

Department's Position: The Department is satisfied with the information we received from AOC. We have not changed our analysis of AOC's U.S. advertising claim.

Comment 43: The petitioners believe that AOC's and Tatung's duty drawback and commodity tax claims were based on an unfair duty-paying value and should be denied by the Department.

VOL
53
ISS
237
DE

1988
UMI

Department's Position: Each firm determines the duty-paying value for its merchandise. The customs authority in Taiwan periodically verifies this information. Based on these facts, the Department has accepted each respondent's methodology in calculating its duty drawback and commodity tax claims.

Comment 44: The petitioners contend that the Department erred in its preliminary analysis by comparing AOC's sales of certain U.S. models with home market sales of certain models made at prices below their cost of production. The Department should disregard all home market sales at prices below the cost of production in its final analysis.

Department's Position: We disagree. The petitioners had sufficient information prior to the preliminary determination concerning AOC's sales to allow the filing of a timely allegation of sales at less than the cost of production. Absent such an allegation sufficiently prior to the preliminary determination to allow for collection and analysis of cost data, we will not institute a cost of production inquiry.

Comment 45: The petitioners request that the Department should determine, prior to its final analysis, whether AOC and its selling agent were "related parties" within the meaning of the law and whether the home market sales are suitable to use for comparison purposes. Although AOC claims that prices to its selling agent were negotiated solely on the basis of market value, this claim does not appear to be supported by the sales price information on the record.

Department's Position: From the documents AOC submitted detailing its relationship with its selling agent, the Department determined that AOC and its selling agent were "related parties" for only the first quarter of the review period. During this period, we used sales between the related selling agent and unrelated dealers in the home market in our analysis. When AOC divested itself of all shares in the company serving as selling agent, they were no longer "related parties" within the meaning of section 771(13) of the Act. We then used sales between AOC and the unrelated selling agent in our analysis.

Comment 46: The petitioners assert that the Department should deny the portion of AOC's home market inland freight claim associated with owning trucks, including salaries of the drivers. These expenses are part of general overhead costs and as such cannot be tied directly to sales of color televisions in the home market.

Department's Position: We disagree. Since these expenses must be deducted from USP, it is necessary to also deduct them from home market selling prices to achieve a proper comparison. AOC reported the underlying *cost* (not a transfer price) of providing the inland freight service. We have accepted this cost as a reasonable proxy for an unrelated transaction price and have deducted said cost from foreign market value.

Comment 47: The petitioners contend that the Department erred in allowing AOC's home market rebate claims in its preliminary analysis. AOC claimed rebates on models not eligible to receive the rebates and did not claim amounts for rebates actually paid during the period of review.

Department's Position: AOC based its rebate claim on rebates actually paid during the review period. The discrepancies noted by petitioners were caused by clerical errors in AOC's submission which have been corrected.

Comment 48: In regard to AOC's home market warranty expenses, the petitioners state that only those expenses incurred during the period of review should be considered appropriate for adjustment purposes. In addition, the Department should not allow AOC's claim for material expenses. Since AOC provided its selling agent with free replacement parts, any value that the selling agent assigned to these parts for purposes of its warranty expense claim does not necessarily reflect an arm's length value. AOC should also be required to confirm that it incurred no U.S. warranty expenses during the period of review on sales of certain models.

Department's Position: We agree. We have included only warranty expenses incurred during the review period in our final analysis. However, we have continued to allow AOC's claim for material expenses. In both the U.S. and home market warranty calculations, AOC claimed its acquisition cost and not the retail value of the replacement parts. AOC reported its U.S. warranty costs on a model-specific basis in its response to the Department's questionnaire.

Comment 49: The petitioners contend that the Department should allow only the taxes paid by AOC's selling agent during the period when the two companies were related because the sales to the first unrelated home market customers were made by the selling agent during this period.

Department's Position: We agree. For the period in question, we have disallowed AOC's stamp tax as an expense directly related to sales by the related selling agent because only the related selling agent's stamp tax expense was the result of the sale to the first unrelated customer. However, we have allowed AOC's stamp tax as an indirect expense in our final calculations.

Comment 50: The petitioners state that the Department failed to deduct export duties on U.S. sales paid by AOC to the China External Development Council in its preliminary analysis.

Department's Position: We disagree. These export duties were included in bank charges.

Comment 51: The petitioners request that Fulet explain or correct the inconsistent sales volumes reported in its responses.

Department's Position: The petitioners have mistaken Fulet's list of shipments to the U.S. for sales. Model P619 was sold from stock; it was not shipped during the review period. The inconsistency in sales listings in Fulet's response was caused by one list including returns.

Comment 52: The petitioners contend that Fulet overstated its home market inland freight claim. Fulet's terms of sale on its home market color television sales appear to be ex-warehouse and no downward adjustment to foreign market value is warranted for inland freight. The adjustment should be restricted to no more than those expenses that are directly related to the color televisions under review. Any inland freight adjustment should not reflect costs entailed in the delivery of merchandise other than color televisions.

Department's Position: Fulet's terms of sale include the freight expenses to its customers. However, we agree with the petitioners that any adjustment for inland freight expenses should be restricted to no more than those expenses that are associated with the color televisions under review. We have corrected this error in our final analysis. *See* also Comment 46.

Comment 53: The petitioners ask that Fulet be required to substantiate that its cash discounts were based on the gross invoice price and document that timely payment was received on the home market color television sales on which the cash discount was earned. Furthermore, Fulet should demonstrate that early payment discounts claimed were actually awarded on its specified home market color television sales. The petitioners disagree with Fulet that only those home market sales should be used for comparison purposes to which the volume discount program applied. They state that no adjustment for volume discounts on accommodation sales should be awarded. In addition, they note a discrepancy in Fulet's volume

discount and rebate expenses that has exaggerated these claims. The petitioners assert that Fulet's "other discounts" should be denied because none of these discounts is directly related to sales in Taiwan of the color televisions under reveiw.

Department's Position: All of Fulet's discount claims, including early payment discounts, were prepared using a dealer-by-dealer, sale-by-sale methodology. The Department is satisfied with this methodology. Accommodation sales received no volume discounts. In our preliminary determination, we used all home market sales for our comparisons, and not only those to which volume discounts applied. We have continued to use this methodology in our final determination. The explanation of figures cited in petitioners' comment is incorrect. The amount stated as Fulet's total color television discounts and rebates in 1985 is actually the total for color televisions and stereos. As for "other discounts," Fulet allocated the amount of these expenses to color television receivers in its indirect expense adjustment. We have accepted this calculation.

Comment 54: The petitioners contend that because Fulet's home market "one-price" rebates appear to apply to a limited number of home market sales, the Department should not apply these expenses to all home market sales.

Department's Position: We disagree. Fulet's "one-price" rebate program applies to all sales of the home market merchandise and was paid to all dealers. We have continued to allow an adjustment for this program in our final analysis.

Comment 55: The petitioners assert that Fulet's actual credit terms on a sale-by-sale basis should be used rather than an averaging of home market credit costs. They ask for clarification as to whether Fulet's short-term borrowings were truly at arm's length. The home market accounts receivable should be net of any bad debt and trading loss allowances. It is not clear that Fulet has done so in this regard. Fulet should revise its accounts receivable calculations to include only color television credit sales. The petitioners believe that the credit period derived by Fulet erroneously overvalues the cost of credit on its home market sales of color televisions. In addition, the accounts receivable turnover ratio should ignore Fulet's notes receivable figure entirely. The figure used by Fulet is overstated because it includes all dealer sales of whatever product and not just sales of color televisions.

Department's Position: The Department is satisfied that the imputed method based on the average balance of accounts receivable accurately reflects the credit costs Fulet incurred on sales of the merchandise. We have no basis to believe that bad debt and trading loss allowances were included in Fulet's accounts receivable or that its short-term loans were not at arm's length. Fulet's accounts receivable ledger consists of all consumer electronics products. It does not maintain a separate account for color television receivers. Therefore, we calculated the credit expense associated with all consumer products. We have continued to allow Fulet's notes receivable in its credit calculation as we did in the previous review. The petitioners' interpretation of Fulet's financial statement is incorrect. The figure presented as the 1985 notes receivables from dealer sales is merely an adjusted amount for notes receivable that was added to accounts receivable at the end of the year. We have accepted Fulet's calculation of credit expenses in our final analysis as it accords with our methodology.

Comment 56: The petitioners maintain that the labor portions of Fulet's technicians' salaries and employee insurance should be disregarded as indirect overhead. Travel expenses should be disallowed unless they are directly related to the servicing of color televisions. If employee-owned vehicles are part of employees' compensation, or used for purposes other than servicing color televisions, these expenses are indirect and should not be allowed.

Department's Position: We disagree. We regard technicians' salaries and employee insurance as indirect warranty expenses. *See* our *Study of Antidumping Adjustments Methodology and Recommendations for Statutory Change*, (November, 1985), p. 46. In our questionnaire we request each respondent to submit *actual* warranty expenses related to sales of the merchandise during the period of review and to identify which elements are fixed or variable expenses. We have no basis to believe that travel expenses were not directly related to the servicing of color televisions.

Comment 57: The petitioners maintain that if there were no sales of model P619 by Fulet in the United States, then the home market sales of this model should be disregarded. Given that this model was defective and quickly gave way to replacement models, the home market sales of this model should be rejected as a basis for comparison because these sales were not made in the ordinary course of trade. The warranty expenses for this model are more accurately considered as design and engineering costs for which no circumstance-of-sale adjustment should be granted.

Department's Position: We disagree. This model was sold in the ordinary course of trade in Taiwan and there were sales of the model in the U.S. during the review period. However, we have employed the methodology stated in Comment 20 above in order to account for the excessive warranty claims over the review period.

Comment 58: The petitioners contend that Hitachi's use of weighted averages in reporting U.S. movement charges distorts the margins and, therefore, should be rejected. Ocean freight charges varied significantly during the review period. Hitachi's claim that it could not trace actual movement charges incurred on sales under review is not credible.

Department's Position: We disagree. Whenever possible the Department calculates movement charges based on actual costs for each sale. However, we use average movement charges on a model-by-model basis when, as here, transaction-by-transaction cost information is not available. See *Portable Electric Typewriters from Japan*, (48 FR 40764, September 9, 1983).

Comment 59: The petitioners contend that Hitachi failed to comply with the Department's request to supply information on its discounts on a sale-by-sale basis. The Department should adjust U.S. price downward in its final analysis by the largest discount amount reported in Hitachi's response as the best information available.

Department's Position: We disagree. Hitachi does not maintain a separate record that tabulates the amount of discounts granted. Since Hitachi's sales are negotiated on a case-by-case basis and not according to regulated discount schedules, we have used the invoice price net of discounts as the starting price in our calculations.

Comment 60: The petitioners maintain that the average short-term interest rate reported by Hitachi in its U.S. credit calculation is abnormally low. Unless the Department can satisfy itself that Hitachi has not understated its reported interest rate, the Department should use the published short-term interest rate in effect during the review period in its calculations.

Department's Position: Hitachi did not use the internal average short-term interest rate reported in its questionnaire response. Hitachi divided total short-term interest for the review period by total sales value. As this calculation of credit was higher than the Department's imputed methodology, we

have used Hitachi's credit expense in our final determination.

Comment 61: The petitioners claim that it is unclear whether depreciation and labor costs have been included in Hitachi's U.S. warehousing expenses.

Department's Position: According to the warehousing contracts supplied by Hitachi and its financial statements, all costs associated with warehouses rented or owned have been included in Hitachi's claim.

Comment 62: The petitioners request that prior to any final analysis, Hitachi should be required to submit the total amount of cooperative advertising expenses per customer so that the accuracy of its allocation methodology can be assessed.

Department's Position: In response to the Department's request, Hitachi revised its U.S. advertising claim to provide customer-specific information. We have accepted this revised calculation.

Comment 63: The petitioners contend that Hitachi's U.S. administrative expenses appear to be grossly understated. Because Hitachi has failed to supply the necessary supporting documentation either in the form of a list of individual expense items or the financial statements for Hitachi Sales Corporation of America ("HSCA"), the Department should use Hitachi Ltd.'s general expenses as a surrogate for HSCA's general expenses in its final analysis.

Department's Position: Hitachi submitted to the Department all financial statements for HSCA and Hitachi Sales Corp. of Hawaii ("HSCH"), including lists of the individual items. Based on this information, we have continued to use the general expenses of HSCA and HSCH in our final analysis.

Comment 64: The petitioners argue that Hitachi failed to report export promotion fees on its U.S. sales. The Department should adjust U.S. sales price downward by the amount of this expense in its final analysis.

Department's Position: We agree and have made the deduction to U.S. price.

Comment 65: The petitioners allege that the materials cost information submitted by Hitachi for constructed value may not have included all of the expenses associated with preparing the material and parts for production into the finished product. They further assert that Hitachi's reported standard cost of materials and actual cost of materials reported on its constructed value calculations cannot be reconciled. The Department must ensure that any parts obtained by Hitachi (Television) Taiwan ("HTT") for use in the production of the televisions under review are reported at the cost HTT paid to obtain these parts, not the cost that HTT's parent or related parties paid for these parts. Hitachi's constructed value calculations should also include all taxes and movement charges for material purchases and any adjustments for scrap or defective parts. Labor costs should be based on actual cost data and must include all labor elements. The Department must ascertain whether Hitachi was related to any subcontractors and whether Hitachi has accounted for any equipment lent to any subcontractors. Hitachi incorrectly allocated its factory overhead expenses and employed estimates in its constructed value calculations. In addition, it is unclear whether Hitachi included an amount for depreciation expenses and research and development in its factory overhead calculations.

Department's Position: Hitachi responded to the Department's constructed value questionnaire and has include all costs associated with the production of the merchandise, including taxes, movement charges, and adjustments for defective parts. Hitachi reported costs incurred by HTT and not the parent company. The differences between the labor and factory overhead allocation rates and actual labor and factory overhead are included in the variance amounts. HTT is not related to its subcontractor. The Department is satisfied that all subcontractor costs and depreciation expenses were included in HTT's constructed value calculations.

Comment 66: The Petitioners contend that constructed value should be the basis of comparison instead of Nettek's third-country sales. They note discrepancies in Nettek's response and request that the Department confirm certain cost elements.

Department's Position: The Department is satisfied that Nettek has submitted accurate cost of production information with regard to its third-country sales. Where we used third-country sales in our analysis, we found these sales to be above their cost of production. We have continued to use Nettek's sales to Chile in our final analysis. It is our policy, based on the legislative history of the 1979 Act, to use third-country sales, where possible, rather than constructed value as a basis for comparison in determining foreign market value. *See* also 19 CFR 353.4 (b).

Comment 67: The petitioners allege that Nettek's sales to Chile were below cost because Nettek undervalued its general, selling, and administrative expenses. Nettek has provided company-wide general expenses for all products instead of color television-specific expenses and has erroneously employed relative sales values in lieu of the Department's long-standing practice of using the relative cost of goods sold in its allocation. The petitioners urge that the Department use the general expense figure found from Nettek's internal financial statements in its sales below cost analysis.

Department's Position: We agree with petitioners that Nettek's general and administrative expenses must be allocated over cost of goods sold. In our final determination, we have used Nettek's general and administrative expenses from its internal financial statements for color televisions because they more accurately capture the expenses associated with color televisions.

Comment 68: The petitioners request that the Department employ the general expenses used in its sales below cost analysis in its constructed value calculations for Nettek. They maintain that constructed value should be used as the basis for comparison for all sales to the U.S. because the third-country merchandise was sold below cost. In addition, certain of Nettek's U.S. sales were not contemporaneous with any of the sales to Chile.

Department's Position: For our constructed value calculations, we have continued to employ the ten percent statutory minimum for general expenses since, according to the methodology outlined in Comment 67, the general, selling, and administrative expenses for third-country sales were less than ten percent. The petitioners have misunderstood our use of the 90/60 day contemporaneity rule. Nettek's U.S. sales were compared to sales to Chile up to 90 days back in time or 60 days forward from the date of the U.S. sale. Using this approach, we found contemporaneous third-country sales. *See* also Comment 67.

Comment 69: The petitioners request that the Department complete a sales below cost analysis on Shin-Shirasuna's sales to Panama and revise and update its sales below cost analysis on sales to Canada. The cost analyses for sales to Panama and Canada must include the mark-up for parts purchased from Shin-Shirasuna Japan, as well as all start-up costs involved in the production of the merchandise. In addition, Shin-Shirasuna has understated its expenses and employed a weighted-average cost of materials instead of providing lot-by-lot information. The petitioners conclude that the U.S. sales for which price-to-price comparisons have preliminarily been made against sales to Panama and

Canada should instead be analyzed in terms of constructed value.

Department's Position: The petitioners had sufficient information prior to the preliminary determination concerning Shin-Shirasuna's sales to Panama to allow the filing of a timely allegation of sales at less than the cost of production. Absent such an allegation sufficiently prior to the preliminary determination to allow for collection and analysis of cost data, we will not institute a cost of production inquiry of sales to Panama. See draft AD Regulations, 51 FR 29046 (August 13, 1986). With regard to our cost of production analysis on sales to Canada, we agree with the petitioners that we must use the price Shin-Shirasuna Taiwan paid for the part. However, since Shin-Shirasuna Taiwan did not purchase parts from Shin-Shirasuna Japan, we have continued to use the prices as reported. We disagree that we incorrectly averaged production costs. We believe that the correct way to compare material costs to selling price is by averaging the costs of all production lots for the period because such an average best represents the material costs over the period of review. We are satisfied that Shin-Shirasuna included all costs in its submission. We have continued to use sales to Panama and Canada in our final analysis.

Comment 70: The petitioners argue that the Department should disregard certain Shin-Shirasuna Canadian sales made through an intermediary company since these sales may have been negotiated in conjunction with certain sales to the United States. They note that the Canadian sales may not be distinct from the United States sales. Therefore, the Department should disregard these Canadian sales and base foreign market value on constructed value.

Department's Position: For these final results, we have continued to use the Canadian sales as the basis of foreign market value. Shin-Shirasuna knows at the time of sale to the unrelated intermediary company the destinations of the televisions. This approach is consistent with our normal practice of determining U.S. price and foreign market value when the seller knows the ultimate destination of the merchandise at the time of sale to an unrelated party. *See, Certain Forged Crankshafts from Japan*, 52 FR 36984 (October 2, 1987); *Nylon Impression Fabric from Japan*, 51 FR 15816 (April 2, 1987); *see also, The Trade Agreements Act of 1979, Report on H.R. 4537 by the Committee on Finance, United States Senate*, 96th Cong., 1st Sess. 94 (1979).

Comment 71: The petitioners encourage the Department to determine the foreign market value for Shin-Shirasuna with reference to its Japanese parent's home market prices. All the statutory prerequisites under the multinational provision in section 773(d) of the Act are satisfied: Shin-Shirasuna and its Japanese parent are integral parts of a multinational corporation; Shin-Shirasuna in Taiwan had no home market sales of the merchandise; and the Japanese parent's color television prices in Japan may be higher than the foreign market value of the televisions produced by Shin-Shirasuna in Taiwan.

Department's Position: We disagree. In order for the Department to make use of the special rule for certain multinational corporations, all criteria must be met. Petitioners did not provide sufficient evidence that the foreign market value of such or similar merchandise produced in one or more of the facilities outside the country of exportation was higher than the foreign market value of such or similar merchandise produced in the facilities located in the country of exportation. Without such evidence, we cannot invoke this provision of the Act.

Comment 72: The petitioners contend that only direct delivery costs of Tatung's home market inland freight should be allowed. In addition, these direct costs should be prorated if the color television deliveries included other products. For U.S. inland freight, the petitioners request that Tatung explain why the Taiwanese inland freight costs for U.S. sales of certain models appear low as compared to other models.

Department's Position: In our final determination, we have allowed Tatung's entire home market inland freight claim since these expenses would be deducted from USP and it is necessary to deduct such expenses from home market price to achieve a proper comparison. *See* Comment 46. The Department is satisfied that Tatung appropriately allocated its U.S. inland freight costs to color television deliveries.

Comment 73: The petitioners allege that Tatung may have overstated its home market credit costs. Tatung's cost of credit should be a weighted-average of only its commercial paper and bank loan rates and should not include short-term loans from its employees and subsidiaries. Tatung should also supply its actual credit experience on sales of color televisions in the United States. Tatung has understated the average period of time during which it extended credit on its U.S. sales by calculating its accounts receivable turnover ratio using the value of its total sales, not just credit sales. The value of Tatung's U.S. c.o.d. and flooring sales on which it extends no credit should be excluded.

Department's Position: We do not consider employees to be related parties. Therefore, we have continued to include Tatung's short-term loans from its employees in our calculation of home market credit. Because loans from subsidiaries are not considered arm's length transactions, we have disregarded such loans in our credit calculation. Tatung did not include c.o.d. and flooring sales in its calculation of the accounts receivable period for its U.S. credit adjustment. Flooring sales credit was calculated separately. The Department is satisfied that the imputed method based on the average balance of accounts receivable accurately reflects the credit costs Tatung incurred on sales of the merchandise.

Comment 74: The petitioners state that Tatung's commissions to its salesmen on home market dealer sales are in reality intracorporate transfers of funds, for which no downward adjustment to foreign market should be allowed.

Department's Position: Commissions to unrelated salesmen in the home market on comparison models are a direct deduction from foreign market value. These expenses are incurred only because a particular sale is made. Such salesmen are not a part of the corporation and funds paid to them are not available for further use by the firm.

Comment 75: Tatung's claimed home market warranty expenses for labor costs, according to the petitioners, actually represent fixed overhead and should not be allowed as a downward adjustment to foreign market value. Tatung's servicemen are paid commissions in lieu of salaries. When the dealers have performed warranty work, Tatung should not be awarded a warranty adjustment because Tatung cannot relate this compensation to the products under review.

Department's Position: We disagree. We treated commissions to Tatung's servicemen in the same manner as we treat commissions to salesmen. In response to the Department's deficiency letter, Tatung calculated warranty expenses incurred by dealers by inspecting each warranty repair slip and reporting all warranty costs for the comparison models. Thus, these expenses are directly related to the color televisions under review.

Comment 76: In the opinion of the petitioners, Tatung's U.S. ocean freight costs appear to be unduly low.

Department's Position: We have no basis to disregard the ocean freight expenses reported by Tatung in its

questionnaire response and have continued to use these figures in our final determination.

Comment 77: The petitioners request that the Department seek clarification from Tatung that its claimed home market advertising expenses were directly related to the subject color televisions. In addition, the Department should inquire whether Tatung's related U.S. subsidiary incurs any color television advertising expenses on its own in the U.S. and why its home market advertising claim is greater than its U.S. claim.

Department's Position: Tatung reported its home market and U.S. advertising according to the methodology in our questionnaire. We are satisfied with the response provided by Tatung and have no reason to believe the information submitted was inaccurate or otherwise insufficient.

Comment 78: The petitioners note that, in many instances, Tatung's Taiwan f.o.b. prices do not seem to correlate with the f.o.b. foreign port prices that result from the computer printouts when all movement charges and direct and indirect selling expenses are subtracted from the U.S. unit prices. They are concerned that Tatung may have employed an unreasonably low transfer price to its U.S. subsidiary as the basis for not only its U.S. duty, but other U.S. selling and movement expenses as well.

Department's Position: Tatung has supplied the Department with the Taiwan f.o.b. prices of all sales to the United States. We have no reason to disregard Tatung's reported import duties or other expenses. The accuracy of the import duty is a matter for Customs to determine.

Comment 79: According to the petitioners, it appears that Tatung has inadvertently omitted bank negotiation and export customs brokerage fees from its deductions from U.S. price.

Department's Position: These charges were included in the "other charge" category in the computer printout.

Comment 80: The petitioners contend that non-material expenses, such as freight charges relative to Tatung's physical difference in merchandise, insurance premiums, brokerage, commodity taxes and other internal taxes, import duties, and handling in bringing the materials to Tatung's facilities, are not within the realm of the difference in merchandise adjustment. The guiding principle should be that only the cost differences actually due to physical differences in the merchandise being compared should be considered.

Department's Position: The Department has concluded that duty-paid parts do reflect the actual cost incurred by the manufacturer. *See Color Television Receivers from Korea,* (51 FR 41377, November 14, 1986) and *Bicycle Tubes and Tires from Taiwan,* (48 FR 31691, July 11, 1983). The items cited by the petitioners are considered to be associated with the cost of the differences, as they are necessary to bring the various parts to the place of manufacture.

Comment 81: The petitioners request that the Department determine how Tatung's average time in inventory was calculated and ensure that the period covers the entire time from date of shipment in Taiwan to the date of sale to the unrelated buyer in the U.S. In addition, they raise the question whether U.S. indirect selling expenses have been understated and home market expenses have been overstated.

Department's Position: Tatung's U.S. inventory carrying cost calculations did not include time on the water. We have added this period to our calculation. The Department is satisfied with Tatung's response to our questionnaire concerning other home market and U.S. indirect selling expenses.

Comment 82: In the calculations of Tatung's constructed value, the petitioners maintain that actual and not standard labor hours should be used.

Department's Position: Tatung's cost calculations include a variance amount which is incorporated at the end of the year to adjust for the difference between standard and actual labor hours. We have included this amount in the calculation of constructed value.

Comment 83: Hitachi contends that the Department should use the quarterly exchange rates during the period of production in calculating constructed value rather than those in effect on the date of the U.S. sale. Hitachi's costs should not be quantified on the basis of fluctuations in exchange rates that occurred long after the time of production and importation.

Department's Position: We disagree. The regulations provide for the use of exchange rates as of the date of purchase, for purchase price transactions (*see* § 353.56(a) of the regulations), and the statute provides for the use of exchange rates as of the time of the first sale in the U.S. to an unrelated customer for exporter's sales price transactions (*see* 19 U.S.C. 1677b(a)(1)).

Comment 84: Sampo claims that the Department should add travel expenses and reworking costs to the warranty adjustment in the constructed value calculations. The Department has recognized these items as direct warranty expenses for the price-to-price comparisons. In addition, it requests that the Department include service costs and costs of unsellable sets as part of the direct warranty adjustment.

Department's Position: We have corrected the error in Sampo's warranty claim regarding the inclusion of travel expenses and reworking costs. However, we consider in-house service costs to be an indirect expense. *See Television Receivers, Monochrome and Color, from Japan,* (52 FR 8945, March 20, 1987). The warranty portion claimed for the costs of unsellable sets represents unrecovered production costs and not an expense involved in servicing the sets under a warranty claim.

Comment 85: Shin-Shirasuna requests that the Department rule that model 5A3 is outside the scope of the antidumping duty order and recalculate Shin-Shirasuna's weighted-average dumping margin.

Department's Position: The Department determined this model to be included in the scope of this order based on the criteria set forth in *Diversified Products Corp. v. United States.* (*See* the final results of the first administrative review in this case, Comment 49. Model 5A3 is the same as model EEE in the first review.) We have continued to include this model in the current review.

Comment 86: Shin-Shirasuna alleges that the Department erred in using sales to Jamaica, rather than constructed value, to calculate foreign market value. The sale to Jamaica falls outside the Department's contemporaneity rule and the quantity of units sold to Jamaica fails to meet the five percent adequacy test set forth in the Department's regulations for home market sales which the Department applied to third-country sales by Shin-Shirasuna in the first administrative review.

Department's Position: In order for the Department to determine whether a sale in the home or third-country market is contemporaneous, we must look at the 90/60 guideline. Because the sale to Jamaica was made outside this time period and there were comparatively few sets sold, we have reconsidered our analysis and used constructed value in our final determination as the best measurement of foreign market value.

Final Results of the Review

As a result of the comments received, we have determined that the following weighted-average margins exist:

Manufacturer/ exporter	Time period	Margin (percent)
AOC International, Inc	4/1/85–3/31/86	0.03
Capetronic (BSR) Ltd	4/1/85–5/29/86	.30
Fulet Electronic Industrial Co., Ltd	4/1/85–3/31/86	.22
Hitachi Television (Taiwan) Ltd	4/1/85–3/31/86	2.31
Nettek Corp., Ltd	4/1/85–3/31/86	1.49
RCA Taiwan, Ltd	4/1/85–3/31/86	1.51
Sampo Corp	4/1/85–3/31/86	.78
Sanyo Electric (Taiwan) Co., Ltd	4/1/85–3/31/86	[1] 4.66
Shinlee Corp	4/1/85–3/31/86	[1] 10.14
Shin-Shirasuna Electric Co	4/1/85–3/31/86	.09
Tatung Co	4/1/85–3/31/86	4.06

[1] No shipments during the review period.

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the precentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required for these firms. Since the margins for AOC, Capetronic, Fulet and Shirasuna are less than 0.5 percent and therefore *de minimis* for cash deposit purposes, the Department shall not require a cash deposit of estimated antidumping duties for these firms. For any future entries of this merchandise from a new exporter not covered in this or prior administrative reviews, whose first shipments occurred after March 31, 1986 and who is unrelated to any reviewed firm, a cash deposit of 4.06 percent shall be required. These deposit requirements are effective for all shipments of Taiwanese color television receivers, except for video monitors, complete or incomplete, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with sections 751 (a)(1) and (c) of the Tariff Act (19 U.S.C. 1675 (a)(1), and (c)) and §§ 353.53a and 353.54 of the Commerce Regulations (19 CFR 353.53a, 353.54).

Jan W. Mares,

Assistant Secretary for Import Administration.

Date: November 29, 1988.

Ferrite Cores (of the Type Used in Consumer Electronic Products) From Japan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Final Results of Antidumping Duty Administrative Review.

SUMMARY: On October 26, 1988, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on ferrite cores (of the type used in consumer electronic products) from Japan. The review covers Taiyo Yuden Co., Ltd. and the period March 1, 1987 through February 29, 1988.

We gave interested parties an opportunity to comment on our preliminary results. We received no comments. The final results are unchanged from those presented in the preliminary results of review.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Barbara Victor or Laurie A. Lucksinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5222/5255.

SUPPLEMENTARY INFORMATION:

Background

On October 26, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 43251) the preliminary results of its administrative review of the antidumping finding on ferrite cores (of the type used in consumer electronic products) from Japan (36 FR 4877, March 13, 1971). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are magnetically soft ferrite magnets which are usually wound with wire. The merchandise is magnetized with the induction of electric current and is of the type commonly used as components in consumer electronic products such as household television receivers, projection television sets, radios, stereos and high fidelity radio systems, automobile radios, electronic home computers, etc. Ferrite cores are currently classifiable under item 535.1240 of the Tariff Schedules of the United States Annotated. This product is currently classifiable under item number 8504.90.00 of the Harmonized Tariff Schedule.

The review covers Taiyo Yuden Co., Ltd. and the period March 1, 1987 through February 29, 1988.

Final Results of Review

We invited interested parties to comment on the preliminary results. We received no comments. The final results are unchanged from those presented in the preliminary results of review, and we determine that a margin of 28 percent exists for Taiyo Yuden Co., Ltd. for the period March 1, 1987 through February 29, 1988.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service. Furthermore, as provided for in section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties of 28 percent shall be required on shipments by Taiyo Yuden. For any shipments from the remaining known manufacturers/exporters not covered by this review, a cash deposit shall be required at the rate published in the final results of the last administrative review for those firms.

For any future entries of this merchandise from a new exporter, not covered in this or prior administrative reviews, whose first shipments occurred after February 29, 1988 and who is unrelated to Taiyo Yuden or any previously reviewed firm, a cash deposit of 1.08 percent shall be required.

These deposit requirements are effective for all shipments of Japanese ferrite cores (of the type used in consumer electronic products) entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a).

Jan W. Mares,

Assistant Secretary for Import Administration.

Date: December 5, 1988.

Fireplace Mesh Panels From Taiwan; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request from the petitioner, the Department of Commerce has conducted an administrative review of the antidumping duty order on fireplace mesh panels from Taiwan. The review covers four manufacturers and/or exporters of this merchandise to the United States and the period June 1, 1987 through May 31, 1988.

Three of the firms failed to respond to our antidumping questionnaire and one submitted an inadequate response. As a result, the Department has preliminarily determined to assess dumping duties equal to the rate found as best information available for all four firms.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Arthur N. DuBois or Phyllis Derrick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-8312/2923.

SUPPLEMENTARY INFORMATION:

Background

On May 5, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 16179) the final results of the last administrative review of the antidumping duty order on fireplace mesh panels from Taiwan (47 FR 24616, June 7, 1982). The petitioner requested, in accordance with section 353.53a(a) of the Commerce Regulations, that we conduct an administrative review for the period June 1, 1987 through May 31, 1988. We published a notice of initiation on July 28, 1988 (53 FR 28424). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Three of the firms failed to respond to our antidumping questionnaire. Taipoly Industries Ltd., an exporter of the subject merchandise, submitted an inadequate response including among other points failing to identify its supplier. For these firms we used the best information available. The best information available was the highest rate in the last published review.

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to this *Harmonized Tariff Schedule* ("HTS") and all merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by this review are fireplace mesh panels. Such panels are defined as precut, flexible mesh panels, both finished and unfinished, which are constructed of interlocking spirals of steel wire and are of the kind used in the manufacture of safety screening for fireplaces. This product is currently classifiable under TSUSA item numbers 642.7800 and 654.0045 and HTS item numbers 7314.49.00 and 7323.99.00.

The review covers four manufacturers and/or exporters of this merchandise to the United States and the period June 1, 1987 through May 31, 1988.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the margin for Yeh Sheng Wire Mesh & Screen Co., Ltd., Tah Chung Iron of Superior Quality Co., Ltd., Yeh Sheng Wire Mesh & Screen Co./Taipoly Industries Ltd., and Dalvey Products Supply, Ltd. is 6.4 percent.

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service.

For any shipments from the remaining known manufacturers and/or exporters not covered in this review, a cash deposit shall be required at the rates published in the first administrative review (49 FR 28592, July 13, 1984). For any future entries of this merchandise from a new exporter not covered in this or in prior administrative reviews, whose first shipment occurred after May 31, 1988, and who is unrelated to any reviewed firm or any other previously reviewed firm, a cash deposit of 6.4 percent shall be required. These deposit requirements are effective for all shipments of Taiwanese fireplace mesh panels entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and section 353.53a of the Commerce Regulations (19 CFR 353.53a).

Date: December 5, 1988.

Jan W. Mares,

Assistant Secretary for Import Administration.

Ceramic Tile From Mexico; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on ceramic tile from Mexico. We preliminarily determine the total bounty or grant to be zero or *de minimis* for 36 firms and 4.28 percent *ad valorem* for all other firms during the period January 1, 1986 through December 31, 1986. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Cynthia Sewell or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–3337.

SUPPLEMENTARY INFORMATION:

Background

On April 27, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (51 FR 15090) the final results of its last administrative review of the countervailing duty order on ceramic tile from Mexico (47 FR 20013; May 10, 1982). On May 27 and May 28, 1987, the Government of Mexico, and Mexican exporter, Azulejos Orion, S.A., respectively, requested in accordance with 19 CFR 355.10 an administrative review of the order. We published the initiation of the administrative review on June 19, 1987 (52 FR 23331). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS). All merchandise entered, or withdrawn from warehouse, for consumption on or after this date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item number(s) and the appropriate HTS item number(s) with our product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the HTS schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by this review are shipments of Mexican ceramic tile, including non-mosaic, glazed, and unglazed ceramic floor and wall tile, currently classifiable under TSUSA item numbers 532.2400 and 532.2700. These products are currently classifiabile under HTS item numbers 6908.10.50—2 and 6907.10.00—0. The review covers the period January 1, 1986 through December 31, 1986 and 13 programs.

Analysis of Programs

(1) FOMEX

The Fund for the Promotion of Exports of Mexican Manufactured Products ("FOMEX") is a trust of the Mexican Treasury Department, with the National Bank of Foreign Trade acting as trustee for the program. The National Bank of Foreign Trade, through financial institutions, makes FOMEX loans available at preferential rates to manufacturers and exporters for two purpsoes: pre-export financing and export financing. We consider both pre-export and export FOMEX loans to be export bounties or grants since these loans are given only on merchandise destined for export. We found that the annual interest rate financial institutions charged borrowers for peso-denominated FOMEX pre-export financing outstanding during the period of review ranged from 39.60 to 59.50 percent. The annual interest rate for dollar-denominated FOMEX export financing ranged from 5.40 to 7.40 percent during the period of review.

We consider the benefit from loans to occur when the interest is paid. Interest on FOMEX Pre-export loans is paid at maturity, and those that matured during the period of review were obtained between November 1985 and October 1986. Since interest on FOMEX export loans is pre-paid, we calculated benefits from all FOMEX export loans received during the period of review.

The Banco de Mexico stopped publishing data on nominal and effective commercial lending rates after 1984. Therefore, as the basis for our benchmark, we have relied in part on the rates for the years 1981 through 1984, as published in the Banco de Mexico's *Indicadores Economicos y Moneda* (I.E.). We calculated the average difference betgween the Costo Porcentual Promedio (CPP) rates, the average cost of short-term funds to banks, and the I.E. effective rates for the period 1981 through 1984. We added this average difference to the 1985 and 1986 CPP rates. In this way, we calculated a benchmark of 86.39 percent for pre-export peso loans obtained in 1985, and 135.27 percent for pre-export peso loans obtained in 1986.

To determine the effective interest rate benchmark for dollar loans, we used the quarterly weighted-average effective interest rates published in the *Federal Reserve Bulletin*, which was 10.47 percent in 1986.

Five of the 46 known exporters of this merchandise used this progam during the period of review. Because we found that the exporters were able to tie their FOMEX loans to exports to specific countries, we measured the benefit only from FOMEX loans tied to U.S. shipments. We allocated each company's FOMEX benefit over the value of its total U.S. shipments during the period of review. We then weight-averaged the resulting benefits by each company's proportion of total exports to the United States during the period of review, excluding from firms with zero or *de minimis* aggregate benefits. we preliminarily determine the benefit from FOMEX pre-export loans to be 2.80 percent *ad valorem* for the period of review. We preliminarily determine the benefit from FOMEX export loans to be 0.31 percent *ad valorem* for the period of review. The total benefit from this program is 3.11 percent *ad valorem* for the period of review.

In May 1988, the Banco de Mexico changed the interest rates on FOMEX peso loans to 66.00 percent and on dollar loans to 7.70 percent. To calculate the FOMEX benefit for cash deposit purposes, we followed the same methodology used in calculating assessment rates. For peso loans, we used as our benchmark the sum of the May CPP rate and the average 1981–1984 spread between the CPP and the I.E. effective rates. For dollar loans, we used as our benchmark the May 1988 weighted-average effective interest rate from the *Federal Reserve Bulletin*. On this basis, we preliminarily determine, for purposes of cash deposits of estimated countervailing duties, a FOMEX benefit of 0.44 percent *ad valorem* for all firms except those with zero or *de minimis* aggregate benefits.

(2) Article 15

Article 15 of the General Law of Credit Institutions and Auxiliary

VOL
53
ISS
237
DE
9
1988
UMI

Organizations ("the Banking Law") established that up to seven percent of a bank's total deposits must be funneled as loans into specially designated sectors of economic activity. The Banco de Mexico established eight industrial categories that are eligible to obtain financing under Article 15. One category consists only of exports of manufactured products.

Two firms received peso-denominated loans under Article 15 during the period of review. We consider such financing to constitute an export bounty or grant because it is provided at below market rates only for merchandise destined for export. The interest on these loans is paid at maturity. To calculate the benefit, we used the same benchmarks as for the FOMEX peso-denominated pre-export loans.

Since these Article 15 loans are based on exports to all countries, we allocated each company's benefit over the value of its total exports during the period of review. We then weight-averaged the resulting benefits by each company's proportion of total exports to the United States during the period of review, excluding exports from firms with zero or *de minimis* aggregate benefits. On this basis, we preliminarily determine the benefit from this program to be 1.14 percent *ad valorem*.

(3) FONEI

The Fund for Industrial Development ("FONEI"), administered by the Banco de Mexico, is a specialized financial development fund that provides long-term loans at below-market rates. FONEI loans are available under various provisions having different eligibility requirements. The plant expansion provision is designed for the creation, expansion, or modernization of enterprises in order to promote the efficient production of goods capable of competing in the international market or to meet the objectives of the National Development Plan (NDP), which include industrial decentralization. We consider this FONEI loan provision to confer a bounty or grant because it restricts loan benefits to those enterprises located outside of Zone IIIA. One firm had a variable-rate peso-denominated FONEI loan for plant expansion or modernization outstanding during the period of review.

We treated these variable-rate loans as a series of short-term loans. To calculate the benefit, we used the same benchmarks as for the FOMEX peso-denominated pre-export loans and compared them to the preferential interest rates in effect for each FONEI loan payment made during the period of review. We allocated the benefit over the company's total sales to all markets. The benefit from this program is 0.003 percent. Because this firm had a *de minimis* benefit during the period of review, we did not include the benefit from this program in the country-wide rate.

(4) FOGAIN

The Guarantee and Development Fund for Medium and Small Industries ("FOGAIN") is a program that provides long-term loans to all small and medium-size firms in Mexico. The interest rates available under the program vary depending on whether a small or medium-size business has been granted priority status, and whether a business is located in a zone targeted for industrial growth. Although FOGAIN loans are available to all small and medium-size firms in Mexico, regardless of the type of industry or location, some companies receive more beneficial rates than others. Therefore, to the extent that this program provides financing at rates below the least beneficial rate available under FOGAIN, we consider it to be counteravailable.

Three firms had FOGAIN loans on which interest payments were due during the period of review. Because the interest rates are variable, we treated each loan as a series of short-term loans. To determine the benefit, we used as our benchmarks the least beneficial interest rates in effect for each FOGAIN loan payment made during the period of review.

We allocated the benefits from each loan over each firm's total sales to all markets. We then weight-averaged the resulting benefits by each company's proportion of exports of this merchandise to the United States during the period of review, excluding exports from firms with zero or *de minimis* aggregate benefits. We preliminarily determine the benefit from this program during the period of review to be 0.03 percent *ad valorem*.

(5) Other Programs

We also examined the following programs and preliminarily determine that exporters of ceramic tile did not use them during the review period:

(A) Certificates of Fiscal Promotion ("CEPROFI");

(B) State tax incentives;

(C) National Industrial Development Fund ("FOMIN");

(D) NDP preferential discounts;

(E) Trust Fund for the Study and Development of Industrial Parks ("FIDEIN");

(F) Bancomext loans;

(G) Delay of payments on loans;

(H) Delay of payments to PEMEX of fuel charges; and

(I) Import duty reductions and exemptions.

Firms Not Receiving Benefits

We preliminarily determine that the following 36 firms received zero or *de minimis* benefits during the period of review:

(1) Augustin Cedillo Ruiz
(2) Alfonso Cortez Coronel
(3) Azulejos Orion
(4) Benjamin Chavez Torres
(5) Ceramica Santa Julia
(6) Dionicio Sanchez Cruz
(7) Eduardo S. Garcia de la Pena
(8) Fernando Espinosa Sanchez
(9) Francisco Almanza Estrada
(10) Francisco Gallegos Olivares
(11) Idelfonso Chavez Parga
(12) Ines Bustos Vargas
(13) Isabel Cortez Coronel
(14) Jesus Ambrosio Garcia R.
(15) Jesus Garza Arocha
(16) Jesus Gallegos Olivares
(17) Jesus Jimenez Lucio
(18) Jose Angel Hernandez Martinez
(19) Jose Davilla Torres
(20) Jose Dolores Hernandez Zaucedo
(21) Jose R. Echavarria
(22) Juan Cortez Coronel
(23) Juan Rodriguez Rocha
(24) Ladrillera Monterrey
(25) Leopoldo Montiel Rincon
(26) Luis Najera Luna
(27) Manual Alvarez Ramon
(28) Pablo Cortez Coronel
(29) Pedro Lopez Alonso
(30) Pisos Coloniales de Mexico
(31) Reynold Martinez Chapa
(32) Rosendo Rodriguez Hernandez
(33) Sotero Jalomo Reyna
(34) Teofilo Cavarrubias Villareal
(35) Vincente Jalomo Reyna
(36) Zenon Cortez Coronel

Preliminary Results of Review

As a result of our review, we preliminarily determine the total bounty or grant during the period January 1, 1986 through December 31, 1986 to be zero or *de minimis* for 36 firms and 4.28 percent *ad valorem* for all other firms.

The Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, shipments of this merchandise from the 36 firms listed above and to assess countervailing duties of 4.28 percent of the f.o.b. invoice price on shipments from all other firms exported on or after January 1, 1986 and on or before December 31, 1986.

The Department intends to instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1)

of the Tariff Act, on shipments of this merchandise from the 36 firms listed above and, due to the change in the FOMEX interest rates, to collect a cash deposit of estimated countervailing duties of 1.61 percent of the f.o.b. invoice price on shipments from all other firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review. This deposit requirement and waiver shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday following. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.10.

Date: December 5, 1988.

Jan W. Mares,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Minority Business Development Agency

Business Development Center Applications; Lubbock/Midland—Odessa, TX

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Development Center (MBDC) Program to operate an MBDC for a 3-year period, subject to available funds. The cost of performance for the first 12 months is estimated at $165,000 for the project performance of May 1, 1989 to April 30, 1990. The MBDC will operate in the Lubbock/Midland—Odessa, Texas, Standard Metropolitan Statistical Area (SMSA). The first year cost for the MBDC will consist of $165,000 in Federal Funds and a minimum of $29,118 in non-Federal funds (which can be a combination of cash, in-kind contribution and fees for services).

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, non-profit and for-profit organizations, local and state governments, American Indian tribes and educational institutions.

The MBDC will provide management and technical assistance to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance; the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a 3-year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's satisfactory performance, the availability of funds, and Agency priorities.

Closing Date: The closing date for receipt of applications is January 20, 1989. Applications must be postmarked on or before January 20, 1989.

ADDRESS: Dallas Regional Office, Minority Business Development Agency, U.S. Department of Commerce, 1100 Commerce, Room 7B23, Dallas, Texas 75242-0790, (214) 767-8001.

FOR FURTHER INFORMATION CONTACT: Deselene Crenshaw, Business Development Clerk, Dallas Regional Office.

SUPPLEMENTARY INFORMATION: Questions concerning the proceding information, copies of application kits and applicable regulations can be obtained at the above address.

11.800 Minority Business Development (Catalog of Federal Domestic Assistance)

A pre-bid conference will be held in Dallas on January 6, 1989 at 1:00 P.M. Conference site information may be obtained by contacting the individual designated above.

Additional RFAs will be available at the conference site.

Melda Cabrera,

Regional Director, Dallas Regional Office.

Project Identification

1. Program Number and Title: 11.800 Minority Business Development.
2. Project Name: Lubbock/Midland-Odessa, Texas MBDC.
3. Project Identification Number: 06-10-89006-01.

Budget Period Duration

1. Budget Period (Check One): First X Second ____ Third ____.
2. Start Date: May 1, 1989.
3. End Date: April 30, 1990.

Project Cost

1. Required Federal Funding Level: $165,000.00.
2. Minimum Non-Federal Contribution: $29,118.00.
3. Total Project Cost: $194,118.00.

Project Minimum Performance Goal Levels

1. Combined Financial Package and Procurement Minimum Goal Level: $10,670,000.00.
2. Billable $M&TA Minimum Goal Level: $100,000.00.
3. Number of clients Minimum Goal Level: $80.

Other Project Specifications

1. Closing Date for Submission of this Application: January 20, 1989.
2. *Geographic Specification:* The Minority Business Development Center shall offer assistance in the geographic area of: Lubbock/Midland-Odessa, Texas.
3. *Eligibility Criteria:* There are no eligibility restrictions for this project. Eligible applicants may include individuals, non-profit organizations, for-profit firms, local and state governments, American Indian tribes and educational institutions.
4. *Budget Period:* The competitive award period will be for approximately three (3) years consisting of three (3) separate budget periods. Performance evaluations will be conducted, and funding levels will be established for

BEST COPY AVAILABLE

each of three (3) budget periods. The MBDC will receive continued funding, after the initial competitive year, at the discretion of MBDA based upon the availability of funds, the MBDC's performance and Agency priorities.

BILLING CODE 3510-21-M

National Institute of Standards and Technology

[Docket No. 80901-8201]

Intent To Revise FIPS PUB 140 (Formerly FED-STD 1027); General Security Requirements for Equipment Using the Data Encryption Standard

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Request for comments.

SUMMARY: National Institute of Standards and Technology plans to revise FIPS PUB 140 (formerly FED-STD 1027), General Security Requirements for Equipment Using the Data Encryption Standard. In revising the standard NIST will consider the following topics:

1. Extending the standard to cover embedded as well as stand-alone encryption modules.
2. Allowing physical security protection mechanisms other than physical locks.
3. Providing for a variety of key loader devices.
4. Permitting the implementation of automated key management functions.
5. Specifying the type of tests which must be passed in order to demonstrate conformance.
6. Modifying Electromagnetic Interference/Electromagnetic Compatibility (EMI/EMC) requirements.

Before proposing this revised standard for review and comment, NIST solicits the views of industry, the public, and State and local governments on the topics listed above and any other topics related to the current standard. Copies of the standard may be obtained from the Standards Processing Coordinator (ADP), Technology Building, Room B64, National Institute of Standards and Technology, Gaithersburg, MD 20899.

DATE: Comments on the FIPS PUB 140 should be submitted March 9, 1989.

ADDRESS: Written comments concerning FIPS PUB 140 should be sent to: National Institute of Standards and Technology, ATTN: Revision of FIPS 140, Technology Building, Room B154, Gaithersburg, MD 20899.

Written comments received in response to this notice will be made part of the public record and will be made available for inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Miles E. Smid, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone (301) 975-2938.

SUPPLEMENTARY INFORMATION: Products are no longer being certified for conformance to FIPS PUB 140. The certification program had been conducted by the National Security Agency. NIST does not plan to reinstitute the certification program, but may develop and require the use of conformance tests for determining whether products and services implement the standard properly.

Heads of agencies may waive the provisions of the current standard in certain cases where equipment meeting this standard is not available or cost effective for the intended applications. Agencies should contact NIST at the address specified above (in "**FOR FURTHER INFORMATION CONTACT**" section) regarding waiver procedures and requirements.

Authority: Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Pub. L. 100-235.

Date: December 5, 1988.

Raymond G. Kammer,

Acting Director.

BILLING CODE 3510-CN-M

National Oceanic and Atmospheric Administration

Coastal Zone Management; Federal Consistency Appeal by the Riggings Homeowners Association

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of appeal.

On October 17, 1988, Aubrey Consulting, Inc., on behalf of The Riggings Homeowners Association (Appellant), filed with the Secretary of Commerce a notice of appeal under section 307(c)(3)(A) of the Coastal Zone Management Act of 1972, 16 U.S.C. 1456(c)(3)(A), and the Department of Commerce's (Department) implementing regulations, 15 CFR Part 930, Subpart H. The appeal arises from an objection by the North Carolina Division of Coastal Management (State) to the Appellant's certification that its proposed beach nourishment and groin reconstruction project in Kure Beach would be consistent with North Carolina's coastal management program. The State's objection precludes the U.S. Army Corps of Engineers from issuing to the Appellant a permit to perform these activities pending the outcome of the Appellant's appeal.

If the Appellant perfects the appeal by filing the supporting data and information required by the Department's implementing regulations, public comments will be solicited by a notice in the **Federal Register** and a local newspaper.

FOR ADDITIONAL INFORMATION CONTACT: Sydney Anne Minnerly, Attorney-Adviser, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue NW., Suite 603, Washington, DC 20235, (202) 673-5200.

(Federal Domestic Assistant Catalog No. 11.419 Coastal Zone Management Program Assistance)

Date: December 2, 1988.

B. Kent Burton,

Assistant Secretary for Oceans and Atmosphere.

[FR Doc. 88-28326 Filed 12-8-88; 8:45 am]

BILLING CODE 3510-08-M

Endangered and Threatened Species; Winter-run Chinook Salmon

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of Determination.

SUMMARY: NMFS has determined, after reconsidering its original decision not to list the winter run of chinook salmon (*Oncorhynchus tshawytscha*) in the Sacramento River, California, that the decision not to list was appropriate. Recent developments related to drought conditions and elevated water temperatures were examined and found to be adequately addressed by the fish and water management agencies. The relevant Federal and State agencies are fulfilling their commitments to alleviate the habitat problems that are preventing the winter run from returning to its historically high population levels. The major actions that would likely be included in a recovery plan for this population are being implemented.

Therefore, NMFS finds that the existing State and Federal programs for managing winter-run chinook salmon in the Sacramento River are effecting remedies to restore the run, are adequately managing the threats to the population, and are flexible enough to respond to natural threats such as drought in a responsible manner. Further, NMFS concludes that the winter run is not likely to become endangered in the foreseeable future throughout all or a significant portion of its range (i.e., the winter run is not a threatened species).

FOR FURTHER INFORMATION CONTACT: James H. Lecky (NMFS Southwest Region, 300 S. Ferry Street, Terminal Island, CA 90731, 213–514–6199) or Charles Karnella (Office of Protected Resources, F/PR2, NMFS, 1335 East-West Highway, Silver Spring, MD 20910, 301–427–2322).

SUPPLEMENTARY INFORMATION:

Background

On November 7, 1985, the National Marine Fisheries Service (NMFS) received a petition from the American Fisheries Society (AFS) to list the winter run of chinook salmon in the Sacramento River as a threatened species under the Endangered Species Act of 1973 (ESA). NMFS reviewed the petition and determined that it contained substantial information indicating that the petitioned action might be warranted. On February 13, 1986, NMFS announced its intention to conduct a review of the status of the run to determine whether or not listing the run was appropriate.

The status review was based on a consideration of available information on the run relative to the five criteria specified in section 4(a)(1) of the ESA and a consideration of the conservation efforts of the State of California and Federal resource management agencies to restore the run, as required by section 4(b)(1)(A) of the ESA. Information was provided by the petitioner, the State, Federal agencies that affect the run or its habitat, and the public. The results of the status review, along with the Notice of Determination, were published on February 27, 1987 (52 FR 6041).

In the Notice of Determination, NMFS determined that the Sacramento River winter-run chinook was a species in the context of the ESA, recognized that the run had declined over a period of less than two decades, and was approaching a level below which genetic diversity might diminish. The primary causal agents in this decline were the construction and operation of a diversion dam at Red Bluff and other human activities that had collectively degraded spawning and rearing habitat to the point that productivity of the run declined.

Based on its assessment that restoration and conservation efforts which were being implemented or planned by State and Federal resource management agencies adequately provided for the rebuilding of the population, NMFS decided not to list winter-run chinook in the Sacramento River as a threatened species under the ESA. Subsequent to this determination, these restoration actions were incorporated into a Ten point Winter-run Restoration Plan and implemented by means of a Cooperative Agreement signed on May 20, 1988, by the California Department of Fish and Game (CDFG), the Bureau of Reclamation (BR), the Fish and Wildlife Service (FWS), and NMFS.

The Sierra Club Legal Defense Fund (SCLDF), on behalf of the AFS, alleged that NMFS exercised discretion not provided for in the ESA. They argued, if a population meets any of the criteria for listing, then the responsible agency (either NMFS or FWS) has a non-discretionary duty to list that population as a threatened or endangered species. On February 3, 1988, the SCLDF filed suit in the Eastern District of California seeking an order to compel NMFS to list the run.

Before the merits of the case were argued, information became available to NMFS indicating that the conservation measures in place to enhance the run might not be adequate to address the adverse effects of anticipated drought conditions. Specifically, drought conditions that arose in 1987 showed signs of persisting through 1988 and water forecasts indicated that river temperatures might reach levels lethal to developing winter-run eggs. Further, information on remedial measures taken in 1987 was becoming available and NMFS decided that reconsideration of its decision not to list the run would be prudent. The SCLDF agreed to stay the suit while NMFS reviewed this new information.

On June 2, 1988, NMFS announced its intent to reconsider its decision to not list the run and opened a public comment period to ensure that all information on the status of the run and factors affecting it was available for the reconsideration (53 FR 20155, June 2, 1988).

Summary of Comments Received

A total of 27 comments were received during the comment period. Twenty favored listing the run as a threatened species, six indicated the decision not to list the run should stand, and one provided information but did not make a recommendation on whether the run should be listed. The comments are summarized below along with brief responses.

Six commentors stated that the ten-point plan (contained in the Cooperative Agreement) did not address all the threats to the winter run. The Ten-point Restoration Plan and Cooperative Agreement address those activities that are having the greatest adverse effect on the winter-run population. NMFS believes that if the actions identified in the agreement are carried out, the run will rebuild. There are activities not included in the agreement that probably affect the run. For reasons explained in the next section (Review of the Listing Criteria) NMFS considers the risks of these other activities to be small compared to the activities addressed in the Cooperative Agreement. These commentors also identified several projects that, if implemented, would have adverse effects on the winter run. However, NMFS believes that existing legal mechanisms ensure that future projects will not be authorized unless the needs of the winter run are addressed adequately. These mechanisms are discussed below.

Six commentors stated that the ten-point plan (contained in the Cooperative Agreement) is not binding and is poorly implemented. NMFS believes that the signatories of the agreement have made a good faith commitment to see that each of the actions identified in the Cooperative Agreement is completed. Some of the actions require large expenditures, consequently, these projects are likely to proceed in phases over several years. In almost all cases the commitments to the projects have been made and the initial phases have been funded. These issues are also discussed in more detail below.

Three commentors stated that the ESA provides no discretion for NMFS to consider the adequacy of Federal programs in determining whether to list a species as threatened. Section 4(b)(1)(A) gives NMFS the authority to consider the adequacy of State and foreign conservation and protective programs in determining whether to list. NMFS believes that this section also applies to Federal programs, particularly because the State of California is so extensively involved in those Federal programs. For example, the CDFG has monitored temperatures in the upper Sacramento River, is restoring spawning gravel to the reach above Redding, and has restricted the recreational fishery for winter run in the river. The

California Department of Water Resources (DWR) is intimately linked to the BR in the management and delivery of water for agriculture.

Three commentors stated that the benefits of section 7 consultations and section 9 prohibitions are not available to protect the winter run unless it is listed under the ESA. Listing a specieies as threatened does not automatically invoke the prohibitions contained in section 9. Section 7 would require proposed Federal projects to be reviewed in consultation with the NMFS to ensure the project would not jeopardize the continued existence of the run. However, section 7 does not apply to State projects or actions. NMFS believes that other mandates for coordination (e.g., the National Environmental Policy Act (NEPA), Clean Water Act (CWA), Federal Power Act (FPA), Fish and Wildlife Coordination Act (FWCA), and Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)) provide for the comparable opportunity for review of impacts and development of mitigation plans for State and Federal projects.

Two commentors stated that the winter run did not constitute a species as defined by the ESA. One of the commentors stated there is no documentation of genetic distinctness between the runs and reproductive isolation between the runs is incomplete. NMFS reviewed this issue in the Notice of Determination. The term "species" is defined in the ESA as "* * * any subspecies of fish or wildlife or plant, and any distinct population segment of any species or vertebrate fish or wildlife which interbreeds when mature." There are a number of biological definitions of a "species" but they share in common the concept of reproductive isolation and a community of gene pools (Mayr 1963). Populations are defined as the community of potentially interbreeding individuals at a given locality in time or space (Mayr 1963). Thus a biological species is composed of numerous local populations each one intercommunicating and intergrading with the others (Mayr 1963). In defining the term "species" in the ESA, Congress essentially equated the biological definition of "species" with the biological definition of a "population". This allows the Secretaries of Commerce and Interior to use the tools provided by the ESA to protect populations thereby ensuring the preservation of genetic diversity within a species. Therefore, all that is needed to consider a group of animals as a species in the context of the ESA is to demonstrate that they compose a distinct population.

The commentor states that the winter run does not qualify as a species because the distinctness of the population has not been demonstrated electrophoretically. Although, the CDFG has contracted a study of the genetic distinctness of salmonid stocks in the Sacramento River, no winter-run chinook have been analyzed to date. Winter-run chinook are distinguishable from the other runs because, on average, they mature at a different rate and consequently are smaller, they return to the river at a different time, and they reside in the river before spawning. Presumably, these traits are controlled genetically and if the right set of proteins were analyzed, electrophoresis would show the run to be distinct. This presumption is supported by studies which have shown sequentially spawning runs in the Columbia River System to be genetically distinct (F. Utter, G. Milner, G. Stohl, and D. Teel in Press, Fishery Bulletin, Department of Commerce, NOAA, Seattle Washington).

Electrophoresis is a tool for confirming the hypothesis that two or more populations are distinct, but it can not be used to reject such a hypothesis. Currently, only small fractions of the thousands of proteins that are derived from an individuals' genome can be analyzed electrophoretically. If an electrophoretic analysis finds no distinctness, the possibility that a distinctness exists in the untested portion of the genome can not be rejected. Therefore, even if, as the commentor suggests, winter run are not distinct electrophoretically, we can not reject the possibility that the winter run is genetically different from the other runs. Regardless of the ultimate finding of the electrophoretic studies referenced by the commentor, genetic distinctness is not a requirement for considering a population to be species in the context of the ESA.

The commentor also asserts that the population is not reproductively isolated and therefore does not qualify for consideration as a species. Reproductive isolation is a criterion for determining whether a group of organisms are a biological species, but is not a criterion to be used in listing species under the ESA. The ESA allows the listing of populations, and populations, by definition, are not reproductively isolated [Mayr 1963). Therefore the NMFS, asserts that the winter run is a population within the species *Oncorhynchus tshawytscha* and, therefore, can be considered a species in the context of the ESA.

Four commentors stated that a listing of winter run would adversely affect water use or other human activities. As four other commentors stated, the ESA requires that the Secretary's listing determination be made solely on the basis of the best scientific and commercial data available after conducting a review of the status of the species and after taking into account those efforts * * * to protect such species. Effects of a listing on human activities are not to be considered in the decision.

Three commentors supported the ten-points contained in the Cooperative Agreement as adequate to provide for the restoration of the winter run. The NMFS agrees.

Two commentors criticized the Ten Point Plan as being incomplete because it did not consider hydroelectric development, additional water marketing, bank stabilization, the Glen-Colusa Irrigation District's diversion, or gravel extraction. These problems are discussed below.

A. Hydroelectric Development

The City of Redding is pursuing two hydroelectric projects—one on the Sacramento River at Redding and one on the Sacramento River at Red Bluff. NMFS has been actively reviewing and critiquing these projects for many years. The Federal Energy Regulatory Commission (FERC), the licensing agency, has indicated that they are acutely aware of the plight of the winter-run stock and are taking full account in their deliverations. NMFS has made very specific recommendations to modify the project to reduce or eliminate adverse impacts and/or mitigate impacts to the other three salmon races. With regard to the winter run, the CDFG, FWS, and NMFS have indicated that no adverse impact would be allowed. NMFS and the FWS have also indicated to FERC and the City of Redding that they will use their authority under section 18 of the Federal Power Act to prescribe fish ladders and protective juvenile fish screens that would eliminate passage impacts from winter-run fry. NMFS believes that its authorities under section 18, as well as, under the Clean Water Act and the Fish and Wildlife Coordination Act, will be sufficient to ensure no new threats to the winter-run population are allowed to develop as a result of hydroelectric projects on the upper Sacramento River

B. Additional Water Marketing

The BR has expressed its intent to market an additional 1.1 million acre-feet of water from the Central Valley Project (CVP). All of the fishery agencies have already warned the BR that there is no water available from the Trinity River side of the system, because it is committed for fishery flows under the 1980 Secretarial Decision by Secretary of the Interior Andrus. Further, because the State of California is currently undergoing a three-year review and modification of water rights (known as the Bay-Delta Water Rights Hearings) in the Sacramento/San Joaquin/Trinity River systems, NMFS believes that the marketing effort is premature and effectively moot. Although the BR is still preparing an Environmental Impact Statement on their marketing plan, the BR has stated that they could not go forward until the State Water Resources Control Board had rendered its final water rights finding.

C. Bank Stabilization

There is a generally recognized fish habitat problem with bank protection projects on the Sacramento River. The fishery agencies have expressed concern over these projects to the Corps of Engineers, especially those using rock riprap, which can seriously affect the survival of juvenile salmon. The COE and the NMFS signed a Letter of Intent on November 1, 1988 to ensure the COE gives full deference to NMFS comments on projects proposed by the COE to ensure that those projects do not adversely affect the winter run.

Currently there are two projects being considered below the Red Bluff Diversion Dam. NMFS believes major modifications will be made to these projects to mitigate or eliminate fishery impacts before they are allowed to proceed, if at all. There are no projects proposed upstream from Red Bluff, which is considered to be the primary winter-run spawning and rearing area. NMFS does not believe that bank protection projects pose a major threat to winter-run chinook salmon in the Sacramento River.

D. GCID Diversions

One commentor expressed concern that the Glenn-Colusa Irrigation District (GCID) was operating with a Corps permit (Corps Section 404 Permit No. 5880) that did not provide fishery protection. On the contrary, we believe that extensive changes have been made in that project and that substantial protective conditions have been included in that Permit. The primary impact, we note occurs with the fall and perhaps late-fall run, since the GCID agricultural pumping operations are normally relatively low (or even concluded) when winter-run juveniles migrate downstream.

As part of the permit condition, the CDFG, GCID, FWS, and NMFS are investigating alternatives to completely eliminate fish passage problems at the diversion. NMFS believes that the COE will likely receive funding to begin restoration of the river elevation in the vicinity of the diversion. This will resolve the major part of the problem. Further, alternative analysis is underway concerning the solution to the fish screen problem at GCID. While NMFS does not believe that this is a major problem for the winter run, we believe that an extensive effort is being made to address the problem.

E. Gravel Extraction

A commentor expressed concern over the impact that gravel mining operations may have on gravel recruitment to spawning areas of the upper Sacramento River. The problem appears to be greatest in Cottonwood Creek. The Corps of Engineers has determined that the projects are outside of their jurisdiction, thus the permitting authority is at the County level. Cottonwood Creek is bounded by Shasta County and Tehama County. The fishery agencies, notably CDFG, have expressed their concern to the County planning agencies. Shasta County has passed a restrictive riparian habitat and gravel mining ordinance that forbids new mining in Cottonwood Creek, but Tehama County is continuing to permit mining on its side of the Creek. NMFS and the CDFG intend to continue to press their case to Tehama County and specifically alert them as to the crucial role that gravel recruitment plays with the winter run. Nevertheless, because it is local agency, it is not likely that a Section 7 consultation, pursuant to an ESA listing, would be able to provide any additional protection.

For completeness of the record and to answer other criticisms of the Ten Point Plan, the following is a brief update of the status of each of the points in the Ten Point Plan.

1. Raise RBDD Gates from December 1 to April 1

The purpose of raising the gates at RBDD from December 1 to April 1 is to reduce the blockage of returning adult winter run and the loss of outmigrating juvenile salmon during the period. One commentor expressed concern that, although use of this technique during the past two seasons made a positive contribution, the BR's commitment was not binding and the early lowering of the gates in February 1988 is an example of the BR's stronger commitment to irrigation.

NMFS believes that, although the commitment is not binding, the BR is committed to maximizing passage of winter-run chinook past the RBDD. The Cooperative Agreement, signed May 20, 1988, contains a mechanism for consultation and coordination between the NMFS and BR before decisions are made to lower to RBDD gates early. The Cooperative Agreement also extends the BR's commitment to raising the gates during the winter for four years. See section on Listing Criteria below for further discussion.

2. Develop Winter-Run Chinook Salmon Propagation Program at Coleman National Fish Hatchery (NFH)

Artificial propagation at Coleman NFH is to be used as a means to provide protection from the catastrophic effects of droughts or an El Niño event as well a means to speed the rate of recovery of the winter-run salmon. One commentor expressed concerns that Coleman NFH had neither the funding nor a comprehensive hatchery propagation plan.

The FWS is developing a hatchery culture program that would ultimately contribute twenty thousand adult winter-run chinook salmon. When fully implemented, the FWS' winter-run culture program will have the following capabilities: capture adult fish and transport to holding facilities, hold sufficient adult winter-run chinook salmon so that 1,800 adults survive to spawning, take and incubate up to 1.89 million eggs, and rear sufficient juvenile for release of 1.5 million smolts.

Mortality of adult fish being held for spawning has been a problem, with high temperature and disease being important sources of mortality. The FWS is currently constructing facilities for holding and spawning winter-run adults. This facility includes deep dark holding ponds, an insulated spawning building, water chillers, and adequate supply of CVP power to run the chillers. Construction will be complete in December of 1988—in time to take eggs from the next year's winter-run chinook spawning run. The FWS is presently developing the required Environmental Analysis for the complete Winter-run Propagation Program; the document should be released this winter.

Until the FWS secures full funding to implement the Coleman Station Development Plan, the FWS' short term plan is to spawn 900 adults, take about 925,000 eggs and rear for release about

500,000 smolts annually. The FWS will begin to trap and spawn adults and rear juvenile winter run during 1989.

3. Restore Spawning Habitat in the Redding Area

Severe degradation of much of the present winter-run salmon spwaning area downstream from Keswick Dam has been caused by loss of gravel recruitment from above Keswick Dam. Spawning riffle restoration is needed in order to increase natural reproduction to desirable levels. Until last year, plans for gravel restoration of this area were fairly general and one of the commentors was concerned that no active restoration was underway.

Active restoration is underway. The BR and CDFG are cooperating to improve salmon spawning habitat between the Anderson-Cottonwood Irrigation District and Keswick dams. The BR has provided $250,000 to contract to CDFG for placement of approximately 16,000 cubic yards of spawning grave (sorted one to four inch diameter) into the river. This spawning grave[illegible]oration project will be completed prior to the 1989 winter-run spawning season.

4. Develop Measures to Control Squawfish at RBDD

Sacramento River squawfish are a major predator on juvenile fall-run salmon in the upper Sacramento River. Data are lacking relative to the effect of squawfish predation on juvenile winter-run salmon which pass RBDD in the fall, but is assumed to be a factor. One commentor stated that there had been no real progress in squawfish control at RBDD.

NMFS has conducted a survey to determine the feasibility of commercial harvest and marketing of squawfish as a means of controlling the squawfish population. Indications were that a small fishery was feasible and that a viable commercial market was available. NMFS awarded a Saltonstall-Kennedy Grant to an individual in the Red Bluff area to develop such a small fishery.

During one of the regularly scheduled Winter-run Restoration Team meetings, the team discussed the concerns of some members that squawfish and also a native species and squawfish reduction measures should not be implemented before a specific predation problem was documented. As a result, NMFS has entered into a contract with the FWS to conduct an initial survey to document the presence or extent of the squawfish predation problem. This work is scheduled to be completed in March 1989.

5. Restrict In-River Fishery

NMFS concluded, in its initial consideration of the Petition to List, that ocean commercial and recreational harvests did not contribute to the decline of the winter-run stock and that eliminating these fisheries would not substantially aid in winter-run restoration.

Nevertheless, the California Fish and Game Commission instituted a limited annual quota of 175 winter-run chinook to be taken in the Sacramento River recreational fishery. In 1987, the first year of the annual quote, only 37 winter run were caught; in 1988, 90 were taken.

NMFS has acknowledged that salmon tagging data documenting the impacts of harvest on winter-run stocks were limited. NMFS has funded the CDFG to implant coded wire tags in the juvenile winter run that are produced by the FWS' hatchery program to collect information on migration patterns of winter-run salmon in the ocean and the Bay-Delta. This information should help NMFS decide whether additional management of the recreational fishery is warranted.

6. Develop Water Temperature Control for Warm Water Years

Existing water demands have resulted in releases from the Shasta-Keswick Dam complex of high temperature water during the summer and fall spawning periods for salmon which have caused serious morality, especially to the winter and spring runs. The releases of warm water during the summer and fall occur primarily during years of low precipitation and when storage in Shasta Reservoir is low. As more and more water is being exported from the system, these warm temperature conditions are occurring more frequently than in the past. Although substantial progress has occurred, one commentor was concerned that only incomplete and temporary solutions are being considered.

The California Water Quality Control Plan for Sacramento River, adopted by the California Regional Water Quality Control Board (Regional Board) in 1975, contains specific temperature objectives for anadromous fish in the upper Sacramento River. The Regional Board, reacting to concerns the Shasta Unit of the CVP was exceeding these objectives, set enforceable waste discharge temperature standards for the Shasta/Trinity Division of the CVP in March, 1988 (Order No. 88-043). These standards call for maintaining 56°F downstream from Keswick to RBDD.

Reacting to fishery agency concerns about temperature impacts and to the recent Regional Board temperature standards, the BR conducted a Value Engineering Study in September 1987 to investigate and develop alternative methods of controlling the temperature of Shasta releases. After evaluating a wide variety of structural alternatives, including multi-level dam outlets, and operational alternatives, the study concluded that a design, known as a Temperature Control Curtain would be the most effective solution. The Temperature Curtain will be designed and constructed as the BR's permanent engineered solution to the problem. The BR has committed to having the structure in place in time for the 1990 winter run. On August 11, 1988, President Reagan signed a Drought Relief Bill which included $5.5 million for construction of the temperature control curtain.

In addition, the BR implemented interim operational measures in 1987 and 1988 to control upper river temperatures utilizing cool, low-level releases from Shasta Reservoir. See the Listing Criteria section for further discussion.

7. Correct Spring Creek Pollution Problem

Acid mine wastes, containing toxic concentrations of heavy metals, are released from the abandoned Iron Mountain Mines site on Spring Creek, a tributary to the upper Sacramento River. These wastes are stored by the BR in the Spring Creek Debris Dam Reservoir, where they are released to the river when sufficient dilution flows occur. BR evaluated the problem and submitted its report to the Environmental Protection Agency (EPA). EPA placed the site on its Superfund Priority List; they have completed a Remedial Investigation/Fleasibility Study of the problem. EPA has identified a combination of source control, treatment, and water management as the most cost effective remedial solution. One commentor believed that there was no evidence of a commitment by EPA to successfully correct the Iron Mountain Mine pollution problem.

The EPA and the BR have drafted an Agreement to implement actions to resolve the Spring Creek toxicity. Under this Agreement the EPA will fund activities through its Superfund Program and will be the managing agency. The BR will be responsible for design and construction of the water management components that protect most of the Spring Creek Basin drainage from being contaminated and will reduce the possibility of a spill from Spring Creek Reservoir. Implementation of this Plan is

estimated to cost about $70 million. After extensive legal battles, EPA has gained access to the mine property and they recently conducted on-site testing of materials. They have spent $2 million this year to cap exposed tailings piles and have scheduled $1 million to conduct mine rehabilitation next fiscal year. The full EPA Superfund program is underway and on schedule.

In addition, the Regional Board, CDFG, and the BR have undertaken an emergency action program this summer/fall to treat concentrated mine effluent and disposed of the toxic sludge. The purpose of this emergency action is to avoid or minimize impacts that may occur this year, due to the drought and the problem of obtaining dilution flows.

8. Correct Problem at the Anderson-Cottonwood Irrigation District Dam (ACID)

There are two fishery problems associated with the ACID dam, 1) river flow reductions necessary to install and remove ACID dam flashboards, and 2) fish passage with the existing fish ladder is often ineffictive when the dam is in place. Although problems persist, we believe that CDFG and BR have made progress in addressing the problem and that the degree of the impact has been reduced. NMFS has recommended that, as an interim solution to the problem, the BR and ACID should amend their Contract to meet CDFG's specifications to limit the rate of low change allowed and forbid reduction below 6,000 cfs. See Listing Criteria for further discussion.

9. Correct Stilling Basin Problem at Keswick Dam

Adult winter-run chinook have become entrapped in Keswick Dam stilling basin following spills. In the past, the BR, FWS, and CDFG would cooperate to release fish that were caught in the stilling basin. However, after cooperatively evaluating alternatives with the fishery agencies, the BR recently made permanent modifications to the existing ladder facility. We believe that this is no longer a problem affecting winter-run chinook

10. Continue to Expand Studies on Winter-Run Chinook Salmon

One commentor expressed concern that only limited or token progress has been made towards gathering the additional winter-run data needed to develop a comprehensive restoration program. NMFS acknowledges that, over the past two years, priority has been given to physically reducing known adverse impacts which required immediate attention. However, NMFS, along with its sister fishery agencies, have developed a program of research studies that we believe are needed for complete restoration and effective management. This plan of research was presented to the Winter-run Chinook Salmon Restoration Team and the fishery agencies are beginning to program these studies into their budgets. Some studies have already commenced—for example: NMFS has funded an ongoing CDFG study to evaluate the pattern of migration and the extent of recreational and commercial harvest; conducted a survey to determine the feasibility of commercial harvest and marketing of squawfish and has funded a FWS survey to document the presence or extent of the squawfish predation problem, in addition to funding helicopter surveys of the winter-run spawning run to refine our knowledge about the distribution of spawning redds in the river and timing of spawning. The FWS and CDFG have conducted diving surveys to determine the locations of preferred spawning and rearing areas in the upper Sacramento River.

Current Winter-Run Status

The 1988 Sacramento winter-run spawning run was about the same size as in recent years. Based on counts at the Red Bluff Diversion Dam (RBDD) fish ladders, approximately 2,085 fish reached the winter-run spawning grounds above the RBDD. Only 90 in-river sport caught fish were taken out of a quota of 175 in 1988.

During the course of counting and sampling the winter-run chinook passing RBDD in 1988, it was determined that 36 percent of the run consisted of sexually precocious two-year old males (known as jacks); winter run normally mature sexually at three years of age. The winter run has historically (since 1967) averaged about 25 percent jacks. In some salmonid populations scientists have documented a proportional relationship between the number of jacks and the number of three-year olds returning the following year. Although no specific data exist for the winter run, such an assumption could lead one to expect a somewhat larger return of spawning 3-year-olds in 1989. The latest estimates of winter-run chinook salmon migrating upstream past RBDD, based on data developed by CDFG is:

Year	Number
1967	57,306
1968	84,414
1969	117,808
1970	40,409
1971	53,089
1972	37,133
1973	24,079
1974	21,897
1975	23,430
1976	35,096
1977	17,214
1978	24,862
1979	2,364
1980	1,156
1981	20,041
1982	1,242
1983	1,831
1984	2,663
1985	3,962
1986	2,422
1987	2,236
1988	2,085

Review of the Listing Criteria

Section 4(a)(1) of the ESA specifies five criteria to be evaluated in reviewing the status of a species or population proposed for listing. These criteria were reviewed in the first Notice of Determination (52 FR 6041). That review is incorporated into this document by reference. Each of the listing criteria are reviewed in light of information that has become available to the agency since it made its decision not to list the winter run.

1. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

This is the listing factor associated with the most adverse impacts to the winter run. The major elements that have contributed to the degradation of winter-run habitat are features of the Federal Central Valley Project. The RBDD blocks or impedes passage of winter-run chinook to suitable spawning habitat, essentially all of which is above the RBDD. Operation of the Shasta/Keswick dams contributes to adverse water temperatures in the reach of the Sacramento River that otherwise contains suitable spawning habitat. This is particularly a problem during drought years. Several other activities are ongoing that have lesser impacts on the winter run.

Red Bluff Diversion Dam. At the recommendation of the fishery resource agencies, the BR agreed to an experiemental period during which the gates at RBDD would be raised (opened) between December 1 and April 1, with the caveat that the gates may have to be lowered (closed) to deliver water for irrigation or maintenance of canals. The period of migration of the four runs past RBDD has been characterized by averaging the cumulative number of fish that passed RBDD during the years 1971 through 1982. Based on these data,

raising the gates through April 1 should allow about 66% of the winter run free access to its spawning habitat.

From December 1 to April 1, 1986–87, the gates were raised for a period of 94 days. The FWS conducted a study of fish passage during the period the gates were opened. The results of that study showed that 11 radio tagged salmon were delayed an average of 3.19 hours or 28 times less than when the gates were down. Also none of the tagged salmon that approached the dam, while the gates were raised, backed downstream away for the dam. Previous studies showed over half of the salmon tagged backed downstream after encountering the dam.

Further, data from an earlier year (1985) (with the RBDD gates closed in the winter) showed about 30 percent of the winter-run spawning took place downstream from RBDD, where temperatures were considered to be lethal for incubating eggs. During the 1986–87 winter, approximately 95 percent spawned above RBDD, indicating the relative effectiveness of raising the RBDD gates in improving winter-run passage.

During the winter of 1987–88, the gates were raised for a period of 77 days. Gates were lowered early in 1988 because of water demands serviced by the Tehama-Colusa Canal. The Cooperative Agreement (at Section II.A.8) signed May 20, 1988, minimizes this problem, because it establishes mechanisms for consultation and coordination between the BR and NMFS before decisison to lower the gates early are made. This will ensure other options for meeting irrigation demands are considered prior to lowering the gates at RBDD. The Cooperative Agreement also extends the period of experimentation for four additional years. This will allow adequate time to evaluate other fish passage alternatives that might be available.

The FWS completed its study on fish passage problems in September 1988. The BR is evaluating the FWS report and plans to propose recommendations for solving the fish passage problem by September 1989. The Central Valley Task Force (CVTF) provides a forum for discussing and selecting alternative solutions to protest the winter run. NMFS has appointed a Winter-Run Chinook Salmon Restoration Team, comprising agency and independent biologists most familiar with the winter run, to provide expert advice on the restoration actions. NMFS intends to use these forums as well as the Cooperative Agreement to ensure the success of winter-run passage at the RBDD. NMFS believes these mechanisms provide ample opportunity for consultation and protection of the winter run. The recent record of operation of RBDD by the BR and the mechanisms for coordination with the NMFS on changes in future operations ensures that the operation of RBDD by the BR will substantially reduce the impact on the winter-run migration.

The Tehama-Colusa Canal (TCC), which diverts Sacramento River water at RBDD, is protected by an inefficient fish screening facility. Consequently, outmigrating juvenile salmon and fry are entrained and lost. Although the effect of this mortality on the winter-run population has not been specifically quantified, studies by the FWS indicate that an estimated 3.9 percent of the outmigrating juvenile winter run are lost at these screens. As part of the BR's efforts to improve operation of the RBDD and the TCC, and to mitigate impacts to fish populations, the BR plans to construct a new fish screen and bypass system at the Tehama-Colusa canal. These new facilities will afford anadromous fish the maximum protection from entrainment at the TCC. The design and placement of the new fish screens was developed in consultation with the NMFS, FWS, and the CDFG. These screens are a state-of-the-art design and should minimize the effect of entrainment on winter run. The construction schedule is designed to "phase in" the new screens so that there will be fish protection at all times. Work on the new screens began in August 1988 and will be complete in fall 1990.

Shasta/Keswick Dams. Equally as important as the problems at RBDD are temperature problems in the upper Sacramento River. During the summer months, when winter-run eggs and fry are developing, water temperatures below RBDD exceed lethal temperatures in most years (Hallock and Fisher 1985, CDFG, Anadromous Fish Branch Office Report 28 pp.). During drought conditions lethal temperatures have occurred above Red Bluff as well. River temperatures of 56 °F are safe for spawning and incubation; 57.5 °F is considered to be the lower threshold for temperature induced mortality; and 62 °F is believed to produce 100 percent mortality. The design of the Shasta Dam spill gates and intake to the powerhouse penstocks contributes to this problem. The present intake design does not provide a mechanism for releasing cold, deep water during the summer without reducing hydropower generation. Therefore, warm surface water is withdrawn for power generation and released into the river where it adversely affects spawning habitat.

In May 1987, the fishery agencies expressed to BR their concern over predicted lethal temperatures above RBDD and estimates of substantial mortality of the 1987 winter-run year class. The BR responded with a water management strategy to lower river temperatures that included opening, for the first time since the Dam was constructed, a low-level outlet in Shasta Dam that draws deep, cold water. This low-level release contributed to maintaining an average river temperature of 57.5 °F over the period August 26, 1987 to September 10, 1987. NMFS believes that action should have salvaged almost all of the winter-run spawn. Complete assessment of the actual benefits of this and other actions taken to protect the 1987 winter run must wait until 1990, when the benefited year class will return from sea as sexually mature spawning adults; an assessment of the impact of the elevated temperatures cannot be made until then.

In March of 1988, the California Regional Water Quality Control Board issued Order No. 88–043, imposing waste discharge requirements (including temperature) on the BR's Shasta/Trinity River Division operation. The Order prescribes maintenance of Sacramento River temperatures upstream from the Red Bluff Diversion Dam at not more than 56 °F to protect fishery resources. This is the first time that specific, enforceable temperature standards have been imposed. The Order cited evidence that future BR Central Valley Project operations would cause water temperatures of Shasta Dam discharges to increase and "* * * typically exceed 56 °F" during the period of winter-run spawning and rearing. The BR opposed the order and is currently appealing the decision on jurisdictional grounds; they, instead, urged the use of non-binding, voluntary agreements to achieve similar ends.

With the drought conditions persisting into 1988, the BR, at the April 21, 1988 meeting of the CVTF, reported that unaltered operation of the Shasta/Trinity Division could produce temperatures at Keswick Dam of approximately 53 °F in July, 63 °F in August, 61 °F in September and 57 °F in October. The CVTF appointed an interagency task group (comprising CDFG, FWS, NMFS, BR, Western Area Power Administration, Regional Water Resources Control Board, California Department of Water Resources, and the U.S. Army Corps of Engineers) to develop a water management strategy that would maintain optimal temperatures in the river for incubation and survival of winter-run eggs and fry.

The task group presented six alternatives to the CVTF with a consensus recommendation for an alternative that, within the physical capabilities of the BR, maximized winter-run survival by ensuring the continuous availability of cold water through the spawning and incubation periods. The CVTF approved the recommended alternative at its July 15, 1988 meeting and the BR is committed to operating according to this plan.

The BR commenced cool water Shasta releases ten days ahead of its planned schedule, because monitoring programs showed river temperatures were rising faster than predicted. Further, they assured the fishery agencies that the BR would continue to alter its operations, where possible, to maintain safe river temperatures in areas where winter-run eggs and larvae were rearing. In fact, the BR fulfilled its commitment and maintained modified operations and suitable river temperatures through the end of September when all winter run were emerged from the gravel and dispersed to rearing habitat.

The use of low-level, cool water releases to protect the winter run was not without cost. Because such releases are below the powerhouse intake level, the BR must forego hydroelectric power generation. The task group estimated 1987 winter-run operations entailed a foregone power cost of $870,000; in 1988, temperature controls resulted in a foregone power cost nearly double (about $4.3 million) the $1.75 to $2.45 million estimated by the CVTF task group, because low level releases had to be initiated earlier than had been anticipated. While such economic considerations cannot enter into the NMFS' listing evaluation, they do indicate the extent of the BR's commitment to employing cooperative programs for protecting the winter run during the critical months of the summer.

Finally, the BR has committed to constructing a permanent temperature control device at Shasta Dam that will allow cold bottom water to be drawn into the power penstocks so the river temperatures can be controlled without foregoing power production. Funding for the curtain is secure and design of the device has begun. Installation is expected by June of 1990.

At the October 14, 1988 meeting of the Winter-Run Restoration Team, the team expressed a consensus opinion that the BR's implementation of the CVTF task group's efforts addressed the threat presented by 1988 drought conditions in the Sacramento Basin and saved the run from a major natural environmental insult. NMFS believes these mitigating actions approximate and probably exceed what could have been accomplished pursuant to a formal consultation conducted under Section 7 of the ESA

Anderson Cottonwood Irrigation District Diversion Dam

The Anderson-Cottonwood Irrigation District (ACID) Diversion Dam presents two problems to salmonids in the upper Sacramento River. It impedes upstream migration when the dam is operational and it contributes to flow modifications that can cause dewatered spawning nests (redds). While these problems contribute to the winter run's condition, the NMFS points out that these problems existed annually from 1946 when Shasta Dam was built. Whereas winter-run population estimates are not readily available for the years preceding the construction of the RBDD, counts at RBDD in late 1960s indicate the run was large despite problems created by the ACID Diversion Dam.

Nevertheless, measures are in place that address these problems. The ACID is prohibited, for safety reasons, from installing the flashboards between December 1 and March 15. Much like the fish passage experiment at the RBDD, this restriction allows about 50 percent of the winter run to migrate upstream of the ACID Dam unimpeded. Unlike the RBDD though, there is suitable spawning habitat below the ACID Dam. In addition, there is some preliminary indication that the ACID Dam has a beneficial impact because of its tendency to retain spawning gravel in the prime spawning area immediately upstream from ACID.

The problem of stranded redds (discussed in the Notice of Determination (52 FR 6041)) is caused largely by the need to change the configuration of the ACID Dam to accommodate high flow releases from Keswick Dam. In 1987, ACID was able to modify their operational criteria to minimize the period when ACID Dam modification would be required. These improved operating procedures are likely to persist while the CDFG, BR, and ACID research methods to eliminate the problem entirely. The NMFS believes that these ongoing efforts substantially reduce any short-term threats to the winter run created by the operation of the ACID Dam.

Hydroelectric Projects. The Federal Energy Regulatory Commission (FERC) is considering licensing applications for two hydroelectric projects which, if authorized, would adversely affect the winter run. These are the Lake Redding Project and the Lake Red Bluff Project, which was recently reactivated by the FERC. If built, these projects would result in significant loss of winter-run habitat and aggravated fish passage problems. However, Section 18 of the Federal Power Act (16 U.S.C. 791 *et seq.*) grants the NMFS authority to prescribe standards for fish passage. These standards must be met before the projects can be authorized. Consequently, the NMFS believes that its authority under section 18 is sufficient to ensure no new threats to the winter-run population will be allowed to develop as a result of hydroelectric projects on the upper Sacramento River.

2. Overutilization for Commercial, Recreational, Scientific or Educational Purposes

Use of the winter run by commercial and recreational fishermen has not changed since the original determination to not list the population as threatened. The best information available indicates that the catch in the ocean troll fishery and the ocean recreational fishery is not substantial. The recreational fishery in the Sacramento River is limited by the California Fish and Game Commission to less than 175 fish per year. The actual catches in 1987 and 1988 were well below that limit. As stated in the original Notice of Determination, NMFS had concluded that harvests have not been instrumental in the decline of the winter run and that elimination of harvests would not significantly aid the restoration of the run.

Point 10 of the Ten-Point Restoration Plan called for more information to be gathered on the winter run. The NMFS, FWS, and CDFG have proposed research projects which would provide key information on this run. One of the research projects that the agencies are currently attempting to fund would update and refine the estimates of sport and commercial harvest.

3. Disease or Predation

Squawfish was identified in the status review as the piscine predator with the greatest potential for interfering with the rebuilding of the winter-run population. In 1987, NMFS assisted in an experimental fishing operation and test marketing of squawfish which demonstrated that a commercial fishery for squawfish is feasible. NMFS has contracted with FWS to document the extent of the influence of squawfish predation on the winter-run population. Another study will follow to determine the impact of various harvest levels on the squawfish population. NMFS will fund further development of a demonstration commercial squawfish

fishery through a Saltonstall-Kennedy grant during 1988–89.

4. The Inadequacy of Existing Regulatory Mechanisms

Relevant laws that comprise the existing regulatory mechanisms were listed in the Notice of Determination (52 FR 6041) and described as providing adequate mechanisms for restoring the winter run in the Sacramento River. However, the decline in the size of the run since the late 1960s indicates that these regulatory mechanisms were not applied effectively with respect to the winter run. NMFS now believes that with the Cooperative Agreement among the NMFS, BR, FWS, and CDFG and the Letter of Intent between NMFS and the COE in place, these mechanisms will be used and are adequate to provide for the restoration of the run. The signatory agencies have also committed to better coordinating the use of their individual authorities to foster the restoration of the run. This improved coordination is expected to increase the effectiveness of the regulatory mechanisms.

5. Other Natural or Manmade Factors Affecting the Continued Existence of the Species

The impact of manmade factors is addressed under criterion 1. Natural factors of greatest concern are periodic droughts and the oceanographic phenomenon known as El Niño. The 1976–77 drought severely reduced the size of two consecutive cohorts leaving the 1978 brood as the only large spawning cohort. The strong El Niño event during 1982–83 contributed to the decline of the last strong cohort. The only measure to mitigate the profound impact of a strong El Niño is hatchery rearing to increase smolt production from the returning spawners that survive the poor ocean conditions.

Drought conditions, such as those that existed during the past two dry years in Northern California, most directly threaten the winter run by causing elevated water temperatures on the spawning grounds. This problem was resolved using interim measures in 1987 and 1988. If drought conditions persist into 1989 a similar drought response strategy will be developed and implemented. Beginning in 1990, the installation of a temperature control curtain will provide a longer-term solution. In addition, the FWS is preparing to raise winter run at the Coleman National Fish Hatchery. If the techniques for holding and spawning winter run in the hatchery can be perfected, that program will provide an extra measure of protection against drought and high water temperatures. NMFS believes that these actions will mitigate the losses to the winter-run population due to periodic drought.

Conclusions

For the reasons presented in the discussion above, NMFS concludes the following:

1. The status of the winter-run population has not deteriorated since the original determination by NMFS not to list the run as threatened.

2. The comments received during the reconsideration period did not provide substantial new information that would persuade NMFS to list this species.

3. There have been substantial commitments by State and Federal agencies to implement the Ten Point Restoration Plan and several actions identified in that Plan are underway.

NMFS reaffirms its determination (under sections 4 (a)(1) and (b)(1)(A) of the ESA) that the actions of State and Federal agencies to restore the winter run of chinook salmon population and its habitat adequately address the threats to the population and that the population is not likely to become endangered throughout all or a significant portion of its range in the foreseeable future (i.e. the winter run is not a threatened species). Therefore, listing is not appropriate under the current conditions.

Dated: December 6, 1988.

James W. Brennan,

Assistant Administrator for Fisheries.

Western Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Western Pacific Fishery Management Council's Bottomfish Plan Monitoring Team will convene a public meeting on December 19, 1988, from 1 p.m. to 3:30 p.m., at the Honolulu Laboratory, National Marine Fisheries Service (NMFS), 2570 Dole Street, Honolulu, HI, to review the Northwestern Hawaiian Islands (NWHI) bottomfish voluntary logbood results, i.e. Kurt Kawamoto's comments on a voluntary NWHI bottomfish logbook and recommendations for improvement of the program's data results and usefulness. The Team will also plan for production of the 1988 Annual Report, i.e. review Team members' responsibilities for respective modules and review the draft timeable to produce the final report by June 31, 1989. Other appropriate Team business will also be discussed.

For further information contact Kitty Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1405, Honolulu, HI 96813; telephone: (808) 523–1368.

Date: December 5, 1988.

Joe P. Clem,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1989; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to Procurement List 1989 a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: January 9, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557–1145.

SUPPLEMENTARY INFORMATION: On June 17, 1988, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (53 FR 22688) of proposed addition to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018).

No comments were received concerning the proposed addition to the Procurement List. After consideration of the material presented to it concerning capability of qualified workshops to provide the service at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the service listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.6. I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the service listed.

c. The action will result in authorizing small entities to provide the service procured by the Government.

Accordingly, the following service is hereby added to Procurement List 1989: Mailroom Service, U.S. Geological Survey, 12201 Sunrise Valley Drive, Reston, Virginia.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820-33-M

Procurement List 1989; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received a proposal to add to Procurement List 1989 commodities and a military resale commodity to be produced by workshops for the blind and other severely handicapped.

Comments Must Be Received on or Before: January 9, 1989.

ADDRESS: Committee to Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and military resale commodity listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and military resale commodity to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018):

Commodities

Mirror, Glass, 7105-00-133-4846, 7105-00-496-9866

Military Resale Item No. and Name

No. 906 Broom, Push, 18", Indoor/Outdoor.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820-33-M

COPYRIGHT ROYALTY TRIBUNAL

[Docket No. 89-1-87JB]

1987 Jukebox Royalty Distribution Proceeding

AGENCY: Copyright Royalty Tribunal.

ACTION: Notice of controversy; notice of commencement of proceedings; notice of partial distribution.

SUMMARY: Notice is given that a controversy exists regarding the distribution of the copyright royalties from the 1987 jukebox royalty fund. Accordingly, the Tribunal commences the 1987 jukebox distribution proceeding, and announces a partial distribution of 90% of the fund.

DATE: The effective date of the controversy is December 15, 1988. The date of the partial distribution shall be December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Robert Cassler, General Counsel, Copyright Royalty Tribunal, 1111 20th Street NW., Suite 450, Washington, DC 20036, (202) 653-5175.

SUPPLEMENTARY INFORMATION: Section 301.72(b) of the Tribunal's rules require that after October 1 of each year, the Tribunal shall ascertain whether a controversy exists with regard to the distribution of jukebox royalties to the copyright owner-claimants and to publish notice of its findings in the **Federal Register**.

The Tribunal has been informed that the American Society of Composers, Authors and Publishers (ASCAP), and Broadcast Music, Inc. (BMI) have reached a settlement and together they claim 100% of the 1987 jukebox royalty fund. Asociacion de Compositores y Editores de Musica Latinoamericana (ACEMLA) claims between 5% and 8% of the fund. SESAC, Inc. (SESAC), whose motion for acceptance of a late-filed claim is still pending with the Tribunal, has claimed 7% of the fund.

Accordingly, the Tribunal has determined that a controversy exists, and notice is hereby given that the 1987 jukebox royalty distribution proceeding is commenced, effective December 15, 1988. The structure of the 1987 proceeding will be announced in an order to the claimants at a later date.

ASCAP and BMI have moved for a partial distribution of 99% of the 1987 jukebox royalty fund pursuant to 17 U.S.C. 116(c) which provides for distribution of those portions of the fund that are not in controversy. ASCAP and BMI base their request on their belief that SESAC is not properly a party to the 1987 jukebox distribution proceeding, and that retention of 1% of the fund is sufficient to satisfy the claim of ACEMLA. ASCAP and BMI further state that in the event SESAC is admitted into the proceeding, they believe that retention of 5% of the fund by the Tribunal is sufficient to satisfy both the claims of SESAC and ACEMLA.

SESAC disagrees with ASCAP and BMI and states that the Tribunal should retain 7% to cover the controversy with SESAC and any additional amount the Tribunal considers necessary to cover the controversy with ACEMLA.

As stated above, the Tribunal has not acted on SESAC's motion for acceptance of its late-filed claim. Therefore, the Tribunal, while agreeing with ASCAP and BMI that the mere assertion of percentage claims by parties do not, in and of themselves, describe the true extent of the controversy, has determined nonetheless, that a retention of 10% of the fund is prudent under these circumstances. Accordingly, the Tribunal orders a partial distribution to ASCAP and BMI collectively of 90% of the fund to take place on December 15, 1988.

Dated: December 5, 1988.

Edward W. Ray,

Chairman.

[FR Doc. 88-28324 Filed 12-8-88; 8:45 am]

BILLING CODE 1410-09-M

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 4-5 January 1989.

Time: 0800-1600 each day.

Place: The Pentagon, Washington, DC.

Agenda: The Army Science Board Ad Hoc Subgroup on Human Dimensions in Army Safety will conduct its third meeting. Briefings will be given by the USAF Safety Office, National Transportation Safety Board, Army Safety Action Team Chairman, Marine Corps Safety Office, and Canadian military

safety personnel. Past, current and planned actions will be discussed in accordance with the Terms of Reference. These meetings will be open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039/7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: An expedited review has been requested in accordance with the Act, since allowing for the normal review period would adversely affect the public interest. Approval by the Office of Management and Budget (OMB) has been requested by December 30, 1988.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. 3517) requires that the Director of the Office of Management and Budget (OMB) provide interested agencies and persons an early and meaningful opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice with attached proposed information collection requests prior to submission of these requests to OMB. For each proposed information collection request, grouped by office, this notice contains the following information: (1) Type of review requested, e.g., new, revision, extension, existing, or reinstatement; (2) title; (3) frequency of collection; (4) the affected public; (5) reporting and/or Recordkeeping burden; and (6) abstract. Because an expedited review by OMB is requested, the information collection request is also included as an attachment to this notice.

Dated: December 6, 1988.

Carlos U. Rice,

Director for Office of Information Resources Management.

Office Of Elementary and Secondary Education

Type of Review: Expedited.

Title: Application For The Magnet Schools Assistance Program.

Abstract: This application is used by local educational agencies to apply for magnet schools projects. The department needs this information to make awards and insure that proposed projects meet the requirements of the statute and regulations. This application contains the following Standard Forms: The SF424, Application for Federal Assistance and the SF424A, Budget Information- Non-Construction Programs.

Additional Information: The Magnet Schools Program is requesting expedited review in order to comply with the statutory deadline which requires that the program awards be made by June 30, 1989. In order to meet this deadline, the program must have sufficient time to receive information from the applicants.

Frequency: Annually.

Affected Public: State or local governments.

Reporting Burden:

Responses: 150.

Burden Hours: 3,750.

Recordkeeping:

Recordkeepers: 0.

Burden Hours: 0.

BILLING CODE 4000–01–M

Public reporting burden for this collection of information is estimated to average 25 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, D.C. 20202-4651; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

OFFICE OF ELEMENTARY AND SECONDARY EDUCATION

MAGNET SCHOOLS ASSISTANCE PROGRAM

INSTRUCTIONS FOR APPLICATION FOR FEDERAL ASSISTANCE
(Nonconstruction Program)

This form shall be used to apply for Federal assistance for projects authorized by Title III of the Elementary and Secondary Education Act of 1965.

Submit the original and two copies of the application to:

U.S. Department of Education
Application Control Center
Attention: Magnet Schools
Assistance Program
Washington, D.C. 20202

No grant will be awarded unless a completed application has been filed.

(20 U.S.C. 3021-3032)

PART I

Federal Assistance Form (424)

Part I consists of the standard face page for Federal financial assistance and the instructions for completing the standard face page.

The general instructions for completing this form begin on page F1 of this application package. Use those instructions except for the following items:

1. Preprinted.
9. Preprinted.
10. Preprinted.

PART II

Budget Information (424A)

Use the standard Instructions to complete the forms. These instructions begin on page F8 of this application package.

PART III

Program Narrative

Include information that addresses sections 280.20, 280.32 and each of the selection criteria in section 280.31 of the Magnet Schools Assistance Program Rules and Regulations.

VOL 53 ISS 237 DE 9 1988 UMI

PART IV

DRAFT

Other Information

1. Desegregation Plan:

Complete the Desegregation Plan Information Sheet on page F09.

2. Supplemental Data:

Complete the Supplemental Data Sheet on page F10 of the application package, as follows:

a. Recentness of implementation of the approved desegregationn plan

Indicate the date of implementation of the desegregation plan or modification, and provide the appropriate and supporting information (which may include reference to the desegregation plan attached to the application).

b. Involvement of minority group children

Complete both data items.

For the first data item, provide the total number of minority group children in the applicant's schools.

For the second data item provide the number of minority group children involved in the applicant's approved desegregation plan.

c. Need for assistance

Complete either of the two data items, or both items.

An applicant that submits a narrative description of "Need for assistance" should limit that narrative to no more than two pages.

If an applicant completes both data items, the data item that receives the higher score will be used to award the points for the special consideration described in section 280.32(d).

d. Degree of achievement

In addition to the Supplemental Data Sheet, provide a narrative of not more than one page addressing the special consideration for "Degree of achievement" described in section 280.32(e) of the Magnet Schools Assistance Program Rules and Regulations.

PART V

Assurances and Certification

Pages _____ thru _____

DRAFT

MAGNET SCHOOLS ASSISTANCE PROGRAM
DESEGREGATION PLAN INFORMATION

Check the box next to item "a" or "b", as appropriate, and attach the requested information.

☐ a. If the applicant has a desegregation plan that 1) includes the magnet school(s) for which it is requesting assistance; and 2) has been previously approved by the Secretary of Education, a court, or a State agency or official of competent jurisdiction, attach a copy of that desegregation plan.

NOTE: If the applicant is implementing a previously approved plan that does not include the magnet school(s) for which assistance is requested, the plan must be modified to include the new magnet school(s) component. The applicant must obtain approval of the new magnet school(s) component, or any other modification to its desegregation plan, from the court, agency, or official that originally approved the plan.

☐ b. If the applicant does not have an approved desegregation plan, attach the following information:

1) a copy of the plan that the applicant is submitting for approval; and

2) a copy of the school board resolution or other evidence of final official action adopting and implementing the plan, or agreeing to adopt and implement the plan upon the award of assistance under the Magnet Schools Assistance Program; and

3) evidence that the plan is a "desegregation" plan as defined in section 280.4(b). In the case of a plan for the reassignment of children or faculty to remedy illegal separation of minority group children or faculty in the schools of the applicant, an example of the type of evidence required is a letter of findings from the Office for Civil Rights. In the case of a plan for the reduction, elimination, or prevention of minority group isolation in one or more of the applicant's schools, such evidence would include enrollment data for the schools involved in the plan that demonstrates the reduction, elimination, or prevention of minority group isolation which has been or would be achieved by the plan.

VOL 53 ISS 237 DE 9 1988 UMI

DRAFT

MAGNET SCHOOLS ASSISTANCE PROGRAM

SUPPLEMENTAL DATA SHEET

a. Recentness of the implementation of the approved desegregation plan

The desegregation plan attached to this application--

☐ is being submitted for approval to the Office for Civil Rights as adequate under Title VI of the Civil Rights Act of 1964 for the desegregation of minority group children or faculty of the applicant.

☐ is being implemented by the applicant. The implementation date of this desegregation plan or modification is _____. State how the implementation date was determined.

b. Involvement of minority group children

The total number of minority group children in the applicant's schools: _____

The number of minority group children involved in the applicant's approved plan: _____

Describe the method used to determine the number of minority group children involved in the approved plan.

c. Need for assistance

☐ The incremental expense of operating the approved desegregation plan (expressed as a percentage increase in the applicant's operating budget) is ____%, based on desegregation plan expenses in the amount of $_____ and an operating budget of $_____. Describe the basis on which the desegregation plan expenses were calculated or attach a summary of those expenses. Also describe the basis on which the operating budget was calculated or attach a summary of that budget.

☐ Narrative describing the difficulty of effectively carrying out such a plan and program or project for which assistance is sought is attached.

DRAFT

MAGNET SCHOOLS ASSISTANCE PROGRAM ASSURANCES

In accordance with section 3007 of Title III of the Elementary and Secondary Education Act of 1965, the applicant hereby assures and certifies that it agrees--

(1) to use funds made available under the Magnet Schools Assistance Program for the purposes specified in section 3007 of Title III of the Elementary and Secondary Education Act of 1965;

(2) to employ teachers in the courses of instruction assisted under the Magnet Schools Assistance Program who are certified or licensed by the State to teach the subject matter of the courses of instruction;

(3) that it will not engage in discrimination based upon race, sex, religion, color, national origin or handicap in the hiring, promotion, or assignment of its employees or other personnel for whom it has any administrative responsibility;

(4) that it will not engage in discrimination based on race, sex, religion, color, national origin or handicap in the mandatory assignment of students to its schools or to courses of instruction within its schools expect to carry out the approved plan;

(5) that it will not engage in discrimination based upon race, sex, religion, color, national origin or handicap in designing or operating extracurricular activities for students; and

(6) that it will carry out a high quality educational program that will encourage greater parental decisionmaking and involvement.

* * * * * *

FOR THOSE APPLICANTS THAT HAVE PREVIOUSLY APPROVED DESEGREGATION PLANS ONLY.

The applicant hereby assures and certifies that it is implementing that desegregation plan as approved.

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: An expedited review has been requested in accordance with the Act, since allowing for the normal review period would adversely affect the public interest. Approval by the Office of Management and Budget (OMB) has been requested by December 7, 1988.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. 3517) requires that the Director of the Office of Management and Budget (OMB) provide interested agencies and persons an early and meaningful opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice with attached proposed information collection requests prior to submission of these requests to OMB. For each proposed information collection request, grouped by office, this notice contains the following information: (1) Type of review requested, e.g., new, revision, extension, existing, or reinstatement; (2) title; (3) frequency of collection; (4) the affected public; (5) reporting and/or Recordkeeping burden; and (6) abstract. Because an expedited review by OMB is requested, the information collection request is also included as an attachment to this notice.

Dated: December 6, 1988.

National Center for Education Statistics

January 1989

Dear School District Superintendent:

We request your cooperation in completing this questionnaire on school districts' use of research and development (R&D) resources. The survey was requested by the Office of Educational Research and Improvement, U.S. Department of Education.

The attached questionnaire is designed to be completed by the staff member who is most knowledgeable about your district's use of R&D resources. The survey focuses specifically on four organizations from which your district may receive R&D services and products: the Regional Educational Laboratories, National Research and Development Centers, ERIC Clearinghouses, and National Diffusion Network (NDN) Facilitators.

While your participation in this survey is voluntary, your cooperation is needed to make the results of the survey comprehensive, reliable, and timely. The information collected will be presented as aggregated statistics only, with no individually identifying information. The survey has been coordinated with the Council of Chief State School Officers through its Committee for Evaluation and Information Systems (CEIS).

The survey is being conducted by our contractor, Westat, a research firm in Rockville, Maryland, using the Fast Response Survey System (FRSS). According to FRSS practice, Westat will send you a report of the survey findings when they are available.

We estimate that it will take approximately 30 minutes to complete the questionnaire. If you have any comments regarding this estimate or another aspect of this survey, send them to the U.S. Department of Education, Information Management and Compliance Division, Washington, DC 20202-4651; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

We would appreciate your completing the questionnaire and mailing it to the address on the back of the form within two weeks. If you have any questions about the survey, please call Judy Thorne, Westat's Survey Manager, at the toll-free Westat number (800) 937-8281 or Jeffrey Williams, the NCES Survey Manager for FRSS, at (202) 357-6333. Your cooperation is greatly appreciated.

Sincerely,

Emerson J. Elliott
Acting Commissioner

USE OF RESEARCH & DEVELOPMENT RESOURCES

This report is authorized by law (20 U.S.C. 1221e-1). While you are not required to respond, your cooperation is needed to make the results of this survey comprehensive, accurate, and timely.

This survey seeks information about the use within your school district of R&D resources funded through the Office of Educational Research and Improvement (OERI), of the U.S. Department of Education and what R&D resources your district needs in the future. "R&D" refers to research and/or development that has provided knowledge, guidelines for practice or policy, or information about new developments that can be used to improve schools. R&D resources are services and products that are intended to make R&D generally available and useful in schools. Services include technical assistance, training, literature searches, and responses to inquiries. Products include publications, bulletins, and research reviews that contain R&D findings.

Please indicate here if your district has received assistance from a Chapter 1 Technical Assistance Center (TAC) since the beginning of the school year 1987-88: ☐ Yes ☐ No

This survey excludes R&D that focuses exclusively on Chapter 1. Therefore, in your responses to the questions below, please do not include assistance from a Chapter 1 TAC.

1. Listed below are a number of types of OERI-funded organizations which may have provided R&D services or products, directly or indirectly, during the past 2 school years (that is, since the beginning of school year 1987-88).

   A: If you do not recognize, or are not sure of the identity of one of these types of organizations, indicate "Don't Recognize" (DR) under Column A. If you circle DR, please skip to the next organization.

   B: Estimate the frequency of use within your district of services and/or products from each type of organization since the beginning of school year 1987-88 by circling the number which best describes that use, as follows: DK = don't know or not sure whether we made any use of services/products from this type of organization, 1 = infrequent or no use, 2 = somewhat frequent use; 3 = very frequent use throughout the year. NOTE: Your district may have received products or services from these organizations directly or indirectly (through state education agencies or professional organizations, for example). Please include both types of delivery in your answer.

   C: Indicate the type of resources received, by circling all appropriate letters, as follows: S = services were received, P = products were received.

ORGANIZATIONS	A. DO NOT RECOGNIZE	B. FREQUENCY OF USE	C. TYPE OF RESOURCES RECEIVED
a. Regional Educational Laboratories	DR	DK 1 2 3	S P
b. National Research and Development Centers	DR	DK 1 2 3	S P
c. ERIC (Educational Resources Information Center) Clearinghouses	DR	DK 1 2 3	S P
d. NDN (National Diffusion Network) Facilitators	DR	DK 1 2 3	S P

2. Listed below are a number of R&D topics about which you may have received products or services.

   A: Indicate whether, since the beginning of school year 1987-88, your district has received R&D services or products dealing with that topic, whether from the above or other organizations (e.g., SEAs) but excluding Chapter 1 TACs. As above, S = services were received, P = products were received.

   B: Indicate if your district will need products or services on that topic in the future, whether from the above or other organizations: S = services are needed; P = products are needed; N = neither are needed.

R&D TOPICS	A. HAVE RECEIVED	B. WILL NEED IN FUTURE:
a. Student Populations (at-risk students, students with limited English proficiency, handicapped, urban students, rural students, gifted students, etc.)	S P	S P N
b. Staffing and Staff Development (teacher/administrative incentives, evaluation, professional development, leadership, teacher testing, collective bargaining, etc.)	S P	S P N
c. Curriculum (content areas, higher order thinking skills, course requirements for graduation, etc.)	S P	S P N
d. School and Classroom Management (teaching/learning strategies, educational technology, classroom procedures, discipline, student testing and evaluation, etc.)	S P	S P N
e. Student Testing and Evaluation (for placement, school-wide assessment, competency testing, etc.)	S P	S P N
f. Early Childhood Education (prekindergarten)	S P	S P N
g. Other (specify)_____	S P	S P N

3. If your district has used services or products since the beginning of school year 1987-88 from Regional Educational Laboratories (excluding Chapter 1 TACs), what has been the nature of the cost to your district? (check all that apply)

   ☐ Free ☐ Cost-shared ☐ Entirely paid for by the district

Office Of Planning, Budget and Evaluation

Type of Review: Expedited.
Title: Survey of Personnel Shortages and Training Needs in Vocational Rehabilitation.

Abstract: This survey is used by the Department to evaluate the personnel shortages and training needs of organizations providing vocational rehabilitation services and to establish training priorities.

Additional Information: The Office of Planning, Budget and Evaluation is requesting expedited review in order to comply with the 1984 Amendments to the Rehabilitation Act which require that the Department target rehabilitation training funds in areas with personnel shortages. In order to meet this requirement, the Department needs the data collected in this survey by February to allocate the 1989 funds.

QUESTIONNAIRE FOR DIRECTORS OF
STATE VOCATIONAL REHABILITATION AGENCIES

INTRODUCTION:

This survey is being conducted under the auspices of the Department of Education. The questions in this survey are intended to identify training needs and possible critical shortages of rehabilitation specialists which can be meaningfully addressed through special priorities governing the allocation of Federal training funds available through RSA.

Critical shortages are defined as regional or national shortages which result in reductions in the quantity or quality of services to levels substantially below those judged necessary to serve current rehabilitation clients or to expand services to underserved populations.

INSTRUCTIONS:

Public reporting burden for this collection of information is estimated to average 50 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, D.C. 20202-4651; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

Please base all your answers on the most recent reporting period for which you have complete information. Special instructions (e.g., **GO TO, SKIP,** etc.) are in bold type throughout the questionnaire. Where code numbers of particular education/training areas are requested, please refer to the yellow pages. Where code numbers of particular professional discipline specialties are requested, please refer to the blue pages. **FEEL FREE TO REMOVE THESE COLOR CODED PAGES FOR EASIER REFERENCE.** Definitions are provided along with each code. Please note that for all counseling specialties, there are corresponding treatment/technical specialties. Please note that only counselors belong in the former category.

A postage paid, addressed envelope has been provided for returning the questionnaire. In order to complete the current budget allocation, it is imperative that this questionnaire be returned by _____. If you have any questions about the questionnaire, please call Diane Pelavin at (202) 785-3308.

NOW, SOME QUESTIONS ABOUT YOUR TRAINING NEEDS FOR EXISTING EMPLOYEES AND THE MOST APPROPRIATE METHODS FOR MEETING THESE NEEDS.

8. In Column A below, list up to three specialties for which services are most hindered because existing personnel in that specialty require additional training. Please order these specialties from most critical to less critical. The codes are provided on the blue pages. In Column B, indicate the most critical educational or training need of personnel in the specialty indicated in Column A. Use the codes on the yellow page. In the last column, use the codes below to indicate the most appropriate method to provide this training.

If your organization has not experienced deficiencies among its existing employees, PLEASE CHECK THE FOLLOWING BOX AND PROCEED TO THE NEXT QUESTION. / /

	A. Specialty	B. Educational/ Training Need	C. Appropriate Method*

SERVICES

101 Behavior Management
102 Outreach -- Providing rehabilitation service opportunities to under-served persons with disabilities
103 Community Resources -- Knowledge of and use of appropriate community services
104 Assessment -- Of the person to determine functional skills and limitations
105 Rehabilitation Planning -- Analysis, synthesis, and utilization of assessment data to develop appropriate intervention strategy
106 Treatment -- To remove, ameliorate, or stabilize the handicapping effects of the disability including medical, psychological, vocational, and social interventions
107 Supportive Relationship -- Support to enable the person with a disability to better adjust
108 Placement -- Vocational, community, independent living, and family

SKILLS

109 Emerging Population -- New groups receiving rehabilitation services, e.g., traumatically brain-injured, chronically mentally ill
110 New Technology -- Technological applications to improve employability and independent living opportunities
111 Supported/Transitional Employment -- Competitive work in integrated work settings
112 Maintaining Facilitative Relationships -- Enhancement of the provider/professional relationship with the person with a disability
113 Team Building -- Of the rehabilitation professionals and improved professional inter-relationships
114 Case Management -- Assuring the proper services are rendered in a timely and appropriate manner
115 Knowledge of Disabilities -- Application of the knowledge of the medical, psychological, social, and emotional aspects of disabling conditions
116 New Techniques -- Applications in rehabilitation
117 Vocational Knowledge -- Applications of the knowledge of the world and vocational information
118 Independent Living -- Applications of the knowledge of independent living
119 Management/Supervisory Skills -- To improve performance of practitioners in delivery of services
120 Maintenance of Skill -- Maintenance and reinforcement of already acquired service-delivery skills

ADMINISTRATIVE AND SUPPORT

121 Orientation -- Orientation to services and an awareness of the needs of persons with disabilities and their families and communities
122 Documentation -- Of services rendered, needs outcomes, etc.
123 Legal and Ethical Issues -- As applied to treatment and services
124 Applications of Technology -- To provide better, more timely, cost efficient, and sensitive administrative services
125 Program Evaluation -- A system to provide data from the constituent parts of a services deliverer to improve services
126 Program Planning -- Identification and development of future strategies and services needed
127 Advocacy Services -- enhancing and increasing the involvement of persons with disabilities in the rehabilitation program
128 Public Information -- Increasing public awareness of the abilities and needs of persons with disabilities

CODES AND DEFINITIONS OF PROFESSIONAL SPECIALTIES

The following definitions have been provided to help you classify your personnel within the categories used in this personnel needs assessment. Please note that for all counseling, there are corresponding treatment/ trechnical specialties. Please be sure to correctly categorize personnel.

Rehabilitation Counseling

01 General Rehabilitation Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in General Rehabilitation.

02 Job Development/Placement Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Job Development/Placement.

03 Independent Living Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Independent Living.

04 Deafness Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Deafness.

05 Blindness/Visual Impairment Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Blindness/Visual Impairment.

06 Mental Illness Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Mental Illness.

07 Specific Learning Disability Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Specific Learning Disabilities.

DRAFT

08 Supported Employment Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Supported Employment.

09 Traumatic Brain Injury Specialist - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Traumatic Brain Injury.

Medical and Allied Health Personnel:

10 Audiologist - Provides diagnosis and treatment services concerned with hearing disabilities.

11 Physiatrist/Physician-Rehabilitation Specialist - A physician licensed to practice medicine and work with physical, psychological, vocational rehabilitation units, programs, or facilities providing services to clients.

12 Prosthetist/Orthotist - Specializes in the fitting and fabrication of appliances to improve the function and cosmesis of patients who have suffered an amputation or loss of parts or whole of an extremity or muscoskeletal impairments.

13 Physical Therapist - Through a variety of physical procedures, treats clients to relieve pain, develop or restore motor function and maintain maximum performance.

14 TBI Specialists - Provides treatment services for individuals with traumatic brain injuries.

15 Occupational Therapist - Provides assistance in the restoration, maintenance, and development of performance capabilities required in activities of daily living and productivity. Facilitates adaption to reduce or correct pathology and promote health.

16 Speech Pathologist - Provides diagnosis and treatment services for individuals with speech and language disorders.

17 Rehabilitation Nurse - A registered Nurse who has training and/or experience in dealing with the needs of rehabilitation populations and is assigned to a physical, psychological, vocational rehabilitation unit, program, or facility.

18 Psychologist/Psychiatry - Meets the legal requirements in the State for the practice of psychology or psychiatry.

19 Recreation Therapist - Provides evaluation and treatment services, by utilizing adaptive activities, to achieve specific medical and/or rehabilitation goals, as well as maximum integration of the person into the community.

20 Blindness/Low Vision Specialist - Facilitates, through technology, the use of residual sight in visually impaired persons.

21 Rehabilitation Dentist - A dentist who restores the function, form, and aesthetics of the dento-facial complex to maximize quality of life for the physically and mentally handicapped and to assist in maintaining or regaining the individual's highest level of physical function and social interaction.

Vocational Personnel:

22 Vocational Evaluator - Assess clients in specific work skills, occupational potentials, and vocational interests through the performance of tasks using materials, tools, and equipment found in particular job families.

23 Work Adjustment Specialist - Works with clients to assist in developing both basic and advanced skills essential to effective functioning in the work environment.

24 Resident Supervisor - Provides supervision in community based facilities.

25 Production Supervisor - Assists and monitors clients in simulated and real occupational activities.

26 Vocational Instructor - Utilizes an organized systematic instructional program to assist clients in the acquisition of specific marketable occupational skills.

27 Business Enterprise Specialist - Assists in the development of vending facilities in public and private buildings. Provides assistance in the installation or operation of these sites.

Rehabilitation Related Personnel:

28 Social Worker - Assists persons in personal, social, family, and financial adjustment.

29 Orientation and Mobility Specialist - Assists blind and visually impaired clients in achieving independent orientation, mobility, and travel skills.

30 Rehabilitation Teacher for the Blind - Assists blind and visually impaired clients with adaptations for independent living skills.

31 Client Assistance Personnel - Provides support and advocacy services for persons with disabilities.

32 Independent Living Specialist - Provides clients the experiences and practice with real or simulated life situations, assistive devices, special equipment, and specialized assistance to obtain independent living skills.

33 Deafness Specialists - Provides aid and training to deaf clients towards style development of independent living goals.

34 Job Development/Placement Personnel - Primarily responsible for planning and/or providing job placement/job development services, including job seeking skills training. Identifies potential employers and facilitates the placement of clients.

35 Supported Employment/Job Coaches -

36 Rehabilitation Engineer - Applies technology for the disabled in the modification of existing systems or devices for adaption in work and independent living.

37 Interpreter for the Deaf - Primarily provides interpreting services for the deaf.

Administration:

38 Rehabilitation Facility Administration - Provides direct support to management of rehabilitation facilities.

39 Rehabilitation Administration - Provides direct support to managment in program planning, data processing, and/or other staff.

40 Independent Living Administration - Provides direct support to managment of independent living facilities in program planning, data processing, and/or other staff.

41 Client Assistance Administrator - Responsible for advising individuals with disabilities about services available to them under the State-Federal rehabilitation program, and advocating for and assisting them in accessing these services.

VOL 53 ISS 237 DE 9 1988 UMI

QUESTIONNAIRE FOR ORGANIZATIONS THAT PROVIDE
VOCATIONAL REHABILITATION SERVICES FOR
STATE VOCATIONAL REHABILITATION AGENCIES

INTRODUCTION:

This survey is being conducted under the auspices of the Department of Education. The questions in this survey are intended to identify training needs and possible critical shortages of rehabilitation specialists which can be meaningfully addressed through special priorities governing the allocation of Federal training funds available through RSA.

Critical shortages are defined as regional or national shortages which result in reductions in the quantity or quality of services to levels substantially below those judged necessary to serve current rehabilitation clients or to expand services to underserved populations.

INSTRUCTIONS:

Public reporting burden for this collection of information is estimated to average 50 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, D.C. 20202-4651; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

Please base all your answers on the most recent reporting period for which you have complete information. Special instructions (e.g., **GO TO, SKIP,** etc.) are in bold type throughout the questionnaire. Where code numbers of particular education/training areas are requested, please refer to the yellow pages. Where code numbers of particular professional discipline specialties are requested, please refer to the blue pages. **FEEL FREE TO REMOVE THESE COLOR CODED PAGES FOR EASIER REFERENCE.** Definitions are provided along with each code. Please note that for all counseling specialties, there are corresponding treatment/technical specialties. Please note that only counselors belong in the former category.

A postage paid, addressed envelope has been provided for returning the questionnaire. In order to complete the current budget allocation, it is imperative that this questionnaire be received by _____. If you have any questions about the questionnaire, please call Diane Pelavin at (202) 785-3308.

DRAFT

SECTION I

If your agency has provided services for the state vocational rehabilitation agency in the past year, GO TO QUESTION 1. If your agency has provided NO SERVICES for the state vocational rehabilitation agency in the past year, please check the following box / / and return this form uncompleted. It is important that you return this questionnaire promptly.

FIRST, SOME QUESTIONS ABOUT YOUR ORGANIZATION.

1. Which category best describe your organization. Circle the number preceding the correct category.

1 Educational Institution
2 Business or Vocational School
3 Hospital or Sanitorium
4 Health Organization/Agency
5 Rehabilitation Facility
6 Welfare Agency
7 Other Public Agency
8 Other Private Agency
9 Private Individual

2. Where is your organization located? (CIRCLE THE NUMBER OF THE APPROPRIATE DESCRIPTION.)

__1__ Rural area

__2__ Small urban area (reasonable commuting distance to metropolitan area or city of at least 50,000 population)

__3__ Large urban/suburban (city of 250,000 or more population)

3. What was the total caseload at your organization in the reporting year? _____

4. How many clients did your organization serve last year who were referred to you by a State Vocational Rehabilitation Agency? _____

5a. Does your organization specialize in serving only individuals with a certain handicap or handicaps?

__1__ Yes __2__ No

DRAFT

5b. If yes, please specify area(s) of specialization:

DO NOT WRITE IN THIS BOX

_____ ___ ___ ___

_____ ___ ___ ___

_____ ___ ___ ___

_____ ___ ___ ___

_____ ___ ___ ___

6. Does your organization serve vocational rehabilitation clients only from your area or are clients referred to your organization from other areas? (CIRCLE THE APPROPRIATE NUMBER.)

1 local referrals only 2 statewide referrals 3 state and interstate referrals

08 Supported Employment Counselor - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Supported Employment.

09 Traumatic Brain Injury Specialist - Through utilizing counseling skills, case management skills, and community resources, provides support in the client's adjustment to disabling conditions and assistance in the choice, preparation, and acquisition of suitable employment. Specializes in Traumatic Brain Injury.

Medical and Allied Health Personnel:

10 Audiologist - Provides diagnosis and treatment services concerned with hearing disabilities.

11 Physiatrist/Physician-Rehabilitation Specialist - A physician licensed to practice medicine and work with physical, psychological, vocational rehabilitation units, programs, or facilities providing services to clients.

12 Prosthetist/Orthotist - Specializes in the fitting and fabrication of appliances to improve the function and cosmesis of patients who have suffered an amputation or loss of parts or whole of an extremity or muscoskeletal impairments.

13 Physical Therapist - Through a variety of physical procedures, treats clients to relieve pain, develop or restore motor function and maintain maximum performance.

14 TBI Specialists - Provides treatment services for individuals with traumatic brain injuries.

15 Occupational Therapist - Provides assistance in the restoration, maintenance, and development of performance capabilities required in activities of daily living and productivity. Facilitates adaption to reduce or correct pathology and promote health.

16 Speech Pathologist - Provides diagnosis and treatment services for individuals with speech and language disorders.

17 Rehabilitation Nurse - A registered Nurse who has training and/or experience in dealing with the needs of rehabilitation populations and is assigned to a physical, psychological, vocational rehabilitation unit, program, or facility.

18 Psychologist/Psychiatry - Meets the legal requirements in the State for the practice of psychology or psychiatry.

DRAFT

DRAFT

19 Recreation Therapist - Provides evaluation and treatment services, by utilizing adaptive activities, to achieve specific medical and/or rehabilitation goals, as well as maximum integration of the person into the community.

20 Blindness/Low Vision Specialist - Facilitates, through technology, the use of residual sight in visually impaired persons.

21 Rehabilitation Dentist - A dentist who restores the function, form, and aesthetics of the dento-facial complex to maximize quality of life for the physically and mentally handicapped and to assist in maintaining or regaining the individual's highest level of physical function and social interaction.

Vocational Personnel:

22 Vocational Evaluator - Assess clients in specific work skills, occupational potentials, and vocational interests through the performance of tasks using materials, tools, and equipment found in particular job families.

23 Work Adjustment Specialist - Works with clients to assist in developing both basic and advanced skills essential to effective functioning in the work environment.

24 Resident Supervisor - Provides supervision in community based facilities.

25 Production Supervisor - Assists and monitors clients in simulated and real occupational activities.

26 Vocational Instructor - Utilizes an organized systematic instructional program to assist clients in the acquisition of specific marketable occupational skills.

27 Business Enterprise Specialist - Assists in the development of vending facilities in public and private buildings. Provides assistance in the installation or operation of these sites.

Rehabilitation Related Personnel:

28 Social Worker - Assists persons in personal, social, family, and financial adjustment.

29 Orientation and Mobility Specialist - Assists blind and visually impaired clients in achieving independent orientation, mobility, and travel skills.

30 Rehabilitation Teacher for the Blind - Assists blind and visually impaired clients with adaptations for independent living skills.

31 Client Assistance Personnel - Provides support and advocacy services for persons with disabilities.

VOL 53 ISS 237 DE 9 1988 UMI

32 Independent Living Specialist - Provides clients the experiences and practice with real or simulated life situations, assistive devices, special equipment, and specialized assistance to obtain independent living skills.

33 Deafness Specialists - Provides aid and training to deaf clients towards style development of independent living goals.

34 Job Development/Placement Personnel - Primarily responsible for planning and/or providing job placement/job development services, including job seeking skills training. Identifies potential employers and facilitates the placement of clients.

35 Supported Employment/Job Coaches -

36 Rehabilitation Engineer - Applies technology for the disabled in the modification of existing systems or devices for adaption in work and independent living.

37 Interpreter for the Deaf - Primarily provides interpreting services for the deaf.

Administration:

38 Rehabilitation Facility Administration - Provides direct support to management of rehabilitation facilities.

39 Rehabilitation Administration - Provides direct support to managment in program planning, data processing, and/or other staff.

40 Independent Living Administration - Provides direct support to managment of independent living facilities in program planning, data processing, and/or other staff.

41 Client Assistance Administrator - Responsible for advising individuals with disabilities about services available to them under the State-Federal rehabilitation program, and advocating for and assisting them in accessing these services.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 88-70-NG]

Atlantic Richfield Co.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on November 22, 1988, of an application filed by Atlantic Richfield Company (ARCO) for blanket authorization to import up to 25 Bcf of Canadian natural gas per year for two years, for use as fuel in its oil refinery located in Ferndale, Washington. The gas, to be purchased from various Canadian suppliers, would be transported from a point of importation at the International Border near Sumas, Washington, through new pipeline facilities to be jointly owned and operated by ARCO and Intalco Aluminum Corporation (Intalco). The application requests that the ERA approve the authorization for a two-year period beginning on the date that the new pipeline, which is known as the Ferndale Pipeline System, is built and operable, which is expected to be no later than November 1, 1989. ARCO proposes to file quarterly reports with the ERA giving the specific terms of each import transaction.

The application is filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than January 9, 1989.

FOR FURTHER INFORMATION CONTACT:

Robert Groner, Natural Gas Division, Economic Regulatory Administration, U.S. Department of Energy, Forrestal Building, Room 3F–091, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–1657

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: ARCO and Intalco have a joint application pending with the Federal Energy Regulatory Commission for authority to construct the Ferndale Pipeline System. It will consist of a 16-inch outside diameter mainline originating at an interconnection with the pipeline facilities of Westcoast Energy Inc. at the International Border near Sumas, Washington and extending 29 miles to ARCO's refinery near Ferndale, Washington.

ARCO currently receives gas acquired on the spot market in Canada which is imported on its behalf by Cascade Natural Gas Corporation (Cascade) and transported through the pipeline facilities of Northwest Pipeline Corporation and Cascade. The requested authorization would enable ARCO to secure the necessary gas supplies directly from Canadian sellers under individually-negotiated, market-responsive contracts, and the new pipeline would provide a significant savings over ARCO's present cost of transportation and delivery.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement will be competitive and thus in the public interest. Parties opposing the arrangement bear the burden of overcoming this assertion.

In accordance with the National Environmental Policy Act of 1969, no final decision will be issued in this proceeding until the DOE has considered the environmental effects of any such decision.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room 3F–056, RG–23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. EST, January 9, 1989.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of ARCO's application is available for inspection and copying in the Natural Gas Division Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 5, 1988.

Constance L. Buckley,

Acting Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 88-71-NG]

Intalco Aluminum Corp.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on November 22, 1988, of an application filed by Intalco Aluminum Corporation (Intalco) for blanket authorization to import up to 2 Bcf of Canadian natural gas per year for two years, for use as fuel in its aluminum smelting plant located in Ferndale, Washington. The gas, to be purchased from various Canadian suppliers, would be transported from the point of importation at the International Border near Sumas, Washington, through new pipeline facilities to be jointly owned and operated by Intalco and Atlantic Richfield Company (ARCO). The application requests that the ERA approve the authorization for a two-year period beginning on the date that the new pipeline, known as the Ferndale Pipeline System, is built and operable, which is expected to be no later than November 1, 1989. Intalco proposes to file quarterly reports with the ERA giving the specific terms of each import transaction.

The application is filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than January 9, 1989.

FOR FURTHER INFORMATION CONTACT:

Robert Groner, Natural Gas Division, Economic Regulatory Administration, U.S. Department of Energy, Forrestal Building, Room 3F-091, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-1657.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: Intalco, a Delaware corporation with its principal place of business in Ferndale, Washington, is a wholly-owned subsidiary of Alumax Inc., also a Delaware corporation, which, in turn, is a wholly-owned subsidiary of AMAX Inc., a New York corporation. Intalco and ARCO have a joint application pending with the Federal Energy Regulatory Commission for authority to construct the Ferndale Pipeline System. It will consist of a 16-inch outside diameter mainline originating at an interconnection with the pipeline facilities of Westcoast Energy Inc. at the International Border near Sumas, Washington and extending 29 miles to ARCO's oil refinery near Ferndale, Washington. Intalco would be supplied its imported gas from a four-mile delivery line to be built between the refinery and the smelting plant.

Intalco currenlty receives gas acquired on the spot market in Canada which is imported on its behalf by Cascade Natural Gas Corporation (Cascade) and transported through the pipeline facilities of Northwest Pipeline Corporation and Cascade. The requested authorization would enable Intalco to secure the necessary gas supplies directly from Canadian sellers under contracts that are individually-negotiated and market-responsive, and the new pipeline would provide a significant savings over Intalco's present cost of transportation and delivery.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement will be competitive and thus in the public interest. Parties opposing the arrangement bear the burden of overcoming this assertion.

In accordance with the National Environmental Policy Act of 1969, no final decision will be issued in this proceeding until the DOE has considered the environmental effects of any such decision.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room 3F-056, RG-23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. EST, January 9, 1989.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant

to this notice, in accordance with 10 CFR 590.316.

A copy of Intalco's application is available for inspection and copying in the Natural Gas Division Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 5, 1988.

[ERA Docket No. 87–68–LNG]

Yukon Pacific Corp.; Public Conference

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of public conference.

SUMMARY: The Economic Regulatory Administration of the Department of Energy announces that it is holding a conference on January 24, 1989, beginning at 10:00 a.m. in Room C 121–122, Federal Building, 722 West 7th Avenue, Anchorage, Alaska, to discuss the contested issues raised by the parties in connection with Yukon Pacific Corporation's application for authority to export liquefied natural gas from the North Slope of Alaska to the Pacific Rim countries of Japan, South Korea, and Taiwan. The informal conference will be open to the public, but participation will be limited to the applicant and intervenors.

A transcript of the conference will be made an official part of the record in the proceeding and will be available for public review at the Natural Gas Division Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., EST, Monday through Friday, except Federal holidays. Individual arrangements may be made with the recorder at the conference to purchase a copy of the transcript.

For further information, please contact Mr. P.J. Fleming of the Natural Gas Division, Office of Fuels Programs, at (202) 586–4819 or Mr. Ben McRea, Natural Gas and Minerals Leasing, Office of General Counsel, (202) 586–6667.

Issued in Washington, DC, December 5, 1988.

Constance L. Buckly,

Acting Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER88–432–000 et al.]

Tucson Electric Power Co. et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. Tucson Electric Power Company

[Docket No. ER88–432–000]

December 2, 1988.

Take notice that on October 28, 1988, Tucson Electric Power Company (Tucson) tendered for filing an amendment to its filing on May 27, 1988, pursuant to 18 CFR 35.12, in which it tendered an agreement entitled "1990–2011 Power Sale Agreement Between Tucson Electric Power Company and Salt River Project Agricultural Improvement and Power District." The amendment, filed October 28, 1988, contains supplemental information in support of the original filing.

Copies of the supplementary information offered by way of amendment have been served to all parties affected by this proceeding.

Comment date: December 12, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. Cimarron Chemical, Inc.

[Docket No. QF89–50–000]

December 2, 1988.

On November 17, 1988, Cimarron Chemical, Inc. (Applicant) of 1400 Post Oak Boulevard, Suite 625, Houston, Texas 77056 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Baca County, Colorado. The facility will consist of two combustion turbine generating units, two heat recovery steam generators and an extraction/condensing steam turbine generating unit. Extraction steam from the facility will be used to produce chilled water, via an absorption chiller, for refrigeration in an adjacent cold storage plant. The net electric power production capacity will be 68 MW. The primary energy source will be natural gas. Installation of the facility will begin in the summer of 1989.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

3. Public Service Company of Indiana

[Docket No. ER88–573–000]

December 2, 1988.

Take notice that on November 4, 1988, Public Service Company of Indiana (PSI), tendered for filing its Refund Compliance Report pursuant a Commission letter dated October 12, 1988.

Comment date: December 14, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. Merck, Sharp & Dohme, a Division of Merck & Co., Inc.

[Docket No. QF89–57–000]

December 2, 1988.

On November 21, 1988, Merck, Shapr & Dohme, a Division of Merck & Co., Inc. (Applicant), of Sumneytown Pike, West Point, Pennsylvania 19486, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is located in West Point, Pennsylvania. The facility consists of a boiler, a steam turbine generating unit, a combustion turbine generating unit and a heat recovery steam generator. Thermal energy recovered from the facility will be used for Applicant's heating and process requirements. The maximum net electric power production capacity of the facility is 36.24 MW. The primary energy sources are natural gas, No. 2 and No. 6 fuel oil. Installation of the facility began on August 4, 1986.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

5. Utah Power & Light Company

[Docket Nos. ER84–571–007, ER85–486–003, and ER86–300–003 (Phase II)]

December 5, 1988.

Take notice that on November 4, 1988, Utah Power & Light Company (Utah) tendered for filing an amendment to its compliance filing submitted on October 12, 1988. The amendment corrects certain oversights and typographical errors.

Copies of the filing were served upon all parties to the proceeding.

Comment date: December 15, 1988, in accordance with Standard Paragraph E at the end of this notice.

6. Pacific Gas and Electric Company

[Docket No. ER88-302-002]

December 5, 1988.

Take notice that on November 17, 1988, Pacific Gas and Electric Company (PG&E) tendered for filing its compliance filing pursuant to the Commission's order issued October 20, 1988.

Comment date: December 19, 1988, in accordance with Standard Paragraph E at the end of this notice.

7. Minnesota Power & Light Company and Superior Water, Light and Power Company

[Docket No. ER89-89-000]

December 5, 1988.

Take notice that on November 23, 1988 Minnesota Power & Light Company (MP&L) and Superior Water, Light and Power Company (Superior) tendered for filing a rate schedule applicable to Dahlberg Light and Power Company (Dahlberg). The propoosed rate schedule supersedes service provided by Superior, a subsidiary of MP&L, to Dahlberg. The proposed rate schedule will reduce revenues from Dahlberg by $453,000 for the-12 month period ending October 31, 1989. The rate is proposed to take effect on November 1, 1988.

Superior also filed on November 23, 1988, Supplement No. 2 to the Electric Service Agreement between Superior and Dahlberg, terminating said Agreement as of October 31, 1988. In addition, in order to effectuate such filing and such cancellation, MP&L filed on November 23, 1988, a letter agreement amending the Interchange Service Agreement between MP&L and Superior to reflect the termination of Superior's service to Dahlberg in rates charged Superior by MP&L.

Copies of the proposed rate contract and statements comparing the sales and revenues therefrom were served on Dahlberg, the Minnesota Public Utilities Commission and the Public Service Commission of Wisconsin. Notice of the proposed cancellation was served upon Dahlberg and the Public Service Commission of Wisconsin.

Comment date: December 19, 1988, in accordance with Standard Paragraph E at the end of this notice.

8. Southern California Edison Company

[Docket No. ER88-577-000]

December 5, 1988.

Take notice that on November 28, 1988, Southern California Edison Company (Edison) tendered for filing an amendment to their filing date August 22, 1988, Docket No. ER88-577-000, a change of rates for transmission service as embodied in Edison's agreements with the following entities which reflects the compliance with FERC deficiency letter dated September 27, 1988; and corrections to previously filed rates.

	Rate schedule FERC No.
1. City of Anaheim (Anaheim).	130, 164, 193, 200, 204, 208.
2. City of Azusa (Azusa)...	160, 189, 196, 201, 209.
3. City of Banning (Banning).	159, 190, 199, 210.
4. City of Colton (Colton)..	162, 191, 202, 211.
5. City of Riverside (Riverside).	129, 165, 192, 194, 198, 205, 212.
6. City of Vernon (Vernon).	149, 154.7, 172, 195, 207.
7. Contract Rate TN.....	FPC Electric Tariff Original Volume No. 1.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: December 19, 1988, in accordance with Standard Paragraph E at the end of this document.

9. Delmarva Power & Light Company

[Docket No. ER87-556-003]

December 5, 1988.

Take notice that on November 17, 1988, Delmarva Power & Light Company filed a Refund Compliance Report pursuant to the Commission's letter order of September 20, 1988 approving the Settlement Agreement in this docket.

Delmarva states that on October 18, 1988 it refunded to the affected wholesale customers the difference between the amounts collected under "interim" rates, approved by letter order of July 26, 1988, and the rates contained in the Settlement Agreement in Docket No. ER87-556-000. Such refund included interest through the date of refund, October 18, 1988.

Copies of the Report were served upon each affected wholesale Customers, the parties of record and the state regulatory agencies in Delaware, Maryland and Virginia.

Comment date: December 19, 1988, in accordance with Standard Paragraph E at the end of this notice.

10. American Ref-Fuel Company of Hempstead

[Docket No. ER89-90-000]

December 5, 1988.

Take notice that on November 23, 1988 American REF-FUEL Company of Hempstead (REF-FUEL), a general partnership of second tier subsidiaries of Air Products and Chemicals, Inc. (APCI) and Browning Ferris Industries, Inc. (BFI) tendered for filing, proposed Rate Schedule No. 1, applicable to sales of energy by REF-FUEL to Long Island Lighting Company (LILCO) from a biomassfired electric generating facility to be located at Westbury, New York (the facility).

Comment date: December 19, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

[Docket Nos. CP89-298-000 et al.]

ANR Pipeline Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. ANR Pipeline Company

[Docket No. CP89-298-000]

December 2, 1988.

Take notice that on November 28, 1988, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-298-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas for EP Operating Company (EP) a

marketer, under ANR's blanket certificate issued in Docket No. CP88–532–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR proposes to transport up to 81,250 dt equivalent of natural gas per day on an interruptible basis for EP. ANR states it would receive the gas at an existing point of receipt in the Ship Shoal Area, offshore Louisiana, and redeliver the gas for the account of EP at 16 existing interconnections located in the state of Louisiana. ANR states it commenced service for EP under § 284.223(a) on October 15, 1988, as reported in Docket No. ST89–740.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Panhandle Eastern Pipe Line Company

[Docket No. CP89–307–000]

December 2, 1988.

Take notice that on November 30, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP89–307–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide interruptible transportation service for Western Gas Marketing U.S.A., Ltd. (Western Gas), a broker, under the blanket certificate issued in Docket No. CP86–585–000 on November 20, 1987, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Panhandle states that pursuant to a transportation agreement dated August 29, 1988, and under its Rate Schedule PT, it proposes to transport up to 26,500 dekatherms (dt) per day equivalent of natural gas on an interruptible basis for Western Gas from points of receipt listed in Exhibit "A" of the agreement to delivery points also listed in Exhibit "A", which transportation service may involve interconnections between Panhandle and various transporters. Panhandle states that it would receive the gas at various existing points on its system in Texas, Oklahoma, Kansas, Colorado, Wyoming, and Illinois, and that it would transport and redeliver the gas, less fuel used and unaccounted for line loss, to Michigan Consolidated Gas Company in Wayne County, Michigan, for ultimate consumption by 444 end-users.

Panhandle advises that service under § 284.223(a) commenced on October 20, 1988, as reported in Docket No. ST89–742. Panhandle further advises that it would transport 26,500 dt on an average day and 9,672,500 dt annually.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Tennessee Gas Pipeline Company

[Docket No. CP89–269–000]

December 2, 1988

Take notice that on November 22, 1988, Tennessee Gas Pipeline Company (Tennessee), Post Office Box 2511, Houston, Texas 77252, filed in Docket No. CP89–269–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for PSI, Inc., (Shipper) under the blanket certificate issued in Docket No. CP87–115–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee states that it proposes to transport for PSI 80,000 dt on a peak day, 80,000 dt on an average day and 29,200,000 dt on an annual basis. Tennessee also states that pursuant to a transportation agreement dated October 10, 1988 between Tennessee and PSI, it proposes to transport natural gas for PSI from points of receipt located offshore Louisiana, offshore Texas, and in the states of West Virginia, Mississippi, Louisiana, Pennsylvania, Alabama, and Texas. The points of delivery and ultimate points of delivery are located in the states of Texas and Mississippi.

Tennessee further states that it commenced this service October 20, 1988, as reported in Docket No. ST89–702.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Women's Natural Gas Corporation, et al.

[Docket No. CI89–102–000, et al.]

December 5, 1988.

Take notice that each Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorization, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Docket No. and date filed	Applicant
CI89–102–000, 11–23–88.	Women's Natural Gas Corporation, Presidio Building, Suite 380, 6907 Capitol of Texas Highway North, Austin, Texas 78731.
CI89–103–000, 11–23–88.	Santanna Natural Gas Corporation, Presidio Building, Suite 380, 6907 Capitol of Texas Highway North, Austin, Texas 78731.
CI89–107–000, 11–29–88.	ARCO Natural Gas Marketing, inc., Room 24–024 DAB, P.O. Box 2819, Dallas, Texas 75221–2819.

Comment date: December 22, 1988, in accordance with Standard Paragraph J at the end of the notice.

5. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP89–293–000]

December 2, 1999.

Take notice that on November 25, 1988, Northern Natural Gas Company, Division of Enron Corporation (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No. CP89–293–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport gas on behalf of Mobil Natural Gas, Inc. (Mobil) a producer of natural gas, under Northern's blanket certificate issued in Docket No. CP86–435–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northern proposes to transport on an interruptible basis up to 20,000 MMBtu of natural gas equivalent per day on behalf of Mobil pursuant to a transportation agreement dated November 1, 1988, between Northern and Mobil. Northern would receive the gas at an existing delivery point in Kansas and redeliver equivalent volumes at existing delivery points in Nebraska and Wisconsin.

Northern further states that the estimated average daily and annual quantities would be 15,000 MMBtu and 7,300,000 MMBtu, respectively. Service under § 284.223(a) commenced on November 1, 1988, as reported in Docket No. ST89–831, it is stated.

Comment date: January 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Panhandle Eastern Pipe Line Company

[Docket No. CP89–229–000]

December 5, 1988.

Take notice that on November 17, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP89–229–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of General Motors Corporation (GM), a shipper and end-user of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86–585–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle proposes to transport on a firm basis up to 775 dt equivalent of natural gas on a peak day for GM, 775 dt equivalent on an average day and 282,875 dt equivalent on an annual basis. It is stated that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is stated that Panhandle would receive the gas for GM's account at existing receipt points in Texas, Oklahoma, Kansas, Colorado, Wyoming and Illinois. It is further stated that Panhandle would deliver equivalent volumes of gas less fuel used and unaccounted for line loss to Kokomo Gas Company in Tipton, Indiana. It is explained that the service commenced October 1, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–535.

Comment date: January 19, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. ANR Pipeline Company

[Docket No. CP89–297–000]

December 5, 1988.

Take notice that on November 28, 1988, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89–297–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations (18 CFR 157.205 and 284.223) for authorization to provide a transportation service for Placid Oil Company, a marketer, under the blanket certificate issued in Docket No. CP88–532–000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR states the transportation service would be provided pursuant to a transportation agreement dated August 16, 1988, wherein ANR proposes to transport up to 131,250 dt equivalent of natural gas per day on an interruptible basis for Placid. ANR states it would receive the gas at an existing point of receipt in the Ship Shoal Area, offshore Louisiana, and redeliver the gas for the account of Placid at existing interconnections located in the state of Louisiana. ANR indicates that it would transport on a peak day and average day 131,250 dt equivalent of natural gas, and 47,906,250 dt equivalent of natural gas annually.

ANR states that it would not be required to construct any facilities to implement the service. ANR also indicates that it would charge the rates and abide by the terms and conditions provided by its Rate Schedule ITS. It is also indicated that the transportation agreement provides for a primary term expiring on December 31, 1989, but that the contract would continue on a month-to-month basis until terminated by either party upon thirty days written notice.

ANR states that it commenced a 120-day transportation service for Placid on October 15, 1988, as provided by § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–646.

Comment date: January 19, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Southern Natural Gas Company

[Docket No. CP89–300–000]

December 5, 1988.

Take notice that on November 29, 1988, Southern Natural Gas Company (Southern) P.O. Box 2563, Birmingham, Alabama 35303–2563, filed in Docket No. CP89–300–000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Sonat Marketing Company (Sonat) under its blanket certificate issued in Docket No. CP88–316–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Southern would perform the proposed transportation service, on an interruptible basis, for Sonat, a marketer, pursuant a service agreement dated September 13, 1988. It is stated that the term of the service agreement is for a primary term of one month, to continue and remain in effect for successive terms of one month unless cancelled by either party. Southern proposes to transport on a peak day up to 16,000 MMBtu; on an average day 7,476 MMBtu; and on an annual basis 2,728,740 MMBtu of natural gas for Sonat. Southern proposes to receive the gas at various receipt points in Louisiana, offshore Louisiana, Mississippi, Alabama, and Texas for delivery to a point in Alabama. Southern asserts that no new facilities are required to implement the proposed service.

Southern states that it would perform such transportation service for Sonat pursuant to its Rate Schedule IT. It is further stated that Southern may agree from time to time to discount the rate charged Sonat for transportation services in accordance with the provisions of Rate Schedule IT. It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Regulations. Southern commenced such self-implementing service on October 1, 1988, as reported in Docket No. ST89–221–000.

Comment date: January 19, 1988, in accordance with Standard Paragraph G at the end of this notice.

9. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–285–000]

December 5, 1988.

Take notice that on November 23, 1988, Transcontinental Gas Pipe Line Company (Transco), Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP89–285–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport gas for Transco Energy Marketing Company (Shipper) under Transco's blanket certificate issued in Docket No. CP88–328–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Transco states that the total volume of gas to be transported for Shipper on a peak day will be 170,000 dt equivalent of natural gas; on an average day will be 170,000 dt equivalent of natural gas; and on an annual basis will be 62,050,000 dt equivalent of natural gas. It is stated that Transco will receive the gas at points of receipt in Pennsylvania, New Jersey, Alabama, Georgia, Texas, Louisiana, offshore Louisiana and offshore Texas and will deliver the gas at an existing point of interconnection between Transco and United Gas Pipe Line Company in Victoria County, Texas. It is stated that Transco will

construct no new facilities to provide this transportation service, utilizing instead existing facilities as reflected in Exhibit A of the service agreement. It is stated that there is no agency relationshp under which a local distribution company or an affiliate of Shipper will receive gas on behalf of Shipper. Transco states that service for Shipper commenced October 4, 1988, pursuant to the 120-day automatic authorization provided for in § 284.223(a) of the Regulations, as reported in Docket No. ST89–0639.

Comment date: January 19, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–277–000]

December 5, 1988.

Take notice that on November 23, 1988, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP89–277–000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport gas for Niagara Mohawk Power Corporation (Shipper) under Transco's blanket certificate issued in CP88–328–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and available for public inspection.

Transco states that the total volume of gas to be transported hereunder for Shipper on a peak day will be 1,928,000 dt equivalent of natural gas; on an average day will be 100,000 dt equivalent of natural gas; and on an annual basis will be 36,500,000 dt equivalent of natural gas. Transco states it will receive the gas at points of receipt in Pennsylvania, New Jersey, Alabama, Georgia, Texas, Louisiana, offshore Louisiana and offshore Texas and deliver the gas at an existing point of interconnection between Transco and Consolidated Gas Supply Corporation at Leidy, Clinton County, Pennsylvania. Transco states that it will construct no new facilities in order to provide this transportation service, utilizing instead existing facilities as reflected in Exhibit A of the transportation agreement. Transco states that there is no agency relationship under which a local distribution company or an affiliate of Shipper will receive gas on behalf of Shipper. Transco states that service for Shipper commenced October 24, 1988, pursuant to the 120-day automatic authorization provided for in § 284.223(a) of the Regulations, as reported in Docket No. ST89–0640. Transco states further that it has verified that transportation hereunder will be pursuant to Subpart F, Part 157 of the Regulations and Subpart G, Part 284 of the Regulations.

Comment date: January 19, 1989, in accordance with Standard Paragraph G at the end of this notice.

11. Panhandle Eastern Pipe Line Company

[Docket No. CP89–230–000]

December 5, 1988.

Take notice that on November 17, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP89–230–000 a request, as supplemented November 22, 1988, pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of General Motors Corporation (GM), a shipper and end-user of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86–585–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle proposes to transport on a firm basis up to 258 dt equivalent of natural gas on a peak day for GM, 258 dt equivalent on an average day and 94,170 dt equivalent on an annual basis. It is stated that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is stated that Panhandle would receive the gas for GM's account at existing receipt points in Texas, Oklahoma, Kansas, Colorado, Wyoming and Illinois. It is further stated that Panhandle would deliver equivalent volumes of gas less fuel used and unaccounted for line loss to Citizens Gas Fuel in Lenawee County, Michigan. It is explained that the service commenced October 1, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–535.

Comment date: January 19, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Distrigas of Massachusetts Corporation

[Docket No. CP89–245–000]

December 6, 1988.

Take notice that on November 18, 1988, Distrigas of Massachusetts Corporation (Applicant), Two Oliver Street, Boston, Massachusetts, 02109, filed in Docket No. CP89–245–000 an application pursuant to section 7(c) of the Natural Gas Act, requesting authorization to install and operate two compressors at Applicant's liquified natural gas ("LNG") terminal, all as more fully set forth in the application which is on file with the Federal Energy Regulatory Commission and open to public inspection.

Applicant operates an LNG terminal and storage facility at Everett, Massachusetts. As a consequence of normal operation of the terminal a small amount of LNG naturally vaporizes, or "boils off". Applicant currently captures a portion of that boil-off vapor, compresses it, and sells it under existing regulatory authority. Applicant proposes to replace its present boil-off compressor, having a capacity of 54.5 Mcf per hour, with two compressors having a total capacity of 165 Mcf per hour. Applicant states that the cost of the compressors would be approximately $1,300,000 with the Applicant bearing the cost and assuming the risk of recovery of the cost of the proposed compressors. Applicant proposes to finance said cost through cash on hand. Applicant states that the expanded compressor capacity will increase the capture and sale of otherwise wasted boil-off vapor and would thus enhance the efficiency of Applicant's LNG terminal.

Comment date: January 27, 1989, in accordance with Standard Paragraph F at the end of this notice.

13. Midwestern Gas Transmission Company

[Docket No. CP89–276–000]

December 6, 1988.

Take notice that on November 23, 1988, Midwestern Gas Transmission Company (Midwestern), 1010 Milam, Houston, Texas 77002, filed in Docket No. CP89–276–000 an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to a total of 265,000 Dt per day on an interruptible basis for five shippers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Midwestern states that it would transport gas on its northern system for the following shippers:

Shipper	Transportation volume (Dt/day)
1. Northern Natural Gas Company	100,000
2. Iowa Public Service Company	100,000

Shipper	Transportation volume (Dt/day)
3. Wisconsin Public Service Corporation	25,000
4. Inland Steel Company	20,000
5. Petro-Canada Hydrocarbons, Inc	20,000

Midwestern states that each shipper would pay a rate equal to the rate set forth in Midwestern's Rate Schedule IT–2 and each shipper would deliver quantities of gas at Emerson, Manitoba, on each day for Midwestern's system fuel and use requirements associated with the transportation quantity.

Midwestern states that each shipper would need to obtain necessary United States authorizations to import natural gas from Canada and the Canadian suppliers would need to obtain necessary Canadian authorizations to export natural gas from Canada.

Further, Midwestern states that the proposed transportation service would benefit the shippers by enabling them to meet existing and future market requirements plus the service would provide some of the shippers alternate sources of supply to meet such requirements.

Comment date: December 27, 1988, in accordance with Standard Paragraph F at the end of this notice.

14. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–256–000]

December 6, 1988.

Take notice that on November 21, 1988, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas, 77251, filed in Docket No. CP89–256–000, an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a certain transportation service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco proposes to abandon the transportation service rendered Florida Gas Transmission Company (FGT) under Transco's Rate Schedule X–199. Transco states that 21,000 Mcf of natural gas per day is transported through FGT's capacity in a jointly owned line from South Marsh Island (SMI) Blocks 149 and 150 to Transco in SMI Block 132. Transco explains that it transports such natural gas on a firm basis for FGT from SMI Block 132 to an existing interconnection with FGT at St. Helena Parish, Louisiana. Transco states that FGT has requested full and permanent abandonment of service under Rate Schedule X–199. Transco further states upon abandonment of service under Rate Schedule X–199, Transco and FGT would enter into an arrangement for substitute firm transportation of 4,000 Mcf of natural gas per day under Transco's Rate Schedule FT. Transco explains that the service would be rendered under the authority of its blanket certificate.

Comment date: December 27, 1988, in accordance with Standard Paragraph F at the end of this notice.

15. United Gas Pipe Line Company

[Docket No. CP89–274–000]

December 6, 1988.

Take notice that on November 22, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–274–000 an application pursuant to section 7(b) of the Natural Gas Act, for issuance of an order permitting and approving abandonment of certain natural gas pipeline facilities.

Specifically, United proposes to abandon in place 6.92 miles of 12-inch pipeline in Baldwin County, Alabama. United states that the line is old and no longer needed and that replacing or maintaining it would be economically unfeasible. United further states this abandonment will be implemented without any termination of service or detriment to any of its customers. The facility was certificated in Docket No. G–232.

Comment date: December 27, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP89-239-000]

ANR Pipeline Co.; Application

December 6, 1988.

Take notice that on November 17, 1988, ANR Pipeline company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-239-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain certificated levels of firm sales entitlements of nine of its firm sales customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

ANR states that pursuant to section 284 of the Commission's Regulations, nine of ANR's eligible firm sales customers, City of Albany, Missouri; Allerton Gas Company; City of Bethany, Missouri; City of Milan, Missouri; St. Joseph Power & Light Company; City of Stanberry, Missouri; City of Unionville, Missouri; City of Wayland, Iowa; and Wisconsin Power and Light Company, have elected to convert a portion of their firm sales entitlements to firm transportation. ANR proposes to abandon a total of 8,117 dt of contract demand and 589,086 dt of annual contract quantity for such nine firm sales customers under Rate Schedules CD-1 and SGS-1 of Original Volume No. 1 of its FERC Gas Tariff.

Pursuant to 18 CFR 284.10(d)(2) of the exercise of the customers' option to convert constitutes consent to the proposed abandonment. Accordingly, any person desiring to be heard or any person, other than the converting customers, desiring to make any protest with reference to said application should on or before December 27, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission with be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Northern to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ89-1-32-000]

Colorado Interstate Gas Co.; Quarterly Purchased Gas Adjustment

December 5, 1988.

On November 30, 1988, Colorado Interstate Gas Company ("CIG") filed the following proposed tariff sheets to reflect a quarterly purchased gas adjustment ("PGA"):

Thirty-sixth Revised Sheet No. 7
Thirty-sixth Revised Sheet No. 8

CIG requests that these proposed tariff sheets be made effective on January 1, 1989.

CIG states this filing, *inter alia*, reflects no change in demand, and a 4.9 cent increase in the commodity rate for the G-1, P-1, PR-1, H-1, F-1 and SG-1 Rate Schedules, compared with rates filed by CIG on August 1, 1988, and accepted by the Commission effective October 1, 1988 in Docket No. TA89-1-32.

CIG states that copies of the filing have been served upon CIG's jurisdictional customers and public bodies, and are otherwise available for public inspection at CIG's offices in Colorado Springs, Colorado.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214) by December 13, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-201-004]

East Tennessee Natural Gas Co.; Rate Filing Pursuant to Tariff Provisions

December 5, 1988.

Take notice that on November 30, 1988, East Tennessee Natural Gas Company (East Tennessee) filed Thirteenth Revised Sheet No. 5 to its FERC Gas Tariff to be effective January 1, 1989.

East Tennessee states that the purpose of the filing is to flow through the second demand surcharge implemented by Tennessee Gas Pipeline Company in Docket No. RP88-191 effective January 1, 1989. East Tennessee is flowing these charges to its customers pursuant to Article 30 of its FERC gas tariff, which was accepted by order of the Commission on July 28, 1988.

East Tennesseee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 13, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to be come a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP89-33-000]

Northern Border Pipeline Co.; Proposed Changes in FERC Gas Tariff

December 6, 1988.

Take notice that Northern Border Pipeline Company (Northern Border), on November 30, 1988, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1. Northern Border projects that the proposed changes will increase jurisdictional revenues by $8.5 million during the first year that such changes are in effect.

By this filing Northern Border is proposing to increase its Operation Phase Rate, which is its allowed rate of return on equity to 16.0 percent from the currently effective rate of 14.5 percent. Northern Border is also proposing to include amounts recorded in 426.1 Donations, not to exceed $20,000 a year, in Northern Border's cost of service and to allocate interest expense, used in the calculation of income taxes, on a ratio of debt to total capitalization.

Northern Border proposes an effective date for this filing of January 1, 1989. Copies of this filing have been sent to all of Northern Border's customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of this chapter. All such motions or protests should be filed on or before December 13, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28405 Filed 12-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TQ89-1-27-000]

North Penn Gas Co.; Proposed Changes in FERC Gas Tariff

December 5, 1988.

Take notice that North Penn Gas Company (North Penn) on November 30, 1988 tendered for filing Ninety-First Revised Sheet No. PGA-1 to its FERC Gas Tariff First Revised Volume No. 1.

North Penn states that the revised tariff sheet is filed pursuant to section 14 of the General Terms and Conditions of North Penn's FERC Gas Tariff to reflect changes in the cost of gas for the period December 1, 1988 through February 28, 1989 and is proposed to be effective December 1, 1988. The proposed change reflects a decrease in the average cost of gas for the G-1 Rate Schedule of 81.792¢ per Mcf.

North Penn requests waiver of the Commission's Rules and Regulations pertaining to the thirty-day notice requirement stating that it did not receive its suppliers' changes in rates in order to make a timely filing and that it has been awaiting the Commission's actions on these changes in rates so that it would not have to make duplicate filings to reflect the proper supplier rates.

While North Penn believes that no other waivers are necessary in order to permit this filing to become effective December 1, 1988, as proposed, North Penn respectfully requests waiver of any of the Commission's Rules and Regulations as may be required to permit this filing to become effective December 1, 1988, as proposed.

Copies of this letter of transmittal and all enclosures are being mailed to each of North Penn's jurisdictional customers and State Commissions shown on the attached service list.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 13, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervent. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28406 Filed 12-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP89-272-000]

Panhandle Eastern Pipe Line Co.; Application

December 6, 1988.

Take notice that on November 22, 1988, Panhandle Eastern Pipe Line Company (Panhandle), Post Office Box 1642, Houston, Texas 77251-1642 filed in Docket No. CP89-272-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon in part certain certificated levels of firm sales entitlements of Central Illinois Light Company (CILCO), one of its firm sales customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Panhandle states that pursuant to section 284 of the Commission's Regulations, CILCO has elected to convert a portion of its firm sales entitlements to firm transportation. Panhandle proposes to abandon a total of 29,060 dt of contract demand for CILCO under Rate Schedule G-2 of Original Volume No. 1 of its FERC Gas Tariff.

It is stated that Panhandle and CILCO have entered into a Service Agreement dated April 1, 1988, which provides, effective April 1, 1988, for a reduction of CILCO's sales contract demand level by nine percent. Panhandle states that the sales service was converted to firm transportation on April 1, 1988. Subsequently, it is stated that CILCO and Panhandle entered into a second Service Agreement, dated August 1, 1988, effective August 1, 1988, to reduce firm sales service further, as a result of a second conversion pursuant to § 284.10, for an aggregate reduction of fifteen percent. According to Panhandle, the corresponding firm transportation is being performed in accordance with the terms and conditions of Panhandle's Rate Schedule PT-Firm, as such may be amended from time to time, or a successor tariff. Accordingly, Panhandle seeks authority for partial abandonment of CILCO's current firm sales entitlement by 17,727 Mcf per day (Mcfd), to be effective April 1, 1988, and by a further 11,333 Mcfd to be effective August 1, 1988.

Panhandle requests an April 1, 1988, effective date for the initial abandonment authorization requested and an August 1, 1988, effective date for the subsequent abandonment requested. The effective date of the reduction and conversion is proposed to be simultaneous, as agreed upon by Panhandle and CILCO. Panhandle states that this proposal is in accordance with the Commission's stated concern that customers be protected from the potential of incurring the cost of both transportation and sales for the portion of firm sales service to be converted.

It is stated that the abandonment requested is without prejudice to recovery of any costs associated with service to CILCO including those matters pending in Docket Nos. RP88-240-000, RP88-241-000, RP89-9-000 and RP89-10-000.

BEST COPY AVAILABLE

Pursuant to 18 CFR 284.10(d)(2) the exercise of the customers' option to convert constitutes consent to the proposed abandonment. Accordingly, any person desiring to be heard or any person, other than the converting customers, desiring to make any protest with reference to said application should on or before December 27, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CAR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Panhandle to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Tennessee Gas Pipeline Co.;

[Docket No. RP88-191-005]

December 6, 1988.

Take notice that on November 30, 1988, Tennessee Gas Pipeline Company (Tennessee) filed First Revised Sheet Nos. 40 through 44 to Volume No. 1 of its FERC Gas Tariff.

Tennessee states that this filing is in accord with the Stipulation and Agreement (October 14, 1987) in *Tennessee* Docket Nos. RP86-119, *et al.* and sets forth the Take-or-Pay Demand Rate Surcharge for each of its Rate Schedules CD, G and GS customers to be effective for the period January 1, 1989 through June 30, 1989. The surcharge is based on fifty percent of the non-affiliate, non-recoupable take-or-pay and contract reformation costs incurred by Tennessee through November 30, 1988. These costs include (i) the amounts Tennessee has commenced recovery of pursuant to its June 10, 1988 filing in this proceeding, representing costs incurred through May 31, 1988, (ii) carrying charges on those amounts calculated at the FERC rate, and (iii) an additional $69,387,331, representing amounts incurred during the period June 1, 1988 through November 30, 1988.

The tariff sheets are proposed to be effective January 1, 1989.

Tennessee states that copies of the filing have been mailed to all parties in this proceeding, affected customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 13, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-27-010 and Docket No. RP88-264-002]

United Gas Pipe Line Co.; Tariff Filing

December 6, 1988.

Take notice that on November 30, 1988, United Gas Pipe Line Company (United) tendered for filing revised tariff sheets, and work papers and schedules related thereto, as follows:

Substitute First Revised Sheet No. 4-G1
Substitute First Revised Sheet No. 4-H
Substitute First Revised Sheet No. 4-I
Substitute First Revised Sheet No. 4-J
Substitute First Revised Sheet No. 4-K

United states that this filing is made pursuant to the order of the Federal Energy Regulatory Commission (Commission) issued in Docket Nos. RP88-27 and RP88-264 on October 31, 1988.

United states this filing revises its September 30, 1988 filing to reflect (1) that customers which depart United's system after the effective date of the proposal and which are assessed costs under it may pay their remaining liability as a lump sum or continue under the amortization schedule at their option; (2) only the inclusion of those costs attributable to binding agreements entered before September 30, 1988; (3) the crediting of any unused take-or-pay credits arising from Docket No. RP85-209 against that customers liability under Docket No. RP88-264; and (4) procedures for reconciling the take-or-pay costs collected with actual settlement payments made.

Further, United states that due to the Commission's November 23, 1988 order in Docket No. CP87-524-001, its compliance filing reflects the same allocation of take-or-pay costs as that contained in United's September 30, 1988 filing. United avers that the Commission's November 23, 1988 order obscures the holding of Ordering Paragraph (B)(1) of the Commission's October 31, 1988 order. United has continued to reflect in this filing the allocation of take-or-pay costs to those

customers who have previously received abandonment authorization, and United therefore requests the Commission to clarify the alleged conflict created by its October 31, 1988 and November 23, 1988 orders.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, on or before December 13, 1988, and in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Such motion will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person desiring to become a party must motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA89-1-11-000]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

December 5, 1988

Take Notice that on November 30, 1988, United Pipe Line Company (United) tendered for filing the following tariff sheets:

First Revised Volume No. 1
Eighty-Fourth Revised Sheet No. 4
Third Revised Sheet No. 4.1

United States the proposed effective date of the tariff sheets in this docket is January 1, 1989. The above referenced tariff sheets are being filed pursuant to §§ 154.304 and 154.308 of the Commission's regulations to reflect the changes in the purchased gas cost adjustment provisions contained in Section 19 of United's FERC Gas Tariff, First Revised Volume No. 1.

United states that it has filed tariff sheets to reflect a 1.38¢ decrease in gas cost. This includes a decrease of 9.97¢ in its current gas cost. The surcharge to be effective on January 1, 1988, and remain in effect throughout 1989, is 16.59¢. This reflects projected recovery of approximately $7.1 million in Additional Deferred Costs in accordance with United's settlement in Docket Nos. TA87-1-11-000, *et al.* and TA87-2-11-000 *et al.*

United states that the revised tariff sheet and supporting data are being mailed to its jurisdictional sales customers and to interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in such accordance with §§ 385.214 and 385.211 of the Commission's regulations. All such motions or protests should be filed on or before December 13, 1988.

Protests will be considered by the Commission in determining appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

West Texas Gas, Inc.; Filing

[Docket No. TQ89-1-35-000]

December 6, 1988.

Take notice that on November 30, 1988, West Texas Gas, Inc. (WTG) filed Thirteenth Revised Sheet No. 3a to its FERC Gas Tariff, Original Volume No. 1, proposed to be effective January 1, 1989. This tariff sheet was filed by WTG in accordance with the Commission's purchased gas adjustment regulations.

Copies of the filing were served upon WTG's customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214 (1987)). All such motions or protests should be filed on or before December 13, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 88-28410 Filed 12-8-88; 8:45 am]

BILLING CODE 6717-01-M

Williston Basin Interstate Pipeline Co.; Proposed Changes In FERC Gas Tariffs

[Docket No. RP89-34-000]

December 5, 1988.

Take notice that on November 30, 1988, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, tendered for filing proposed changes to its FERC Gas Tariffs, First Revised Volume No. 1, Original Volume No. 1-A, Original Volume No. 1-B, and Original Volume No. 2 applicable to its jurisdictional gas sales and transportation customers. Williston Basin states that the proposed changes are designed to increase revenues from jurisdictional sales and transportation services by $4,666,050 based on the 12-month period ending July 31, 1988, as adjusted. The proposed effective date is January 1, 1989.

Williston Basin states this filing continues the basic rate design structure proposed in Docket Nos. RP88-197-000 *et al.* which was authorized to become effective September 24, 1988, pursuant to the Commission's Order Accepting Tariff Sheets, Rejecting Alternate Tariff Sheets, Granting Request for Clarification and Requiring Revised Filing, issued November 25, 1988. Williston Basin's filing in Docket Nos. RP88-197-000 *et al.* provided for the implementation of the IT-1 and FT-1 rate schedules and the commencement of NGPA Section 311 transportation service. Just prior to the submission of the instant filing, Williston Basin tendered an application to the Commission under section 7 of the NGA requesting authority to institute revised Maximum Daily Delivery Quantities and Annual Entitlement Quantities applicable to Williston Basin's sales customers. The instant filing reflects these two impacts on the billing determinants.

Copies of this filing were served on the Company's jurisdictional customers and interested state regulatory agencies.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before December 13, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to

become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28411 Filed 12-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket TQ89-1-49-001]

Williston Basin Interstate Pipeline Co.; Additional Purchased Gas Cost Adjustment Filing

December 5, 1988.

Take notice that on November 29, 1988, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, tendered for filing as part of its FERC Gas Tariff the following tariff sheets:

Original Volume No. 1-A

Eleventh Revised Sheet No. 11
Fourteenth Revised Sheet No. 12
Fifth Revised Sheet No. 97A

Original Volume No. 1-B

Fourth Revised Sheet No. 10
Fourth Revised Sheet No. 11

Original Volume No. 2

Substitute Seventeenth Revised Sheet No. 10
Ninth Revised Sheet No. 11B

The Company respectfully requests waiver of the Commission's Regulations to the extent necessary for these tariff sheets to become effective as of November 1, 1988.

Williston Basin states the instant filing is tendered to revise the fuel adder rates coincide with Williston Basin's latest filed PGA in Docket No. TQ89-1-49-000 which was subsequently approved by the Commission by an OPPR Letter Order dated October 31, 1988.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding must file a motion to intervene on or before December 13, 1988. Copies of the filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3488-2]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and is available to the public for review and comment. The ICR describe the nature of the information collection and its expected cost burden; where appropriate, it includes the actual data collection instrument.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: Recordkeeping Requirements for Producers of Pesticides (EPA ICR #0143; OMB #2070-0028). This is a renewal of a previously approved collection.

Abstract: This collection requires producers of pesticides to maintain records related to production and other operations. EPA may inspect these records to determine compliance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). Producers themselves may use the records to fulfill various FIFRA-mandated reporting requirements.

Burden Statement: The estimated public recordkeeping burden for this collection of information is 2 hours per pesticide producer.

Respondents: Pesticide producers.

Estimated No. of Respondents: 13,918.

Estimated Total Annual Burden on Respondents: 27,836.

To obtain a copy of the FCR package contact Sandy Farmer on (202) 382-2740.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223), 401 M Street, SW., Washington, DC 20460,

and

Tim Hunt (ICR #0143), Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place NW., Washington, DC 20503, (Telephone (202) 395-3084).

Date: November 28, 1988.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared November 21, 1988 through November 25, 1988 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5074.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 22, 1988 (53 FR 13318).

Draft EISs

ERP No. DS–AFS–J28015–CO, Rating EC2, Rock Creek Reservoir, Routt National Forest or Muddy Creek Reservoir, Kremmling Resource Area, Construction, Special Use and 404 Permits, Routt and Grand Counties, CO.

Summary: EPA is pleased to see the shift to Muddy Creek as the proposed reservoir site. However, environmental concerns over the need to adquately mitigate the loss of 892 acres of wetlands remain. Further, EPA is concerned that the proposed 390 acres of wetland mitigation proposed may not be adequate to fully compensate for the loss wetland functions. Questions also remain on how the HEP model was applied.

ERP No. D–UAF–K11032–CA, Rating EC2, March Air Force Base Land Conveyance for Construction of a New 15th Air Force Headquarters Building, a Non-commissioned Officers Professional Education Center and a 15th Air Force Band Center, Implementation, Riverside County, CA.

Summary: EPA expressed environmental concerns, primarily on the need for the proposed project to fully comply with the legislative and regulatory requirements of the Comprehensive Environmental Response, Compensation and Liability Act, as amended by the Superfund Amendments and Reauthorization Act (CERCLA/SARA). The final EIS needs to disclose whether any CERCLA hazardous substances exist on the 845 acres proposed for conveyance to a private party and whether the construction of three new buildings on the Main Base would affect any ongoing or planned CERCLA investigation or remedial work.

Final EISs

ERP No. F–BLM–K60017–CA, Western Mojave Land Tenure Adjustments Project, Implementation, Kern, Los Angeles, and San Bernandino Counties, CA.

Summary: EPA requested that the Record of Decision contain a commitment that the BLM will have a mechanism in place to ensure that all future site-specific environmental analyses for land exchanges provide inventory for hazardous substances.

Dated: December 6, 1988.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

BILLING CODE 6560–50–M

[ER–FRL–3489–2]

Designation of Ocean Dredged Material Disposal Sites (ODMDS) Offshore Freeport, TX; Intent To Prepare an Environmental Impact Statement (EIS)

AGENCY: U.S. Environmental Protection Agency (EPA), Region VI.

ACTION: Notice of intent to prepare an EIS on the designation of two ODMDSs offshore Freeport, Texas.

Purpose: In accordance with section 102 of the Marine Protection, Research and Sanctuaries Act of 1972 and 40 CFR Part 228 (Criteria for the Management of Disposal Sites for Ocean Dumping), EPA will prepare a Draft EIS on the designation of two ODMDSs offshore Freeport, Texas.

For Further Information and to Be Placed on the Project Mailing List Contact: Mr. Norm Thomas (6E–F), Chief, Federal Activities Branch, EPA, 1445 Ross Avenue, Dallas, Texas 75202–2733, Telephone: (Commerical) 214/655–2260 or (FTS) 255–2260.

SUMMARY: The Corps of Engineers (COE), Galveston District, proposes to expand and relocate the Freeport Harbor Entrance and Jetty Channels. This expansion and relocation will produce approximately 5.1 million cubic yards (mcy) of construction (new work) material to be discharged offshore. In addition, approximately 2.1 mcy of maintenance material will be dredged annually and disposed offshore.

Need for Action: The COE has requested that EPA designate two ODMDSs offshore Freeport, Texas. One site is for the one-time disposal of virgin construction material and the other site is for the routine disposal of future maintenance material from Freeport Harbor (45-Foot Project), Texas. An EIS is required to provide the necessary information to evaluate alternatives and designate disposal sites.

Alternatives: Alternatives to be considered in the Draft EIS include no action, upland disposal, and ocean disposal.

Scoping: A scoping meeting will not be held. Scoping with affected federal, state and local agencies and with interested parties is being accomplished by correspondence.

Estimated Date of Release: The Draft EIS should be available in January 1989.

Responsible Official: Mr. Robert E. Layton Jr., P.E., Regional Administrator.

Richard E. Sanderson,

Director, Office of Federal Activities.

BILLING CODE 6560–50–M

[OPTS–59265A; FRL–3488–5]

Certain Chemicals; Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(l) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME–89–2. The test marketing conditions are described below.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Robert Wright, III, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Room E–611, 401 M Street SW., Washington, DC 20460, (202) 382–7800.

SUPPLEMENTARY INFORMATION: Section 5(h)(l) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME–89–2. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–89–2. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until five years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.

2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. Copies of the bill of lading that accompanies each shipment of the TME substance.

T–89–2

Date of Receipt: October 20, 1988.
Notice of Receipt: November 9, 1988 (53 FR 45385).
Applicant: Confidential.
Chemical: (G) Acrylate acrylonitrile vinylacetate copolymer.
Use: Laminating adhesives.
Production Volume: Confidential.
Number of Customers: Confidential.
Test Marketing Period: Eighteen months, commencing on first day of manufacture.
Risk Assessment: EPA identified no significant health or environmental concerns for the test market substance. Therefore, the test market substance will not present any unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: December 2, 1988.

Wendy Cleland-Hamnett,

Deputy Director, Chemical Control Division, Office of Toxic Substances.

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TRSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for secton 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of twenty-six such PMNs and provides a summary of each.

DATES: Close of Review Periods:

Manufacturer. Quantum Chemical Corp., Emery Div.
Chemical. (G) Substituted lactone.
Use/Production. (S) Chemical intermediate. Prod. range: 1,000 kg/yr.

P 89–119

Manufacturer. Quatum Chemicals Corp., Emery Div.
Chemical. (G) Substituted lactone.
Use/Production. (G) Intermediate chemical. Prod. range: 1,000 kg/yr.

P 89–120

Manufacturer. NL Chemicals.
Chemical. (G) Polyurethane resin.
Use/Production. (G) Polyurethane resin to be used in an open nondispersive manner. Prod. range: Confidential.

P 89–121

Manufacturer. NL Chemical.
Chemical. (G) Acrylic modified alkyd.
Use/Production. (G) Acrylic modified alkyd to be in an open, nondispersive manner. Prod. range: Confidential.

P 89–122

Manufacturer. Hoechst Celanese Corporation.
Chemical. (G) Organic phosphate ester.
Use/Production. (S) Antistatic agent. Prod. range: 25,000–120,000 kg/yr.

P 89–123

Manufacturer. Confidential.
Chemical. (G) Alkyl amine.
Use/Production. (G) Dispersive agent use. Prod. range: Confidential.
Toxicity Data. Acute oral toxicity: LD50 5.0 g/kg species(Rat).

P 89–124

Manufacturer. Confidential.
Chemical. (G) Halogenated polyacrylate/methacylate.
Use/Production. (G) Resin in a millwork prome. Prod. range: 80,000–100,000 kg/yr.

P 89–125

Manufacturer. Confidential.
Chemical. (G) Acrylic methacrylic polymer.
Use/Production. (G) Openly applied industrial coating. Prod. range: 16,000–163,000 kg/yr.

P 89–126

Manufacturer. Confidential.
Chemical. (G) Styrenated acrylate-methacrylate.
Use/Production. (S) Chemical intermediate. Prod. range: 22,000–27,000 kg/yr.

P 89–127

Manufacturer. E.I. Du Pont de Nemours & Company, Inc.,
Chemical. (G) Diisocyanate.
Use/Production. (S) Monomer to make polyurethane. Prod. range: Confidential.
Toxicity Data. Acute oral toxicity: LD50 760 mg/kg species(Rats). Acute dermal toxicity: LD50>4640 mg/kg species(Rabbit). Eye irritation: strong species(Rabbits). Skin irritation: moderate species(Rabbit).

P 89–128

Manufacturer. Hercules Incorporated.
Chemical. (G) Hydrophhobically-modified hydroxethyl cellulose (HMHEC).
Use/Production. (S) Thickening agent for latex paint, inks, & industrial application. Prod. range: Confidential.

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in

the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984 (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of twelve such PMNs and provides a summary of each.

[FRL-3487-8]

Announcement of a Public Hearing on the Proposed Determination To Prohibit, or Deny the Specification, or the Use for Specification of an Area as a Disposal Site; Ware Creek, James City County, VA

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: A public notice entitled "Proposed Determination to Prohibit, or Deny the Specification, or the Use for Specification, of an Area as a Disposal Site: Ware Creek, James City County, Virginia" was published in the **Federal Register** on November 18, 1988. (Request for a copy of that notice should be made to the person listed in the section below entitled **FURTHER INFORMATION.**) The November 18, 1988 notice announced the Environmental Protection Agency's (EPA) Region III Administrator's proposed determination to take action under section 404(c) of the Clean Water Act (CWA) to prohibit, deny, or restrict specification or use of certain Ware Creek waters in the area of James City County, Virginia, as a disposal site for dredged or fill materials in connection with construction of an impoundment for county water supply. The waters of the United States which are subject to the proposed section 404(c) action include those which would be affected by a dam proposed to be constructed across Ware Creek approximately 1,000 feet downstream from the confluence of Ware Creek and France Swamp. This section 404(c) action is being proposed because EPA Region III has reason to believe that filling and inundating the above-described waters of the United States, including wetlands, would have an unacceptable adverse effect on fishery areas, wildlife and recreational areas. Furthermore, the EPA has reason to believe that alternatives are available to James City County which will meet projected water supply needs at less environmental cost and which are economically feasible. The purpose of this notice is to announce the scheduling of a hearing to provide the opportunity to comment on the Regional Administrator's proposed determination to prohibit, deny, or restrict the specification or use of all or portions of Ware Creek and its tributaries as a disposal site pursuant to section 404(c) of the Clean Water Act.

Public Hearing

A public hearing is scheduled for January 18, 1989 at the James City County Government Center's Board Room at 101-C Mounts Bay Road, Williamsburg, Virginia at 7 pm. Written comments may be submitted prior to the hearing. Any person may appear at the hearing and present oral or written statements and may be represented by counsel or other authorized representative. Participants will be afforded an opportunity for rebuttal. The Regional Administrator's designee will be the Presiding Officer at the hearing. The Presiding Officer will establish reasonable limits on the nature and length of the oral presentation. No cross examinations of any hearing participant will be permitted, although the Presiding Officer may make appropriate inquiries of any such participant. The hearing record will remain open for the submittal of written comments until February 2, 1989, 15 days from the close of the public hearing. A record of the hearing proceeding shall be made by a verbatim transcript. Copies of the transcript of the proceedings may be purchased by any person from EPA after the close of the comment period. Copies will be available for public inspection at the Region III EPA office, 841 Chestnut Building, Philadelphia, PA after the close of the comment period. The cost of a copy will correspond directly to the number of pages enclosed within the transcript.

All written statements and information offered in evidence at the hearing will constitute a part of the hearing file which will become part of the administrative record of the Regional Administrator's determination.

DATES: All written comments should be submitted to the person listed under **ADDRESSES,** below, no later than

February 2, 1989, 15 days from the close of the public hearing. Written comments may be submitted to the Presiding Officer at the time of the hearing.

ADDRESSES: Comments should be sent to Ms. Barbara D'Angelo, Environmental Assessment Branch (3ES40), U.S. Environmental Protection Agency Region III, 841 Chestnut Bldg., Philadelphia, PA 19107.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara D'Angelo, Environmental Assessment Branch (3ES40), U.S. EPA Region III, 841 Chestnut Bldg., Philadelphia, PA 19107, (215) 597–9301. If you wish to receive a copy of the public notice entitled "Proposed Determination to Prohibit, or Deny the Specification, of an Area as a Disposal Site: Ware Creek, James City County, Virginia" published on November 18, 1988, please contact Ms. D'Angelo and a copy will be mailed to you.

SUPPLEMENTARY INFORMATION: The November 18, 1988 public notice entitled "Proposed Determination to Prohibit, or Deny the Specification, or the Use for Specification, of an Area as a Disposal Site: Ware Creek, James City County, Virginia" reviewed the 404(c) process, provided a description of the subject wetland site, reviewed the proceedings to date on the subject action, discussed the basis for the proposed determination and, solicited comments.

During the scheduled hearing, EPA would like to obtain comments on: (1) Whether filling and/or inundating the above-described Ware Creek waters including wetlands, would have an unacceptable adverse effect on fishery areas, wildlife and recreational areas; (2) the vegetative, hydrologic and other ecological characteristics of the project area including the proposed lake impact area and balance of the Ware Creek watershed; (3) observations of, or information concerning, fish and wildlife (including but not limited to endangered, or threatened species) utilizing the project area and recreational use (including hunting and fishing) of the project area; (4) whether the Regional Administrator should recommend to the EPA Assistant Administrator for Water the determination to prohibit, deny, or restrict the specification or use of all or portions of Ware Creek and its tributaries as a disposal site for construction of the Ware Creek reservoir. Comments should be submitted no later than February 2, 1989 to the person listed above under **ADDRESSES.** All comments received will be fully considered by the Regional Administrator in making his determination to prohibit, deny, or restrict filling of the Ware Creek site or to withdraw this proposed determination.

James M. Seif,

Regional Administrator, Region III.

BILLING CODE 6718–02–M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC, Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200190.

Title: Port Authority of New York and New Jersey Terminal Agreement.

Parties:

The Port Authority New York and New Jersey (Port Authority)
Mitsui OSK Lines (America) Inc. (Mitsui).

Synopsis: The agreement provides for the Port Authority to pay Mitsui $25/import and $50/export container with cargo loaded or unloaded from Mitsui's vessels at a marine terminal in the Port of New York/New Jersey. Each container must have been shipped by rail to or from points more than 260 miles from the Port, and must have been the subject of a rail freight bill or waybill issued after September 12, 1988.

Agreement No.: 224–010862–002.

Title: Georgia Ports Authority Terminal Agreement.

Parties:

Georgia Ports Authority
Scanbarber A/S.

Synopsis: The agreement extends the term of the basic lease agreement to December 31, 1990.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: December 6, 1988.

[FR Doc. 88–28319 Filed 12–8–88; 8:45 am]

BILLING CODE 6730–01–M

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission,

Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in §§ 560.7 and/or 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: 224–200189.

Title: Port of Houston Authority Terminal Agreement.

Parties: Port of Houston Authority of Harris County, Texas (Port) and James J. Flanagan Steveodres (Flanagan).

Filing party: Algenita Scott Davis, Counsel, Port of Houston Authority, P.O. Box 2562, Houston, TX 77252–2562.

Synopsis: The agreement provides that Flanagan will perform public marine terminal services, including freight handling, cargo loading and unloading, at the Port's wharves and transit sheds numbers 21 through 23. The term of the agreement expires December 31, 1990.

By Order of the Federal Maritime Commission.

Dated: December 6, 1988.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

December 2, 1988.

Background

Notice is hereby given of the submission of proposed information collection(s) to the Office of Management and Budget (OMB) for its review and approval under the Paperwork Reduction Act (Title 44 U.S.C. Chapter 35) and under OMB regulations on Controlling Paperwork Burdens on the Public (5 CFR Part 1320). A copy of the proposed information collection(s) and supporting documents is available from the agency clearance officer listed in the notice. Any comments on the proposal should be sent to the OMB desk officer listed in the notice. OMB's usual practice is not to take any action on a proposed information collection until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

FOR FURTHER INFORMATION CONTACT: *Federal Reserve Board Clearance Officer*—Martha Bethea—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202–452–3181).

OMB Desk Officer—Gary Waxman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202–395–7340).

Request for OMB Approval to Extend, Without Revision, the Following Reports

Report title: Quarterly Country Exposure Report.

Agency form number: FFIEC 009.

OMB Docket number: 7100–0035.

Frequency: Quarterly.

Reporters: State member banks and bank holding companies that have a foreign office or subsidiary, International Banking Facility or Edge or Agreement subsidy.

Estimated number of respondents: 31.

Average hours per response: 24.

Annual reporting hours: 2,976.

Small businesses are not affected.

General description of report: This information collection is mandatory [12 U.S.C. 248(a) and 1844(c)] and is given confidential treatment [5 U.S.C. 552(b)(4) and (b)(8)].

This interagency report collects information on international claims of U.S. banks and bank holding companies that is used for supervisory and analytical purposes. The information is used to monitor country exposure of banks to determine the degree of risk in their portfolios and the possible impact on U.S. banks of adverse developments in particular countries.

2. *Report title:* Country Exposure Information Report.

Agency form number: FFIEC 009a.

OMB Docket number: 7100–0035 (formerly 7100–0188).

Frequency: Quarterly.

Reporters: State member banks and bank holding companies.

Estimated number of respondents: 31.

Average hours per response: 5.

Annual reporting hours: 620.

Small businesses are not affected.

General description of report: This information collection is mandatory [12 U.S.C. 248(a) and 1844(c)]. The information is available to the public.

This report is a supplement to the Quarterly Country Exposure Report (FFIEC 009) and provides publicly available information on material foreign country exposures (all exposures to a country in excess of one percent of total assets or 20 percent of capital, whichever is less) of U.S. banks and bank holding companies that file the FFIEC 009 report. Reporting institutions must also furnish a list of countries in which they have lending exposures above .75 percent of total assets or 15 percent of total capital, whichever is less.

Board of Governors of the Federal Reserve System, December 2, 1988.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on December 2, 1988.

Public Health Service

(Call Reports Clearance Officer on 202–245–2100 for copies of package)

1. National Survey of Health and Sexual Behavior: AIDS Behavior Pretest—NEW—This request is for approval of an AIDS Behavior Pretest sponsored by the National Institute of Child Health and Human Development of the National Institute of Health (NICHS/NIH). The project provides data on the distribution of sexual behavior of the general population of the U.S. The results of the pretest will be used to develop the strategy for a full-scale study and offer some interim measures of sexual activity in the U.S. Respondents will include a sample of all persons in the civilian non-institutional populations of the United States. Respondents: Individuals or households. Number of Respondents: 2,300; Number of Responses per Respondent: 1.058; Average Burden per Response: 1.07; Estimated Annual Burden: 2,610 hours.

OMB Desk Officer: Shannah Koss-McCallum.

As mentioned above, copies of the information collection clearance

packages can be obtained by calling the Reports Clearance Officer on one of the following numbers:

PHS: (202) 245–2100
HCFA: (301) 966–2088
SSA: (301) 965–4149
OS: (202) 472–4415

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

Date: December 6, 1988.

James E. Larson,

Acting Deputy Assistant Secretary for Information Resources Management.

[FR Doc. 88–28360 Filed 12–8–88; 8:45 am]

BILLING CODE 4150–04–M

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on December 2, 1988.

Public Health Service

(Call Reports Clearance Officer on 202–245–2100 for copies of package)

1. Drug Quality Reporting System (DQRS)—0910–0024—This voluntary reporting system monitors the quality of drugs in the marketplace. The system has rapidly uncovered health hazards or circumstances which may increase patient/consumer risk. This mechanism utilizes the professionalism of the nation's pharmacists. DQRS information also provides FDA with timely surveillance data to direct field inspection operations. Respondents: Individuals or households, Businesses or other for-profit; Number of Respondents: 3,500; Number of Responses per Respondent: 1.15; Average Burden Per Response: 0.13; Estimated Annual Burden: 530 hours.

2. Assessment of NIH, Industry, and Academic Relationships in Restorative Material Research—NEW—To utilize federal research funds most effectively, information is needed about the role played by private industry in support of similar research. This study of dental materials research will use data from research performers and research sponsors to examine research collaboration among federal and private sources regarding support and performance of research, and to develop methods that can be used in other areas of biomedical research. Respondents: Individuals or households, State or local governments, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations. Number of Respondents: 988; Number of Responses per Respondent: 1; Average Burden Per Response: .362; Estimated Annual Burden: 358 hours.

3. Data collection for Analysis of the Use and Costs of Medical, Social, and Support Services for Persons with HIV-Related Illnesses—Concept Clearance—NEW—This survey will obtain health resources utilization, cost and insurance information from patients with AIDS and other HIV-related illnesses across the country. Data will be used to estimate total resources used by patients and variations in patterns of use in order to guide policymakers in decisions regarding allocation of resources. Respondents: Individuals or households; Non-profit institutions; Estimated Annual Burden: 1 hour.

4. Regulation—Foreign Quarantine (42 CFR Part 71)—0920–0134—Foreign quarantine regulations implement the provisions of the Public Health Services (PHS) Act in preventing the introduction, transmission, or spread of communicable diseases from foreign countries into the United States. Inspections and control measures are undertaken with respect to conveyances, persons and shipments of animals and etiologic agents. The clearance request has been submitted with five separate information collection itemized burdens. Each collection is listed below. Respondents: Individuals or households/Businesses or other for-profit.

1st information collection, vehicle reporting		2nd information title reporting: dogs and cats
(§§ 71.21, 71.33(c), 71.35)		(§§ 71.51(b)(3), 71.51(d))
Number of Responses.	208	2505
Number of Responses Per Respondent.	10.2	1
Average Burden Per Responses.	1/60 or (.02)	16/30 or (.25)

3rd information collection		4th information collection
Title: Reporting (turtles) §71.52(d)		Reporting (nonhuman primates §71.53(d))
Number of Respondents.	10	100
Number of Responses Per Respondent.	1	1
Average Burden Per Response.	30/60 or (.5)	10/60 or (.167)

5th Information Collection	
Title: Recordkeeping (nonhuman primates) §71.533(e)	
Number of Respondents	175
Number of Respondents Per Respondent	—
Average Burden Per Response	—

Total Annual Burden for all Collection: 777.

OMB Desk Officer: Shannah Koss-McCallum.

Health Care Financing Administration

(Call Reports Clearance Officer on 301–594–1238 for copies of package)

1. Hospital Provider of Long Term Care Services (Swing-Bed) Survey Report Form—0938–0485—This survey form is an instrument used by the State agency to record data colleced in order to determine compliance with individual conditions of participation and report it to the Federal government. Respondents: Individuals or households, State or local governments, Federal agencies or employees, Small businesses or organizations. Number of Respondents: 1,500; Number of Responses per Respondent: 1; Average Burden per Response: .25; Estimated Annual Burden: 375.

2. Medicaid Eligibility Quality Control (MEQC)—Information Collection Requirements in 42 CFR 431.804 (d) (3) and (4)—0938–0344—The information being collected is an optional additional sample of Medicaid eligibility cases which may be used by Medicaid state agencies to demonstrate that their actual current error rate is lower than that projected by HCFA. The clearance request has been submitted reflecting Reporting and Recordkeeping burden hours separately. Each collection is listed below.

1st information collection		2nd information collection
TITLE: *Reporting*		*Record-keeping*
Annual Number of Respondents	10	10
Annual Frequency	400	
Annual Burden Per Response	.3475	92.6
Total Burden Hours	2,316	

OMB Desk Officer: Allison Herron.

Social Security Administration

(Call Reports Clearance Officer on 301–965–4149 for copies of package)

1. Report by Former Representative Payee—0960–0112—This form collects information from State agencies or institutions which were formerly payees for persons receiving Social Security benefits. The form is used by the Social Security Administration to determine if those benefits were received and used properly. Respondents: State or local governments. Number of Respondents: 8,000; Frequency of Response: 1; Average Burden Per Response: 15 minutes; Estimated Annual Burden: 2,000 hours.

OMB Desk Officer: Justin Kopca.

As mentioned above, copies of the information collection clearance package can be obtained by calling the Reports Clearance Officer on one of the following numbers:

PHS: (202) 245–2100
HCFA: (301) 966–2088
SSA: (301) 965–4149
OS: (202) 472–4415

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

Dated: December 6, 1988.

James E. Larson,

Acting Deputy Assistant Secretary for Information Resources Management.

BILLING CODE 4160–19–M

National Institutes of Health

John E. Fogarty International Center for Advanced Study in the Health Sciences; Meeting

Notice of meeting of the Fogarty International Center Advisory Board Pursuant to Pub. L. 92–463, notice is hereby given of the eleventh meeting of the Fogarty International Center (FIC) Advisory Board, January 24, 1989, in Building 31, A–Wing, Conference Room 4, at the National Institutes of Health.

The meeting will be open to the public from 8:30 a.m. to 2:30 p.m. The morning agenda willl include a report by the Director of the FIC; a report on the meeting of the Advisory Committee to the Director, NIH, on "Human Fetal Tissue Transplantation Research;" a report of the Commission on Health Research for Development Study on "The Role of Biomedical Research in Developing Countries Worldwide;" a presentation on the potential for collaborative activities between NIH's National Center for Nursing Research and FIC; an analysis of U.S. scientists who had postdoctoral foreign research experiences and their perceived hindrances or disincentives; and reports from working groups of the FIC Advisory Board.

In accordance with the provisions set forth in 552b(c)(9)(B), Title 5, U.S.C., the Board meeting will be closed to the public from 2:30 to 4:00 p.m. for discussion of specific long-range initiatives, the premature disclosure of which might hinder the implementation of such initiatives.

In accordance with the provisions of 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting will also be closed to the public from 4:00 p.m. to adjournment for the review, discussion, and evaluation of research fellowship applications. These applications contain information of a proprietary nature, including detailed research protocols, designs, and other technical information; and personal information about individuals associated with the applications.

Myra Halem, Committee Management Officer, Fogarty International Center, Building 38A, Room 609, National Institutes of Health, Bethesda, Maryland 20892 (301–496–1491), will provide a summary of the meeting and a roster of the committee members upon request.

Dr. Coralie Farlee, Assistant Director for Planning and Evaluation, Fogarty International Center (Executive Secretary), Building 38A, Room 609, telephone 301–496–1491, will provide substantive program information.

Dated: November 30, 1988.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

VOL 53 ISS 237 DE 9 1988 UMI

National Center for Nursing Research; Meeting of the Nursing Science Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Nursing Science Review Committee (NRRC), National Center for Nursing Research, January 11–13, 1989, Building 31C, Conference Room 7, National Institutes of Health, Bethesda, Maryland 20892.

This meeting will be open to the public on January 11, from 9 a.m. to 12:00 noon. Agenda items to be discussed will include Report of the Director, NCNR, NRRC Chairperson's Report, NRRC Executive Secretary's Report, and a presentation on the grant application review process.

Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d)) of Pub. L. 92–463, the meeting will be closed to the public on January 11 from 12 noon to recess, on January 12 from 9:00 a.m. to recess, and on January 13 from 9:00 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. The applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Eileen Raizen, Executive Secretary, Nursing Science Review Committee, National Center for Nursing Research, National Institutes of Health, Building 31A, Conference Room 2, Bethesda, Maryland 20892, (301) 496–0472, will provide a summary of the meeting, roster of committee members, and substantive program information upon request.

Dated: November 30, 1988.

Betty J. Beveridge,

Committee Management Officer, NIH.

National Institute of Child Health and Human Development, Meeting of the National Advisory Child Health and Human Development Council

Pursuant to Pub. L. 92–463, notice is hereby given of meeting of the National Advisory Child Health and Human Development Council, January 23–24, 1989, in Building 31, Conference Room 6, National Institutes of Health, Bethesda, Maryland, and the meeting of the Subcommittee on Planning on January 23 from 8:30 a.m. to 9:30 a.m. in Building 31, Room 2A03.

The Council Meeting will be open to the public on January 23 from 9:30 a.m. until 5:00 p.m. The agenda includes a report by the Director, NICHD, and a presentation by the Prevention Research Program. The meeting will be open on January 24 immediately following the review of applications if any policy issues are raised which need further discussion. The Subcommittee meeting will be open on January 23 from 8:30 a.m. to 9:30 a.m. to discuss program plans and the agenda for the next Council meeting. Attendance by the public will be limited to space available.

In accordance with the provision set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public on January 24 from 8:30 a.m. to completion of the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Linda Hall, Council Secretary, NICHD, Executive Plaza North, Room 520, National Institutes of Health, Bethesda, Maryland 20892, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of Council members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.864, Population Research, and 13.865, Research for Mothers and Children, National Institutes of Health)

Dated: November 30, 1988.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

National Institute of Neurological and Communicative Disorders and Stroke; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of the Committees of the National Institute of Neurological and Communicative Disorders and Stroke.

These meetings will be open to the public to discuss program planning, program accomplishments and special reports or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Summaries of meetings, rosters of committee members, and other information pertaining to the meetings can be obtained from the Executive Secretary indicated.

Name of Committee: National Advisory Neurological and Communicative Disorders and Stroke Council and Its Planning Subcommittee.

Date: January 11, 1989 (Planning Subcommittee).

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Preparation of a Settlement Roll of Indians of the Reservation

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Superintendent of the Northern California Agency of the Bureau of Indian Affairs is preparing a settlement roll of Indians of the Reservation under the Hoopa-Yurok Settlement Act of October 31, 1988. The Settlement Act directs the Secretary of the Interior to prepare a settlement roll of Indians of the Reservation who meet stated eligibility criteria. Persons named on the settlement roll will be entitled to participate in certain settlement provisions under the Hoopa-Yurok Settlement Act. In accordance with the Settlement Act, notice of the preparation of the settlement roll is to be published in the **Federal Register**.

DATE: Application forms for inclusion on the settlement roll of Indians of the Reservation are to be filed with the Superintendent, Northern California Agency, Bureau of Indian Affairs, P.O. Box 494879, Redding, California 96049, and must be postmarked, if mailed, or received, if delivered, no later than close of business on March 29, 1989.

FOR FURTHER INFORMATION CONTACT: Northern California Agency, Bureau of Indian Affairs, P.O. Box 494879, Redding, California 96049, telephone number: (916) 246–5141; or the Klamath Field Office, Bureau of Indian Affairs, P.O. Box 789, Klamath, California 95548, telephone number: (707) 482–6421.

SUPPLEMENTARY INFORMATION: This notice is published in exercise of the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs in the Departmental Manual at 209 DM 8.

Notice

Pursuant to the Hoopa-Yurok Settlement Act, Pub. L. 100–580, section 5(b), this is official notification to all "Indians of the Reservation," who were not on August 8, 1988, enrolled members of the Hoopa Valley Tribe, that they may apply for inclusion on the Indians of the Reservation Settlement Roll.

Application forms will be mailed to all plaintiffs in the *Short* cases. "*Short* cases" as defined in section 1(b)(11) of the Hoopa-Yurok Settlement Act means the cases entitled *Jessie Short et al.* v. *United States,* (Cl. Ct. No. 102–63); *Charline Ackley* v. *United States,* (Cl. Ct. No. 460.78); *Bret Aanstadt* v. *United States,* (Cl. Ct. No. 146–85L); and *Norman Giffen* v. *United States,* (Cl. Ct. No. 746–85L). In addition, application forms may be picked up or requested from the Klamath Field Office, Bureau of Indian Affairs, P.O. Box 789, Klamath, California 95548; the Hoopa Field Office, Bureau of Indian Affairs, P.O. Box 369, Hoopa, California 95546; the Northern California Agency, Bureau of Indian Affairs, P.O. Box 494879, Redding, California 96049; or the Sacramento Area Office, Bureau of Indian Affairs, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825. Parents and guardians should also request and submit applications for all minors or non compos mentis individuals. The executor of any estate is requested to submit an application for any "Indian of the Reservation" who died on or after October 31, 1988.

To establish eligibility applicants must meet the following criteria:

A. Be born on or prior to the living upon the date of enactment of the Act, October 31, 1988; and

B. Be citizens of the United States; and

C. Not be, on August 8, 1988, enrolled members of the Hoopa Valley Tribe, and

D. Qualify as an "Indian of the Reservation" as established by the United States Court of Claims in its March 31, 1982, decision, and by the United States Claims Court in its May 14, 1987, and March 1, 1988, decisions in the case of *Jessie Short et al.* v. *United States,* Cl. Ct. No. 102–68. The March 31, 1982, opinion sets out eligibility Standards A–E. The May 14, 1987, and March 1, 1988, decisions delineated the manifest injustice standard.

Standards A–E are as follows:

Standard A: Allottees of land on any part of the Reservation, living on October 1, 1949, and lineal descendants of allottees living on October 1, 1949.

Standard B: Persons living on October 1, 1949, and resident on the Reservation at that time, who have received Reservation benefits or services, and hold an assignment, or can make other proof that though eligible to receive an allotment, they have not been allotted, and the lineal descendants of such persons, living on October 1, 1949.

Standard C: Persons living on June 2, 1953, who have at least ¼ Reservation blood, as defined below, have forebears born on the Reservation and were resident on the Reservation for 15 years prior to June 2, 1953.

Standard D: Persons of at least ¼ Indian blood, born after October 1, 1949, and before August 9, 1963, to a parent who is or would have been, when alive, a qualified Indian of the Reservation under Standards A, B, or C, or has previously been held entitled to recover in the *Short* cases.

Standard E: Persons born on or after August 9, 1963, who are of at least ¼ Indian blood, derived exclusively from the qualified parent or parents who is or would have been, when alive, a qualified Indian of the Reservation under Standards A, B, or C, or has previously been held entitled to recover in the *Short* cases.

Reservation blood, as used in Standard C above, means the blood of the following tribes or bands: Yurok; Hoopa/Hupa; Grouse Creek; Hunstang/Hoonsotton/Hoonsolton; Miskut/Miscotts/Miscolts; Redwood/Chilula; Saiaz/Nongatl/Siahs; Sermalton; South Fork; Tish-tang-atan; Karok; Tolowa; Sinkyone/Sinkiene; Wailake/Wylacki; Wiyot/Humboldt; and Wintun.

Manifest Injustice Standard: A person may be enrolled under the *Short* cases' manifest injustice exception if he or she does not qualify under the A–E Standards and it would be manifestly unjust to exclude him or her from enrollment. To qualify under the manifest injustice exception, a person

must adequately demonstrate all of the following:

1. A significant degree of Indian blood (at least ¼ degree Indian blood), and

2. Personal connections to the Reservation shown through a substantial period of residence on the Reservation (approximately ten years of residence); and

3. Personal ties to the land of the Reservation and/or ties to the land through a lineal ancestor.

Any named plaintiff in the *Short* cases determined by the United States Claims Court to be eligible as a Short plaintiff will be required to submit a timely application. Any other Indian who feels he or she qualifies under the above eligibility criteria must provide, in addition to the application, documented evidence including birth certificates that he or she meets the eligibility requirements.

All applications must be postmarked, if mailed, or received, if delivered at the Bureau of Indian Affairs, Northern California Agency, Redding, California 96049, no later than the close of business on March 29, 1989. Application forms filed after March 29, 1989, will be rejected for failure to file on time regardless of whether the applicant otherwise meets the qualifications for eligibility.

All substantive requirements which applicants must meet, including the deadline for filing applications, to qualify for inclusion on the settlement roll of Indians of the Reservation have been set out in the Hoopa-Yurok Settlement Act. However, to provide procedures for BIA personnel to follow, a rulemaking document amending Part 62 of Title 25 of the Code of Federal Regulations will be published at a later date in the **Federal Register**. The rulemaking action will result in the procedures contained in Part 62 being applicable in the preparation of the settlement roll of Indians of the Reservation under the Hoopa-Yurok Settlement Act.

Donald F. Ashbra,

Acting Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

Request for Applications for Planning of Detention Centers

November 28, 1988.

ACTION: Notice of request for applications.

SUMMARY: The Bureau of Indian Affairs (BIA), Division of Law Enforcement Services in association with the Office of Facility Management and Construction Center, will be receiving applications for the Planning of New Institutions (PONI) Program for construction or renovation of detention centers in Indian Country. The PONI applications may be obtained by writing to Warren D. LeBeau, Staff Assistant—Detention, Bureau of Indian Affairs, Pinal Air Park, Building 18, Marana, Arizona, 85653. The completed applications must be received by the BIA Staff Assistant—Detention, no later than 45 days after publication of this notice in the **Federal Register**.

All PONI applications will be reviewed by an independent panel, rated and ranked according to an established criteria and prioritized according to demonstrated need. The panel will also consider the findings of the survey of detention facilities conducted by the National Academy of Public Administration and the applicant's demonstrated history of performance in maintaining and operating facilities. A list of the rankings will be published in the **Federal Register** after the completion of the review process. The Office of Construction Management, Department of the Interior, will use the list published in the **Federal Register** to determine priority of construction or renovation of detention center projects with available funds and for long range planning purposes.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Warren D. LeBeau, Staff Assistant—Detention, Division of Law Enforcement Services, (602) 629-5406 or Mr. Robert Montoya, Facility Management and Construction Center, (505) 766-2846.

W.P. Ragsdale,

Acting Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31349]

Wisconsin & Calumet Railroad Co., Inc.; Acquisition and Operation of Trackage Rights Exemption Over a Rail Line of the Northeast Illinois Regional Commuter Corp. (METRA)

Wisconsin & Calumet Railroad Company, Inc. (W&C) filed a notice of exemption to acquire overhead trackage rights to operate over a rail line owned by the Northeast Illinois Regional Commuter Corporation (METRA) between Fox Lake, IL (milepost 49.79) and Cragin Yard in Chicago, IL (milepost 7.0). The trackage rights became effective on November 9, 1988.

Comments must be filed with the Commission and served on: Thomas F. McFarland, Jr., Belnap, Spencer, McFarland, Emrich & Herman, 20 North Wacker Drive, Chicago, IL 60606.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 2, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in. Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report to keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Extension

Employment and Training Administration
Administrative Procedures—20 CFR 601 including form MA 87
1205-0222; MA 87
As needed
State or local governments
53 respondents; 53 hours; 1 hour per response; 1 form

Requires States to submit copies of their unemployment compensation laws for approval by the Secretary of Labor, as well as all relevant State materials which allow the Secretary to make findings required by the Internal Revenue Code, Social Security Act, and Wagner-Peyser Act.

Designation of Competent Person—OSHA 73 #1218-0011
Log of Inspection and Tests by Competent Person—OSHA 74
Occupational Safety and Health Administration
Business or other for profit; small business or organizations
3400 responses; 825 hours, .236 hours per response, 2 forms

To ensure that shipyard personnel do not enter confined spaces that contain oxygen deficient, toxic of flammable atmospheres, qualified personnel must test these spaces and the results of these tests must be available to those who must enter these spaces. Shipyards, barge cleaners, and repair facilities are affected.

Signed at Washington, DC this 6th day of December, 1988.

Marizetta L. Scott,

Acting Departmental Clearance Officer.

BILLING CODE 4510-30-M

Office of the Assistant Secretary for Veterans' Employment and Training

Secretary of Labor's Committee on Veterans' Employment; Meeting

The Secretary's Committee on Veterans' Employment was established under section 308, Title III, Pub. L. 97-306 "Veterans Compensation, Education and Employment Amendments of 1982," to bring to the attention of the Secretary, problems and issues relating to veterans' employment.

Notice is hereby given that the Secretary of Labor's Committee on Veterans' Employment will meet on Thursday, January 12, 1989, at 2:00 p.m., in the Secretary's Conference Room, S-2508, FPB.

Written comments are welcome and may be submitted by addressing them to: Veterans' Employment and Training, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

The primary item on the agenda is the report of the Workforce 2000 and America's Veterans forum.

The public is invited.

Signed at Washington, DC this 6th day of December, 1988.

Donald E. Shasteen,

Assistant Secretary for Veterans' Employment and Training.

[FR Doc. 88-28390 Filed 12-8-88; 8:45 am]

BILLING CODE 4510-79-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

Volume I

None.

Volume II

Illinois:
IL88-7 (Jan. 8, 1988) ..... p. 136.
IL88-19 (Jan. 8, 1988) ..... p. 232.
Wisconsin:
WI88-8 (Jan. 8, 1988) ..... p. 1113.

Volume III

Colorado:
CO88-1 (Jan. 8, 1988)..... p. 104.
CO88-2 (Jan. 8, 1988)..... p. 114.
CO88-4 (Jan. 8, 1988)..... p. 120.
Montana:
MT88-1 (Jan. 8, 1988)..... p. 169.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 2nd day of December 1988.

Robert V. Setera,

Acting Director, Division of Wage Determinations.

[FR Doc. 88-28110 Filed 12-8-88; 8:45 am]

BILLING CODE 4510-27-M

Employment and Training Administration

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; M. Grossman & Sons, et al.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period November 7-18, 1988 and November 21-25, 1988

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers, in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-20,923; M. Grossman & Sons, Passaic, NJ
TA-W-20,964; St. Marys Box Co., Inc., St. Marys, PA
TA-W-20,959; Murray Machine, Wausau, WI
TA-W-21,060; Beacon Construction, Pittsburgh, PA
TA-W-20,911; Bethlehem Steel Corp., Steelton, PA
TA-W-21,002: G & A Style, Inc., Newark, NJ
TA-W-20,957; Mattoon Garmet Co., Mattoon, IL
TA-W-20,998; Enpex Corp., LaPryor, TX
TA-W-20,997; Enpex Corp., San Diego, CA
TA-W-21,025; Petrolero Corp., San Antonio, TX
TA-W-20,965; Standard Oil Production, Casper Operation Sector of the Onshore Business Unit, Casper, WY
TA-W-20,966; Standard Oil Production, Oklahoma City Operations Sector of The Onshore Business Unit, Oklahoma City, OK
TA-W-20,967; Standard Oil Production, Lafayette Operation Sector of The Onshore Business Unit, Lafayette, LA
TA-W-21,004; General Cable Co., Fiber Optics Div., North Adams, MA
TA-W-20,950; Greater El Paso Corp., Formerly Greater Texas Finishing Corp., El Paso, TX
TA-W-21,041; Wessely Energy Co., Dallas, TX
TA-W-21,042; Wessely Energy Co., Denver, CO
TA-W-21,267; Ernest E. Fey, Inc., West New York, NJ
TA-W-21,007; Jackets By Tommy, Inc., East Newark, NJ

In the following cases, the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-21,006, Chance Collar Manufacturing Co., Lafayette, LA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-21,360; International Telecharge, Inc., Dallas, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,992; Dawson Operating Co., Inc., Amarillo, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,988; Christeve Oil Co., Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-21,065; Cannelton Industries, Peyton, WV

U.S. imports of coal are negligible.

TA-W-21,017; Montgomery Exploration Co., Dallas, TX

The investigation revealed that criterion (1) has not been met. Emplolyment did not decline during the relevent period as required for certification.

TA-W-21,017; Montgomery Exploration Co., LTD, Dallas, TX

The investigation revealed that criterion (1) has been met. Employment did not decline during the relevant period as required for certification.

TA-W-21,033; Texo Oil Co., Wichita Falls, TX

The investigation revealed that criterion (1) has been met. Employment did not decline during the relevant period as required for certification.

TA-W-21,095; General Motors Corp., Thousand Oaks, CA

The investigation revealed that criterion (1) has been met. Employment did not decline during the relevant period as required for certification.

TA-W-21,046; ACA Denver (American Consulting Association), Denver, CO

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,993; DynMac Corp., Tulsa, OK

U.S. imports of oil field pumps are negligible.

BILLING CODE 4510–30–M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; A.P. Parts Co., et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 19, 1988.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 19, 1988.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 14th day of November 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

VOL 53 ISS 237 DE 9 1988 UMI

Mine Safety and Health Administration

[Docket No. M-88-213-C]

Peabody Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Peabody Coal Company, 301 North Memorial Drive, P.O. Box 373, St. Louis, Missouri 63166 has filed a petition to modify the application of 30 CFR 75.330 (sealing abandoned sections) to its Martwick Mine (I.D. No. 15-14074) located in Muhlenberg County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that the mining system be designed in accordance with a plan and revisions thereof approved by the Secretary and adopted by such operator so that, as each working section of the mine is abandoned, it can be isolated from the active workings of the mine with explosion-proof seals or bulkheads.

2. Due to a squeeze, mining has ceased at the 9 west panel off the northeast submain. Tests are being conducted and measurements are being compiled at a yield pillar test area within the panel.

3. As an alternate method, petitioner proposes that a certified person would monitor the air entering and exiting the panel, and monitor the methane concentrations of the panel. The area would be sealed after all pertinent data from the squeeze and the yield pillar have been compiled. In support of this request, petitioner states that—

(a) Due to the reduced clearance caused by the squeeze, the area is inaccessible and abandoned, and the air exiting the panel would not be used to ventilate active working places in the mine; and

(b) The area is being observed to ascertain the cause of the squeeze and to complete the aforementioned tests.

4. The proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 9, 1989.

Copies of the petition are available for inspection at that address.

Date: December 1, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

MONITORED RETRIEVABLE STORAGE REVIEW COMMISSION

Meeting

Pursuant to its authority under Subtitle A of Pub. L. 100-203, the Nuclear Waste Policy Amendments Act of 1987, notice is hereby given that the Monitored Retrievable Storage (MRS) Review Commission will hold a meeting on Thursday, December 15, 1988 from 10:00 a.m.-12:00 p.m. in Room 6E069 of the Forrestal Building, 1000 Independence Avenue SW., Washington, DC.

The purpose of the meeting will be to obtain information from the U.S. Department of Energy on its program to construct a permanent repository for the disposal of nuclear waste. Department of Energy officials will brief the Commission on the status of its efforts to characterize the Yucca Mountain site in Nevada and the schedule for providing a permanent repository for the disposal of high level radioactive waste and spent fuel.

Members of the public are invited to attend this meeting only as observers. The meetings will be transcribed and transcripts of the meetings will be placed in the Commission's Public Document Room.

Persons planning to attend the meeting are asked to contact Ms. Paula N. Alford by Tuesday, December 13, 1988 at the Monitored Retrievable Storage Review Commission, 1825 K Street NW., Suite 318, Washington, DC 20006, (202) 653-5361.

Further information on this meeting or other activities of the Commission can be obtained from Ms. Paula N. Alford, Director, External Affairs, Monitored Retrievable Storage Review Commission, 1825 K Street NW., Suite 318, Washington, DC 20006, (202) 653-5361.

December 6, 1988.

Jane A. Axelrad,

Executive Director and General Counsel.

BILLING CODE 6820-BE-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-499]

Houston Lighting & Power Co., et al. South Texas Project, Unit 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.54(w)(5)(i) to Houston Lighting & Power Company, et al., (the licensee) for the South Texas Project, Unit 2, located at the licensee's site in Matagorda County, Texas.

Environmental assessment

Identification of Proposed Action

On August 5, 1987, the NRC published in the **Federal Register** a final rule amending 10 CFR 50.54(w). The rule increased the amount of on-site property damage insurance required to be carried by NRC's power reactor licensees. The rule also required these licensees to obtain by October 4, 1988 insurance policies that prioritized insurance proceeds for stabilization and decontamination after an accident and provided for payment of proceeds to an independent trustee who would disburse funds for decontamination and cleanup before any other purpose. Subsequent to publication of the rule, the NRC has been informed by insurers who offer nuclear property insurance that, despite a good faith effort to obtain trustees required by the rule, the decontamination priority and trusteeship provisions will not be able to incorporated into policies by the time required in the rule. In response to these comments and related petitions for rulemaking, the Commission has proposed a revision of 10 CFR 50.54(w)(5)(i) extending the implementation schedule for 18 months (53 FR 36338, September 19, 1988). However, since this rulemaking action was not completed by October 4, 1988, the Commission is issuing a temporary exemption from the requirements of 10 CFR 50.54(w)(5)(i) until completion of the pending rulemaking extending the implementation date specified in 10 CFR 50.54(w)(5)(i), but not later than April 1, 1989. Upon completion of such rulemaking, the licensee shall comply with the provisions of such rule.

The Need for The Proposed Action

The exemption is needed because insurance complying with requirements of 10 CFR 50.54(w)(5)(i) is unavailable

and because the temporary delay in implementation allowed by the exemption and associated rulemaking action will permit the Commission to reconsider on its merits the trusteeship provision of 10 CFR 50.54(w)(4).

Environmental Impacts of the Proposed Action

With respect to radiological impacts on the environment, the proposed exemption does not in any way affect the operation of licensed facilities. Further, as noted by the Commission in the Supplementary Information accompanying the proposed rule, there are several reasons for concluding that delaying for a reasonable time the implementation of the stabilization and decontamination priority and trusteeship provisions of §50.54(w) will not adversely affect protection of public health and safety. First, during the period of delay, the licensee will still be required to carry $1.06 billion insurance. This is a substantial amount of coverage that provides a significant financial cushion to licensees to decontaminate and clean up after an accident even without the prioritization and trusteeship provisions. Second, nearly 75% of the required coverage already is prioritized under the decontamination liability and excess property insurance language of the Nuclear Electric Insurance Limited-II policies. Finally, there is only an extremely small probability of a serious accident occurring during the exemption period. Even if a serious accident giving rise to substantial insurance claims were to occur, NRC would be able to take appropriate enforcement action to assure adequate cleanup to protect public health and safety and the environment.

The proposed exemption does not affect radiological or nonradiological effluents from the site and has no other nonradiological impacts.

Alternatives to the Proposed Action

It has been concluded that there is no measurable impact associated with the proposed exemption; any alternatives to the exemption will have either no environmental impact or greater environmental impact.

Alternative Use of Resources

This action does not involve the use of any resources beyond the scope of resources used during normal plant operation.

Agencies and Persons Consulted

The staff did not consult other agencies or persons in connection with the proposed exemption.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For information concerning this action, see the proposed rule (53 FR 36338), and the exemption which is being processed concurrent with this notice. A copy of the exemption will be available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488 and Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701.

Dated at Rockville, Maryland this 5th day of December, 1988.

For the Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-28349 Filed 12-8-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-338 and 50-339]

Virginia Electric and Power Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-4 and NPF-7, issued to Virginia Electric and Power Company (the licensee), for operation of the North Anna Power Station, Units No. 1 and No. 2 (NA-1&2), located in Louisa County, Virginia.

Environmental Assessment

Identification of Proposed Action

The proposed amendments would revise the NA-1&2 Technical Specifications (TS) containment air temperature upper limit to 120 °F, and would increase the required containment test pressure for the integrated (Type A) and local (Types B and C) leak rate tests (NA-1&2 TS 3.6.1.2) from the current value of 40.6 psig to 44.1 psig.

The proposed action is in accordance with the licensee's application for amendments dated March 2, 1988.

The Need for the Proposed Action

The proposed change to the TS is needed due to the fact that the current containment bulk air temperature and the service water temperature limits represent a severe constraint to the operation of NA-1&2 during the summer months.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to the Technical Specifications. The proposed revisions would allow the licensee to operate with an allowable containment air temperature of up to 120 °F. The plant design basis was reviewed to determine which transients are impacted by the increased service water temperature and containment bulk temperature. The maximum service water temperature, while analyzed at 97 °F, would not be changed at this time since the service water system modifications recently put into place at NA-1&2 can maintain the reservoir temperature below the currently allowable 95 °F. In addition, the results of the review of the containment bulk temperature indicate that the containment design criteria are not violated at the initial conditions of 120 °F containment temperature, 97 °F service water temperature and the lower volume of refueling water storage tank water. Therefore, the proposed changes do not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential nonradiological impacts, the proposed change to the TS involves systems located within the restricted area as defined in 10 CFR Part 20. They do not affect nonradiological plant effluents and have no other environmental impacts. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendments.

The Notice of Consideration of Issuance of Amendments and Opportunity for Hearing in connection with this action was published in the **Federal Register** on May 12, 1988 (53 FR 16921). No request for hearing or petition

for leave to intervene was filed following this notice.

Alternatives to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendments. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statements for the North Anna Power Station, Units No. 1 and 2.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendments.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendments dated March 2, 1988, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC and at the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Dated at Rockville, Maryland, this 5th day of December, 1988.

For the Nuclear Regulatory Commission.

Herbert N. Berkow,

Director, Project Directorate II–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28350 Filed 12–8–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–338]

Virginia Electric and Power Co. and Old Dominion Electric Co.; Issuance of Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission is considering the issuance of an exemption from the requirements of 10 CFR 50.46 to Virginia Electric and Power Company and Old Dominion Electric Cooperative (the licensee) for the North Anna Power Station, Unit 1, located in Louisa County, Virginia.

Environmental Assessment

Identification of Proposed Action and Need for Proposed Action

NA–1 is currently operating in Cycle 7 with two assemblies containing fuel rods clad with an advanced zirconium-based material as approved by the NRC letter of May 13, 1987. The licensee is proposing to use additional zirconium-based advanced cladding material in the same two fuel assemblies starting with NA–1 Cycle 8. These assemblies will contain fuel rods clad with an additional zirconium-based advanced alloy. Although this new zirconium-based alloy is very similar to "Zircaloy," whether or not this new alloy falls within the scope of 10 CFR 50.46 which applies to "Zircaloy" clad fuel is unclear. In the absence of a clear definition of the actual compound "Zircaloy" as stated in 10 CFR 50.46, an exemption from the provisions of 10 CFR 50.46 limiting its application to "Zircaloy" clad fuel is needed to permit authorization of the use of the new clad material. Furthermore, test experience with a limited number of assemblies for design development purposes provides important data to determine whether new designs can provide performance improvement while maintaining a high standard of safety performance.

Environmental Impacts of the Proposed Action

Reactor operation with the additional new cladding material will not be significantly affected. The composition of this zirconium-based alloy is very similar to "Zircaloy" in essential respects; moreover, the test assemblies are not located in the portions of the core expected to experience highest burnup and highest power density. The safety assessments performed by the licensee and the NRC staff demonstrate that performance of these assemblies in the event of a Loss of Coolant Accident (LOCA) will be bounded by the performance previously calculated for other zircaloy clad assemblies in the core, which was based on accepted ECCS evaluation models. Further, the staff has concluded that the use of two test assemblies containing the additional new alloy in the NA–1 reactor would conform to all current fuel design bases, would not change the existing reload design safety analysis limits, and would satisfy the NRC guidelines for lead test assemblies. As a result, the use of the two lead test assemblies would not affect the probability or consequences of potential reactor accidents. In addition, this proposed exemption does not otherwise affect radiological plant effluents. Accordingly, the staff concludes that there are no significant radiological impacts associated with the proposed exemption.

With regard to potential non-radiological impacts, the proposed exemption involves features located entirely within the restricted area as defined in 10 CFR Part 20. Implementation of the proposed exemption will not affect non-radiological plant effluents and will have no other significant non-radiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action

Since we have concluded that the environmental effects of the proposed action are not significant, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested exemption. This would not reduce environmental impacts associated with operation of the facility and requiring compliance with the rule would negate design development purposes which provide important data to determine whether new fuel assemblies with advanced cladding material (zirconium-based alloy) can provide performance improvement while maintaining a high standard of safety performance.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement (as amended) for the North Anna Power Station, Units No. 1 and No. 2.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the licensee's application for using two lead test assemblies with advanced cladding material dated

September 30, 1988, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Dated at Rockville, Maryland, this 5th day of December, 1988.

For the Nuclear Regulatory Commission.

Herbert N. Berkow,

Director, Project Directorate II–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28351 Filed 12–8–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–482]

Kansas Gas & Electric Co. et al.; Issuance of Amendment to Facility Operating License

In the matter of Kansas City Power and Light Co., and Kansas Electric Power Cooperative, Inc., Wolf Creek Generating Station.

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 22 to Operating License No. NPF–42 issued to Kansas Gas & Electric Company, et al., which revised the Technical Specifications for operation of the Wolf Creek Generating Station located in Coffey County, Kansas. The amendment is effective as of the date of issuance.

The amendment revised Technical Specification (TS) 3/4.7.6, Control Room Emergency Ventilation System, 3/4.7.7, Emergency Exhaust System (Plant Systems), 3/4.9.13, Emergency Exhaust System (Refueling Operations), TS Bases B 3/4.7.7, Emergency Exhaust System (Plant Systems) and B 3/4.9.13, Emergency Exhaust System (Refueling Operations).

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 26, 1988 (53 FR 32804). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action see (1) the application for amendment dated February 26, 1988 as supplemented October 31, 1988, (2) Amendment No. 22 to License No. NPF–42, and (3) the Commission's related Safety Evaluation and Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW 20555 and at the Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects III, IV, V and Special Projects.

Dated at Rockville, Maryland this 5th day of December, 1988.

For the Nuclear Regulatory Commission.

Douglas V. Pickett,

Project Manager, Project Directorate—IV Division of Reactor Projects—III, IV, V and Special Projects Office of Nuclear Reactor Regulation.

[Release No. 34–26337; File No. SR–MBS–88–18]

Self-Regulatory Organizations; MBS Clearing Corporation; Notice of Filing of Proposed Rule Change; Depository Division Rules

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 22, 1988, MBS Clearing Corporation, Depository Division, filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed change to the Rules of the Depository Division ("the Depository") of MBS Clearing Corporation ("the Corporation") is the addition of Rule 14 to Article VI, providing for assignment by the Corporation of any Depository Participants Agreement to another registered clearing agency ("the successor") in connection with sale of the business and assets of the Depository to the successor. Upon such assignment and the successor's assumption of obligations and liabilities of the Corporation under the Participants Agreement, the subject Participant shall be a participant in the successor and bound by the rules and procedures of the successor.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed Rule change is intended to facilitate the sale of Depository assets to Participants Trust Company ("PTC"), which is being formed as a New York limited purpose trust company, for the purpose of acquiring the business of the Depository. In connection with the sale of its assets to PTC, the Corporation intends to assign to PTC the Participant Agreements of all Depository Participants who are eligible for participation in PTC, and PTC intends to assume all obligations of the Depository thereunder. The Depository's form of Participants Agreement contains no prohibitions against assignment.

On September 30, 1988, PTC filed a Form CA–1 application with the Securities and Exchange Commission ("the Commission") to be registered as a clearing agency under section 17A of the Securities Exchange Act of 1934. The Form CA–1 includes a copy of the form of PTC's participants agreement as Exhibit P and a copy of PTC's proposed

rules as Exhibit E–3. PTC's form of participants agreement is substantially identical to the form of Participants Agreement currently used by the Depository, and the proposed rules of PTC are substantially identical to the amended and restated Depository Rules submitted in File No. SR–MBS–88–14 as amended.

The proposed Rule change permits the efficient transfer of the Depository's business to PTC. The Depository's assignment of Participants Agreements to PTC avoids the costs and delays entailed by termination of each Participants Agreement and each participant's execution of a new agreement with PTC. Therefore, the proposed Rule change is consistent with section 17A of the Securities Exchange Act of 1934 ("the Act"), in that it facilitates the prompt and accurate settlement of securities transactions.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Corporation does not believe that any burden will be placed on competition as a result of the proposed Rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Corporation has not received comments on the proposed Rule change from Participants. The Corporation has neither distributed the text or a summary of the proposed Rule change among Participants nor has it solicited comments on the proposed Rule change.

The text and a summary of the proposed Rule change will be distributed to all Participants shortly after the submission of this Form. The Corporation will notify the Commission upon receipt of any written comment.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization comsents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to File No. SR–MBS–88–18 and should be submitted by December 30, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 2, 1988.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–26341; File No. SR–NYSE–88–35]

Self-Regulatory Organizations; Proposed Rule Change by the New York Stock Exchange, Inc., Relating to Extensions of Time for Payment or Delivery of Securities

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) ("Act"), notice is hereby given that on November 16, 1988, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing a new rule that would require all member organizations for which the Exchange has been appointed the designated examining authority ("DEA") by the Commission pursuant to Rule 17d–1 under the Act [1] to submit requests for extensions of time for payment or delivery of securities to the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Authority to grant extensions of time on payment for purchases and delivery on sales of securities is given to a registered national securities exchange or a registered national securities association under Regulation T [2] of the Federal Reserve Board ("FRB") and Rule 15c3–3(n)[3] under the Act when the self-regulatory organization ("SRO") is satisfied that a creditor (broker/dealer) is acting in good faith in making such a request and when, according to the creditor, exceptional circumstances warrant such action.

Proposed new Rule 434 would require all member organizations for which the Exchange has been appointed the DEA by the Commission pursuant to Rule 17d–1 under the Act to submit requests for extensions of time for payment or delivery of securities to the Exchange.

Since no FRB or Commission standards for extension requests exist each SRO that processes extension requests (other SROs currently include the Boston, Cincinnati, Midwest, Pacific, and Philadelphia Stock Exchanges as well as the National Association of Securities Dealers) has its own parameters and procedures for evaluating, granting, and controlling extension requests. As a result, acceptable reasons, number of

---

[1] 17 CFR 240.17d–1 (1988).

[2] 12 CFR 220.4(c) and 220.8(d) (1988)

[3] 17 CFR 240.15c–3–3 (1988).

extensions permitted, special limitations and restrictions on customers are not uniformly applied and in some cases, possibly, not applied at all. Therefore, broker/dealers can apply for extensions from several or all SROs to circumvent any special requirements or the maximum number of extensions allowed by another SRO (*i.e.*, while the NYSE restricts customers to 5 extensions in 12 months, the NYSE understands that some SROs allow more extensions or have no limitations).

The Exchange has devoted considerable effort and expense to develop a computerized extension processing system which provides significant regulatory information to member organizations, the Exchange and industry regulators. The Exchange system contains specific criteria regarding acceptable reasons, number of days permitted per extension and limits on number of extensions permitted per code and in total. These criteria facilitate the prompt collection of monies and securities due and reduce exposure to losses for both customers and member organizations.

The Exchange system generates daily and monthly reports which provide member organizations and exchange staff a means to monitor the incidence and reasons for the extension, potential abuses, compliance with appropriate regulations and indications of possible operational problems. In addition, the system is currently being expanded to allow for collection of information regarding the description and quantity of the security and debit balance. This will allow for monitoring of potential sales practice problems.

The Exchange has been designated by the SEC as the DEA for almost all of its members. This designation places *sole* responsibility upon the Exchange for examining its members for compliance with industry financial responsibility rules. Other SROs of which these broker/dealers are members are statutorily relieved of all such responsibilities. Therefore, the Exchange is the only SRO in a position to monitor and effectively impose restrictions on the extension of credit by its members. This is an essential regulatory function that can affect the financial viability of a firm.

Requiring firms to file all extension requests with its DEA would:

- Facilitate monitoring for compliance with appropriate regulations based upon review of all extensions requested by a particular firm.
- Allow credit related financial restrictions placed upon a member firm to be made based upon complete information comprising all extensions requested.
- Enhance operational surveillance, e.g., excessive extension requests can be an early indication of back office problems.
- Ensure uniform application of standards to *all* customers of NYSE firms and uniform application of the extension of credit provisions of Federal Reserve Board Regulation T and SEC Rule 15c3–3(n).
- Provide a valuable surveillance tool in detecting manipulation and other illegal trading activities.
- Provide the ability to detect possible sales practice problems.

(b) The proposed rule change is consistent with the requirements of Rule 17d–1 under the Act in that the Exchange has been designated as having responsibility for examining its members for compliance with applicable financial responsibility rules such as Regulation T of the FRB and Rule 15c3–3 under the Act. It is also consistent with section 7(a) of the Act in that it is designed to prevent the excessive use of credit for the purchase or carrying of securities and supports the purposes of Regulation T of the FRB.

3. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will have an impact on competition in that other SROs will no longer receive revenue from processing extension requests from broker/dealers which are dual members for which the Exchange has been appointed DEA. The Exchange does not believe that such impact will result in a burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. As DEA for most of its members, the Exchange is the only SRO charged with the duty to oversee compliance by these broker/dealers with financial responsibility rules. The Exchange believes that information gathered in processing extension requests is essential in carrrying out its statutory oversight responsibilities.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization All submissions should refer to the file number in the caption above and should be submitted by December 30, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 5, 1988.

Jonathan G. Katz,

Secretary.

Bullock Growth Shares, Inc.; Application

December 2, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for De-Registration under Investment Company Act of 1940 ("1940 Act").

Applicant: Bullock Growth Shares Inc.

Relevant 1940 Act Section: Application filed pursuant to section 8(f) and Rule 8f–1.

Summary of Application: Applicant requests an order declaring that it has ceased to be an investment company under the 1940 Act.

Filing Dates: The application was filed on October 18, 1988, and amended on December 1, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 27, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Applicant, 1345 Avenue of the Americas, New York, NY 10105.

FOR FURTHER INFORMATION CONTACT: Thomas C. Mira, Staff Attorney (202) 272–3047, or Brion R. Thompson, Branch Chief (202) 272–3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant (formerly Bullock Fund, Ltd.) was organized on November 10, 1932, and has engaged in the sale of its shares since 1932. Applicant has been registered under the 1940 Act as an open-end, diversified management investment company since shortly after the 1940 Act was passed. To the best of Applicant's knowledge, Applicant registered one class of capital stock pursuant to the Securities Act of 1933 shortly after that Act was passed.

2. On November 17, 1986, Applicant's Board of Directors approved (i) the sale of substantially all the assets of Applicant to The Alliance Fund, Inc. (formerly the Chemical Fund, Inc., File No. 811–204) in exchange for shares of common stock of The Alliance Fund, Inc. to be distributed to Applicant's shareholders on the basis of their relative net asset values per share, and (ii) the subsequent dissolution of Applicant. The Agreement and Plan of Reorganization and Liquidation and the terms of the reorganization are set forth in the Forn N–14 Registration Statement filed with the SEC on December 24, 1986 (File No. 33–11093). On January 29, 1987, a Prospectus/Proxy Statement forming a part of said registration statement was mailed to Applicant's shareholders of record. On February 27, 1987, at a meeting duly called and held, a majority of the shareholders of Applicant approved the reorganization and subsequent dissolution of Applicant. Pursuant to the Agreement and Plan of Reorganization and Liquidation, on March 16, 1987, Applicant transferred all its assets to The Alliance Fund, Inc. in exchange for shares of common stock of The Alliance Fund, Inc. The shares of The Alliance Fund, Inc. received by Applicant were thereafter all distributed to Applicant's shareholders in liquidation. All expenses incurred in connection with the reorganization were paid by Applicant's investment adviser, Alliance Capital Management Corporation.

3. Applicant states that it does not currently have any shareholders; it does not have any assets or liabilities; it is not a party to any litigation or administrative proceeding, and it does not propose to engage in any business activities other than those necessary for the winding-up of its affairs. Applicant filed Articles of Dissolution with the State of Maryland terminating its existence as a Maryland corporation. The Articles of Dissolution became effective upon filing.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16675; (812–7128)]

MacKay-Shields MainStay Series Fund; Application

December 2, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: MacKay-Shields MainStay Series Fund.

Relevant 1940 Act Sections: Exemption requested under Section 6(c) from section 32(a)(1).

Summary of Application: Applicant seeks an order to permit it and any future investment company or series as may be added to the group of investment companies having as its adviser, administrator or distributor MacKay-Shields Financial Corporation ("MacKay-Shields"), Gamma Advisers Ltd. ("Gamma") or NYLIFE Securities Inc. ("NYLIFE") to file with the SEC financial statements signed or certified by an independent accountant selected at a Board of Trustees meeting held more than 30 but not more than 90 days before or after the beginning of their respective fiscal years.

Filing Date: The application was filed on September 21, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 27, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

Addresses: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549; Applicant, 51 Madison Avenue, New York, NY 10010, Attention: Michelle S. Lenzmeier, Esq.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst (202) 272–3420, or Brion R. Thompson, Branch Chief (202) 272–3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch in person, or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland at (301) 258–4300).

Applicant's Representations and Legal Conclusions

1. The Applicant is an open-end, diversified management investment company consisting of ten series, with different investment objectives and policies: MacKay-Shields Capital Appreciation Fund, MacKay-Shields Convertible Fund, MacKay-Shields Global Fund, MacKay-Shields Gold and Precious Metals Fund, MacKay-Shields Government Plus Fund, MacKay-Shields High Yield Corporate Bond Fund, MacKay-Shields Money Market Fund, MacKay-Shields Tax Free Bond Fund, MacKay-Shields Total Return Fund and

MacKay-Shields Value Fund (collectively, "Series"). The Series is advised by MacKay-Shields or Gamma. NYLIFE is the administrator and distributor of the Series. The Applicant was established as a Massachusetts business trust dated January 9, 1986.

2. The Applicant's fiscal year ends August 31. Applicant is governed by a Board of Trustees, of which at least 40 percent of the members are not "interested persons" within the meaning of section 2(a)(19) of the 1940 Act. Applicant holds regularly scheduled Board of Trustees meetings four times each year, approximately 90 days apart. Because of the timing of the Board of Trustees meeting that follows the completion of the Applicant's annual audit, it is not usually practicable to have a Board of Trustees meeting within 30 days before or after the beginning of Applicant's fiscal year.

3. The Applicant is not required to hold annual shareholder meetings and will do so only to the extent required by the 1940 Act. Thus, section 32(a)(1) of the 1940 Act would require additional meetings of the Board of Trustees for the sole purpose of selecting the Applicant's independent accountant.

4. The Applicant submits that it would be desirable for it to consider the selection of its independent accountant at a regularly scheduled quarterly Board of Trustees meeting during its fiscal year. Expanding the 30-day window under section 32(a)(1) to 90 days will permit a regular and systematic consideration of the independent accountant for the Applicant at a meaning full time. This is preferable to incurring the expense of holding extra Board of Trustees meetings solely for the purpose of selecting an independent accountant, which would be necesary if the 30-day window is not expanded.

5. By permitting the Applicant to schedule the selection of the independent accountant at one of the regularly scheduled Board of Trustees meetings through expansion of the 30-day window to 90 days, the SEC will allow the establishment of a review procedure for its Board of Trustees that will ensure that selection of the Applicant's independent accountant is considered on a systematic basis. This review procedure will provide detailed review by the Applicant and result in more thorough consideration of all information developed by the audit committee of its Board. Moreover, the process will more accurately reflect the reality of doing business in complexes having a substantial number of funds, a situation which is markedly different from the time the 1940 Act was passed when funds primarily were operated on an individual basis or in small fund groups. The Applicant further submits that the granting by the SEC of the relief requested will benefit its shareholders through cost savings.

6. For the reasons set forth above, Applicants submit that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. Applicant, therefore, requests that the SEC issue an order, pursuant to section 6(c) of the 1940 Act, granting the exemption as requested.

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. The Fund, a Delaware corporation, is a diversified, closed-end management investment company registered under the 1940 Act. On December 31, 1986, the Fund had approximately $100 million of net assets. The Adviser, a California corporation, is an investment adviser registered under the Investment Advisers Act of 1940. Until December 31, 1986, it was a wholly-owned subsidiary of First Interstate Investment Services, Inc., a subsidiary of First Interstate Bancorp, and provide investment advice to the Fund pursuant to an investment advisory agreement (the "Old Advisory Agreement") approved by the Fund's stockholders. On December 31, 1986, the Old Advisory Agreement terminated as the result of the acquisition of the Adviser described in paragraph 2. For the period December 31, 1986, through February 12, 1987, the Adviser provided advisory services pursuant to an interim investment advisory agreement (the "Interim Advisory Agreement"), which except for termination dates and conditions precedent to receiving compensation, was identical in all respects to the Old Advisory Agreement. The Interim Advisory Agreement provided that the Advisor would not be entitled to receive the Contingent Management Fee unless: (A) Fund stockholders approved (i) a new advisory agreement (the "New Advisory Agreement"), substantially identical to the Old Advisory Agreement, and (ii) payment of the Contingent Management Fee, and (B) the Commission issued an order permitting

VOL 53 ISS 237 DEC 9 1988 UMI

payment of the Contingent Management Fee. On February 12, 1987, Fund shareholders approved the New Advisory Agreement and the payment of the Contingent Management Fee.

2. On October 31, 1986, Legg Mason, Inc. ("LMI") acquired all of the Adviser's capital stock (the "Acquisition") pursuant to agreements entered into on that date (collectively, the "Purchase Agreement"). LMI is a holding company which, through its subsidiaries, is engaged in various securities-related businesses. The Acquisition is more fully described in the Fund's proxy statement dated January 6, 1987, a copy of which is attached to the application.

3. Pursuant to the Purchase Agreement, "control" of the Adviser changed within the meaning of section 2(a)(9) of the 1940 Act; the Acqusition constituted an "assignment" of the Old Advisory Agreement within the meaning of section 2(a)(4) of the 1940 Act; and, upon such assignment, the Old Advisory Agreement terminated pursuant to its terms. The New Advisory Agreement could not be implemented without shareholder approval, according to the requirements of section 15(a) of the Act. Such approval could not practicably have been held until some time after the occurrence of the assignment.

4. In anticipation of the possible assignment and termination of the Old Advisory Agreement, the Fund's Board of Directors (including a majority of the Directors who were not "interested persons" as defined in section 2(a)(19) of the 1940 Act) in mid-December 1986, approved entering into the New Advisory Agreement and the Interim Advisory Agreement and the payment arrangements described above concerning the Contingent Management Fee. These decisions were made upon the Board's determination that it was in the best interests of the Fund and its stockholders to avoid interruption of investment advisory services and the change in control of the Adviser resulting from the Acquisition did not and would not have a detrimental effect on the ability of the Adviser to provide the same quality of services.

5. The Acquisition was the subject of intense negotiations with material terms uncertain even until immediately prior to the execution of the definitive Acquisition Agreement on the night of December 31, 1986. The lack of an agreement by year-end 1986, may have prevented the consummation of the Acquisition, therefor the parties determined that it was in the Fund's best interests not to solicit shareholder or Commission approval until the parties agreed upon definitive terms. Having reached a definitive agreement, with payment of the Contingent Management Fee conditioned upon obtaining approvals from Fund shareholders and the Commission, the parties sought to obtain first shareholder approval of the Interim Advisory Agreement and then the Commission's approval of the application. Applicants submit that such approach was proper because, if shareholders did not approve the payment of the Contingent Management Fee, there would have been no reason to proceed with the application.

6. In anticipation of successful negotiations, proxy materials were submitted for review by the Commission's Staff on Decembr 23, 1986, and proxy materials were mailed to Fund shareholders on January 8, 1987. On February 12, 1987, holders of a majority of the Fund's outstanding shares approved the New Advisory Agreement and payment of the Contingent Management Fee.

7. No material changes were made in the Adviser's business, corporate structure, capitalization or composition of senior management or personnel responsible for rendering investment advice to the Fund during the period the Interim Advisory Agreement was in effect. Notwithstanding the Acquisition, the investment advisory and other services provided to the Fund were not diminished during the period the Interim Advisory Agreement was in effect. Under the Interim Advisory Agreement, the Fund continued to receive the same advisory services, provided by substantially the same personnel, as prior to the Acquisition.

8. The Adviser submits that to deprive it of the Contingent Management Fee for no reason other than the fact that the Acquisition resulted in termination of the Old Advisory Agreement would be a harsh result and an unreasonable penalty to attach to a transaction having no substantive impact upon the Fund. Applicants represent that the Fund will not bear any of the costs of the preparation and the filing of this application.

9. Applicants state that while it is difficult to quantify precisely the aggregate costs of the Adviser's services to the Fund during the term of the Interim Advisory Agreement, based on the methodology provided in the application, such costs totalled $50,140. an amount approximately $9,000 less than the fees that would have been earned by the Adviser under the Interim Advisory Agreement.

10. According to the application, the Adviser does not keep expense tabulations on a per client basis. To calculate the cost of providing services to the Fund during the Interim Advisory Agreement, the Adviser multiplied the aggregate expense for each line item for all clients managed by the Adviser by a fraction, the numerator of which is the average revenues attributable to the Fund for the respective period and the denominator of which is the aggregate average revenues of all client accounts managed by the Adviser for the relevant period. The Adviser believes the foregoing method to be reasonable and appropriate.

11. Applicants will not rely on any exemptive order prior to its issuance as authority for the Adviser serving as investment adviser to the Fund from December 31, 1986, the termination date of the Old Advisory Agreement, through February 12, 1987, the date the New Advisory Agreement was approved by the fund's stockholders.

Applicants' Legal Conclusions

1. The requested exemption would be appropriate in the public interest, and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

2. Applicants believe that the relief afforded by Rule 15a–4 is unavailable because a controlling person of the Adviser received money or benefits in connection with the assignment of the Old Advisory Agreement. Applicants submit, however, that the Fund solicited proxies promptly in accordance with the spirit of Rule 15a–4. (*See IC Rel No 10809, August 6, 1979).*

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC–16674; (811–3185)]

Principal Equity Fund, Inc.; Applications

December 2, 1988

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for De registration under the Investment Company Act of 1940 ("1940 Act")

Applicant: Principal Equity Fund, Inc

Relevant 1940 Act Section: Section 8(f) and Rule 8f–1 thereunder.

Summary of Application: Applicant requests an order under section 8(f) declaring that it has ceased to be an investment company

Filing Dates: The application was filed on October 28, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 27, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549; Applicants, Suite B304, 6991 East Camelback Road, Scottsdale, Arizona 85251.

FOR FURTHER INFORMATION CONTACT: James E. Banks, Staff Attorney (202) 272–2190, or Brion R. Thompson, Branch Chief (202) 272–3016 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant registered under the 1940 Act as an open-end, diversified, management investment company on May 15, 1981. Applicant's Registration Statement was declared effective on December 15, 1982 and Applicant commenced public offering of its securities on or about that date.

2. Applicant incorporated on May 12, 1981 in the State of Maryland and has been dissolved as a corporation. Applicant filed Articles of Transfer with the State of Maryland on September 22, 1988 and Articles of Dissolution on or about October 26, 1988.

3. At a special meeting of Applicant's Board of Directors (the "Board") held on December 14, 1987, the Board approved the Agreement and Plan of Acquisition (the "Plan") between Applicant and Princor Growth Fund, Inc. ("Princor") (811–1873) and submitted the Plan to its shareholders for their consideration.

4. On June 20, 1988, a Proxy Statetment and the Agreement and Plan of Acquisition (the "Proxy") was filed on Form N–14 with the SEC. On August 3, 1988, Applicant mailed the Proxy to all of its shareholders entitled to vote on the matter. At a special meeting held on August 29, 1988, a majority of Applicant's shareholders approved the Plan.

5. On September 16, 1988, Applicant had 69,937.88 shares outstanding with a total aggregate net asset value of $359,280.88 and a per share value of $5.137. On this date, Applicant transferred all of its assets and liabilities to Princor. In exchange, Applicant received Princor shares having an aggregate net asset value equal to the aggregate net asset value of Applicant's shares. Applicant distributed those shares to its shareholders on the same date.

6. In connection with the merger, legal expenses of approximately $75,000 and general administration expenses of approximately $2,500 were incurred, all of which was assumed by Principal Management, Inc.

7. Applicant is not a party to any current or pending litigation or administrative proceedings, and does not propose to engage in any business activities other than those necessary to effectuate the winding-up of its business and affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Principal Equity Fund Accumulation Plan; Application

December 2, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for De-registration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Principal Equity Fund Accumulation Plan.

relevant 1940 Act Section: Section 8(f) and Rule 8f–1 thereunder.

Summary of Application: Applicant requests an order under section 8(f) declaring that it has creased to be an investment company.

Filing Dates: The Application was filed on October 28, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 27, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC along with proof of service by affidavit or, for attorneys, by certificate. Request with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549; Applicant, Suite B304, 6991 East Camelback Road, Scottsdale, Arizona 85251.

FOR FURTHER INFORMATION CONTACT: James E. Banks, Staff Attorney (202) 272–2190, or Brion R. Thompson, Branch Chief (202) 272–3016 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is a business trust created under the laws of the State of New York. Applicant registered under the 1940 Act on September 17, 1981 and its Registration Statement was declared effective on March 16, 1983. Applicant was created for the sole purpose of investing in shares of Principal Equity Fund, Inc. (811–3185) ("PEF") on a periodic basis. PEF was merged into Princor Growth Fund on September 16, 1988.

2. On December 14, 1987, Applicant's Board of Directors (the "Board") approved the Agreement and Plan of Acquisition (the "Plan") between Princor Growth Fund, Inc. ("Princor") and PEF. The Board further agreed under the Plan that Applicant be terminated and that PEF be merged into Princor. The Board then submitted the Plan to Applicant's planholders for their consideration.

3. On June 20, 1988, a Proxy Statement and the Agreement and Plan of Acquisition (the "Proxy") was filed on

planholders of record advising them that all accumulation plans would be terminated on August 29, 1988. Planholders were requested to inform the Applicant whether they wanted to liquidate their holdings or invest their total plans into PEF. The number of shares of planholders who elected to receive a check for the value of their plans totaled 2,417.622 or $13,929.24. The remaining planholders either elected to invest their total plans directly into PEF or were automatically invested into PEF. There were 8,777.409 such shares with an aggregate value of $50,750.98 which were invested into PEF. All plans were terminated on August 29, 1988 and PEF's shareholders approved the merger of PEF into Princor Growth Fund, Inc. on August 29.

4. A portion of the $2,500 in general administration expenses and $75,000 in legal fees incurred in PEF's merger were attributable to the Applicant's liquidation. However, Principal Management, Inc. assumed all of these expenses.

5. Applicant is not a party to any current or pending litigation or administrative proceedings, and does not propose to engage in any business activities other than those necessary to effectuate the winding-up of its business and affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

DEPARTMENT OF TRANSPORTATION

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended December 2, 1988

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket No.: 45968

Date Filed: November 28, 1988.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 27, 1988.

Description: Application of Continental Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations, requests an amendment of its certificate of public convenience and necessity for Route 176, reissued by Order 86-8-78, which will permit Continental to operate flights between Guam and Brisbane/Sidney, Austrialia.

Docket No.: 45979

Date Filed: December 1, 1988.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 29, 1988.

Description: Application of Air Transport International, Inc. pursuant to Section 401 of the Act and Subpart Q of the Regulations requests authority to provide foreign scheduled air transportation of property and mail between any point or points in any State of the United States (including all points in the United States commonwealths, territories and possessions), and the District of Columbia, on the one hand, and a point or points in the following countries, on the other hand: Austria, Belgium, Denmark, Federal Republic of Germany, Finland, France, Greece, Ireland, Luxembourg, The Netherlands, Norway, Spain, Sweden, Switzerland and the United Kingdom.

Docket No. 45985

Date Filed: December 2, 1988.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 30, 1988.

Description: Application of The Flying Tiger Line Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations requests a certificate of public convenience and necessity to provide scheduled foreign air transportation making permanent certain of its existing exemption authorizations and integrate such authority, along with Flying Tigers' existing foreign trade route certificate authority, into one unified certificate.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

Federal Aviation Administration

[Summary Notice No. PE-88-46]

Petition For Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Ch. I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before December 29, 1988.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. ——, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-3132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on December 5, 1988.

Denise Donohue Hall,

Manager, Program Management Staff.

Petitions For Exemption

Docket No.: 22690.

Petitioner: Boeing Commercial Airplane Company.

Sections of the FAR Affected: 14 CFR 61.57(c).

Description of Relief Sought: To extend and amend Exemption No. 4779 that permits certain pilots employed by petitioner to satisfy the general recent flight experience requirements of that section by alternate means. Exemption No. 4779 will expire on April 30, 1989.

Docket No.: 23392.
Petitioner: Beaver Aviation Service, Inc.
Sections of the FAR Affected: 14 CFR 141.91(a).
Description of Relief Sought: To extend Exemption No. 3682, as amended, that allows petitioner to conduct flight training at a satellite base, which is more than 25 nautical miles from its main operations base.

Docket No.: 25659.
Petitioner: Eastern Air Charter, Inc.
Sections of the FAR Affected: 14 CFR 135.165(b).
Description of Relief Sought: To allow extended overwater operations between Boston and Bermuda, utilizing one long-range navigation receiver and one HF transceiver for emergency aeromedical flights.

Docket No.: 25683.
Petitioner: Christopher C. Foltz.
Sections of the FAR Affected: 14 CFR 61.197.
Description of Relief Sought: To allow the petitioner a 90-day extension on his current flight instructor certificate.

Docket No.: 25245.
Petitioner: United States Air Force.
Sections of the FAR Affected: 14 CFR 91.24(b).
Description of Relief Sought: To reissue Exemption No. 4633B which provides relief from the requirements of § 91.24(b) while conducting flight operations within specifically designed airspace. Additionally, petitioner requests that Restricted Area R–4807 be included in the area designated for exempted operations and that additional military aircraft be authorized to conduct flight operations under the provisions of the exemption.

Docket No.: 24052.
Petitioner: United States Navy.
Sections of the FAR Affected: 14 CFR 91.70(a) and (b), 91.71(c) and (d), and 91.79(c).
Description of Relief Sought: To amend Exemption No. 4504 to allow the Navy Flight Demonstration team to conduct airshow rehearsals and to perform airshows at speeds up to 600 knots, to perform acrobatic maneuvers in weather conditions of 1,000 feet ceiling and 3-mile visibility, and to permit acrobatic maneuvers during takeoff or landing with pilot and controller coordination.

Docket No.: 21789.
Petitioner: Air Transport Association of America.
Sections of the FAR Affected: 14 CFR 61.49.
Description of Relief Sought: To extend Exemption No. 3474, as amended, for 3 years. Exemption No. 3474, as amended, permits the airman employees of the petitioner's member airlines and similarly situated Part 121 certificate holders to take a written or flight test without waiting 30 days provided a Part 121 authorized instructor has given the applicant additional flight or ground instruction, as appropriate, and finds that applicant competent to pass the test. *Partial Grant, November 14, 1988, Exemption No. 3474D.*

Docket No.: 24256.
Petitioner: Dalfort Corporation.
Regulations Affected: 14 CFR 61.57(a)(1), (c), and (d); 61.58(c)(1) and (d); 61.63(d)(2) and (3); 61.67(d)(2); and 61.157(e)(1) and (2) and portions of Appendix A of Part 61 and Appendix H of Part 121.
Description of Relief Sought/Disposition: To amend Exemption No. 4955 that allows the petitioner to use the FAA-approved advanced simulators to the extent necessary to permit the petitioner and persons who contract for services with the petitioner to complete certain training and checking. *Grant, November 14, 1988, Exemption No. 4955A.*

Docket No.: 25079.
Petitioner: Montex Drilling Company.
Sections of the FAR Affected: 14 CFR 61.58(c)(1).
Description of Relief Sought/Disposition: To extend Exemption No. 4736 that allows petitioner's pilots to complete the entire 24-month pilot-in-command check in an FAA-approved simulator provided the pilot taking the flight check has completed three takeoffs and three landings within the preceding 90 days in a BAC 1–11 aircraft. *Grant, November 23, 1988, Exemption No. 4736A.*

Docket No.: 25556.
Petitioner: McDonnell Aircraft Company, McDonnell Douglass Corporation.
Sections of the FAR Affected: 14 CFR 21.187.
Description of Relief Sought/Disposition: To allow petitioner to operate certain aircraft in both experimental and normal category operations without complying with procedural requirements specified in § 21.187. *Denial, November 10, 1988, Exemption No. 4994.*

Docket No.: 25608.
Petitioner: Aviation Methods, Inc.
Sections of the FAR Affected: 14 CFR 135.165(b)(5) and (6)
Description of Relief Sought/Disposition: To allow extended overwater operations using one high frequency (HF) transceiver. *Partial Grant, November 22, 1988, Exemption No. 4996.*

Docket No.: 25709.
Petitioner: First Chicago Leasing Corp.
Sections of the FAR Affected: 14 CFR 145.73.
Description of Relief Sought/Disposition: To allow Messerschmitt Bolkow-Blohm GmbH/Aircraft Service Center (MBB) to perform certain structural modifications on L–1011 aircraft, U.S. Registration Number N309EA, Serial Number 1010, that is owned by petitioner, beginning October 26, 1988. *Grant, November 16, 1988, Exemption No. 4995.*

UNITED STATES INSTITUTE OF PEACE

Announcement of Awards; Albert Einstein Institution, et al.

The United States Institute of Peace announces awards made in the unsolicited grants category, from March through September 1988. The following forty-three awards amount to a total funding of $1,408,483.

- Albert Einstein Institution, Cambridge, MA (Mr. Ronald McCarthy, Project Director): $43,755 (USIP 500).
- Alston, Dr. Philip, the Fletcher School of Law and Diplomacy, Tufts University, MA: $20,000 (USIP 298).
- American University, Washington, DC (Abdul Aziz Said, Professor, School of International Service, Project Director): $23,333 (USIP 416).
- Atlantic Council of the United States, Washington, DC (Dr. John A. Baker, Director of Education, Project Director): $30,000 (USIP 469).
- California Seminar on International Security and Foreign Policy, Santa Monica, California (Mr. James Digby and Mr. Joseph Nation, Project Directors): (USIP 448).
- Carnegie Endowment for International Peace, Washington, DC (Dr. Geoffrey Kemp, Project Director): $40,000 (USIP 515).
- Catholic University of America, Washington, DC (Professor Joseph Komonchak, Project Director): $15,000 (USIP 399).
- Coats, Dr. Wendell, Connecticut College, New London, Connecticut: $15,000 (USIP 460).
- Columbia University, Peace Education Program, Teachers College (Dr. Betty Reardon, Project Director): $50,000 (USIP 445).
- Copson, Dr. Raymond W., National Defense University and the Congressional Research Service, Library of Congress, Washington, DC: $18,550 (USIP 303).
- Council for the Advancement of Citizenship, Washington, DC (Ms. Diane Eisenberg, Project Director): $118,656 (USIP 484).
- Dartmouth College, Hanover, New Hampshire (Professor Ian Lustick, Project Director): $15,000 (USIP 392).
- Gerson, Allan, Esq., Chevy Chase, Maryland, former Senior Advisor to the Attorney General of the United States on International Affairs and Special Counsel to the United States Permanent Representative to the United Nations: $17,500 (USIP 422).
- Green, Dr. W., S. Freidzon and L. Avrashev, Boston, MA: $40,000 (USIP 461).
- Hebrew University of Jerusalem, Leonard Davis Institute for International Relations (Mr. Yair Kagan and Dr. J. Rothman, Project Directors): $40,000 (USIP 454).
- Heston, Alan W., Professor of Economics, University of Pennsylvania: $30,000 (USIP 327).
- Horowitz, Donald L., Professor of Law, Public Policy Studies, and Political Science, Duke University, Durham, North Carolina: $25,000 (USIP 406).
- John W. McCormack Institute of Public Affairs, University of Massachusetts at Boston (Mr. Padraig O'Malley, Project Director): $15,000 (USIP 098).
- Johnson, Dr. James, Rutgers University and Dr. John Kelsay, Florida State University (Project Directors): $30,000 (USIP 451).
- Massachusetts Institute of Technology, Cambridge, MA (Dr. Nazli Choucri, Project Director): $56,000 (USIP 497).
- Mississippi State University, Center for International Security and Strategic Studies (Professor Janos Radvanyi, Project Director): $50,000 (USIP 423).
- New Hampshire Council on World Affairs, Durham, New Hampshire (Dr. David L. Larson, University of New Hampshire, Project Director): $11,500 (USIP 479).
- New York University (Dr. Steven Brams, Project Director): $26,595 (USIP 362).
- Northwestern University, Center for International Studies and Center for Urban Affairs and Policy Research, Evanston, Illinois (Professors Jack A. Goldstone, Ted Robert Gurr, and Mr. Farrokh Moshiri, Project Directors): $24,000 (USIP 387).
- Oxford Research Group, Great Britain (Mr. Hugh Miall, Project Director): $30,000 (USIP 429).
- Princen, Dr. Thomas E., Program on Negotiation, Harvard Law School: $6,000 (USIP 351).
- Salzburg Seminar, Cambridge, MA (Mr. Lloyd Cutler and Mr. Roger Lort, Project Directors): $25,000 (USIP 477).
- School of Advanced International Studies, The Johns Hopkins University, Washington, D.C. (Professor I. William Zartman, Project Director): $50,000 (USIP 293).
- Shanor, Donald R., Columbia University: $20,000 (USIP 417).
- Sinai, Dr. Joshua, Washington, D.C.: $25,000 (USIP 456).
- Tanter, Dr. Raymond, Michigan State University, East Lansing, Michigan: $6,383 (USIP 106).
- Tufts University, Medford, MA (Dr. Jean Mayer, President, and Jeffrey Rubin, Professor of Psychology, Project Directors): $60,000 (USIP 375).
- United Nations Regional Centre for Peace and Disarmament in Africa (Dr. Sammy Kum Buo, Project Director): $50,000 (USIP 466).
- University of Connecticut, War and Ethics Program (Dr. Robert Phillips, Project Director): $15,000 (USIP 443).
- University of Hawaii Foundation, Honolulu, Hawaii (R.J. Rummel, Project Director: $80,000 (USIP 433).
- University of Hawaii Institute for Peace, Honolulu, Hawaii (Ms. Caroline Stephenson, Project Director): $12,500 (USIP 050).
- University of Hawaii Institute for Peace, Honolulu, Hawaii (Mr. Stephen Uhalley, Project Director): $24,274 (USIP 446).
- University of Michigan, Dr. J. David Singer, Ann Arbor, Michigan: $32,000 (USIP 464).
- University of Missouri-St. Louis (Dr. Frederic S. Pearson and Dr. Michael Brzoska (University of Hamburg, FRG) Project Directors): $35,000 (USIP 482).
- Washington and Lee University School of Law, Lexington, Virginia (Professor Gregory Stanton and Ms. Morrow Cater, Project Directors): $46,767 (USIP 378).
- Whittier College, Whittier, California (Project Director, Joyce Kaufman): $53,820 (USIP 397).
- Wiarda, Dr. Howard, American Enterprise Institute for Public Policy Research, Washington, DC: $29,300 (USIP 205).
- Yankelevich, Mr. Efrem, Newton Massachusetts: $37,000 (USIP 468).

Contact: Hrach Gregorian, Director of Grant Programs, United States Institute of Peace, 1550 M Street NW., Suite 700, Washington, DC 20005–1708, (202) 457–1700.

Date: November 22, 1988.

Samuel W. Lewis,

President.

BILLING CODE 3155–01–M

Announcement of Fellowships Awarded; Jennings Randolph Program for International Peace

The United States Institute of Peace has announced the appointment of 22 fellows for 1988–1989 in its Jennings Randolph Program for International Peace. This is the first year an international competition was held for all three types of awards offered by the Program: Distinguished Fellow, Peace Fellow and Peace Scholar.

The fellowships enable outstanding scholars, diplomats, professionals and university doctoral students to conduct research and education projects focused

on the nature of international conflict and methods for achieving peace. Ten fellows will work at the Institute's Washington, DC offices; the others will be based at universities and other organizations throughout the U.S. Projects generally take one year.

This year's fellowship recipients represent thirteen U.S. states and the District of Columbia as well as eight foreign countries. Fellows come from such diverse backgrounds as diplomacy, law, political science, psychology, sociology, international relations and economics.

The U.S. Institute of Peace is an independent, nonpartisan government institution created and wholly funded by Congress to strengthen the nation's capacity to promote the peaceful resolution of international conflicts. The Institute is governed by a bipartisan 15-member, Presidentially appointed Board of Directors and is precluded from playing a direct role in foreign policy making or in mediating international disputes.

The fellowship program is named for former Senator Jennings Randolph (D-WVa), a leading proponent of the legislation passed in 1984 establishing the Institute. The Institute also awards grants, directs research and studies projects, and conducts a variety of citizen education activities.

Distinguished Fellows are eminent scholars and practitioners with careers marked by extraordinary achievement. The three Distinguished Fellows announced for 1988–89 are:

- John Burton, Distinguished Visiting Professor, George Mason University, Virginia. Australian. Widely recognized as a founding father of the field of international conflict resolution, Burton will complete a six-volume series synthesizing the leading insights of the field;
- Herbert Kelman, Professor, Harvard University, Massachusetts. A social psychologist, Kelman will examine the practical applications of techniques of collective problem solving in helping to resolve Israeli-Palestinian differences; and
- John Reinhardt, Professor, University of Vermont. Formerly U.S. Ambassador to Nigeria and Director of the U.S. Information Agency, Reinhardt will study and write articles on the subject of how governmental communication with foreign publics can help to reduce international tension and conflict.

Peace Fellow awards are made to persons in varied careers who show substantial accomplishment and promise of future leadership. The first Peace Fellows announced by the Institute are:

- Bruce Berlin, Founder and Executive Director of the Trinity Forum for International Security and Conflict Resolution, Santa Fe, New Mexico. Berlin will engage diplomats, scholars, and college students in a series of workshops that will derive lessons on conflict resolution from the recent peace process in Central America;
- Raymond Cohen, Senior Lecturer, Hebrew University, Jerusalem. Israeli. Cohen will write a book on how intercultural communication difficulties may affect U.S. negotiations with other countries;
- Lily Gardner Feldman, Associate Professor, Tufts University, Massachusetts. British. Gardner Feldman will seek clues to how former enemies in war have developed close ties of friendship, by looking at Germany's postwar reconciliation with Israel, France and the United States;
- Ted Robert Gurr, Professor, University of Colorado. Gurr will study why certain nations historically seem prone to violent behavior while others are inclined toward non-violent means for resolving problems;
- Mark Katz, International Affairs Consultant, Washington, DC. Katz will develop and conduct a series of workshops that examine the role that the U.S., the United Nations and other third-party mediators have played and can play in achieving progress toward peace in Afghanistan, the Iran-Iraq war, Central America and other regional conflicts;
- Paul Kimmel, Senior Research Associate, Creative Associates International, Inc., Washington, DC. Kimmel will develop and test a model for overcoming cultural barriers in international negotiations;
- Robin Ranger, Arms Control Analyst, Washington, DC. Canadian. Ranger will develop effective and workable safeguards to ensure compliance with Strategic Arms Reduction Talks (START) and other proposed arms control agreements;
- Shirin Tahir-Kheli, Director of Near East and South Asian Affairs, National Security Council. Washington, DC. Tahir-Kheli will examine how a relative stability has been achieved between India and Pakistan and how it may be maintained following the Soviet departure from Afghanistan; and
- Goshu Wolde, former Foreign Minister of Ethiopia, currently living in Pennsylvania. Wolde will study possible regional efforts to reduce conflicts and increase cooperation in the Horn of Africa.

Peace Scholars are outstanding students in university doctoral programs who are undertaking dissertation research that advances the state of knowledge about international peace and conflict management. Recipients of the Peace Scholar awards and their topics are:

- George Agbango, Atlanta University. Ghanaian. The impact of conflict on economic development in Africa;
- Anthony Armstrong, University of Washington. Good-will initiatives that improve relationships between long-time adversaries;
- Daniel Bahr, Iowa State University. The roots of international cooperation in the absence of global authorities;
- Orna Ben-Naftali, Tufts University. Israeli. The United States and the International Court of Justice;
- Lisa Brandes, Yale University. The impact of women on nations' attitudes toward war and peace;
- Jurgen Brauer, University of Notre Dame. West German. The effect of military spending on developing nation's economies;
- Fernando Lopez-Alves, University of California at Los Angeles. The role of labor unions in preserving democratic stability in Latin America;
- Raul Pangalangan, Harvard University. Filipino. International human rights theories and Third World elites;
- Luigi Sensi, Rutgers University. Italian. Superpower intervention in civil wars; and
- James Winkler, Tufts University. Security and development objectives in U.S. policy toward the Third World.

The second annual international competition for the three types of awards will accept applications postmarked no later than February 1, 1989. Applications are available from the Jennings Randolph Program for International Peace, U.S. Institute of Peace, 1550 M Street, NW., Suite 700, Washington, DC 20005.

Contact: Michael Lund, *Director, Jennings Randolph Program for International Peace.*

Date: November 28, 1988.

Samuel W. Lewis,
President.

BILLING CODE 3155–01–M

VOL 53 ISS 237 DE 9 1988 UMI

VETERANS ADMINISTRATION

Privacy Act of 1974; Amendment of System Notice; Revision of Routine Use Statement

Notice is hereby given that the Veterans Administration (VA) is considering revising a routine use statement for the system of VA records entitled "Loan Guaranty Home, Condominium and Manufactured Home Loan Applicant Records, Specially Adapted Housing Applicant Records, and Vendee Loan Applicant Records—VA" (55VA26) as set forth in the **Federal Register** publication, "Privacy Act Issuances", 1986 Compilation, Volume V, page 794, and amended at 52 FR 721 (January 8, 1987).

The purpose of the revision is to assist in the sale of vendee loans without recourse by expanding the number of parties to whom vendee loan records may be disclosed. Vendee loans are loans made by the VA to purchasers of VA acquired properties in order to finance the sale of these properties. Routine use No. 16 currently provides for disclosure of these records to actual and prospective investors in order to provide a basis for their submitting offers to purchase these loans and to enable them to establish loan accounts on loans which they have purchased. This was sufficient to conduct vendee loan sales with recourse, that is, with a Government guarantee to repurchase the loan in the event the borrower defaulted. However, VA may now also sell vendee loans without recourse. In order to market these loans effectively, on a no-recourse basis, VA must secure the assistance of financial advisors, investment bankers and other parties, all of whom require access to the vendee loan records in the performance of their duties.

In order to provide for this access, routine use No. 16 is being amended to also allow disclosure of these records to financial advisors, to assist VA in developing strategies for marketing these loans, and to investment bankers, bond rating agencies, other governmental agencies, private mortgage insurance companies, bonding companies or other parties involved in the marketing or sale of vendee loans.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed revision to the routine use statement to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420. All relevant material received before January 9, 1989, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays) until January 18, 1989.

If no public comment is received during the 30-day review period allowed for public comment, or unless otherwise published in the **Federal Register** by the Veterans Administration, the new routine use statement included herein is effective January 9, 1989.

Approved: November 21, 1988.

Thomas K. Turnage,

Administrator.

Notice of Amendment to System of Records

The system identified as 55VA26, "Loan Guaranty Home, Condominiums and Manufactured Home Loan Applicant Records, Specially Adapted Housing Applicant Records and Vendee Loan Applicant Records—VA," appearing on pages 794–796 of the **Federal Register** publication "Privacy Act Issuances," 1986 Compilation, Volume V, and amended at 52 FR 721, January 8, 1987, is amended as follows:

55VA26

SYSTEM NAME:

Loan Guaranty Home, Condominium and Manufactured Home Loan Applicant Records, Specially Adapted Housing Applicant Records, and Vendee Loan Applicant Records—VA.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

16. Any information in a direct or vendee loan account record may be disclosed to active investors purchasing or considering the purchase of VA direct or vendee loans from VA or from a previous investor. Such information will be furnished to active prospective investors to provide a basis for their submitting an offer to purchase loans and to actual investors in order that they may establish loan accounts on purchased loans. Such information may also be disclosed to financial advisors to assist VA in developing strategies for marketing these loans, and to investment bankers, bond rating agencies, other governmental agencies, private mortgage insurance companies, bonding companies, master servicers, and others involved in the marketing or sale of vendee loans, including legal counsel, accountants and auditors for such entities.

BILLING CODE 8320-01-M

Privacy Act of 1974; Proposed Amendment of Systems Notice; Additional Routine Use Statements

Notice is hereby given that the Veterans Administration (VA) is considering adding two new routine use statements to the system of records entitled, "Patient Medical Records—VA" (24VA136) which is set forth on pages 771 and 772 of the **Federal Register** publication, "Privacy Act Issuances, 1986 Compilation, Volume V" and amended at 52 FR 381, January 5, 1987.

Section 4132 of Title 38, United States Code, provided for the confidentiality of Veterans Administration patient medical records that are maintained in connection with the performance of any program or activity (including education, training, treatment, rehabilitation, or research) relating to drug abuse, alcoholism or alcohol abuse, or sickle cell anemia. Section 121 of Pub. L. No. 100–322, Veterans' Benefits and Services Act of 1988, amended 38 U.S.C. section 4132 and added medical records of patients who are infected with the Human Immunodeficiency Virus (HIV) to the confidentiality provisions of this section. The statute provides an exception for the disclosure of record information relating to HIV infection to a Federal, State, or local public health authority that is charged under Federal or State law with the protection of the public health. A Federal or State law must require disclosure of the record information and a qualified representative of the public health authority must make a written request which states the purpose for providing the information. The purpose must be authorized by law and the request must clearly identify such lawful purposes. The public health authority may not redisclose or use the information for a purpose other than that for which the disclosure was made. Routine use statement number 27 is proposed to provide for those disclosures which are authorized by 38 U.S.C. 4132(b)(2)(C) as amended by section 121 of Pub. L. No. 100–322.

The statute provides also for the disclosure of information indicating that a patient or subject is infected with the HIV, under certain circumstances, to (1) the spouse of the patient or subject, or (2) to an individual whom the patient or

subject has, during the process of professional counseling or of testing to determine whether the patient or subject is infected with such virus, identified as being a sexual partner of such patient or subject. Before any patient or subject gives consent to being tested for the HIV, as part of pre-test counseling, the patient or subject must be informed fully about these notification provisions.

Disclosures under these provisions may be made only if the physician or professional counselor, after making reasonable efforts to counsel and encourage the patient or subject to provide the information to the spouse or sexual partner, reasonably believes that the patient or subject will not provide the information and that the disclosure is necessary to protect the health of the spouse or sexual partner. Routine use statement number 28 is proposed to provide for these disclosures which are authorized by 38 U.S.C. 4132(f) as amended by section 121 of Pub. L. No. 100–322.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed routine uses to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All relevant material received before January 9, 1989, will be considered. All written comments received will be available for public inspection only in room 132 of the above address between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays), until January 18, 1989.

If no public comment is received during the 30-day review period allowed for public comment, or unless otherwise published in the **Federal Register** by the VA, the routine use statements included herein are effective January 9, 1989.

Approved: November 18, 1988.

Thomas K. Turnage,

Administrator.

Notice of System of Records

In the system identified as 24VA136, "Patient Medical Record—VA" appearing on pages 771 and 772 of the **Federal Register** publication, "Privacy Act Issuances, 1986 Compilation, Volume V" and amended at 52 FR 381, January 5, 1987, the following additions are made:

24VA136

SYSTEM NAME:

Patient Medical Records—VA.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

27. In the case of any record which is maintained in connection with the performance of any program or activity relating to infection with the Human Immunodeficiency Virus (HIV), information may be disclosed to a Federal, State, or local public health authority that is charged under Federal or State law with the protection of the public health, and to which Federal or State law requires disclosure of such record, if a qualified representative of such authority has made a written request that such record be provided as required pursuant to such law for a purpose authorized by such law. The person to whom information is disclosed should be advised that they may not redisclose or use such information for a purpose other than that for which the disclosure was made (38 U.S.C. 4132(b)(2)(C)). The disclosure of patient name and address under this routine use must comply with the provisions of 38 U.S.C. 3301(f)(2).

28. Information indicating that a patient or subject is infected with the Human Immunodeficiency Virus (HIV) may be disclosed by a physician or professional counselor to the spouse of the patient or subject or to an individual whom the patient or subject has, during the process of professional counseling or of testing to determine whether the patient or subject is infected with the virus, identified as being a sexual partner of the patient or subject. Disclosures may be made only if the physician or counselor, after making reasonable efforts to counsel and encourage the patient or subject to provide the information to the spouse or sexual partner, reasonably believes that the patient or subject will not provide the information to the spouse or sexual partner and that the disclosure is necessary to protect the health of the spouse or sexual partner. Such disclosures should, to the extent feasible, be made by the patient's or subject's treating physician or professional counselor. Before any patient or subject gives consent to being tested for the HIV, as part of pre-testing counseling, the patient or subject must be informed fully about these notification provisions.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 237
Friday, December 9, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10:00 a.m. Wednesday, December 14, 1988.

LOCATION: Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, Maryland.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED:

1. Kerosene Heaters Petition CP87-1

The Commission will consider petition CP 87-1 from the National Kerosene Heater Association. The Commission was briefed on this matter at the meeting on September 27, 1988. The petition requests the development of a consumer product safety rule for kerosene heaters containing requirements to limit nitrogen dioxide emissions and imposing all of the requirements now set forth in the Underwriters Laboratories standard for kerosene heaters designated UL standard 647. The Commission will also consider the request of the International Association of Fire Chiefs to require kerosene heaters to be labeled to warn against flare-up fires.

2. Exemptions from Preemption Under Commission Statutes

The Commission will consider a **Federal Register** notice which would propose a new regulation to govern procedures for applications for exemption from preemption under the Consumer Product Safety Act, the Federal Hazardous Substances Act, the Flammable Fabrics Act, and the Poison Prevention Packaging Act.

FOR A RECORDED MESSAGE CONTAINING THE LATEST AGENDA INFORMATION, CALL: 301-492-5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207, 301-492-6800.

Sheldon D. Butts,

Deputy Secretary.

December 7, 1988.

FARM CREDIT ADMINISTRATION

Farm Credit Administration Board; Special Meeting

SUMMARY: Notice is hereby given pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), of the special meeting of the Farm Credit Administration Board (Board).

DATE AND TIME: The meeting was held at the offices of the Farm Credit Administration in McLean, Virginia, on November 22, 1988, from 12:00 noon until such time as the Board concludes its business.

FOR FURTHER INFORMATION CONTACT: David A. Hill, Secretary to the Farm Credit Administration Board, 1501 Farm Credit Drive, McLean, Virginia 22102-5090, (703) 883-4003, TDD (703) 883-4444.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board were open to the public (limited space available), and parts of the meeting were closed to the public. The matters considered at the meeting were:

Open Session

1. FCA Merger-Related Policy Statements;

Closed Session [1]

2. Stock Purchase Requirements Associated with the Sale of Receivership Loans; and
3. Section 411 Merger in Louisville District.

Dated: December 7, 1988.

David A. Hill,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-M

FARM CREDIT ADMINISTRATION:

Correction of Sunshine Act Meeting

SUMMARY: Pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), the Farm Credit Administration gave notice on December 5, 1988 (53 FR 49007) of the regular meeting of the Farm Credit Administration Board (Board) scheduled for December 6, 1988. This notice is to revise the exemptions for the closed session of that meeting.

FOR FURTHER INFORMATION CONTACT: David A. Hill, Secretary to the Farm Credit Administration Board, 1501 Farm Credit Drive, McLean, Virginia 22102-5090.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090.

SUPPLEMENTARY INFORMATION: Parts of the meeting of the Board were open to the public (limited space available), and parts of the meeting were closed to the public. The exemptions for the Tuesday, December 6 regular meeting are revised to read as follows:

Session closed to the public—exempt pursuant to 5 U.S.C. 552b(c) (4), (8), and (9).

Dated: December 7, 1988.

David A. Hill,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, December 13, 1988, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

Memorandum and resolution regarding an extension of time for compliance with that portion of the Corporation's rules and regulations, entitled "Foreign Banks," which limits country exposure concentrations of an insured domestic branch of a foreign bank to borrowers in the country in which the foreign bank parent is chartered to 200 percent of the branch's required capital equivalency ledger account and 100 percent for all other countries.

Memorandum and resolution re: Final amendments to Part 303 of the Corporation's rules and regulations, entitled, "Applications, Requests, Submittals, Delegations of Authority, and Notices of Acquisition of Control," which amendments, to implement certain amendments to the Change in Bank Control Act made by section 1360 of the Anti-Drug Abuse Act of 1986, (1) Permit the Corporation to (a) waive the newspaper publication or comment solicitation requirements of 12 CFR 303.4(b)(2)(ii), or to act on a proposed change in control prior to

[1] Session closed to the public—exempt pursuant to 5 U.S.C. 552(c) (4), (8) and (9).

the expiration of the public comment period, only if the Corporation makes a written finding that newspaper publication or comment solicitation would seriously threaten the safety or soundness of the bank to be acquired, and (b) for good cause, shorten the public comment period to a period of not less than ten days; and (2) provide for publication and solicitation of comment in situations in which notice has not been filed pursuant to the Change in Bank Control Act.

The meeting will be held in the Board Room of the sixth floor of the FDIC Building located at 550 17th Street NW., Washington, DC.

Request for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: December 6, 1988.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Tuesday, December 13, 1988, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re:
Kansas City Consolidated Office, Cost Center—301 (Memo dated October 31, 1988)
Audit Report re:
EDP Audit Report, Oklahoma City Consolidated Office Cost Center—401 (Memo dated November 4, 1988)
Trend Analysis Report re:
Analysis of Regional/Consolidated Office Audit Results (Memo dated November 9, 1988)

Discussion Agenda:

Application for Federal deposit insurance:

Pioneer Financial, A Cooperative Bank, an operating non-FDIC-insured cooperative bank, located at 46 Pleasant Street, Malden, Massachusetts.

Application for Federal deposit insurance for a State-chartered branch of a foreign bank:

Bank of Oman Limited, Dubai, United Arab Emirates, for Federal deposit insurance of deposits received at and recorded for the account of its State-chartered branch to be located at 255 Fifth Avenue, New York (Manhattan), New York.

Application for consent to merge:

Wilburton State Bank, Wilburton, Oklahoma, an insured State nonmember bank, for consent to merge, under its charter and with the title "Latimer State Bank," with Latimer State Bank, Wilburton, Oklahoma.

Report of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re:
Vendor Tax Reporting and Withholding (Memo dated November 7, 1988)

Memorandum regarding the Corporation's corporate activities.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

Matters relating to the possible closing of certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: December 6, 1988.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Corrections

Federal Register
Vol. 53, No. 237
Friday, December 9, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Request for Bilateral Textile Consultations With the Government of the People's Republic of China To Review Trade in Categories 330/630

Correction

In notice document 88-24465 beginning on page 41621 in the issue of Monday, October 24, 1988, make the following correction:

On page 41622, in the second column, under *Summary and Conclusions*, the third paragraph should be removed and the following text should be inserted in it's place:

The sharp and substantial increase in imports of hankerchiefs (Category 330/630) from China is causing a real risk of market disruption.

U.S. Production and Market Share

Between 1984 and 1987, U.S. production of cotton and man-made fiber hankerchiefs (Category 330/630) remained relatively flat, fluctuating within a very narrow range declining in one year and increasing in the next. U.S. production in 1987 was flat, remaining at the 1986 level, but was two percent below the 1984 level. The share of this market held by domestic manufacturers fell from 70 percent in 1984 to 64 percent in 1987.

Section 8 Housing Assistance Payments Program; Revised Contract Rent Annual Adjustment Factors

VOL 53 ISS 237 DE 9 1988 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Part 888

[Docket No. N-88-1897; FR-2550]

Section 8 Housing Assistance Payments Program; Revised Contract Rent Annual Adjustment Factors

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice of Revised Contract Rent Annual Adjustment Factors.

SUMMARY: The United States Housing Act of 1937 (1937 Act) requires that the assistance contracts signed by owners participating in the Department's Section 8 Housing Assistance Payments Progams provide for annual or more frequent adjustment in the maximum monthly rentals for units covered by the contract to reflect changes based on fair market rents prevailing in a particular market area, or on a reasonable formula. This Notice announces revised Annual Adjustment Factors, which are based on a formula using rent and utility data from the Consumer Price Index and using the Bureau of the Census American Housing Surveys. The revised Factors are to be used to adjust contract rents in the Section 8 Housing Assistance Payments Programs.

EFFECTIVE DATE: December 9, 1988.

FOR FURTHER INFORMATION CONTACT: Shirley C. Stone, Existing Housing Division, Office of Elderly and Assisted Housing (202) 755-6887; James Tahash, Program Planning Division, Office of Multifamily Housing Management (202) 426-3970. For technical information regarding the development of the schedules for specific areas or the method used for calculating the Adjustment Factors, Michael R. Allard, Economic and Market Analysis Division, Office of Policy Development and Research (202) 755-5577. Mailing address for above persons: Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: Section 8(c)(2)(A) of the United States Housing Act of 1937 (42 U.S.C. 1437f(c)(2)(A)) requires the Department to provide for adjustments in the maximum monthly rents for units covered by the Section 8 Housing Assistance Payments (HAP) Contracts. Adjustments must reflect changes in the fair market rents (FMRs) prevailing in particular market areas or be based on a reasonable formula.

This Notice establishes revised Annual Adjustment Factors (AAFs) based on a formula using rent and utility data from the Consumer Price Index (CPI) and using the Bureau of the Census American Housing Surveys (AHS). The revised AAFs are to be used to adjust Contract rents under the Section 8 Housing Assistance Payments Programs. HUD regulations provide that the AAFs will be published annually in the **Federal Register** (24 CFR 888.202). The annual anniversary date for publication of the AAFs is November 8. These revised AAFs apply (subject to the limitations on applicability discussed below) to adjust Contract Rents on or after November 8, 1988.

Applicability of AAFs to Various Section 8 Programs

In general, AAFs established by this Notice are used to adjust Contract Rents for Section 8 units. The following provides a general description of how AAFs apply under the several Section 8 Housing Assistance Payments Programs. The application of the AAFs should be determined by reference to the HAP Contract and to appropriate program regulations.

In certain cases, AAFs are not used to adjust Contract Rents. AAFs are not used for Section 8 Certificate Program units subject to 24 CFR 882.110(d), which applies to units in certain otherwise subsidized projects that are rented to Section 8 Certificate Program families. (The housing assistance payment for such a unit is equal to the difference between the subsidized rent and the rent payable by the eligible family. Adjustments to the subsidized rents are made in accordance with rules and procedures governing the particular subsidized housing program involved.) In addition, AAFs are not used for units placed under HAP contract in recent years under the Section 202/Section 8 Program. Instead, rents are based on a HUD-approved budget for the project.

Contract Rents for many projects receiving Section 8 subsidies under the Loan Management provisions of 24 CFR Part 886, Subpart A, and for projects receiving Section 8 subsidies under the Property Disposition provisions of 24 CFR Part 886, Subpart C, are adjusted, at HUD's option, either by applying the AAFs or by adjusting rents in accordance with 24 CFR 207.19 (e)(2) and (e)(4).

The AAFs developed by the formula apply to rental units of all bedroom sizes in each rent interval. Under the Section 8 Moderate Rehabilitation Program, the public housing agency (PHA) should use the base rent, not the Contract Rent, to select the correct AAF to apply to the base rent.

Each AAF applies to a specified geographical area, as indicated in the Table at the end of this document. Program participants should refer to the Table that provides the list of States included in each of the four Census Regions and the metropolitan areas with separate local CPI surveys (defined by counties or New England towns) to make certain that they are using the correct factors. Units located in metropolitan areas with separate local CPI surveys must use the corresponding AAFs for that metropolitan area. Units that are located outside those metropolitan areas with separate local CPI surveys must use the AAFs for the respective Census Region within which the state is located.

Application of an AAF to the prior Contract Rent for a unit may not result in material differences between the rents charged for assisted units and unassisted units of similar quality and age in the same market area, as determined by the Secretary. (See 42 U.S.C. 1437f(c)(2)(C), and the applicable program regulations in 24 CFR Ch. VIII.) Thus, an AAF for an entire primary metropolitan statistical area (PMSA) may not be uniformly applicable to all rental housing within that broad area, if a project-specific rent comparability test shows that a material difference exists between the rents charged for assisted projects and unassisted projects of similar quality and age in the same market area.

In certain cases, however, the AAF established for a particular area may result in rents that are substantially lower than rents charged for comparable units not receiving assistance under the Section 8 Program. If this occurs, a PHA or private owner may apply to the HUD Field Office for consideration of a revised AAF for the area, as provided in 24 CFR 888.204.

Owners of Section 8 units (other than units assisted under the Section 8 Certificate and FmHA Programs) who have HAP Contracts with anniversary dates falling on November 8, 1988 through December 9, 1988, may request that the AAFs be applied retroactively to the anniversary date of their HAP Contracts. Retroactivity is permitted to avoid any detriment to owners because of HUD's delay in the annual publication of the factors as required by 24 CFR 888.202. For units assisted under the section 8 Certificate and the FmHA Programs, the factors are not applied retroactively; the annual adjustments, as of any anniversary date, are determined

using the AAFs most recently published in the **Federal Register** (see 24 CFR 882.108(a)(1)(i) and 884.109(b)(2)).

Calculation of Adjustment Factors

AAFs are provided for the four Census Regions, the states of Alaska and Hawaii, and the 72 metropolitan areas with local CPI surveys (listed in alphabetical order). Since Westchester County, NY has been established as a separate Fair Market Rent area (see section 142(b) of the Housing and Community Development Act of 1987 (Pub. L. 100–242, approved February 5, 1988) (1987 Act)), a separate listing for that county is included in this publication of AAFs as well. The CPI data are no longer collected for the Scranton—Wilkes-Barre, PA metropolitan area. The five counties that defined this area (Columbia, Lackawanna, Luzerne, Monroe, Wyoming) will now use the AAFs for the Northeast Census Region.

As a result of decreases in the local CPI surveys, the department is publishing AAFs that are less than 1.00 for five metropolitan areas in Texas. These areas are: The Houston PMSA; the Brazoria PMSA; The Galveston-Texas City PMSA; the Dallas PMSA; and the Fort Worth–Arlington PMSA. The AAFs for the state of Alaska, also less than 1.00, are based on a reduction in the Anchorage CPI. AAFs that are less than 1.00 normally would result in rent reductions. However, section 8(c)(2)(C) of the 1937 Act, as amended by section 142(d) of the Housing and Community Development Act of 1987, prohibits the reduction of contract rents for newly constructed, substantially rehabilitated, or moderately rehabilitated projects (including projects assisted under section 8 as in effect prior to November 30, 1983), unless the project has been refinanced in a manner that reduces the periodic payments of the owner. Therefore, contract rents for newly constructed, substantially rehabilitated, or moderately rehabilitated projects (including projects assisted under Section 8 as in effect prior to November 30, 1983) in areas with factors of less than 1.00 will not be reduced as a result of such factors.

For the Denver, CO PMSA and the Boulder–Longmont, CO PMSA, there was no change in the CPI factor used to determine the AAFs for Contract Rents for units including the highest cost utility. The AAFs for Contract Rents for units excluding the highest cost utilities reflects the slight increase in the CPI data for these same two areas.

Except for rent adjustments for manufactured home space rents under the Section 8 Certificate Program, the formula for calculating the AAFs for each area was developed as follows: (1) The increases in the residential rent component and the fuel and utilities component of the CPI were based on the most recent available average annual changes; (2) a shelter rent factor was calculated by eliminating the effect of heating costs on the CPI residential rent component as determined by Bureau of Labor Statistics data; (3) a gross rent factor for each of the metropolitan areas covered by the CPI and for each of the four Census Regions was calculated by weighing the shelter rent and the fuel and utilities charges in accordance with updated 1980 Census State weights of these component parts of rent, as derived from 1983 AHS data; (4) AAFs for Contract Rents including the highest cost utility were calculated by adjusting the gross rent factors to reflect variations by rent range in each area, based on variations developed from 1983 national AHS data as applied to the local FMR levels; and (5) AAFs for Contract Rents excluding the highest cost utility were calculated by developing updated shelter rents from the updated gross rents, by rent ranges, and then dividing the updated shelter rents by that of the previous year.

Section 8 Certificate Program AAFs for Manufactured Home Spaces

This notice contains a separate set of AAFs for adjusting Contract Rents for manufactured home spaces. There is one factor for each area, which represents the change in the median rent for the area. These factors were derived by following steps one and two in the formula described above.

Other matters

An environmental assessment is unnecessary, since revising Annual Adjustment Factors is categorically excluded from the Department's National Environmental Policy Act procedures under 24 CFR 50.20.

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this Notice do not have federalism implications and, thus, are not subject to review under the Order. The Notice merely announces the adjustment factors to be used to adjust contract rents in the Section 8 Housing Assistance Payment Programs, as required by the United States Housing Act of 1937.

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has also determined that this Notice does not have potential significant impact on family formation, maintenance, and general well-being and, thus, is not subject to review under the Order. The Notice merely announces the adjustment factors to be used to adjust contract rents in the Section 8 Housing Assistance Payment Programs, as required by the United States Housing Act of 1937.

The Catalog of Federal Domestic Assistance program number for Lower Income Housing Assistance Programs (Section 8) is 14.156.

Accordingly, the Department publishes these Contract Rent Annual Adjustment Factors for the Section 8 Housing Assistance Payments Program as set forth in the following tables:

Dated: December 2, 1988.

Thomas T. Demery,

Assistant Secretary for Housing-Federal Housing Commissioner.

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

WHERE:

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 26, at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC
RESERVATIONS: 202–523–5240

LOS ANGELES, CA

WHEN: January 12, at 9:00 a.m.
Room 8544,
Federal Building,
300 N. Los Angeles St.,
Los Angeles, CA
RESERVATIONS: Call the Federal Information Center.
Los Angeles 213–894–3800

Rules and Regulations

Federal Register
Vol. 53, No. 238
Monday, December 12, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 906

[Docket No. FV-88-122]

Oranges and Grapefruit Grown in the Lower Rio Grande Valley in Texas; Authorization of an Additional Container

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting without modification as a final rule provisions of an interim final rule which authorized an additional container for bulk shipments of Texas orange and grapefruit to retailers. This container is needed by the Texas orange and grapefruit industry to more successfully ship these fruits to the fresh market.

EFFECTIVE DATE: December 12, 1988.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone: (202) 475–3918.

SUPPLEMENTARY INFORMATION: This final rule is issued under the Marketing Agreement and Marketing Order No. 906, as amended (7 CFR Part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 78 handlers of Texas oranges and grapefruit subject to regulation under the Texas citrus marketing order, and approximately 2,500 orange and grapefruit producers in Texas. The number of handlers has been changed to 78 from 22 and the number of producers to 2,500 from 3,000 in this final rule, from that in the interim final rule, reflecting further analysis of pertinent statistical data. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of these handlers and producers may be classified as small entities.

An interim final rule amending § 906.340 *Container, pack, and container marking regulations* was issued September 22, 1988, and published in the **Federal Register** (53 FR 37728, September 28, 1988; and corrected at 53 FR 43319, October 26, 1988). The interim final rule provided that interested persons could file public comments through October 28, 1988. No comments were received.

The interim final rule revised paragraph (a)(1) of § 906.340 to authorize the use of a third container for bulk shipments of Texas oranges and grapefruit. This container is a fiberboard crib, either rectangular or octagonal in shape, with approximate dimensions of 46 inches to 47-½ inches in length, 37 to 38 inches in width, and 36 inches in height. The container must have a Mullen or Cady test of at least 1,300 pounds and must be used only once for shipment of citrus fruit. This container was used on an experimental basis last season, and it was found acceptable. The major use of this crib is for bulk shipments of fruit to retailers. This action was unanimously recommended by the Texas Valley Citrus Committee, which administers the order locally, at its meeting on June 29, 1988.

The interim final rule also removed obsolete language pertaining to a container no longer authorized but still listed in paragraph (a)(1)(iii) of § 906.340, made minor language changes for clarity in the introductory text and paragraph (a)(1) of § 906.340, and renumbered several paragraphs within paragraph (a)(1).

The Department's view is that the impact of this action, continuing in effect changes made by the interim final rule, will be beneficial to producers and handlers because it will continue to provide handlers with more flexibility in marketing Texas oranges and grapefruit.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendation submitted by the committee, and other available information, it is found that the final rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) This action maintains relaxed container requirements currently in effect for Texas oranges and grapefruit; (2) handlers of these fruits are aware of this action which was recommended unanimously by the committee at a public meeting and they will need no additional time to continue to comply with the requirements; (3) shipment of the 1988–89 season Texas orange and grapefruit crops is currently in progress; (4) the interim final rule provided a 30-day comment period, and no comments were received; and (5) no useful purpose would be served by delaying the effective date until 30 days after publication.

List of Subjects in 7 CFR Part 906

Marketing agreements and orders, Texas grapefruit, Oranges.

For the reasons set forth in the preamble, 7 CFR Part 906 is amended as follows:

PART 906—ORANGES AND GRAPEFRUIT GROWN IN THE LOWER RIO GRANDE VALLEY IN TEXAS

1. The authority citation for 7 CFR Part 906 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Accordingly, the interim final rule amending § 906.340, which was published in the **Federal Register** (53 FR 37729, September 28, 1988; and corrected at 53 FR 43319, October 26, 1988), is adopted as a final rule without change.

Note: This section will appear in the Code of Federal Regulations.

Dated: December 7, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

Food Safety and Inspection Service

9 CFR Parts 301, 304, 305, 313, 318 and 327

[Docket No. 87–022F]

Mandatory Meat Inspection; Definitions

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule; amendment.

SUMMARY: The Food Safety and Inspection Service (FSIS) is amending the Federal meat inspection regulations to arrange the terms defined in § 301.2 (9 CFR 301.2) in alphabetical order and to make minor clerical revisions in certain of those definitions. The definitions of terms in § 301.2 are being rearranged to permit easier reference to them. Four of the definitions are amended by removing the pronoun "his" and replacing it with the pronouns "his/her" to correct gender terminology within the text of the definitions. The definition for "circuit supervisor" is amended to remove the term "circuit" for clarity. The definition of the term "program" is revised to reflect organizational units that are involved in the administration of inspectional activities. In addition, §§ 304.1(b), 305.5(c), 313.1(c), 318.308(d)(vi)(*a*)(*1*), and 327.5(a), which contain references to certain terms defined in § 301.2 are being amended to be consistent with § 301.2 as revised.

EFFECTIVE DATE: December 12, 1988.

FOR FURTHER INFORMATION CONTACT: Ralph E. Stafko, Director, Policy Office, Policy and Planning Staff, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447–8168.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Administrator has determined that this final rule is not a "major rule" within the scope of Executive Order 12291. It would not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises or export markets. This rule requires administrative changes only and the costs of such action are minor.

Effect on Small Entities

The Administrator has determined that this action will not have a significant economic impact upon a substantial number of small entities as defined by the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601 *et seq.*) because only nonsubstantive administrative changes are being made and do not effect any member of the public.

It has been decided that the list of terms and definitions in § 301.2 (CFR 301.2) be arranged in alphabetical order so that they will be easier to find in the text. FSIS has considered and adopted the recommendation that the terms be arranged alphabetically in § 301.2, accordingly.

For reasons set forth in the preamble, Title 9, Subchapter A, Parts 301, 304, 305, 313, 318, and 327 are amended as set forth below.

PART 301—[AMENDED]

1. The authority citation for Part 301 continues to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*

2. Section 301.2 is amended by rearranging and revising the terms in alphabetical order and revising the definition of the term "program" as follows (in effect, paragraphs (a) through (iii) and (kkk) through (yyy) are revised, paragraph (jjj) is added, and paragraph (zzz) is removed):

§ 301.2 Definitions.

* * * * *

(a) *The Act.* The Federal Meat Inspection Act, as amended, (34 Stat. 1260, as amended, 81 Stat. 584, 84 Stat. 438, 92 Stat. 1069, 21 U.S.C., sec. 601 *et seq.*).

(b) *Administrator.* The Administrator of the Food Safety and Inspection Service or any officer or employee of the Department to whom authority has heretofore been delegated or may hereafter be delegated to act in his/her stead.

(c) *Adulterated.* This term applies to any carcass, part thereof, meat or meat food product under one or more of the following circumstances:

(1) If it bears or contains any such poisonous or deleterious substance which may render it injurious to health; but in case the substance is not an added substance, such article shall not be considered adulterated under this clause if the quantity of such substance in or on such article does not ordinarily render it injurious to health;

(2)(i) If it bears or contains (by reason of administration of any substance to the live animal or otherwise) any added poisonous or added deleterious substance (other than one which is:

(A) A pesticide chemical in or on a raw agricultural commodity;

(B) A food additive; or

(C) A color additive) which may, in the judgment of the Administrator, make such article unfit for human food;

(ii) If it is, in whole or in part, a raw agricultural commodity and such commodity bears or contains a pesticide chemical which is unsafe within the meaning of section 408 of the Federal Food, Drug, and Cosmetic Act;

(iii) If it bears or contains any food additive which is unsafe within the

meaning of section 409 of the Federal Food, Drug, and Cosmetic Act;

(iv) If it bears or contains any color additive which is unsafe within the meaning of section 706 of the Federal Food, Drug, and Cosmetic Act: *Provided*, That an article which is not deemed adulterated under paragraphs (aa)(2) (ii), (iii), or (iv) of this section shall nevertheless be deemed adulterated if use of the pesticide chemical food additive, or color additive in or on such article is prohibited by the regulations in this subchapter in official establishments;

(3) If it consists in whole or in part of any filthy, putrid, or decomposed substance or is for any other reason unsound, unhealthful, unwholesome, or otherwise unfit for human food;

(4) If it has been prepared, packed, or held under unsanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered injurious to health;

(5) If it is, in whole or in part, the product of an animal which has died otherwise than by slaughter;

(6) If its container is composed, in whole or in part, of any poisonous or deleterious substance which may render the contents injurious to health;

(7) If it has been intentionally subjected to radiation, unless the use of the radiation was in conformity with a regulation or exemption in effect pursuant to section 409 of the Federal Food, Drug, and Cosmetic Act;

(8) If any valuable constituent has been in whole or in part omitted or abstracted therefrom; or if any substance has been substituted, wholly or in part therefor; or if damage or inferiority has been concealed in any manner; or if any substance has been added thereto or mixed or packed therewith so as to increase its bulk or weight, or reduce its quality or strength, or make it appear better or of greater value than it is; or,

(9) If it is margarine containing animal fat and any of the raw material used therein consisted in whole or in part of any filthy, putrid, or decomposed substance, or is otherwise adulterated.

(d) *Anesthesia.* Loss of sensation or feeling.

(e) *Animal food.* Any article intended for use as food for dogs, cats, or other animals derived wholly, or in part, from the carcass or parts or products of the carcass of any livestock, except that the term animal food as used herein does not include:

(1) Processed dry animal food or

(2) Livestock or poultry feeds manufactured from processed livestock byproducts (such as meatmeal tankage, meat and bonemeal, bloodmeal, and feed grade animal fat).

(f) *Animal food manufacturer.* Any person engaged in the business of manufacturing or processing animal food.

(g) *Area.* One or more circuits under the supervision of an area supervisor.

(h) *Area Supervisor.* The official in charge of an area.

(i) *Artificial coloring.* A coloring containing any dye or pigment, which dye or pigment was manufactured by a process of synthesis or other similar artifice, or a coloring which was manufactured by extracting a natural dye or natural pigment from a plant or other material in which such dye or pigment was naturally produced.

(j) *Artificial flavoring.* A flavoring containing any sapid or aromatic constituent, which constituent was manufactured by a process of synthesis or other similar artifice.

(k) *Biological residue.* Any substance, including metabolites, remaining in livestock at time of slaughter or in any of its tissues after slaughter as the result of treatment or exposure of the livestock to a pesticide, organic or inorganic compound, hormone, hormone-like substance, growth promoter, antibiotic, anthelmintic, tranquilizer, or other therapeutic or prophylactic agent.

(l) *Capable of use as human food.* This term applies to any carcass, or part or product of a carcass, of any livestock, unless it is denatured or otherwise identified as required by the applicable provisions of §§ 314.3, 314.10, 325.11, and 325.13 of this subchapter to deter its use as a human food, or it is naturally inedible by humans; e.g., hoofs or horns in their natural state.

(m) *Captive bolt.* A stunning instrument which when activated drives a bolt out of a barrel for a limited distance.

(n) *Carbon dioxide.* A gaseous form of the chemical formula CO_2.

(o) *Carbon dioxide concentration.* Ratio of carbon dioxide gas and atmospheric air.

(p) *Carcass.* All parts, including viscera, of any slaughtered livestock.

(q) *Chemical preservative.* Any chemical that, when added to a meat or meat food product, tends to prevent or retard deterioration thereof, but does not include common salt, sugars, vinegars, spices, or oils extracted from spices or substances added to meat and meat food products by exposure to wood smoke.

Other definitions, if any, that are applicable only for purposes of a specific part of the regulations in this subchapter, are set forth in such part.

(r) *Circuit.* One or more official establishments included under the supervision of a circuit supervisor.

(s) *Circuit supervisor.* The supervisor of a circuit.

(t) *Commerce.* Commerce between any State, any Territory, or the District of Columbia, and any place outside thereof; or within any Territory not organized with a legislative body, or the District of Columbia.

(u) *Consciousness.* Responsiveness of the brain to the impressions made by the senses.

(v) *Cutting up.* Any division of any carcass or part thereof, except that the trimming of carcasses or parts thereof to remove surface contaminants is not considered as cutting up.

(w) *Dead livestock.* The body (cadaver) of livestock which has died otherwise than by slaughter.

(x) *The Department.* The United States Department of Agriculture.

(y) *Dying, diseased, or disabled livestock.* Livestock which has or displays symptoms of having any of the following:

(1) Central nervous system disorder;

(2) Abnormal temperature (high or low);

(3) Difficult breathing;

(4) Abnormal swellings;

(5) Lack of muscular coordination;

(6) Inability to walk normally or stand;

(7) Any of the conditions for which livestock is required to be condemned on ante-mortem inspection in accordance with the regulations in Part 309 of this subchapter.

(z) *Edible.* Intended for use as human food.

(aa) *Experimental animal.* Any animal used in any research investigation involving the feeding or other administration of, or subjection to, an experimental biological product, drug, or chemical or any nonexperimental biological product, drug, or chemical used in a manner for which it was not intended.

(bb) *Exposure time.* The period of time an animal is exposed to an anesthesia-producing carbon dioxide concentration.

(cc) *Federal Food, Drug, and Cosmetic Act.* The Act so entitled, approved June 25, 1938 (52 Stat. 1040), and Acts amendatory thereof or supplementary thereto.

(dd) *Firm.* Any partnership, association, or other unincorporated business organization.

(ee) *Food Safety and Inspection Service.* The Food Safety and Inspection Service of the Department.

(ff) *Further processing.* Smoking, cooking, canning, curing, refining, or

rendering in an official establishment of product previously prepared in official establishments.

(gg) *Immediate container.* The receptacle or other covering in which any product is directly contained or wholly or partially enclosed.

(hh) *Import Field Office (IFO).* The office of the supervisor of import inspection activities for a particular importing field area. The areas are as follows:

IFO #1. Boston, MA—Covering the States of Massachusetts, New York (excluding New York City), Connecticut, Rhode Island, Vermont, New Hampshire and Maine.

IFO #2. New York, NY—Covering the areas of New York City and northern New Jersey.

IFO #3. Philadelphia, PA—Covering the State of Pennsylvania and the area of southern New Jersey.

IFO #4. Baltimore, MD—Covering the States of Maryland, Delaware, West Virginia, Virginia and Kentucky.

IFO #5. Charleston, SC—Covering the States of Tennessee, North Carolina, South Carolina, Georgia and Florida (excluding south Florida).

1IFO #6. Miami, FL—Covering the areas of southern Florida, Puerto Rico and the Virgin Islands.

1IFO #7. New Orleans, LA—Covering the States of Louisiana, Mississippi, Alabama, Arkansas, Texas, Oklahoma, Kansas, New Mexico and Colorado.

1IFO #8. San Pedro, CA—Covering the States of Hawaii, Arizona, Utah, Nevada, the area of southern California, American Samoa, Guam, and the Northern Marianas.

1IFO #9. Tacoma, WA—Covering the States of Washington, Oregon, Idaho, Montana, Wyoming, North Dakota, South Dakota, Alaska, and Nebraska, and the area of northern California.

1IFO #10. Detroit, MI—Covering the States of Michigan, Wisconsin, Minnesota, Iowa, Missouri, Illinois, Indiana and Ohio.

(ii) *Import Supervisor.* The official in charge of import inspection activities within each of the import field offices.

(jj) *Inedible.* Adulterated, uninspected, or not intended for use as human food.

(kk) *Inhumane slaughter or handling in connection with slaughter.* Slaughter or handling in connection with slaughter not in accordance with the Act of August 27, 1958 (72 Stat. 862; 7 U.S.C. 1901 through 1906, as amended by the Humane Methods of Slaughter Act of 1978, 92 Stat. 1069) and Part 313 of this subchapter.

(ll) *"Inspected and passed" or "U.S. Inspected and Passed" or "U.S. Inspected and Passed by Department of Agriculture" (or any authorized abbreviation thereof).* This term means that the product so identified has been inspected and passed under the regulations in this subchapter, and at the time it was inspected, passed, and identified, it was found to be not adulterated.

(mm) *Inspector.* An inspector of the Program.

(nn) *Inspector in charge.* A designated program employee who is in charge of one or more official establishments within a circuit and is responsible to the circuit supervisor or his/her designee.

(oo) *Label.* A display of written, printed, or graphic matter upon the immediate container (not including package liners) of any article.

(pp) *Labeling.* All labels and other written, printed, or graphic matter:

(1) Upon any article or any of its containers or wrappers, or

(2) Accompanying such article.

(qq) *Livestock.* Cattle, sheep, swine, goat, horse, mule, or other equine.

(rr) *Meat.* The part of the muscle of any cattle, sheep, swine, or goats, which is skeletal or which is found in the tongue, in the diaphragm, in the heart, or in the esophagus, with or without the accompanying and overlying fat, and the portions of bone, skin, sinew, nerve, and blood vessels which normally accompany the muscle tissue and which are not separated from it in the process of dressing. It does not include the muscle found in the lips, snout, or ears. This term, as applied to products of equines, shall have a meaning comparable to that provided in this paragraph with respect to cattle, sheep, swine, and goats.

(ss) *Meat broker.* Any person engaged in the business of buying or selling carcasses, parts of carcasses, meat or meat food products of livestock on commission, or otherwise negotiating purchases or sales of such articles other than for his/her own account or as an employee of another person.

(tt) *Meat byproduct.* Any part capable of use as human food, other than meat, which has been derived from one or more cattle, sheep, swine, or goats. This term, as applied to products of equines, shall have a meaning comparable to that provided in this paragraph with respect to cattle, sheep, swine, and goats.

(uu) *Meat food product.* Any article capable of use as human food which is made wholly or in part from any meat or other portion of the carcass of any cattle, sheep, swine, or goats, except those exempted from definition as a meat food product by the Administrator in specific cases or by the regulations in Part 317 of this subchapter, upon a determination that they contain meat or other portions of such carcasses only in a relatively small proportion or historically have not been considered by consumers as products of the meat food industry, and provided that they comply with any requirements that are imposed in such cases or regulations as conditions of such exemptions to assure that the meat or other portions of such carcasses contained in such articles are not adulterated and that such articles are not represented as meat food products. This term, as applied to food products of equines, shall have a meaning comparable to that provided in this paragraph with respect to cattle, sheep, swine, and goats.

(vv) *Misbranded.* This term applies to any carcass, part thereof, meat or meat food product under one or more of the following circumstances:

(1) If its labeling is false or misleading in any particular;

(2) If it is offered for sale under the name of another food;

(3) If it is an imitation of another food, unless its label bears, in type of uniform size and prominence, the word "imitation" and immediately thereafter, the name of the food imitated;

(4) If its container is so made, formed, or filled as to be misleading;

(5) If in a package or other container unless it bears a label showing:

(i) The name and place of business of the manufacturer, packer, or distributor; and

(ii) An accurate statement of the quantity of the contents in terms of weight, measure, or numerical count; except as otherwise provided in Part 317 of this subchapter with respect to the quantity of contents;

(6) If any word, statement, or other information required by or under authority of the Act to appear on the label or other labeling is not prominently placed thereon with such conspicuousness (as compared with other words, statements, designs, or devices, in the labeling) and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use;

(7) If it purports to be or is represented as a food for which a definition and standard of identity or composition has been prescribed by the regulations in Part 319 of this subchapter unless:

(i) It conforms to such definition and standard, and

(ii) Its label bears the name of the food specified in the definition and standard and, insofar as may be required by such regulations, the common names of optional ingredients (other than spices, flavoring, and coloring) present in such food;

(8) If it purports to be or is represented as a food for which a standard or standards of fill of container

have been prescribed by the regulations in Part 319 of this subchapter, and it falls below the standard of fill of container applicable thereto, unless its label bears, in such manner and form as such regulations specify, a statement that it falls below such standard;

(9) If it is not subject to the provisions of paragraph (vv)(7)(ii) of this section unless its label bears:

(i) The common or usual name of the food, if any there be, and

(ii) In case it is fabricated from two or more ingredients, the common or usual name of each such ingredient, except as otherwise provided in Part 317 of this subchapter;

(10) If it purports to be or is represented for special dietary uses, unless its label bears such information concerning its vitamin, mineral, and other dietary properties as is required by the regulations in Part 317 of this subchapter.

(11) If it bears or contains any artificial flavoring, artificial coloring, or chemical preservative, unless it bears a label stating that fact; except as otherwise provided by the regulations in Part 317 of this subchapter; or

(12) If it fails to bear, directly thereon or on its containers, when required by the regulations in Part 316 or 317 of this subchapter, the inspection legend and, unrestricted by any of the foregoing, such other information as the Administrator may require in such regulations to assure that it will not have false or misleading labeling and that the public will be informed of the manner of handling required to maintain the article in a wholesome condition.

(ww) *Nonfood compound.* Any substance proposed for use in official establishments, the intended use of which will not result, directly or indirectly, in the substance becoming a component or otherwise affecting the characteristics of meat food and meat products, excluding labeling and packaging materials as covered in Part 317 of the subchapter.

(xx) *Official certificate.* Any certificate prescribed by the regulations in this subchapter for issuance by an inspector or other person performing official functions under the Act.

(yy) *Official device.* Any device prescribed by the regulations in Part 312 of this subchapter for use in applying any official mark.

(zz) *Official establishment.* Any slaughtering, cutting, boning, meat canning, curing, smoking, salting, packing, rendering, or similar establishment at which inspection is maintained under the regulations in this subchapter.

(aaa) *Official import inspection establishment.* This term means any establishment, other than an official establishment as defined in paragraph (zz) of this section, where inspections are authorized to be conducted as prescribed in § 327.6 of this subchapter.

(bbb) *Official inspection legend.* Any symbol prescribed by the regulations in this subchapter showing that an article was inspected and passed in accordance with the Act.

(ccc) *Official mark.* The official inspection legend or any other symbol prescribed by the regulations in this subchapter to identify the status of any article or animal under the Act.

(ddd) *Packaging material.* Any cloth, paper, plastic, metal, or other material used to form a container, wrapper, label, or cover for meat products.

(eee) *Person.* Any individual, firm, or corporation.

(fff) *Pesticide chemical, food additive, color additive, raw agricultural commodity.* These terms shall have the same meanings for purposes of the Act and the regulations in this subchapter as under the Federal Food, Drug, and Cosmetic Act.

(ggg) *Prepared.* Slaughtered, canned, salted, rendered, boned, cut up, or otherwise manufactured or processed.

(hhh) *Product.* Any carcass, meat, meat byproduct, or meat food product, capable of use as human food.

(iii) *Program.* The organizational unit within the Department having the responsibility for carrying out the provisions of the Act.

(jjj) *Program employee.* Any inspector or other individual employed by the Department or any cooperating agency who is authorized by the Secretary to do any work or perform any duty in connection with the Program.

(kkk) *Regional Director.* The official [1] in charge of the program within each of the following regions:

Northeastern Region—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Virginia (except for Northwestern part).

Southeastern Region—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia (Northwestern), West Virginia, Puerto Rico, and the Virgin Islands.

North Central Region—Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio, and Wisconsin.

Southwestern Region—Arkansas, Kansas, Louisiana, Missouri, Nebraska, New Mexico, Oklahoma, and Texas.

Western Region—Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming, American Samoa, Guam, and the Northern Mariana Islands.

(lll) *Renderer.* Any person engaged in the business of rendering carcasses or parts or products of the carcasses of any livestock except rendering conducted under inspection or exemption under Title I of the Act.

(mmm) *Secretary.* The Secretary of Agriculture of the United States or his/her delegate.

(nnn) *Shipping container.* The outside container (box, bag, barrel, crate, or other receptacle or covering) containing or wholly or partly enclosing any product packed in one or more immediate containers.

(ooo) *State.* Any State of the United States or the Commonwealth of Puerto Rico.

(ppp) *Supervision.* The controls, as prescribed in instructions to Program employees, to be exercised by them over particular operations to insure that such operations are conducted in compliance with the Act and the regulations in this subchapter.

(qqq) *Surgical anesthesia.* A state of unconsciousness measured in conformity with accepted surgical practices.

(rrr) *Territory.* Guam, the Virgin Islands of the United States, American Samoa, and any other territory or possession of the United States, excluding the Canal Zone.

(sss) *U.S. Condemned.* This term means that the livestock so identified has been inspected and found to be in a dying condition, or to be affected with any other condition or disease that would require condemnation of its carcass.

(ttt) *U.S. Inspected and Condemned (or any authorized abbreviation thereof).* This term means that the carcass, viscera, other part of carcass, or other product so identified has been inspected, found to be adulterated, and condemned under the regulations in this subchapter.

(uuu) *U.S. Passed for Cooking.* This term means that the meat or meat byproduct so identified has been inspected and passed on condition that it be cooked or rendered as prescribed

---

[1] The addresses of the Regional Directors are as follows:

Northeastern Region—Seventh Floor, 1421 Cherry Street, Philadelphia, PA 19102.

Southeastern Region—Room 299 South, 1718 Peachtree Street, NW., Atlanta, GA 30309.

North Central Region—607 East Second Street, Des Moines, IA 50309.

Southwestern Region—Room 5–F41, 1100 Commerce Street, Dallas, TX 75201.

Western Region—Room 620 Central Avenue, Building 2C, Alameda, CA 94501.

VOL 53 ISS 238 DE 12 1988 UMI

by the regulations in Part 315 of this chapter.

(vvv) *U.S. Passed for Refrigeration.* This term means that the meat or meat byproduct so identified has been inspected and passed on condition that it be refrigerated or otherwise handled as prescribed by the regulations in Part 311 of this subchapter.

(www) *U.S. Retained.* This term means that the carcass, viscera, other part of carcass, or other product, or article so identified is held for further examination by an inspector to determine its disposal.

(xxx) *U.S. Suspect.* This term means that the livestock so identified is suspected of being affected with a disease or condition which may require its condemnation, in whole or in part, when slaughtered, and is subject to further examination by an inspector to determine its disposal.

(yyy) *United States.* The States, the District of Columbia, and the Territories of the United States.

PART 304—APPLICATION FOR INSPECTION; GRANT OR REFUSAL OF INSPECTION

2. The authority citation for Part 304 continues to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 466–466k.

§ 304.1 [Amended]

3. Section 304.1(b) is amended by removing "§ 301.2(iii)" and inserting in its place "§ 301.2(kkk)".

PART 305—OFFICIAL NUMBERS; INAUGURATION OF INSPECTION; WITHDRAWAL OF INSPECTION; REPORTS OF VIOLATION

4. The authority citation for Part 305 continues to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 466–466k.

§ 305.5 [Amended]

5. Section 305.5(c) is amended by removing "§ 301.2(ooo) (9 CFR 301.2(ooo))" and inserting in its place "§ 301.2(kk) (9 CFR 301.2(kk)."

PART 313—HUMANE SLAUGHTER OF LIVESTOCK

6. The authority citation for Part 313 continues to read as follows:

Authority: 92 Stat. 1069, 72 Stat. 862, 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 91, 438; 21 U.S.C. 71 *et seq.*; 601 *et seq.*; 7 U.S.C. 1901–1906.

§ 313.1 [Amended]

7. Section 313.1(c) is amended by removing "§ 301.2(gg)" and "§ 301.2(ccc)" and replacing with "§ 301.2(xxx)" and "§ 301.2(y)", respectively.

PART 318—ENTRY INTO OFFICIAL ESTABLISHMENTS; REINSPECTION AND PREPARATION OF PRODUCTS

8. The authority citation for Part 318 continues to read as follows:

Authority: 34 Stat. 1260 as amended, 81 Stat. 584, as amended (21 U.S.C. 601 *et seq.*), 72 Stat. 862, 92 Stat. 1069, as amended (7 U.S.C. 1901 *et seq.*), 76 Stat. 663 (7 U.S.C. 450 *et seq.*).

Subpart G—Canning and Canned Products

§ 318.308 [Amended]

9. Section 318.308(d)(vi)(*a*(*1*) is amended by removing "§ 301.2(ee)" and inserting in its place "§ 301.2(ttt)".

PART 327—IMPORTED PRODUCTS

10. The authority citation for Part 327 continues to read as follows:

Authority: 38 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*

§ 327.5 [Amended]

11. Section 327.5(a) is amended by removing "§ 301.2(yyy)" and inserting in its place "§ 301.2(hh).".

The amendments are not substantive changes and do not affect any member of the public. Therefore, under the administrative procedures provisions in 5 U.S.C. 553, it is found upon good cause that public participation in this rulemaking procedure is impracticable and unnecessary, and good cause is found for making the amendments effective less than 30 days after publication in the **Federal Register**.

Done at Washington, DC, on: November 16, 1988.

[Docket No. 85–030F]

Ascorbic Acid, Erythorbic Acid, Citric Acid, Sodium Ascorbate, and Sodium Citrate in Fresh Pork Cuts

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule; confirmation of interim rule.

SUMMARY: On August 22, 1986, FSIS published an interim final rule (51 FR 30052) (corrected on September 22, 1986, at 51 FR 33565) amending the Federal meat inspection regulations to permit the use of ascorbic acid, erythorbic acid, citric acid, sodium ascorbate, and sodium citrate, singly or in combination, to maintain the color of fresh pork cuts. Fresh pork cuts which have been treated to maintain color by the addition of these substances are required to be labeled with a qualifying phrase, contiguous to the product name, which indicates that they have been treated to maintain color. The Administrator of FSIS determined that the Agency had sufficient information and data to satisfy the requirements for amending the regulations. However, an interim rule was published to permit public comments because of the novelty of the new use of these substances, and to allow additional time for the Agency to assess data under actual market conditions before confirming the interim rule. FSIS has determined the interim rule should be made final.

EFFECTIVE DATE: January 11, 1989.

FOR FURTHER INFORMATION CONTACT: Ashland L. Clemons, Acting Director, Standards and Labeling Division, Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250; Area Code (202) 447–6042.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Administrator has determined that this final rule is not a "major rule" within the scope of E.O. 12291. It will not result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This final rule affirms the discretionary use of ascorbic acid, erythorbic acid, citric acid, sodium ascorbate, and sodium citrate, singly or in combination, to maintain the color of fresh pork cuts.

Effect on Small Entities

The Administrator certifies that this final rule will not have a significant economic impact on a substantial

number of small entities as defined by the Regulatory Flexibility Act (5 U.S.C. 601 through 612).

This final rule will impose no new requirements on industry. This rule affirms FSIS approval for the meat industry to use a new method of color preservation to help maintain the fresh appearance of fresh pork cuts. Costs should be incidental and would be offset by distribution efficiencies and reduction of losses due to color deterioration of fresh pork cuts.

Background

FSIS was petitioned [1] by Wilson Foods Corporation to permit the addition of ascorbic acid, erythorbic acid, citric acid, sodium ascorbate, and sodium citrate, in conjunction with phosphates, to fresh port cuts packaged in a controlled atmosphere of carbon dioxide, oxygen and nitrogen in order to maintain the fresh appearance of such meat. This treatment was claimed to result in the extension of a fresh color and appearance during the product's microbiological shelf life.

Fresh pork which is packaged and stored at low temperatures will remain safe and wholesome for 30 days or more. During storage, however, pork color changes and the product loses its appeal and marketability while still safe and wholesome. These color changes detract from the appearance of the product.

The petitioner presented data demonstrating that the addition of the above mentioned substances resulted in extension of the color and appearance of fresh pork cuts for a period of time less than or equal to the microbiological shelf life of fresh port cuts.

The Administrator of FSIS found that information provided by the petitioner and other data available to the Agency disclosed that (1) the use of these substances is functional and suitable for the product, (2) the substances would be used at the lowest level necessary to accomplish their intended technical effect, and (3) the use of these substances will not render the product on which they are used, adulterated, misbranded, or otherwise not in accordance with the requirements of the Act provided treatment occurs only under an approved partial quality control (PQC) program monitored by FSIS. The Agency published an interim final rule (51 FR 30052) amending the Federal meat inspection regulations to permit the use of ascorbic acid, citric acid, erythorbic acid, sodium ascorbate and sodium citrate, singly or in combination, to maintain the color of fresh pork cuts. However, public comments were solicited so that commercial experience could be obtained and considered prior to confirmation of the rule as final.

The petitioner provided further data on consumer tests to determine the habits of consumers when purchasing fresh pork, as well as methods used by consumers to evaluate freshness and wholesomeness. Additionally, data were evaluated on typical duration of refrigerated and frozen storage by consumers. These data indicated that product color was the first test for wholesomeness, but that consumers also used odor and flavor as indicators. It was determined that consumers typically prepare or freeze fresh meat within the first three days of refrigerated storage.

Webb Foodlab, Inc., conducted an independent study for FSIS, which corroborated data provided by the petitioner. The study evaluated the treatment under commercial and retail conditions rather than laboratory conditions and included sensory analysis, microbiological evaluation and chemical analysis. Samples of treated pork were obtained from retail stores in two cities. Retail storage conditions were maintained throughout the study. Analyses were performed on samples which were fresh, three days old and seven days old.

For the sensory analysis, samples were evaluated by ten panelists trained to focus on color as the sole criterion of freshness. The samples were rated as to whether the panelist would purchase the pork chops. The samples were then rated in categories of color, odor, cooked odor, flavor and off flavor.

The microbiological evaluation involved several tests including aerobic plate count, *Salmonella, Listeria,* and the Mugg test (PTG agar plate) for total Enterobacteriaceae and *E. Coli.* The chemical tests included analysis of rancidity (thiobarbituric acid (TBA) content), ascorbic acid content, and pH.

Following the sensory, microbiological, and chemical analyses, the study concluded that if pork chops treated with ascorbic acid, erythorbic acid, citric acid, sodium ascorbate, and sodium citrate are handled in the same manner as untreated fresh pork cuts regarding both retail storage and domestic usage, the appearance of a spoiled or unwholesome product would not be enhanced to the extent that it might be purchased and eaten by the consumer who relied on the appearance of the product.

Comments Received on Interim Rule

A total of 88 comments was received in response to the interim final rule. There were 65 from consumers, 9 from university professors, 7 from trade associations, 2 from meat processors, 2 from chemical manufacturers, 2 from supermarket chains and 1 from a consultant to the meat industry. Thirty-nine of the comments supported the rule, and 49 of the comments opposed the rule. Three of those comments in opposition were signed by 41 additional people for a total of 90 who opposed the rule.

All of the 16 consumers supporting the rule believed this would enable consumers to have a wider variety of products available, with better quality and longer shelf life.

The consultant, supermarket chains, chemical manufacturers, meat processors, trade associations and 7 of the 9 university professors supported the rule. Many of the comments from these groups stressed the need for controls to ensure that proper amounts of the color maintenance additives are utilized and excessive amounts are not added.

The Agency agrees that controls are necessary to assure proper use of these substances. Therefore, when processors request to apply the above mentioned substances to fresh pork cuts, they will be required to apply for an approved Partial Quality Control (PQC) program pursuant to 9 CFR 318.4(d) and, if approved, to follow that program. Processing will not be permitted, nor will labeled products be permitted to be distributed in commerce until such PQC programs are evaluated and approved according to the requirements set forth in 9 CFR 318.4(e). This will ensure that the substances will not be applied in excessive amounts and that color maintenance will not exceed microbiological shelf life. All such PQC programs must cover certain critical control points, including but not necessarily limited to:

(1) Condition of meat before treatment (must be fresh or previously frozen meat maintained in a wholesome conditions as evidenced by time and temperature records from the point of slaughter),

(2) Solution formulation control,

(3) Single application control,

(4) Finished product ingredient analysis monitoring,

(5) Integrity of packaging during storage, transportation, and distribution, and

(6) Further processing control (ascorbate treated cuts may not be further processed into fresh, ground pork products).

[1] Petition submitted on April 22, 1985, by Wilson Foods Corporation.

VOL
53
ISS
238
DE
12
1988
UMI

The chemical manufacturers and 1 meat processor commented that the list of acceptable substances should be expanded to include sodium erythorbate. This would not comply with the procedures stipulated in 9 CFR 318.7(a)(2) for the approval of food additives and therefore cannot be included in this final rulemaking.

Two of the university professors expressed concern that treatment of fresh pork cuts at the permitted levels would result in color maintenance exceeding the microbiological shelf life. They suggested that further studies be conducted to ensure that this would not occur at the permitted levels. These studies have been conducted, as described above, and it was found that the use of ascorbic acid, erythorbic acid, citric acid, sodium ascorbate, and sodium citrate does not mask unwholesomeness. These results support issuance of a final rule.

The consumer comments opposing the rule were generally based on the objection to meat additives. Many felt that such additives were unnecessary and deceptive in nature. Six of the commenters strongly objected to use of these substances because of allergic reactions to them. The Agency permits an additive only if "its use is functional and suitable for the product and it is permitted for use at the lowest level necessary to accomplish the stated technical effect as determined in specific cases" (9 CFR 318.7(a)(2). Data show that the use of ascorbic acid, erythorbic acid, citric acid, sodium ascorbate, and sodium citrate on fresh pork cuts does provide the useful function of maintaining product color and that the additive levels permitted by this final rule are the lowest levels that will achieve this function. Further, a label declaration regarding the use of these substances and a listing of the substances in the ingredient statement is required. Consumers can readily avoid buying these products. The requirement to prominently disclose the presence and purpose of the additives, by use of a qualifying statement adjacent to the product name, was endorsed by many commenters.

One commenter objected to use of the term "fresh" when labeling pork cuts that had been treated with a preservative. The Agency believes consumers understand the word "fresh" to indicate a meat product has not been cured (9 CFR 317.8(b)(6)). Although the product for which these substances have been approved is "fresh pork cuts," from the time of application, the product is no longer "fresh" as defined in the regulations. As such, the Agency will not permit use of the term "fresh" to be included as part of the name of pork cuts that have been treated with these substances.

Several commenters suggested that the use of color maintainers be extended to fresh meat cuts of other species. The Agency will consider the use of these substances on meat from other species at such time that data is submitted to FSIS to demonstrate efficacy and the lowest use levels necessary to achieve the intended technical effect.

Provisions of the Final Rule

Pork cuts treated with ascorbic acid, erythorbic acid, citric acid, sodium ascorbate, and sodium citrate that were used to provide data supporting the petition were packaged in a controlled atmosphere of carbon dioxide, oxygen and nitrogen. Packing gases are already permitted for use and are not a part of this rule.

The intended technical effect of the ascorbic acid, erythorbic acid and sodium ascorbate is to serve as antioxidants. The amount of these substances required to achieve the intended technical effect is between 250 and 500 parts per million (ppm), or up to 1.8 milligrams per square inch of surface area collectively. This rule provides for use of these substances at levels not to exceed either 500 ppm or 1.8 milligrams per square inch of surface, singly or in combination. Neither of these levels may be exceeded.

The intended technical effect of the citric acid and sodium citrate is to serve as sequestrants. Sequestrants are "substances which combine with polyvalent metal ions to form a soluble metal complex, to improve the quality and stability of products" (21 CFR 170.3 (o)(26)). The amount of these substances required to achieve the intended technical effect is 250 ppm or 0.9 milligrams per square inch of surface area collectively. This rule provides for use of these substances at levels not to exceed either 250 ppm or 0.9 milligrams per square inch of surface, singly or in combination. Neither of these levels may be exceeded.

Fresh pork cuts which are treated with these substances to maintain the color during distribution will be required to be labeled with a statement identifying each specific approved substance by its common or usual name and the purpose for which it is added, such as "sprayed with a solution of water, ascorbic acid and citric acid to maintain color." This phrase must be contiguous to the product name and must be in the same style of print no smaller than one fourth the size of the print in the product name. The requirement of the presence of the qualifying statement is consistent with established regulatory standards when other preservatives, such as antioxidants or mold inhibitors, are added to meat food product (9 CFR 317.2(j)(10) and 317.8(b) (27) and (28)).

The substances addressed in this rulemaking are generally recognized as safe (GRAS) as direct human food ingredients by the Food and Drug Administration, when used in accordance with good manufacturing practice. Ascorbic acid is listed as a chemical preservative in 21 CFR 182.3013, erythorbic acid is listed as a chemical preservative in 21 CFR 182.3041, citric acid is listed as a sequestrant in 21 CFR 182.6033, sodium ascorbate is listed as a chemical preservative in 21 CFR 182.3731, and sodium citrate is listed as a sequestrant in 21 CFR 182.6751.

Based on all of the information and data available to the Agency, the Administrator reaffirms his findings that (1) the use of these substances is functional and suitable for the product, (2) the substances would be used at the lowest level necessary to accomplish their intended technical effect, and (3) the use of these substances will not render the product on which they are used adulterated, misbranded, or otherwise not in accordance with the requirements of the Act provided treatment occurs only under an approved partial quality control (PQC) program monitored by FSIS, as indicated above.

Therefore, FSIS is confirming the interim rule published on August 22, 1986, (51 FR 30052) which (1) amended the table of approved substances in 9 CFR 318.7(c)(4) to include the use of ascorbic acid, erythorbic acid, citric acid, sodium ascorbate and sodium citrate, singly or in combination, as color maintainers for fresh pork cuts and (2) required descriptive labeling of fresh pork products to which ascorbic acid, erythorbic acid, citric acid, sodium ascorbate and sodium citrate, singly or in combination, are added to maintain color.

List of Subjects in 9 CFR Parts 317 and 318

Food labeling, Food additives, Meat inspection.

PART 317—LABELING, MARKING DEVICES, AND CONTAINERS

1. The authority citation for Part 317 continues to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 1254.

PART 318—ENTRY INTO OFFICIAL ESTABLISHMENTS; REINSPECTION AND PREPARATION OF PRODUCTS

2. The authority citation for Part 318 continues to read as follows:

Authority: 34 Stat. 1260, 81 Stat. 584, as amended (21 U.S.C. 601 *et seq.*), 72 Stat. 862, 92 Stat. 1069, as amended (7 U.S.C. 1901 *et seq.*), 76 Stat. 663 (7 U.S.C. 450 *et seq.*).

§§ 317.8 and 318.7 [Amended]

Accordingly, FSIS is adopting as a final rule, without change, the interim rule that amended §§ 317.8(b)(37) and 318.7(c)(4), that was published on August 22, 1986, at 51 FR 30052.

Done at Washington, DC, on November 17, 1988.

Lester M. Crawford,

Administrator, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 23

[Docket No. 057CE, Special Condition No. 23-ACE-42]

Special Conditions; Gyroflug Model SC-01 Speed Canard

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions.

SUMMARY: These special conditions are issued to Gyroflug Ingenieurgesellschaft mbH to become part of the type certification basis for the Model SC-01 Speed Canard airplane. The airplane will have novel or unusual design features related to the aerodynamic configuration of the airplane, the location of the engine and propeller, and the use of composite materials for primary flight structure, which were not envisaged in the applicable airworthiness standards and for which the regulations do not contain adequate or appropriate airworthiness standards. These special conditions contain the additional safety standards which the Administrator considers necessary to establish a level of safety equivalent to that provided by the applicable airworthiness standards.

EFFECTIVE DATE: January 11, 1989.

FOR FURTHER INFORMATION CONTACT: Bobby W. Sexton, Aerospace Engineer, Standards Office (ACE-110), Small Airplane Directorate, Aircraft Certification Service, Central Region, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; telephone (816) 426-5688.

SUPPLEMENTARY INFORMATION:

Type Certification Basis

The type certification basis for the Gyroflug Model SC-01 airplane is as follows: Part 21 of the Federal Aviation Regulations (FAR), § 21.29; Part 23 of the FAR, effective January 9, 1965, including amendments 23-1 through 23-25; Part 36 of the FAR, effective December 1, 1969, as amended by amendments 36-1 through the amendment effective on the date of type certification; exemptions, if any; and the special conditions adopted by this rulemaking.

Background

On January 27, 1984, Gyroflug Ingenieurgesellschaft mbH, Flughafen, 7570 Baden-Baden Oos, West Germany, filed an application to the FAA Brussel's Office for U.S. type certification for its Model SC-01 Speed Canard airplane. The Gyroflug Model SC-01 is a small, two-place, composite structure, canard configuration airplane with a pusher propulsion system. It is powered by a 116-horsepower Avco Lycoming 0-235-P2A reciprocating engine and the airplane has a maxium takeoff weight of 1,500 pounds. The airplane received German type certification on September 30, 1983.

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.17(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane. Special conditions, as appropriate, are issued in accordance with § 11.49, after public notice as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis, as provided by § 21.17(a)(2).

The proposed type design of the Model SC-01 airplane contains a number of novel or unusual design features not envisaged by the applicable Part 23 airworthiness standards. Special conditions are considered necessary because the airworthiness standards of Part 23 do not contain adequate or appropriate safety standards for the novel or unusual design features of the Model SC-01 airplane.

A Notice of Proposed Special Conditions, Notice No. 23-ACE-42, was published in the **Federal Register** on June 7, 1988 (53 FR 20860). No comments were received.

Federalism Implications

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 14 CFR Parts 21 and 23

Aircraft, Air transportation, Aviation safety, Safety.

PARTS 21 AND 23—[AMENDED]

The authority citation for these special conditions is as follows:

Authority: Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 21.16 and 21.17; and 14 CFR 11.28 and 11.29(b).

Adoption of the Special Conditions

In consideration of the foregoing, the following special conditions are issued as a part of the type certification basis for the Gyroflug Model SC-01 series airplanes:

1. Evaluation of Composite Structure.

In lieu of complying with § 23.572, and in addition to the requirements of §§ 23.603 and 23.613, airframe structure, the failure of which would result in catastrophic loss of the airplane, in each wing, wing carry-through, wing attaching structure, fuselage, wing mounted vertical stabilizer, wing flap, and moveable control surfaces must be evaluated to damage tolerance criteria prescribed in paragraphs (a) through (i) of this special condition, unless shown to be impractical. In cases shown to be impractical, the aforementioned structure must be evaluated in accordance with the criteria of paragraphs (a) and (j) of this special condition. Where bonded joints are used, the structure must also be evaluated in accordance with the residual strength criteria in paragraph (g) of this special condition.

(a) It must be demonstrated by tests, or by analysis supported by tests, that the structure is capable of carrying ultimate load with impact damage. The level of impact damage considered need not be more than the established

threshold of detectability considering the inspection procedures employed.

(b) The growth rate of damage that may occur from fatigue, corrosion, intrinsic defects, manufacturing defects; e.g., bond defects, or damage from discrete sources under repeated loads expected in service; i.e., between the time at which damage becomes initially detectable and the time at which the extent of damage reaches the value selected by the applicant for residual strength demonstration, must be established by tests or by analysis supported by tests.

(c) The damage growth, between initial detectability and the value selected for residual strength demonstrations, factored to obtain inspection intervals, must permit development of an inspection program suitable for application by operation and maintenance personnel.

(d) Instructions for continued airworthiness for the airframe must be established consistent with the results of the damage tolerance evaluations. Inspection intervals must be set so that after the damage initially becomes detectable by the inspection method specified, the damage will be detected before it exceeds the extent of damage for which residual strength is demonstrated.

(e) Loads spectra, load truncation, and the locations and types of damage considered in the damage tolerance evaluations must be documented in test proposals.

(f) Each wing, fuselage, wing carry-through, wing attaching structure, wing flap, moveable control surface, and wing-mounted vertical stabilizer structure must be shown by residual strength tests, or analysis supported by residual strength tests, to be able to withstand critical limit flight loads, considered as ultimate loads, with the extent of damage consistent with the results of the damage tolerance evaluations.

(g) In lieu of a non-destructive inspection technique which assures ultimate strength of each bonded joint, the limit load capacity of each bonded joint critical to safe flight must be substantiated by either of the following methods used singly or in combination:

(1) The maximum disbonds of each bonded joint consistent with the capability to withstand the loads in paragraphs (f) and (g) of this special condition must be determined by analysis, tests, or both. Disbonds of each bonded joint greater than this must be prevented by design features.

(2) Proof testing must be conducted on each production article which will apply the critical limit design load to each critical bonded joint.

(h) The effects of material variability and environmental conditions; e.g., exposure to temperature, humidity, erosion, ultraviolet radiation, and/or chemicals, on the strength and durability properties of the composite materials must be accounted for in the damage tolerance evaluations and in the residual strength tests.

(i) The airplane must be shown by analysis to be free from flutter to V_D with the extent of damage for which residual strength is demonstrated.

(j) For those structures where the damage tolerance method is shown to be impractical, the strength of such structures must be demonstrated by tests, or analysis supported by tests, to be able to withstand the repeated loads of variable magnitude expected in service. Impact damage in composite material components which may occur must be considered in the demonstration. The impact damage level considered must be consistent with detectability by the inspection procedures employed.

2. Loads

(a) In addition to the requirements of § 23.301, paragraph (b), the following shall be required: Methods used to determine load intensities and distribution over the various aerodynamic lifting and control surfaces must be validated by flight test measurements unless the methods used for determining those loads are shown to be reliable or conservative for the configuration under consideration.

(b) In lieu of § 23.301, paragraph (d), the following applies: The forward lifting surface of a canard or tandem wing configuration must meet all of the requirements of Part 23, Subpart C—Structure, applicable to a wing.

(c) In lieu of § 23.331, the following apply:

(1) The appropriate balancing loads must be accounted for in a rational or conservative manner when determining forward and main wing loads and linear inertia loads corresponding to any of the symmetrical flight conditions specified in §§ 23.333 through 23.341.

(2) The incremental forward wing loads due to maneuvering and gusts must be reacted by the angular inertia of the airplane in a rational or consevative manner.

(3) Mutual influence of the aerodynamic surfaces must be taken into account when determining flight loads.

(d) In addition to the gust load requirements of § 23.341, the following applies: The gust loads for a canard or tandem wing configuration must be computed using a rational analysis considering the gust criteria of § 23.333(c), or may be computed in accordance with § 23.341 provided the resulting loads are shown to be conservative with respect to the gust criteria of § 23.333(c).

(e) In lieu of the balancing loads requirements of § 23.421, the following apply:

(1) A horizontal surface balancing load is a load necessary to maintain equilibrium in any specified flight condition with no pitching acceleration.

(2) Horizontal balancing surfaces must be designed for balancing loads occurring at any point on the limit maneuvering envelope and in the flap conditions specified in § 23.345. The distribution in figure B6 of Appendix B of Part 23 may be used only on aft-mounted horizontal stabilizing surfaces unless its use elsewhere is shown to be conservative.

(f) In lieu of the maneuvering load requirements of § 23.423, the following apply:

(1) Each horizontal surface with pitch control must be designed for maneuvering loads imposed by the following conditions:

(i) A sudden movement of the pitching control at V_A, to (1) the maximum aft movement, and (2) to the maximum forward movement, as limited by the control stops, or pilot effort, whichever is critical.

The average loading of B23.11 of Appendix B and the distribution in figure B7 of Appendix B may be used only on aft-mounted horizontal stabilizing surfaces unless its use elsewhere is shown to be conservative.

(ii) A sudden aft-movement of the pitching control at speeds above V_A, followed by a forward movement of the pitching control resulting in the following combinations of normal and angular acceleration:

Condition	Normal acceleration (n)	Angular acceleration (radian/sec.^{2})
Nose up pitching	1.0	$+\frac{39 n_m (n_m - 1.5)}{V}$
Nose down pitching	n_m	$-\frac{39 n_m (n_m - 1.5)}{V}$

where—

(a) n_m = positive limit maneuvering load factor used in the design of the airplane; and

(b) V = initial speed in knots.

(2) The conditions in this section involve loads corresponding to the loads that may occur in a "checked

maneuver", i.e., a maneuver in which the pitching control is suddenly displaced in one direction and then suddenly moved in the opposite direction. The deflection and timing of the "checked maneuver" must avoid exceeding the limit maneuvering load factor. The total horizontal surface load for both down-load and up-load conditions is the sum of the balancing loads at V and the specified value of the normal load factor, n, plus the maneuvering load increment due to the specified value of the angular acceleration. The maneuvering load increment in figure B2 of Appendix B and the distribution in figure B7 for nose-up pitching and in figure B8 for nose-down pitching of Appendix B may be used only on airplane configurations with aft-mounted surfaces unless their use elsewhere is shown to be conservative.

(g) In lieu of the gust loads requirements of § 23.425, the following apply:

(1) Each horizontal surface, other than the main wing, must be designed for loads resulting from—

(i) Gust criteria specified in § 23.333(c) with the flaps retracted; and

(ii) Positive and negative gusts of 25 feet per second (f.p.s.) nominal intensity at V_F corresponding to the flight conditions specified in § 23.345(a)(2).

(2) When determining the total load on the horizontal surfaces for the conditions specified in paragraph (g)(1) of this special condition, the initial balancing loads for steady unaccelerated flight at the pertinent design speeds, V_F, V_C, V_D must first be determined. The incremental load resulting from the gusts must be added to the initial balancing load to obtain total load.

(h) In lieu of the unsymmetrical load requirements of § 23.427, the following apply:

(1) Horizontal surfaces, other than the main wing, and their supporting structure must be designed for unsymmetrical loads arising from yawing and slipstream effects, in combination with the loads prescribed for the flight conditions set forth in paragraphs (e) through (g) of this special condition.

(2) In the absence of more rational data:

(i) 100 percent of the maximum loading from the symmetrical flight conditions may be assumed on the surface on one side of the plane of symmetry; and

(ii) The following percentage of that loading must be applied to the opposite side:

Percent = 100 − 10(n−1), where n is the specified positive maneuvering load factor, but this value may not be more than 80 percent.

(3) The vertical and horizontal surfaces and their supporting structures must be designed for combined vertical and horizontal surface loads resulting from each prescribed flight condition taken separately.

(i) In the absence of specific requirements for wing mounted vertical stabilizers, the following apply: Vertical stabilizers mounted on the wing must meet the applicable requirements of §§ 23.441, 23.443, and, in lieu of a more rational method, § 23.445 for vertical tail surfaces. The effect of these surfaces on the spanwise loading of the wing must also be accounted for.

3. Propeller Ground Clearance

In addition to the propeller clearance requirements of § 23.925, the following apply:

(a) The airplane must be designed such that the propeller will not contact the runway surface when the airplane is in the maximum pitch attitude attainable during normal takeoffs and landings; and

(b) If a tail wheel, bumper, or an energy absorption device is provided to show compliance with paragraph (a) of this special condition, the following apply:

(1) Suitable design loads must be established for the tail wheel, bumper, or energy absorption device; and

(2) The supporting structure of the tail wheel, bumper, or energy absorption device must be designed to withstand the loads established in paragraph (b)(1) of this special condition and inspection/replacement criteria must be established for the tail wheel, bumper, or energy absorbing device and provided as a part of the information required by § 23.1529.

4. Propeller Marking

In the absence of specific regulations, the propeller must be marked so that the disc is conspicuous under normal daylight ground conditions.

Issued in Kansas City, Missouri, on November 16, 1988.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 88-28429 Filed 12-9-88; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 88-ASW-50; Amdt. 39-6090]

Airworthiness Directives; Sikorsky Model S-58 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) which requires repetitive inspections and replacement, as necessary, of pylon and tail cone fittings on Sikorsky S-58 helicopters. The amendment provides for optional alternate methods of compliance which could result in reduced maintenance impacts and the elimination of unnecessary operational costs.

DATES:

Effective Date: December 27, 1988.

Compliance: As indicated in the body of the AD.

ADDRESSES: The applicable service information may be obtained from Sikorsky Aircraft, 6900 Main Street, Stratford, Connecticut 06601-1381, or may be examined in the Rules Docket, Office of the Assistant Chief Counsel, FAA, Room 158, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Mathias, FAA, Rotorcraft Standards Staff, Forth Worth, Texas 76193-0111, telephone (817) 624-5123.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 674 (29 FR 559; January 21, 1965), AD 64-02-06, which currently requires repetitive inspections and replacement, as necessary, of pylon and tail cone fittings on Sikorsky Model S-58 series helicopters. After issuing Amendment 674, the FAA has determined that the AD should be revised to include provisions for the issuance of special flight permits and alternate means of compliance, when appropriate for this helicopter series.

Since this amendment provides a clarification only, allows an alternate means of compliance which is optional, and imposes no additional burden on any person, notice and public procedure hereon are unnecessary, and the amendment may be made effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is

determined that this final rule will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is clarifying in nature and imposes no additional regulatory or economic burden on any person. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Regional Rules Docket.

List of Subjects 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, and Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By amending Amendment 674 (29 FR 559), AD 64–02–06, by adding paragraphs (c) and (d) as follows:

Sikorsky Aircraft: Applies to all Sikorsky Model S–58 series helicopters.

Compliance is required as indicated unless already accomplished.

* * * * *

(c) Upon request, an alternate means of compliance which provides an equivalent level of safety with the requirement of this AD may be used when approved by the Manager, Rotorcraft Standards Staff, Rotorcraft Directorate, Aircraft Certification Service, ASW–110, FAA, Forth Worth, Texas 76193–0110.

(d) In accordance with §§ 21.197 and 21.199, the helicopter may be flown to a base where compliance may be accomplished.

This amendment becomes effective December 27, 1988.

This amendment amends AD 64–02–06, Amendment 674 (29 FR 559; January 21, 1964).

Issued in Forth Worth, Texas, on December 1, 1988.

L.B. Andriesen,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 88–28430 Filed 12–9–88; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 87–ASW–30, Amdt. 39–6091]

Airworthiness Directives; Sikorsky Model S–76A/B Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) which requires removal of electrical door locking actuators to prevent passenger door locks from jamming in the locked position on Sikorsky Model S–76A/B helicopters. This amendment allows those helicopters which have installed an electric door lock manual override retrofit kit to be exempt from further compliance with the AD.

EFFECTIVE DATE: January 11, 1989.

Compliance: As indicated in the body of the AD.

ADDRESSES: The applicable service information may be obtained from Sikorsky Aircraft, 6900 Main Street, Stratford, Connecticut 06601–1381.

A copy of the service bulletin is contained in the Rules Docket, Office of the Assistant Chief Counsel, FAA, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. Terry Fahr, ANE–153, FAA, New England Region, Boston Aircraft Certification Office, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone number (617) 273–7103.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to amend Amendment 39–5754 (52 FR 43054; November 9, 1987), AD 87–23–07, was published in the **Federal Register** on August 12, 1988 (53 FR 30435). Amendment 39–5754 currently requires removal of Part Number (P/N) 22020256 electrical door locking actuators to prevent the passenger door locks from jamming in the locked position on Sikorsky Model S–76A/B helicopters. After issuing Amendment 39–5754, the FAA determined that Sikorsky has designed a manual override kit, P/N 76070–20097, which allows the door lock to be manually overridden if the electrical door lock jams in the locked position. Therefore, the FAA is amending Amendment 39–5754 to exempt those helicopters which have installed a manual override kit, P/N 76070–20097, from compliance with the AD. The noted electric door locks may only be used with a manual override.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received. Accordingly, the proposal is adopted without change.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule will not have sufficient federalism implications to warrant the preparation of a Federalism Assessement.

The FAA has determined this amendment is relieving in nature and imposes no additional burden on any person. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the FAA amends § 39.13 of Part 39 of the FAR as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983) and 14 CFR 11.89).

§ 39.13 [Amended]

2. By amending Amendment 39–5754 (52 FR 43054; November 9, 1987), AD 87–23–07, by revising the applicability paragraph to read as follows:

Sikorsky Aircraft Division: Applies to all Sikorsky Model S-76A/B helicopters, certificated in all categories, equipped with electrical door locking actuators installed in accordance with Sikorsky Drawing 76088-20016 using actuator P/N 22020256 in left and right passenger doors, except those helicopters which have installed a manual override kit, P/N 76070-20097. (Docket 87-ASW-30)

* * * * *

This amendment becomes effective January 11, 1989.

This amendment amends Amendment 39-5754 (52 FR 43054; November 9, 1987), AD 87-23-07.

Issued in Fort Worth, Texas, on December 1, 1988.

L.B. Andriesen,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Parts 201, 203, and 234

[Docket No. N-88-1894; FR-2591]

Mortgage Insurance; Changes to the Maximum Mortgage Limits for Single Family Residences, Condominiums and Manufactured Homes and Lots

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice of revisions to FHA maximum mortgage limits for high-cost areas.

SUMMARY: This Notice is the annual complete listing of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act, and each such area's applicable limits. Mortgage limits are adjusted in an area when the Secretary determines that middle- and moderate-income persons have limited housing opportunities because of high prevailing housing sales prices.

EFFECTIVE DATE: December 12, 1988.

FOR FURTHER INFORMATION CONTACT: For single family: Morris Carter, Director, Single Family Development Division, Room 9270; telephone (202) 755-6720. For manufactured homes: Robert J. Coyle, Director, Title I Insurance Division, Room 9160; telephone (202) 755-6880; 451 Seventh Street, SW., Washington, DC 20410. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

The National Housing Act (NHA), 12 U.S.C. (1710 through 1749), authorizes HUD to insure mortgages for single family residences (from one- to four-family structures), condominiums, manufactured homes, manufactured home lots, and combination manufactured homes and lots. The NHA, as amended by the Housing and Community Development Amendments of 1980 and the Housing and Community Development Amendments of 1981, permits HUD to increase the maximum mortgage limits under most of these programs to reflect regional differences in the cost of housing. In addition, sections 2(b) and 214 of the NHA provide for special high-cost limits for insured mortgages in Alaska, Guam and Hawaii.

On May 22, 1984, the Department published a revised list of areas eligible for "high-cost" mortgage limits, which contained several new features. (See 49 FR 21520). First, there was no separate listing for condominium units, since these limits are now the same as those for other one-family residences. Second, the listing included instructions on how to compute the high-cost limits for combination manufactured homes and lots and individual lots, and specified the special high-cost amounts for manufactured homes and lots and individual lots insured in Alaska, Guam and Hawaii. And third, changes were made to the list based on a new definition of "Metropolitan area".

The last comprehensive list of high-cost areas was published on March 3, 1988 (53 FR 6922). Since then a number of areas have had increases to their mortgage limits published in the **Federal Register**. In addition, HUD in this Notice is adding a number of new high-cost areas and increasing the limits in some other areas previously listed.

This Document

In this document, the Department publishes its entire list of high-cost areas with applicable mortgage limits. This document incorporates the changes published on March 28, 1988 (53 FR 9869), April 12, 1988 (53 FR 11997), April 25, 1988 (53 FR 13405), June 1, 1988 (53 FR 19897), August 1, 1988 (53 FR 28872), September 20, 1988 (53 FR 36448) and December 2, 1988 (53 FR 48636).

In addition, this document adds to the list the following new high-cost areas, with applicable limits:

New Areas

Greeley, CO MSA	York, PA MSA
Panama City, FL MSA	Chattanooga, TN-GA MSA
Pensacola, FL MSA	Clarksville-Hopkinsville, TN-KY MSA
Rockford, IL MSA	Killeen-Temple, TX MSA

Lyon County, NV

These high-cost limits are effective December 12, 1988 and supersede other published amounts in effect, to the extent they are inconsistent with figures appearing in this document.

These amendments to the high-cost areas appear in two parts. Part I explains high-cost limits for mortgages insured under Title I of the National Housing Act. Part II lists each high-cost area, with applicable limits for single family residences (including condominiums) insured under section 203(b), 234(c) and 214 of the National Housing Act.

List of Subjects

24 CFR Part 201

Fire prevention, Health facilities, Historic preservation, Home improvement, Loan programs-housing and community development, Manufactured homes, Reporting and recordkeeping requirements.

24 CFR Part 203

Home improvement, Loan programs-housing and community development, Mortgage insurance, Reporting and recordkeeping requirements, Solar energy.

24 CFR Part 234

Mortgage insurance, Reporting and recordkeeping requirements.

Accordingly, the Department publishes the revised dollar limitations as follows:

National Housing Act High Cost Mortgage Limits

I. Title I: Method of Computing Limits

A. Section 2(b)(1)(D). Combination Manufactured Home and Lot (Excluding Alaska, Guam and Hawaii)

To determine the high-cost limit for a combination manufactured home and loan, multiply the dollar amount in the "one family" column of Part II of this list by .80. For example, Cumberland County, ME, has a one-family limit of $101,250. The combination home and lot loan limit for is $101,250 x .80, or $81,000.

B. Section 2(b)(1)(E): Lot Only (Excluding Alaska, Guam and Hawaii)

To determine the high-cost limit for a lot loan, multiply the dollar amount in the "one-family" column of Part II of this list by .20. For example, Cumberland County, ME, has a one-family limit of $101,250. The lot-only loan limit for Cumberland County, ME is $101,250 x .20, or $20,250.

C. Section 2(b)(2). Alaska, Guam and Hawaii Limits

The maximum dollar limits for Alaska, Guam and Hawaii may be 140% of the statutory loan limits set out in section 2(b)(1).

Accordingly, the dollar limits for Alaska, Guam and Hawaii are as follows:

1. For manufactured homes: $56,700. (40,500 X 140%).

2. For combination manufactured homes and lots: 75,600. ($54,000 X 140%).

3. For lots only: $18,900. (13,500 X 140%).

II. TITLE II.—UPDATING OF FHA SECTION 203(b), 234(c) AND 214 AREA WIDE MORTGAGE LIMITS

Market area designation and local jurisdictions	Mortgage Limits			
	1-family and condominium unit	2-family	3-family	4-family
REGION I

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8236]

Allocation and Apportionment of Deduction for State Income Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary Income Tax Regulations relating to the allocation and apportionment of deductions for state income taxes in computing taxable income from sources inside and outside the United States. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the Notice of Proposed Rulemaking in the Proposed Rules section of this issue of the **Federal Register**.

EFFECTIVE DATES: The rules of § 1.861–8T(e)(6)(i) and the language preceding the examples in § 1.861–8T(g) are effective for all taxable years beginning after December 31, 1976. The remaining regulations are effective for taxable years beginning on or after January 1, 1988.

FOR FURTHER INFORMATION CONTACT: David F. Chan of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attn: CC:CORP:T:R) (202–634–5404, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary Income Tax Regulations (26 CFR Part 1) under sections 861(b), 862(b), and 863(a) of the Internal Revenue Code of 1986. The temporary regulations are issued under the authority contained in section 7805 (26 U.S.C. 7805) of the Internal Revenue Code of 1986.

Sections 861(b) and 862(b) of the Code provide that, in determining taxable income attributable to items of United States source income enumerated in section 861(a) and foreign source income enumerated in section 862(a), deductions must be properly allocated and apportioned to such income. In addition, section 863(a) provides that deductions must be properly allocated and apportioned to items of income not described in section 861(a) or 862(a) in order to compute taxable income under section 863. The allocation and apportionment of deductions is fundamental to the computation of taxable income of foreign corporations under section 882 and the foreign tax credit limitation under section 904(a) of the Code. Questions have recently arisen about the allocation and apportionment of the deduction for state taxes in situations not explicitly addressed by the current regulations. The temporary regulations promulgated herein provide guidance with respect to these questions.

Need for Temporary Regulations

Because of the significant number of taxpayers needing immediate guidance for purposes of filing income tax returns, the Internal Revenue Service has found it to be impractical to issue these temporary regulations after the notice and public comment procedure under section 553(b) of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Discussion

Section 1.861–8

This document revises § 1.861–8 by reserving paragraph (e)(b) of § 1.861–8, the language of § 1.861–8(g) that precedes the examples, and Examples (25) and (26) of paragraph (g) of § 1.861–8.

Section 1.861–8T(e)(6)

Paragraph (e)(6)(i) of § 1.861–8T as promulgated herein restates the previously promulgated general principle that state, local, and foreign income, war profits and excess profits taxes are definitely related and allocable to the gross income with respect to which such taxes are imposed. Paragraph (e)(6)(ii) clarifies that the deduction for a state franchise tax that is computed based on income is to be allocated in the same manner as an income tax. This paragraph also cites five examples illustrating the application of the general principle for allocation of that deduction, and provides that taxpayers may use another method of allocation or apportionment if shown to the satisfaction of the district director that such method produces a more accurate result. This allocation and apportionment is necessary because states may tax income that is foreign source under the Internal Revenue Code provided the income is attributable to activities performed in the state. *Mobil Oil Corp.* v. *Commissioner of Taxes*, 445 U.S. 425 (1980). Paragraph (e)(6)(iii) of § 1.861–8T provides that the regulations in paragraph (e)(6)(i) are effective for all taxable years, and that the regulations in paragraph (e)(6)(ii) and *Examples* (25) through (29) of § 1.861–8T(g) are effective for taxable years beginning on or after January 1, 1988. This paragraph also provides taxpayers with the option to apply the regulations to deductions for state tax incurred in taxable years beginning before January 1, 1988.

Section 1.861–8T(g)

Paragraph (g) of § 1.861–8T as promulgated herein first restates the previously promulgated language that precedes the examples in § 1.861–8(g), and supplements that language to clarify that the examples do not establish as substantive rules the particular methods of allocation set forth therein. Because the application of the general rule is inherently factual in nature and an allocation must be reasonable under all the facts and circumstances, this paragraph provides that the methods of allocation illustrated in the examples may not be used if the result is not a reasonable allocation, under all of the facts and circumstances, of the deduction to the gross income to which it relates.

Paragraph (g) § 1.861–8T(g) then provides five examples, Examples (25) through (29), that illustrate the general rule for allocation and apportionment of the deduction for state income tax.

Examples (25) and (26)

Examples (25) and (26) of § 1.861–8T(g) are modifications of previously promulgated examples. The modification to each example provides that for purposes of allocating the deduction for state taxes neither U.S. nor foreign source income is reduced by the amount of the state income tax deduction being allocated. Example (25) provides that the deduction for state income taxes is allocable to a class of income that includes foreign source income when the laws of the states imposing tax on the taxpayer do not specifically exempt foreign source income, and the total amount of income taxed by the states, as determined under state law, exceeds the amount of U.S. source income for Federal income tax purposes. Example (26) describes the allocation and apportionment of state income tax when one (but not all) of the states imposing an income tax on the

taxpayer explicitly exempts foreign source income. If, under the facts of Examples (25) and (26), the total amount of state taxable incomes is less than or equal to the amount of U.S. source income for Federal income tax purposes, none of the state income tax is allocable to a class of income that includes foreign source income.

Example (27)

Example (27) of § 1.861–8T(g) indicates that when a taxpayer conducts income producing operations in a state that does not impose an income tax, an adjustment is necessary before the allocation and apportionment methods contained in Examples (25) and (26) may be applied. Examples (25) and (26) determine whether foreign source income is taxed by states by comparing total state taxable incomes with U.S. source taxable income for Federal income tax purposes. Without an adjustment, this comparison may be inaccurate when the taxpayer has significant activities in a state that does not impose a tax computed on income attributable to activities in that state.

Example (27) provides that the allocation and apportionment of state income taxes is to be made by first making a reasonable estimate of the taxable income attributable to activities in states that do not impose a tax computed on state taxable income and subtracting this estimated amount from U.S. source taxable income for Federal income tax purposes. The taxpayer must then apply the allocation and apportionment methods described in Example (26) by comparing total state taxable incomes in states that imposed an income tax with the reduced amount of U.S. source taxable income for Federal income tax purposes. Example (27) of the temporary regulations provides a method that will be deemed to produce a reasonable estimate of the taxable income attributable to activities in a state that does not define state taxable income.

Example (28)

Example (28) of § 1.861–8T(g) provides for the allocation and apportionment of the deduction for a state income tax imposed by a state that defines a corporation's business income to include dividends from noncontrolled companies ("portfolio dividends") and that determines the corporation's state taxable income by apportioning the corporation's business income based upon a ratio of its factors in the state to those outside the state. Under state law, the factors used to compute the ratio used to apportion income to the state do not include factors attributable to corporations paying portfolio dividends. In such a situation, a portion of the state tax is definitely related to the portfolio dividends and must be allocated to the classes of gross income consisting of foreign source and U.S. source portfolio dividends, respectively. Any remaining tax is to be allocated and apportioned separately under the principles illustrated in the other examples of § 1.861–8T(g).

Example (29)

Example (29) of § 1.861–8T(g) illustrates the allocation and apportionment of the deduction for state income taxes when a state imposes an income tax on a worldwide unitary basis. Under this example, an appropriate portion of unitary tax is first allocated to the taxpayer's portfolio dividends in the manner described in Example (28). An appropriate portion of unitary tax is then allocated to state taxable income attributable to the inclusion, under state tax rules, of controlled foreign corporations (CFCs) and "80/20" companies as defined in section 861(c)(1) in the unitary group. The state tax imposed on such income is apportioned on the basis of the income earned by the CFCs and the 80/20 companies. The state tax remaining after reduction for tax attributable to portfolio dividends and tax attributable to the inclusion of other related companies in the unitary group is added to the state tax imposed by the other states and apportioned under the principles illustrated in Examples (25) through (27).

Special Analyses

It has been determined that this temporary rule is not a major legislative regulation subject to Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Accordingly, these temporary regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of these regulations is David F. Chan of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. Section 1.861–8 (e)(6) and the introductory text of paragraph (g) and *Examples* (25) and (26) are revised to read as follows:

§ 1.861–8 Computation of taxable income from sources within the United States and from other sources and activities.

* * * * *

(e) *Allocation and apportionment of certain deductions.*

* * * * *

(6) *Income taxes.* [Reserved] For guidance see § 1.861–8T (e)(6).

* * * * *

(g) *General examples.* [Reserved] For guidance see § 1.861–8T (g).

* * * * *

Example (25)—Income Taxes. [Reserved] For guidance see § 1.861–8T (g) *Examples* (25) through (29).

Example (26)—Income Tax. [Reserved] For guidance see § 1.861–8T (g) *Examples* (25) through (29).

Par. 3. Section 1.861–8T is amended by adding paragraph (e)(6), the introductory text of paragraph (g) and Examples (25) through (29) to read as follows:

§ 1.861–8T Computation of taxable income from sources within the United States and from other sources and activities (Temporary).

* * * * *

(e) * * *
